liberal patronage of all harness horse owners. It is the intention of the Los Angeles Association to give an early spring meeting not later than the first week in June next, thereby giving horsemen intending to race their horses East an opportunity to try them out and win a few dollars before starting. With the last and the first meetings of each year held at Los Angeles that track should be a great place to winter horses, as the climate there has less rainy days during the winter months than any other place in California. San Bernardino is only fifty miles east of Los Angeles and Santa Ana but thirty miles south, so the shipments will be short and inexpensive. If you desire to race any more this year it would be advisable to ship to Southern California and race at these three meetings, as the purses there are worth going for. The Hanford and Tulare meetings can be taken in on the way down.

THE PICTURE OF PETIGRU 2:10½, which appears on our front page this week, is from a photograph taken at San Jose last spring. After making a season in the stud at San Jose and Los Angeles this year, Petigru was put in training by his owner, W. G. Durfee, and soon showed that he was a faster and better gaited trotter than ever before in his life. Conservative horsemen who saw him work the last half of a 2:15 mile in 1:04½ with the last eighth in 14½ seconds, believed he would lower his record three or four seconds this year, but he got cast in a stall at Santa Rosa and wrenched one of his hind legs, so that it swelled to twice its natural size. This of course prevented his starting at Sacramento, where he was entered, but the swelling has now gone down and it is not thought any permanent injury will result. Mr. Durfee deserves more credit for making a good gaited and level headed trotter out of this horse than any he ever handled. When he took him in a trade in the East in 1901, Petigru was a spoiled horse, and had been given up by several trainers, including Ed Geers. He would not stick to his gait but bolt and run, the result of bad early training. Durfee has made a model trotter out of him and Petigru was as steady as a clock in his work this year. It need not surprise anyone if Petigru takes a record of 2:06 or better next season. He is by Kingward, son of Onward, and is out of that great brood mare Lemonade 2:27½, the dam of three trotters with records better than 2:12.

THE \$7000 BREEDERS' FUTURITY for foals of this year has a very healthy look. The stakes closed on the 15th of last October with 388 mares bred that year nominated at \$2, which put \$776 into the stake for a starter. On February 1st this year second payment of \$5 each was made on 286 of these mares, which placed \$1430 more to the credit of the stake, and the bank account read \$2206. Third payments of \$5 each were also due and payable on the first of this month. Payments were made on 224 foals, which puts \$1120 more to the account, so that the amount now in the bank to the credit of Pacific Breeders' Futurity No. 5 is \$3326, and the foals entered are only just weaned. There will be a \$10 payment February 1st on yearlings, and \$10 each year thereafter, and if the same proportion of payments are made as have been made in previous stakes, the stake will again, as it did this year, exceed the amount guaranteed. The popularity of the Breeders' Futurity does not diminish, and bids fair to increase in popularity until the guaranteed value can be placed at \$10,000 or more. It has done more to keep up the interest in horse breeding on this Coast than any other one thing.

GOOD HARNESS RACING has been the rule at all the meetings in California this year. Since the Pacific Coast Trotting Horse Breeders' Association took the initiative and prohibited bookmaking at its meetings, other associations have adopted the same rule and the tone of racing has been greatly improved. At Los Angeles, Fresno and Santa Rosa this year auctions and mutuels were the only system of betting permitted. At the State Fair there was a syndicate book, but it was very gingerly patronized by the harness horsemen.

FIVE DAYS RACING at the Tulare Fair this year offers a fine opportunity to those who intend racing on the Southern California Fall Circuit to "stop off at Tulare" and win a few dollars. There are two \$500 purses, five \$400 purses, and several of less amounts for two and three-year-olds. The Tulare track is one of the fastest in the State, there is always a good attendance and the management is very attentive and obliging to visiting horsemen. The full program of the purses offered will be found in our advertising columns.

THE MINNESOTA STATE FAIR is one worth while. This year it broke all its previous records for attendance, there being in round numbers 64,000 admissions recorded on Monday, 48,000 on Tuesday, 47,000 on Wednesday, 35,000 on Thursday a rainy day, 58,000 Friday and 40,000 Saturday, or a total of 290,000. The cash surplus at the end of the week was in excess of \$50,000. A big harness racing program was given, two \$5000 purses being hung up, besides two \$2500 purses and ten or twelve \$1000 purses. There were big fields and fine racing, although no betting is allowed on the grounds. The biggest attendance of the week, 61,000 on Monday, the opening day, was brought by the attempt of Dan Patch to lower his record of 1:56. Had he accomplished the feat he would have been awarded \$10,000. The track was heavy and slow on account of rain, but Dan reeled off a mile in 1:59½, a wonderful performance. The live stock and other exhibits at the fair were large and complete in every way.

AN INDUSTRIAL EXPOSITION of the resources of the Pacific Slope is what the annual California State Fair should be. The one just closed was a big improvement over many of its predecessors in many ways, but there is yet much room for improvement. The pavilion should be removed from the city to the fair grounds and the whole show given in one enclosure. An attendance of at least ten thousand every day can be secured under proper management.

SANTA MARIA will hold a race meeting November 6th to 11th, and entries close October 23d. The purses range from \$75 to \$150 and are for trotters, pacers and runners. Send to William Mead, secretary, Santa Maria, for entry blanks.

ANSWERS TO CORRESPONDENTS.

JOHN DUNLAP, White River, Cal.—Your colt can be registered provided its dam is registered. If you can give us her name we can tell you whether she is registered or not.

F. M. NORTHUP, San Jose.—We fail to find a filly called Moos credited to Vamoose. The mare Fanny Fisher is by Servitor out of Sue Abbot by imp. Brutus. The name of neither of these mares appears in Goodwin's Guide as having started during the past two years.

J. J. BONZA, Tyndall, S. D.—We cannot place the horse Kid Treadwell 2:35½. If you give us name of his sire and dam and where he raced we may be able to get the information you desire.

CHAS. F. SHACKLER, Gorin, Mo.—We cannot find any record of the stallion Glideaway that you mention. If you can give his probable age we may be able to ascertain some of the particulars you desire.

WON A \$5000 RACE.

There was nothing the matter with the bay gelding Bolivar last week when he started in the \$5000 stake at Milwaukee. Bolivar is the horse that Monroe Salisbury bought at Eureka last winter for James Butler of New York. He had won a race in 2:21 at the Eureka Fair of last year and looked like a prospect. Mr. Salisbury heard about him, took a sea trip and bought him for something like \$2000. Bolivar is one of the slickest going pacers that ever left the State and he has been the principal bread winner for the Butler stable this year. While the other horses were starting on the Grand Circuit during the last part of August, Mr. Butler sent Bolivar and Danube out West where there were several big stakes offered at Hamline, Milwaukee and other places. Danube is the trotter by Direcho that Captain Newton of Los Angeles raised. Danube got second money in the \$5000 trot at Hamline and won first money in a \$2500 race the same week. Bolivar won a heat in 2:06½ in the 2:13 pacing purse of \$5000 and was beaten the other heats by that "phenom," Echo Jr., but was a good second in the third and fourth heats.

Gil Curry took the two horses to Milwaukee last week. Bolivar was entered in the 2:13 pace on the 13th of the month and drew 13th and last position. Curry thought the thirteen hoodoo had struck him sure, especially as Ed Patch, a son of Dan Patch, was in the race. Bolivar was away back in the second tier when they got the word for the first heat, and although Curry did not try very hard he finished second in 2:08¼, and then went out and won the next three in 2:07½, 2:08½ and 2:11. It was a great day for Bolivar and Curry and they got an ovation. Bolivar is by Wayland W. 2:12½ that took his record eleven years ago at San Jose, when he beat Altao, Shylock, Lago, Lucy B. and Vlna Belle in straight heats, the time being 2:12½, 2:14¼ and 2:14, a cracking good race. Wayland W. is by Arthur Wilkes 2:28½ out of that great brood mare Lette that is also the dam of Welcome 2:10½, and Maud Singleton 2:28½. The next dam is old Mary by Flaxtail, one of the greatest progenitors of speed whose name is written in the table of great brood mares.

King Direct 2:05½ in the third heat is by Direct 2:05½, dam Welcome Bunker, dam of Cheery Lass 2:06½, second dam old Lady Bunker, the dam of Guy Wilkes, William L., El Mahdi and Declaration, all producing sires.

NOTES AND NEWS.

Bolivar 2:06½ pacing, by Wayland W. 2:12½.

Zephyr 2:07½ trotting, by Zombro 2:11.

Bonalet (3) 2:11¼, by Bonnie Direct 2:05¼.

The program for the Southern California Fall Circuit is out.

Hollister's race meeting will open next Wednesday, the 27th inst.

The Ukiah meeting will open October 3d. and continue five days.

According to the veterinary surgeons who held an autopsy on the body of Sadie Mac, the mare died from "degenerative dilation of the heart."

The Alameda race track is getting to be quite a Sunday resort for road drivers, and not a Sunday passes but one or two match races are trotted or paced. Considerable money changes hands at times.

The roan gelding Leonardo, that is trotting so fast on the Grand Circuit, is by Bellini 8194, dam Lena Holly 2:18¾ by Director 2:17, second dam Steinola by Steinway, third dam Phacola by Silverthreads, fourth dam Minnehaha, the dam of Beautiful Bells.

A yearling by Greco paced a half in 1:36 at the Ferndale fair last week. This is the first of Greco's get to start. Greco is by McKinney, dam Alleen 2:26 by Anteo, second dam Lou Milton the dam of the world's champion trotter.

The first annual sale from the celebrated Humboldt herd of Shorthorns owned by B. F. Rush and William Pierce of Suisun, will be held at that place October 19th. Elegant catalogues have been issued and can be had by writing to Fred H. Chase & Co., live stock auctioneers, 1732 Market street, San Francisco, Cal.

A hot race was trotted at the Alameda track last Sunday between the mare Twilight by Noonday and a big gelding named Frank by Lynmont. The gelding won in straight heats, the best time being 2:22. In the second heat Twilight was only beaten by a neck and the finish brought forth a cheer from the crowd that waked the echoes. The stakes were \$500 a side and at least \$1500 changed hands on the result.

Jack McKerron 2:27½ as a two-year-old over a half mile track is one of the youngsters sired by John A. McKerron 2:04¼ that is proving the fact that the Nutwood Wilkes blood breeds on.

The Eastern papers all agree that laying up heats is indulged in just about as often on the big tracks of the Grand Circuit as on the half mile rings. "So very much depends upon the style in which it's done."

Bonnie Russell 2:10¼ has been retired for the season and will be treated by a New York veterinary on an affection of one of the horse's ankles.

T. F. Adkins, the Rochester man who owns Lisonjero 2:08¼, has leased from New England parties the bay mare Princess Lesa 2:19¼, an own sister to Lisonjero, and will race her in his stable the balance of the season. Princess Lesa is thought to be a good 2:10 prospect.

About the three fastest performers racing this season by one sire are Locanda 2:03¾, Allerton 2:05½ and Charley Hayt 2:06¼, all sons of Allerton 2:09¼, himself once the champion trotting stallion. All three of these horses are in grand form and apparently sure to reduce their records before the season ends.

Stiletto by Steinway out of Nola by Nutwood, whose record is now 2:12¼, reduced the record of the Dover, Massachusetts, half mile track, two weeks ago, by pacing a mile in 2:12¼.

Mendolita by Mendocino, dam Edith by George Wilkes, recently won her maiden race over East, taking a record of 2:18¼ in the third heat. She is an own sister to Idolita 2:09¼.

Lady Mowry, the bay mare by McKinney 2:11¼, dam by Nutwood Wilkes, owned by Mr. J. C. Mowry of Alameda county, won third money in the \$5000 trotting stake won by Advancer at Milwaukee last week. Lady Mowry was second in 2:11¼, the fastest heat in the race. A protest was made against Advancer on the ground that he was a ringer. Secretary Knight of the American Trotting Association filed the protest, and the money is tied up pending an investigation. It is said that Advancer is none other than Major Chew 2:14¼. If the protest is sustained Lady Mowry will get second money. She beat Danube in the race, who was fourth in the summary.

A friend of ours recently said "Just wait until Sweet Marie meets Dr. Strong, and she'll have to stretch her neck." Well, they have met and she beat the Doctor without elongating her cervical vertebrae.

If you want to bet your money, enter your horses at the Phoenix, Arizona, Territorial Fair meeting. They say one can get good odds on most any kind of a bet down there, and the only limit is the sky.

There is good money on the Southern California Circuit. Read the half page advertisement in this issue.

There is no betting at the Minnesota State Fair but they give two \$5000 purses, one for trotters, the other for pacers, and they offered the owner of Dan Patch \$10,000 if his champion pacer would lower his record of 1:56. There were 64,000 people paid to get into the gate the day Dan Patch made the effort. The mile was in 1:59½, the most remarkable mile ever paced by this great horse, as the track was not in the very best of shape and it was only his first start this season.

It is announced that Mr. J. B. Haggin will sell all his trotting bred horses in Kentucky. Mr. Haggin has about two hundred head of well bred animals, but has not trained or raced any for years. On Rancho del Paso, near Sacramento, he also breeds quite a number of trotters, and one or two sales are held annually at the ranch, the principal purchasers being liverymen and others who want roadsters.

W. H. Raymond, the well known horse breeder of Missoula, Montana, died on the 18th instant, aged 60 years. Mr. Raymond bred the thoroughbred horse Spokane, winner of the Chicago Derby in 1889.

Clarence Mackaye has retired from the running turf for good it is said. He says he is far too busy to devote any time to racing as the sport as now conducted takes about all a person's time who owns and races a string of horses.

In reply to the talk about a race between Audubon Boy and Dan Patch, Mr. Savage, owner of the last named horse, says that when Audubon Boy shows he is Dan's class he is ready to race for \$50,000. Make it \$50,001, as we want to get in with you on the bet.

George G's new record of 2:05¼, made at Syracuse, shows the Homeward gelding has all his speed. Perhaps he will be able to trot two or three heats in that time later on.

Audubon Boy's fractional time in his mile in 2:00¼ at Syracuse last week was :31, 1:00¼, :30, 2:00¼. The last half was in just one minute.

SAN-ONNETTI II
Black Percheron Stallion in Crouch & Son's Exhibit at California State Fair

Gazelle 2:11 by Gossiper is the most distinguished brood mare of the year. Her son, Zolock by McKinney, has reduced his pacing record to 2:05¼, and her daughter, Zephyr by Zombro, has reduced her trotting record to 2:07¾, and trotted three heats all in 2:09 or better in a race.

And now the drivers on the Grand Circuit are objecting to the new starter, Mr. Newton. When the starter that pleases everybody appears, the trump of Gabriel's horn will be heard right after the order is given to score by the pole horse.

Sadie Mac 2:06¼ was insured for \$15,500.

Ben Chaboya came near winning a race with Rey del Diablo at Nassau, New Hampshire, September 6. He had won the third and fourth heats in 2:16¾ and 2:17¼, came second the fifth heat, and was in the lead in the stretch in the sixth, when he was fouled by another horse and Chaboya was thrown out of the sulky. Rey del Diablo got second money but he had been heavily played to win.

Among the horses being worked at Pleasanton is the handsome stallion Mokelumne, owned by Geo. Fox of Clements. The horse is in the string of W. DeRyder, who thinks very highly of him. Mokelumne is by Silver Bow 2:16, dam Kitty Fox by Pancoast, second dam by Dictator, third dam by Mambrino Time, fourth dam by Paddy Burns and fifth dam by Mosely's Copperhead. "Moke" is now six years old, a fine individual, and a great prospect. A coming two-year-old by him owned by S. S. Stiles of Oakland is one of the fastest youngsters for his opportunities in California. He can show a forty gait and is only just broken.

Alta Vela 2:11¼ by Electioneer is for sale. This stallion will pay for himself in any good horse breeding community in three months next spring. He is out of a great brood mare and his grandam is also a great brood mare. He is one of the most perfectly gaited trotters living and has never had a fair chance in the stud. Apply at this office for price and terms.

Albata won a heat and took second money in the \$5000 stake for 2:18 class pacers at Columbus.

Mr. J. D. Springer has removed his residence from Pleasanton to Los Angeles, and has taken his string of horses with him. Among the horses are Billy Red 2:10, Miss Idaho 2:09¼, Argyle, Sonoma Girl and several others. Mr. Springer has made a host of friends in Pleasanton who will regret that he and his estimable family are not longer to be residents of that town.

Bonalet has redeemed herself. She is the three-year-old pacer by Bonnie Direct 2:05¼, out of Roblet 2:12 by Robin, second dam Eveline by Nutwood. She was bred by Mr. W. H. Lumsden of Santa Rosa, who sent her and the trotting three-year-old Bonnie Mc by Bonnie Direct out of Myrtle 2:13½ to Ed Benyon to train for the big stakes they are entered in over East. Benyon started both fillies at Hartford in the divisions of the Hartford Futurity to which they were eligible and both were distanced the first heats of their races. On Tuesday of this week Bonalet started in the Kentucky Stock Farm Futurity for three-year-olds pacers at Columbus. The only other starter was Miss Adbell, that won the Hartford race, and Bonalet trimmed her nicely. The heats were in 2:16¼ and 2:11¼, which shows Bonalet is the high class filly she was supposed to be when she left California.

Dan Patch paced in 2:00¼ at the Indianapolis track on Wednesday of last week. This lowers the track record three-quarters of a second.

Norman B., by Phallas, is quite a trotter. He won the 2:09 class trot at Columbus on Tuesday of this week in 2:06¼, 2:07¾ and 2:08¾, beating Mazetto, Angiola, Direct View and others.

The Denver Field and Farm tells the following story: Two years ago C. W. Bogart of Colorado Springs bought Gold Dust Maid for \$2,000 on credit. He stunted himself for her care and slept in her stable winter and summer from that day until two weeks ago, when she came under the wire at Cleveland a 50 to 1 shot for place, winning him \$5,000. He sold her on the spot to Johnson of Memphis for another \$5,000 and wept like a child before 10,000 people in the grand stand as she was led away. Then he came home and paid every cent of the indebtedness he had incurred the last twenty-four months with interest.

Dr. William Dodge, president of the Los Angeles Driving Club, was a caller at the office of the Breeder and Sportsman this week. He says that the directors of the Los Angeles Harness Horse Association expects a large entry list to its meeting to be held in November. Quite a number of Eastern trainers will probably arrive with their strings about the first of next month to remain all winter and will take part in the races. There are at least seventy-five trotters and pacers now in training at the Los Angeles track that are being put in shape for this meeting.

It is reported that Tiverton 2:04½ will race no more this year. This is indeed unfortunate as Mr. Gwathmey's gelding was almost certain to have knocked about two seconds from his present record had he remained in condition.

They say Zephyr 2:07½ by Zombro 2:11, dam Gazelle 2:11½ (dam of Zolock 2:05¼) by Gossiper 2:14¾, will be consigned to the Old Glory sale this winter. She ought to be one of the greatest brood mares living. She has one foal, a two-year-old by Beaumont 2:06¼, that is very promising.

Daedalion 2:10 will probably make a season at San Jose after the first of the new year. He will be a sire of early and extreme speed.

Danube's record is now 2:12¼, made in the fourth heat of the 2:35 trot at Hamline.

Bon Voyage 2:12¼ is the fastest trotting three-year-old colt of the year. There was considerable talk earlier in the season that he was not good, but like all the horses in W. S. Clark's string he has improved both in manners and speed since going into Trainer Gerrity's hands.

W. A. Clark Jr., who owns the great colt Bon Voyage, winner of the Hartford Futurity for three-year-old trotters, after the great victory presented each of the stable boys with \$50, and the groom of the colt \$100, giving to his trainer and driver, J. O. Gerrity, a nice new \$500 bill.

Do you raise any beef cattle on your farm? If so, you should be improving your herd all the time whether it is large or small. The sale of cattle from the celebrated Humboldt Herd of Rush & Pierce will take place at Suisun, October 19th. Buy a young registered bull or a few heifers and breed up. It pays.

Jack Curry has returned from his Eastern trip with Mr. Montanya's mares Tuna and Brilliant Girl. Both these mares were off during the entire trip.

Miss Kinney, by winning a heat in 2:11¼ at Columbus, Tuesday in a field of fifteen trotters, took second money out of the race and led the spectators to believe that she will be in McKinney's 2:10 list before the season ends. Her dam is by Don Cossack and she was bred by Chas. Frost of Pasadena. She is nine years old.

PACIFIC BREEDERS \$7000 FUTURITY.

Third Payments Made on 224 Foals of 1905 in This Popular Guaranteed Stake.

Following are the names of those who made third payment Sept. 1st, on foals entered in the Pacific Breeders' Futurity No. 5, guaranteed value \$7000, for foals of mares bred in 1904.

P. E. G. Anzar's foal by Delphi, dam Antinoche by Echo.
C. R. Arquez's foal by Kinney Lou, dam Dixie by Chas. Derby.
C. R. Arquez's foal by Kinney Lou, dam Spry Ruth by Boodle.
Grove P. Ayers' f. Queen of Hearts by Cupid, dam Lady by Deltz's St. Clair.
Henry M. Ayres' foal by Peralta, dam Azrah by Echo.
Henry M. Ayers' foal by Almaden, dam Rochella by Chas. Derby.
Henry M. Ayres' foal by Almaden, dam Yera by Chas. Derby.
*D. L. Bachant's b. f. Miss Dividend by Athabio, dam Vivian by Hambletonian Wilkes.
T. W. Barstow's ch. c. Frank G. by Big Boy, dam Princess Airlie by Prince Airlie.
*Mrs. S. V. Barstow's ch. c. Miss Florence by Nearest, dam Alphabeta by Steinway.
Geo. H. Bixby's b. c. Banquero by Neernut, dam Alice McKinney by McKinney.
G. B. Blanchard's br. c. by Kinney Lou, dam Aurelia by Nearest.
Oliver Blanchard's ch. c. by Kinney Lou, dam Miss Camilla by Boodle.
J. F. Blessing's foal by Stam B., dam Salinas Maid by Junio.
I. L. Borden's b. f. Ramona by Prince Robert, dam Allie Cresco by Cresco.
I. L. Borden's s. c. Pelvoir by Monterey, dam Alice Bell by Washington.
I. L. Borden's s. f. Juliet by Monterey, dam La Belle Almont by Altamont.
Y. H. Boudreau's foal by Robert Direct, dam Belle by Pasha.
W. O. Bowers' b. f. by I. Direct, dam Betsy by Silver Bee.
*W. O. Bowers' b. f. by Silver Bee, dam Lizzie B. by Starlight.
Alex. Brown's foal by Prince Ansel, dam Majella B. by Nushagak.
Alex. Brown's foal by Nushagak, dam Serpoio by Mendocino.
Alex. Brown's foal by Nushagak, dam Addie B. by Dexter Prince.
Alex. Brown's foal by Prince Ansel, dam Bonnie Derby by Chas. Derby.
H. Brace's foal by Greco, dam Banker's Daughter by Arthur Wilkes.
H. Brace's foal by Greco, dam Lizzie S. by Antevolo.
H. Brace's foal by Greco, dam Myrtle T. by Hamb. Wilkes.
H. Brace's foal by Greco, dam Toppy by Electric.
H. Brace's foal by Greco, dam Allista by Altivo.
H. Brace's foal by Greco, dam Bell King by Harry Wilkes.
Martin Carter's foal by Directum II, dam Muriel P. by Nutwood Wilkes.
Martin Carter's foal by Nutwood Wilkes, dam Ingar by Director.
*Martin Carter's foal by Nutwood Wilkes, dam Bessie C. by California Nutwood.
Martin Carter's foal by Kinney Lou, dam Queen C. by Nutwood Wilkes.
Martin Carter's foal by Bonnie Direct, dam Georgie B. by Nutwood Wilkes.
James Campbell's foal by On Stanley, dam Nellie Bly by Woolsey.
H. C. Carson's foal by Neernut, dam Nancy Carson s. t. b. by Nelson.
S. Christenson's b. f. by Stam B., dam Perza by Allie Wilkes.
*W. A. Clark Jr's b. f. by Lightfoot, dam Hazel Wilkes by Guy Wilkes.
*W. A. Clark Jr's b. f. by Nutwood Wilkes, dam Ruth Mary.
W. A. Clark Jr's foal by Highland, dam Reina dei Diabli by Diabli.
J. C. Connell's b. f. Bellecita by Kewanna, dam Belle C. by Alto Rex.
*S. T. Coram's ch. f. Kershira by Nutwood Wilkes, dam Petrina by Piedmont.
John A. Cole's br. c. Don Reginaldo by On Stanley, dam Belle Raymon by Raymon.
*C. L. Crellin's b. f. by Searchlight, dam Bertha by Alcantara.
Jas. Coffin's bl. c. Serge de Witte by Cassian, dam Lilith by Secretary.
*Jas. Coffin's bl. f. Grace Zolock by Zolock, dam Grace Kaiser by Kaiser.
Geo. A. Cressey's c. by Chas. Derby, dam Elsie by Gen. Benton.
P. S. Dashiell's b. c. Zamona T. by Frank S. Turner, dam Nellie Seymour by Seymour Wilkes.
Joseph Deponster's ch. c. by Milton Gear, dam Alta Almont by Prince Almont.
*T. L. Davidson Jr's foal by Diabli, dam Trilby by Altamont.
Rick De Bernardi's br. c. Kinney Rick by Kinney Lou, dam Ione D. by Paloma Prince.
*J. Wallace DeWitt's b. f. by Dictatus, dam Alysse Latham by Steinway.
R. Edmond Dixon's foal by Athabio, dam Lofty by Algon.
*P. M. Doyle's b. f. by Stam B., dam Jessie M. by Electioneer.
W. J. Dingee's b. c. Ned Dennis by Mendocino, dam Lucy Shaw by Cropsy's Nutwood.
*W. E. Detels' f. by Stam B., dam Effie Madison by Jas. Madison.
S. Y. Dollenmeyer's bl. f. Sierra Maid by Robert Direct, dam Ida May by Grosvenor.
R. L. Draper's bl. c. Robert D. by Murray M., dam Lady Royal by Royal Derby.
Frank Drake's foal by Count Hannibal, dam Florista by Admiral.
Frank Drake's foal by Count Hannibal, dam Scatch D. by Pay Car.
Oscar Duke's foal by Athabio, dam Winifred Weare by Montana.
W. G. Durfee's foal by Petigru, dam Jessie Madison by Jas. Madison.
W. G. Durfee's foal by Coronado, dam by Son of Nutwood.
C. A. Durfee's bl. f. Miss Ethel by Lecco, dam Rose McKinney by McKinney.
C. A. Durfee's bl. c. Dr. Lecco by Lecco, dam Bessie D. by McKinney.
C. A. Durfee's foal by Kinney Lou, dam Lasman by Owyhee.
H. H. Elliott's foal by Wayland W., dam Belle Cooper by Ira.
J. P. Emigh's br. f. by Nushagak, dam Pattie Walstein by Walstein.
Aug. Erickson's bl. c. Arc Light by Searchlight, dam Altalena by Altamont.
B. Erkenbrecher's b. f. by Electro McKinney, dam Wilhelmnia by Charleston.
Dr. Rae Felt's foal by Edward B., dam Pearl K. by Wayland W.
*Dr. Rae Felt's foal by Searchlight, dam Edith by Dexter Prince.
J. L. Field's b. f. Lady Parkhurst by Nearest, dam Nacy Field by Janette Almont.
*Mrs. Josie S. Frary's b. f. Rosezella by Falrose, dam Nora S. by Sable Wilkes.
A. Morris Fosdick's b. f. Lulu K. by Kinney Lou, dam Athene by Dexter Prince.
Geo. W. Ford's b. c. by Neernut, dam Alcola by Mamb. Wilkes.
Ernest A. Gammon's b. f. Cleo Dillon by Sidney Dillon,

dam Cleo G. by Yosemite.
M. Grossmeyer's foal by Richmond Chief, dam Bess. Chas. A. Graves' gr. c. Rosamond by Hurler, dam Sally Pance.
R. P. M. Greeley's bl. f. Lady Search by Searchlight, dam Winnie Wilkes by Rey Wilkes.
*F. Gomme's foal by Alta Vela, dam Miss Gomme by Nutwood Wilkes.
*F. Gomme's foal by Alta Vela, dam Zorilla by Dexter Prince.
Griffith & McConnell's foal by Bonnie Direct, dam Ginger by Steinway.
Griffith & McConnell's foal by Bonnie Steinway, dam Victoria S. by Rory O. Moore.

W. Zibbell's foal by Lynwood W., dam Evangie by Shadeland Onward.
J. W. Zibbell's foal by Tom Smith, dam Kate Lamry by Shadeland Onward.

*Denotes substitutions.

RACE MEETING AND POLO TOURNAMENT.

The fall race meeting and polo tournament of the California Polo and Pony Racing Association will take place at the race course and polo field of C. W. Clark, Esq., San Mateo, from Saturday, October 14, to Saturday, October 21. There are already a large number of ponies in training for the different events and there is every prospect of the meeting being the most successful in the history of the organization. The races are open to all ponies whether owned by members of the association, or not, and a general invitation is extended to all owning ponies to enter. On the opening Saturday the distances to be run are one-quarter, three-eighths, one-quarter, one-half and three-quarters. The prizes are \$25 to first and \$15 to second, or cups as the owners may select. Entries to the races will close Wednesday, October 18. Mr. Robert Leighton, secretary of the association, went to Walla Walla this week, where he will act as presiding judge of the meeting to be given there, but will return by the first of October.

The West Chicago Driving Club has offered the owner of Dan Patch \$5000 if Dan will lower his record at their inatinee September 30th.

COLUMBUS RACES.

After a postponement of one day on account of rain, the Columbus, Ohio, Grand Circuit meeting opened on Tuesday of this week with a large attendance. The opening race was the pacing division of the Kentucky Stock Farm Futurity for three-year-olds. There were but two starters, the filly Bonalet by Bonnie Direct, bred and owned by Mr. W. H. Lumsden of Santa Rosa, and Miss Adbell, a daughter of Adbell, son of Advertiser and Beautiful Bells. Miss Adbell had won the Hartford Futurity Pace the week previous in 2:14 $\frac{1}{2}$ and 2:18, distancing Bonalet the first heat. The California filly turned the tables on her Tuesday, however, and beat Miss Adbell easily two heats in 2:16 $\frac{1}{2}$ and 2:11 $\frac{1}{2}$, the last heat being the fastest second heat paced by a three-year-old this year, and tying the record of Mona Wilkes made at Santa Rosa in August.

In the 2:18 class trot, won by Pat T., the McKinney mare Miss Kinney took a record of 2:11 $\frac{1}{2}$ by winning the third heat.

The \$5000 purse for 2:18 class pacers went to Hal C. after Col. Kirkpatrick's Albata had won the first heat in 2:12 $\frac{1}{2}$.

Norman B. by Phallas surprised everybody by winning the first heat of the 2:09 trot in 2:06 $\frac{1}{2}$ and taking the race in straight heats. The Zombro mare Zephyr won fourth money in this event.

Glenwood M. won first money in the \$1000 stake for 2:13 class trotters. He won the first heat in 2:09 $\frac{1}{2}$ and Leonardo took the second in 2:10, and the finish of the race went over until Wednesday, when Glenwood M. won the deciding heat in 2:08 $\frac{1}{2}$.

But one heat of the 2:15 pace was decided on Tuesday and was won by Martha Young, who was distanced in the next heat, paced Wednesday, and the race went to William C.

On Wednesday the Kentucky Stock Farm trotting stake for three-year-olds was decided. There were six starters. Susie N. and Bon Voyage divided favoritism in the pools. The race went to Susie N. in straight heats in the fast time of 2:10 and 2:09 $\frac{1}{2}$. This is the fastest time by three seconds made by a three-year-old this year, and stamps Susie N. as one of the best trotters of her age ever produced. She is by Moko, dam Gipsy Dark by Wiltwood, a son of Wilton, second dam Zoulou by Electro Benton 2:24 $\frac{1}{2}$, son of Electioneer, third dam by Bourbon Wilkes, fourth dam by Abdallah Manbrino, fifth dam by Edwin Forrest and sixth dam the famous old mare Lizzie Peebles, said to be by Wagner. Susie N. has fourteen crosses to Hambletonian 10.

The 2:09 pace went to the California bred horse Owyho in straight heats, with Ben F., another Californian, second. The heats were in 2:07 $\frac{1}{2}$, 2:07 $\frac{1}{2}$ and 2:08 $\frac{1}{2}$. Owyho was bred at Oakwood Park Stock Farm and is by Owyhee out of Bertia, dam of Don Derby 2:04 $\frac{1}{2}$, Diablo 2:09 $\frac{1}{2}$, etc.

Texas Rooker was the winner of the 2:11 pace, one heat of which was paced Tuesday. He won in straight order and took a new record of 2:05 $\frac{1}{2}$ in the second heat. Miss Georgie by McKinney was a starter in this event, but was fifth in the summary.

The 2:13 pace went to Jubilee and was also a fast race, the second heat being paced in 2:06 $\frac{1}{2}$.

On Thursday one new world's record was made and two others equaled, while most of the heats were in unusually fast time.

What is said to be the best time record that the Grand Circuit has ever known was made at Columbus track today, when sixteen heats were trotted and paced to an average of 2:07 11-16.

Wentworth's victory in the 2:06 trot was the sensation. George G. took the first heat, and led past the half in the second. There he broke and Wentworth nosed out Dr. Strong, the favorite.

By trotting the second heat in the 2:06 class trot in 2:04 $\frac{1}{2}$ the Philadelphia gelding, Wentworth, now divides the honors with the New York gelding, Tiverton 2:04 $\frac{1}{2}$, as the world's fastest trotting gelding in a race and winner of the fastest second heat ever trotted in a race. Time by quarters, 0:31, 1:01 $\frac{1}{2}$, 1:32 and 2:04 $\frac{1}{2}$.

In the 2:06 class pace the Canadian mare, Maud Keswick, won in straight heats, pacing three of the fastest heats ever paced by a mare in the history of the harness turf. She finished in 2:04 $\frac{1}{2}$, 2:04 $\frac{1}{2}$ and 2:06, total seconds of which foot up to 15 $\frac{1}{4}$ seconds.

Edith W. by Ben Lomond Jr. held the previous fastest record for an event made over the Oakley Park track, Cincinnati, on September 26, 1901. Her three heats were in 2:05 $\frac{1}{2}$, 2:05 $\frac{1}{2}$, 2:05 $\frac{1}{2}$, or total of 16 for the three heats. Thus the new world's champion pacing mare lowered the former record by an average of a quarter of a second per heat.

Every heat winner of the afternoon either entered the 2:10 list or gained fast reduced mark.

In the 2:15 and 2:12 trotting classes, four of the heat winners, Albert C., a local speedway trotter; Helen Norte, Mainland and Evelyn Bird entered the 2:10 list.

Albert C. stood best in the summary at the end of the fifth heat of the 2:15 trot, carried over from Wednesday, and was declared the winner. Summaries:

Kentucky Stock Farm Futurity, three-year-old pacers, purse \$1500.

Bonalet, br. f. by Bonnie Direct.....(Benyon) 1 1
Miss Adbell, b. f.(Kenney) 2 2
Time—2:16 $\frac{1}{2}$, 2:11 $\frac{1}{2}$.

Pacing, 2:15 class, purse \$1000. One heat Tuesday.
William C., blk. g. by Civilization.....(Freeman) 4 1 1 1

Time—2:04 $\frac{1}{2}$, 2:01 $\frac{1}{2}$, 2:06.

Lecco 2:09 $\frac{1}{2}$, the son of Bonnie Boy that has made the last two seasons at Pleasanton, can show speed at any time he is taken on the track. He trotted a quarter in 33 seconds there one day last week and did it very handsly.

A CALIFORNIA STOCK FARM FOR CANADA.

James Faris Jr. of Sacramento, who went to the province of Alberta, Canada, last spring, returned this week for a short stay and will remove all his standard bred and draft stock from the Faris Stock Farm on the Sacramento river, to the new Faris Stock Farm, which has been established about two miles from the thriving new town of Red Deer in the province mentioned. Mr. Faris has a fine collection of brood mares and will place at the head of his stud the young stallion Jim Faris by Monbells (son of Mendocino and Beautiful Bells), dam the great brood mare Edith by Geo. Wilkes. Edith is the dam of Idolita 2:09 $\frac{1}{2}$. Mendolita 2:18 $\frac{1}{2}$, full brother and sister to Jim Faris. Edith is also the dam of Hummer, sire of Bouncer 2:09 and 27 more in 2:30. Jim Faris is a two-year-old and a very promising young trotter. He is one of the best bred colts ever bred at Senator Stanford's Palo Alto Stock Farm, being a result of the Electioneer-Wilkes cross that is admitted to be the greatest combination of trotting blood yet made by advanced breeders of the American trotter. Mr. Faris says the outlook for the new country in which he has located is very bright. The land is very rich and is being rapidly settled, as high as five carloads of actual settlers having reached Red Deer in one day. A yield of fifty bushels of high class milling wheat to the acre is common and one yield of eighty bushels was reported this year. While the mercury drops to 40 degrees below zero in midwinter sometimes, the country is particularly healthful. Good horses for road and work purposes are in demand, the available supply being mostly cayuse ponies. The horses which Mr. Faris will ship to Red Deer will fill about three cars, and will leave Sacramento early next month.

UKIAH WILL HOLD A MEETING.

The Agricultural Park Association of Ukiah will hold a five days' race meeting during the month of October, beginning on the 3d. Everything points to a very successful meeting, but owing to delays in making arrangements the program will consist chiefly of running events at short distances. However there will be several Sonoma county trotters at the track, among them Robizola, R. W. P., Wilmar, Gertie H., Charley Belden and Grace McKinney. The three first mentioned can step a half mile almost any day in 1:03 and are to start in races of half mile heats, so some very fast trotting may be expected on this half mile track, which is one of the best on the coast. Ukiah citizens have raised \$1300 for purses, but too late to advertise harness purses at a mile, the majority of the trotters and pacers having gone south or been sent home and let up on. Mr. Thos. Charlton's stallion Dumont S. 2:20, own brother to Sonoma Girl, and Mr. H. B. Smith's fast mare Ayress, also by Lynwood W., will take part in the races. Lynwood W. will have five representatives present during the meeting, all without records excepting Dumont S., and they can all step in 2:15 or better. The running purses will range from \$100 to \$160 and be at all distances from a quarter of a mile to a mile and an eighth. L. G. Simmons is president of the Association, T. Charlton vice-president, F. G. Albertson secretary, Henry Marks treasurer and H. B. Smith superintendent.

The starters in the Kentucky Futurity will probably be made up from the following list: Silver Wings, bay colt by Arion 2:07 $\frac{1}{2}$, dam Luni by Bow Bells 2:19 $\frac{1}{2}$; Flyingdote, bay filly by Bernadotte 2:19 $\frac{1}{2}$, dam Ruth Ashmoreland by Flying Artillery; Katherine L. 2:12 $\frac{1}{2}$, bay filly by Libert Chimes 2:22 $\frac{1}{2}$, dam Grismonda by Gregory the Great; Elmford, bay colt by Red Chute 2:24 $\frac{1}{2}$, dam Laurine by Stamboul; Rosabel, bay filly by Adbell 2:23, dam Junie Fleetwood by Simmons 2:28; The Phantom, black colt by Boreal 2:15 $\frac{1}{2}$, dam Shadow 2:18 by Nighthawk; Miss Adbell, bay filly by Adbell 2:23, dam Emma T. 2:17 $\frac{1}{2}$ by Socrates; Susie N., roan filly by Moko, dam Gypsy Dark by Wiltwood; Evania, brown filly by Clay King, dam Frances Strong by Strong Boy; Bonnie Me, brown filly by Bonnie Direct 2:05 $\frac{1}{2}$, dam Myrtle 2:13 $\frac{1}{2}$ by Anteeo 2:16 $\frac{1}{2}$; The Minute Man, bay colt by Bingen 2:06 $\frac{1}{2}$, dam Miss Pratt 2:17 by Heir-at-Law; Governor Crane, bay colt by Bingen 2:06 $\frac{1}{2}$, dam Nowaday 2:14 $\frac{1}{2}$ by Lookaway; Bon Voyage 2:12 $\frac{1}{2}$ by Expedition 2:15 $\frac{1}{2}$, dam Bon Mot by Erin.

Susie N. 2:09 $\frac{1}{2}$ in the second heat of a race is only a half second behind Fantasy's three-year-old record of 2:08 $\frac{1}{2}$. As Susie N. finished strong it is evident that she could easily take the world's record for her age if driven for it. She has fourteen crosses of Hambletonian through his best sons, and there is good four-mile thoroughbred blood mixed with it.

DISTEMPER AND ITS CURE.

Distemper in horses and colts is caused by minute organism called germs which course through the blood and settle in the glands, muscles and joints. The blood and the glandular system are poisoned and distemper cannot be radically and permanently cured until the blood has been purged and all germ life expelled. Dangerous as distemper is, there is one way to positively cure it. Modern science furnished a specific in the well known and popular remedy Craft's Distemper & Cough Cure, made by The Wells Medicine Co., Chemists Lafayette, Ind., which practical experience has proven reliable in all forms of the disease. Craft's Cure has the endorsement of veterinary surgeons and practical horsemen the world over, not only for distemper but for coughs, colds, pinkeye, catarrhal and all germ diseases. Further particulars concerning the remedy may be had by writing to the Wells Medicine Co., Lafayette, Ind., for their latest pamphlet, "Veterinary Pointers." It is free and may be had for the asking. Write for it today.

GOOD TROTTING AT SYRACUSE.

The New York State Fair held at Syracuse is a member of the Grand Circuit. Its meeting was to open on Monday, September 11th, but heavy rain storms prevented and it was Thursday before the track could be used. Nothing daunted, however, the racing began at 10 a. m. each morning, and by Saturday at 5 o'clock all the events on the card had been concluded.

On Thursday Josie, sister to Billy Red, won third money in the 2:15 pace, and the next race, in which any of the California horses started, was the 2:09 pace, Owyho, Ben F. and Irish representing this State. Owyho and Ben F. divided third and fourth moneys, but Irish was last in the summary.

In the \$10,000 trot for 2:14 class horses Swift B. was a starter but did not get any of the dinero. The race went to Ethel's Pride, daughter of the California bred sire Directum 2:05 1/4. Helen Norte, the Oregon mare, won third money, and a son of Stamboul got fourth.

In the 2:20 trot the same day the Zombro mare Italia started. She was a bang up second the third heat in 2:12 1/4, but owing to an accident had to be drawn.

No less than eight races were decided on Friday and this is probably the record for one day's harness racing. Twenty thousand people were present. After the 2:11 pace, in which the McKinney mare, Miss Georgie, was a starter, but not in the money, the Chamber of Commerce \$2000 trot was called and the great mare Zephyr by Zombro 2:11 walked away with it in three straight heats in 2:07 1/2, 2:09 and 2:08, one of the best races that has been trotted this year on the Grand Circuit. She had behind her such trotters as Mazette, Norman B., Angiola, Direct View, Lis-onjero and others, but won like a very high class mare, and but for a slight rain that fell before the race the time would have been a second faster in all three heats.

Morone, the black gelding owned by W. A. Clark, Jr., trotted a good race in the 2:17 class. The race was won by Pat T. in heats that ranged from 2:13 1/2 to 2:12 1/4. Morone was a good second in the first and last heats and third in the second heat. Miss Kinney, a daughter of McKinney, won third money.

The eighth race of the day was the 2:07 trot, with Snyder McGregor, George G., McKinley, Wentworth and Charley Herr as starters. George G. reeled off the first heat in 2:05 1/4, but Snyder McGregor beat him the next two heats in 2:08 1/2 and 2:07 1/4. This is a new record for George G. and within a half second of the fastest mile trotted this year.

Audobon Boy started against his record of 2:03 1/4 during the afternoon and paced a mile in 2:00 1/4. During the day twenty-five heats were trotted and paced at an average speed of 2:08 1/4.

The meeting closed Saturday with six races on the program. In the consolation of the \$10,000 trot, Swift B. got the first heat in 2:12 1/4, but was beaten the other heats by Kid Shea in faster time.

Sweet Marie won the free-for-all trot from Dr. Strong in straight heats in 2:06 1/4 and 2:05 and seemed to do it handily. Admiral Dewey tried to lower his record of 2:06 1/4, but a mile in 2:07 1/4 was the best he could do. The summaries of the three days racing follow:

Pacing, 2:15 class, purse \$2000.

Newark Call: If there is physical weakness in any part of a horse the training necessary to fit him for campaign work will bring it out the same as in an athlete. There have been great disappointments in this respect in all training stables. Weeks of steady, pains-taking work have been expended on a horse, only to have him develop some weakness just at the time when he was considered ready for track work. Sometimes the disability is only temporary, but even in that case the animal is thrown out for the season. More often, however, the developed weakness becomes permanent, and although the horse may be patched up for a time, he breaks down when the strain comes. Times without number has this occurred. No amount of veterinary skill could put Star Pointer in condition to campaign again after his race with Joe Patchen, at the Empire track. We could name scores of horses that were permanently retired owing to physical defect at the age when they should have been at the height of their powers. The chain gave way at the weakest link, as is always the case. One of the speediest mares ever owned in this state, and few horses anywhere had ever shown more speed at the trotting gait, went wrong in a hind leg just at the time when her great powers were approaching full development. She was turned out for an entire season, and when taken up again stood training so well that her owner was encouraged to believe that the trouble had been eradicated, but she went down in the second race in which she started, and was never again able to race. This mare was only six years old when she was retired. It is reported that three very speedy horses which have been in training at Waverley have "gone wrong" and will not be raced

this year. With two of them it is the recurrence of an old trouble which was thought to have been repaired so that the defective point was stronger than heretofore, but it appears that such was the case. The disappointment is great all around, as much was expected of these horses for the remainder of the season.

Spirit of the West. In order to make the breeding industry a success, and make the business profitable a great deal of careful and painstaking work is necessary. Profit and success do not obtain without effort and hard work of some one. It is easy to depend altogether too much on the other fellow. The division of the work is not always evenly borne by all the parties at interest, yet all are anxious to share equal or more so in the net results. The stallion owner, the breeder, the owner and the man who is entrusted to develop and train are all interested. The transaction in too many cases assumes the nature of a game where individual interest overshadows general good. There is a grand difference between joining in a game and being connected with a great enterprise which has for its purpose the promotion and development of a great industry, international in extent, profitable to the country and creditable to the men engaged in it. How would it do to turn over a new leaf and all join in a grand movement to add one another in building up the business?

Chicago Horseman: A point well taken by a correspondent recently was to the effect that track managers are too prone to postpone races on account of bad weather. Of course no one wishes to see a valuable horse injured by racing over a track made unsafe by the rain, but on the other hand it is unreasonable for owners to expect a parlor track every time their horse is turned for the word. Many a time thousands of spectators have been disappointed because of postponements which were really unnecessary. It would be better for all concerned, track managers, horse owners and the public, if racing was conducted according to schedule whenever possible. Some horses might not do so well on a sticky, muddy track as on a very hard one, but the owners of good mud horses would not object and the others would have to set it down as one of the fortunes of the sport. And some owners would be surprised to find how well their horses can perform over a muddy track.

OAK PARK DRIVING CLUB MATINEE.

The Oak Park Driving Club held its first matinee at the new Agricultural Park, Sacramento, last Sunday, and despite the fact that a brisk north wind was blowing a large crowd assembled and seemed well pleased with the showing made.

There were but three events, two trotting and one running race, but the manner in which the sport was conducted showed that the club intends making a success of its new venture.

The first race was a trot for horses of the three-minute class, in which the following were entered: Charles Lewis' Prince L., Ira Woodworth's Baby Knight, Harry Raynsford's Lady Silver Bow, W. A. Gilbert's C. C., Howard Kerr's Twinkle, Clarence Crouch's Maud. This race was best two in three and Prince L. captured the event in straight heats, showing speed sufficient to be in faster company.

The 2:40 class trot was also a two in three race, and the entries were J. Hudson's Chicken by Knight, J. H. Allen's Bumble Bee by Daedalion, Oscar Wilbur's Starling by Glen Wilkes, and Geo. Gillespie's Mott by Altamont. After losing the second heat to Starling, Chicken captured the race. Best time 2:50.

The third race was a gallop for a quarter of a mile between Hamp Cowles, Automobile and Oscar Gould's Kid. The flag fell to a good start, but Gould's horse became ungovernable and took the fence, Automobile winning in 25 1/2 seconds.

The club is so well pleased with the success of its first meet that another matinee will in all probability be given on Thanksgiving day. Following are the summaries:

Trotting, 3:00 class:			
Prince L.(Lewis)	1	1	
Lady Silver Bow(Raynsford)	2	3	
Baby Knight(Woodworth)	4	2	
Twinkle(Kerr)	3	4	
C. C.(Gilbert)	6	5	
Maud(Crouch)	5	dr	
Best time 2:57.			

Trotting, 2:40 class:			
Chicken(Hudson)	1	2	1
Starling(Wilbur)	3	1	2
Bumble Bee(Allen)	2	3	3
Mott(Gillespie)	4	dr	
Best time 2:50.			

VISION SOLD FOR \$2000.

Mr. Joseph Herscher, of the Samuel Herscher Company, 521 Market street, has purchased that good and fast race horse Vision 2:09 1/4 by Vanquish that has raced so well and so gamely on the California circuit this year. We understand \$2000 was the purchase price and Mr. Herscher got a bargain, as Vision is one of the handsomest pacers and best roadsters ever hitched to a bike or a buggy.

DAN PATCH BREAKS TWO RECORDS.

At the Allentown, Penn., half mile track on Thursday of this week. Dan Patch broke all half-mile pacing records by a mile in 2:01 to sulky and one in 2:05 to wagon.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

INTERSTATE ASSOCIATION TOURNAMENT.

The ninth Interstate Association blue rock tournament for 1905 was held on September 15th, 16th and 17th at the Ingleside grounds under the auspices of the San Francisco Trap Shooting Association.

This shoot will be noted in the trap shooting annals of the Coast as one of the best managed and most systematically conducted tournaments held here up to the present time. The efforts of the San Francisco Trap Shooting Association had received the hearty endorsement of many of our shooters and now that the meeting is a matter of the past, the work of both associations is the subject of much favorable comment.

One of the principal results will be future benefit derived from the opportunity of observing and studying the management and system in conducting a big shoot.

The arrangement of the grounds, trapping, scoring boards, squad hustling—without hustlers, posting results, paying of purses 15 minutes after events were shot, and the many details connected with a shoot worked smoothly, rapidly and satisfactory for three days, in fact was a clock-like working object lesson.

The supervising genius of the tournament was Mr. Elmer E. Shaner, to whom is due every praise for the successful running of the meeting. Mr. Shaner's management is an evidence of executive abilities of a high order. He had an eye for every detail and a ready ear for everybody, besides which he is the happy possessor of a genial personality that made him a host of friends among our sportsmen. The results that were apparent to the onlooker were decidedly interesting—the unseen preparatory work in order to get the machinery in condition and ready is of no less importance.

The consensus of opinion among the shooters present at the tournament is that the Interstate shoot next year will be a big card.

The advent of the team of eastern champions was a matter of no little importance for the sport of trap shooting on the Pacific slope. The visitors were popular from the start and are an all round aggregation of good fellows. There was an immediate fraternization of East and West and a bond of good fellowship cemented that will be lasting. The visitors were ever ready to impart information, make comparisons, in fact go into or take up any phase of the sport, with or for the benefit of the Coast men. Not that our shooters are not up to the times, but it was recognized that the years of experience in trap shooting, all the year round all over the United States, and elsewhere as well, would afford practically an encyclopaedia of information that was worthy of consideration.

Captain Tom Marshall was introduced to the big audience of Sunday by Clarence A. Haight. Marshall in response spoke eloquently and fittingly for the occasion and in turn in an apt and happy manner introduced his associates, Crosby, Gilbert, Hirschy, Fanning, Heikes, C. D. Plank, C. M. Powers and Shaner. The episode was a pleasant one and the speaker was frequently greeted by his hearers with applause.

The reception committee did much to look after the comfort and convenience of everybody on the grounds. C. A. Haight, W. S. Wattles, F. Turner, T. L. Lewis, A. M. Shields, G. W. Gibson, E. Holling, E. E. Drake, E. L. Forster, H. C. Kaplan and W. J. Golcher were on the committee.

The office corps was composed of H. C. Hirschy, H. P. Jacobsen, J. J. Sweeney, Sam Watson, Mr. Stevens and Mr. Oliver. Their ready efforts and speedy attention to every detail of the work was appreciated by all.

The Preliminary Handicap on Saturday started before noon and was finished early, the event being closely followed by a large audience. The race was contested keenly from start to finish. As the shoot narrowed down to the last sections of targets the interest and enthusiasm of everybody present was raised to a tension pitch. The leaders were Hagerman, Carr, Varien, Powers, M. O. Feudner, E. Klevesahl, Golcher, G. W. Gibson, E. Schultz and Nauman, and it was anybody's race. One by one the leading contestants lost targets enough to put them out of the trophy consideration until the match was narrowed down to C. D. Hagerman of Los Angeles, who finished with 93. Varien lost a bird out of his last 20 and scored 92. "Pop" Carr of Monterey then started on his last 20 targets. Carr's shooting was watched by a big crowd of shooters, for he was in good form and a straight would have tied with Hagerman. The loss of his seventh bird, followed by two more, relegated him to sixth place in the race. Hagerman won the cup and first money, Varien second money, Feudner, C. M. Powers and E. Klevesahl, 91 breaks each, divided third, fourth and fifth moneys; Carr sixth money; Golcher and G. W. Gibson, 89 birds each, divided seventh and eighth money; E. Schultz and C. C. Nauman, 88 birds each, divided ninth and tenth moneys. The elegant trophy cup was presented to the winner by Mr. Shaner.

On Sunday the principal event of the day and the main event of the tournament, the Pacific Coast Handicap, was observed by an audience of over 1000

spectators, among whom the fair sex were conspicuous, both in numbers and enthusiasm.

This event was a struggle from start to finish, the latter being somewhat sensational in the final denouement. The 100-target allotment per man was divided in six sections of 15 and 20 targets, and the squads went down the line of traps alternately. One by one the cracks fell by the wayside. Either the 18, 19 or 20 yards was too telling a handicap, or enough targets were slipped to put a favorite out of the running for the cup. When the last squads were finishing a glance over the score sheets showed George Sylvester (16 yards) to be the high gun, with 97 out of 100 to his credit. There was a chance for one shooter to eventually win out, and that man was the Los Angeleno, R. H. Bungay, who had a score of 77 out of 80, with his final string of 20 still to shoot. A straight would tie Sylvester, and the chance to win on the shoot-off was regarded by many as being favorable to the man from the citrus belt. Bungay finished his last 20 at a swinging clip, centering almost every target in a cool and assuring way.

Manager Shaner then announced that Sylvester and Bungay would shoot out the tie at 20 targets, 16 yards distance. The two shooters stepped to the score, shook hands and began firing at the clays, Sylvester shooting first. The contestants were keenly watched by a large audience. Sylvester finally won, 17 targets against his opponent's 16, the trophy cup.

The purse in the handicap amounted to \$812.50 and was distributed among the twelve high guns, George Sylvester and R. M. Bungay, 97 each, divided; Del Cooper (18 yards) of Bellingham, Wash., 91 breaks, and Fred Schultz (16 yards) of San Francisco divided third and fourth purse; Ed Schultz (19 yards), A. J. Webb (18 yards), W. H. Varien (18 yards) of Pacific Grove, F. B. Mills (16 yards) of Santa Ana and H. P. Jacobsen (15 yards) of San Francisco, with 90 each, divided fifth, sixth, seventh, eighth and ninth purses; C. C. Nauman (18 yards), E. L. Forster (18 yards), F. M. Newbert (17 yards) of Sacramento and L. E. Walker (17 yards) of Woodland, with 89 breaks, divided the balance.

After the conclusion of the regular tournament card, seven teams of five men each contended in a sweepstakes match at 20 targets. Golden Gate team, composed of Otto Feudner, Jack Fanning, Ed Schultz, A. J. Webb and Clarence Nauman, won first money with a total score of 87 breaks out of 100. Union Gun Club team, E. Holling, E. Klevesahl, Dick Reed, W. J. Iverson and George Sylvester, with 86 breaks, won second money. The Eastern team, Marshall, Crosby, Hirschy, Powers and Gilbert, scored but a total of 83 and were beaten by the two local teams.

Whilst the attendance was encouraging for the annual recurrence of the tournament, still we regret that there was not a larger number of entries. When the story of the shoot is familiar to the absentees and diffident shooters, unless we are greatly mistaken, some of the boys will realize that a big bet was overlooked.

The primary inducement, the powerful fostering of the sport on the Coast under the aegis of the Interstate Association, the added money incentive—for there was more and larger average purses distributed among the shooters at this meeting than at any trap shoot held on the Coast up to date—were two strong reasons that should have made the tournament attended by more shooters than were present and participated. But at that there was a good turnout. The northern cities, save Bellingham, Wash., and Medford, Or., were not represented. But the drawbacks to a large representation from the north were time, distance and heavy expense. Vallejo, Napa, Santa Rosa, Marysville, Oroville, Sacramento, Davis, Chico, Woodland, St. Helena, Pinole, Martinez, San Jose, Hollister, Fresno, Los Angeles, San Diego, Santa Ana, Monterey, Pacific Grove and other points were well represented by skilled shooters.

The added money figured up \$1500 as follows: \$420 the first day, \$390 and a trophy cup (\$50) the second, and \$540 and a trophy cup (\$100) the third day.

Weather conditions on Friday were foggy but favorable. The background was good, the targets showing up well against the sky. In the afternoon the weather became chilly and windy, the day's shooting was over before the weather conditions materially interfered with the shooters.

On Saturday morning warmth and sunny conditions made the day comfortable and all that could be desired for trap shooting until a brisk wind sprung up in the afternoon; the breeze, however, came too late to do any appreciable damage to scores.

Sunday was a warm balmy day in the forenoon and pleasantly warm in the afternoon—for many shooters an ideal day in which to shoot blue rocks.

The traps worked well throughout the shoot; at times the squad firing was sensationally rapid. Even at this, many shooters were unconsciously carried along with the swing of affairs and shot faster, if not better, than they ever did before. The birds came so fast for Gilbert at one spell, that veteran as he is, he slipped 6 out of 15 in the fifth section of the preliminary shoot. A noticeable feature during both handicaps was that the squads were graded—each quintet standing at the same distance peg. This attention to detail made the work of the shooters easy, as against a squad shooting from various marks, according to handicap place, always causing confusion, if not worse. As an example of evenness of shooting, is the work of Mr. Heikes, who scored each day 143 out of 150.

The ten high general averages shot by trade representatives were: Crosby 434 out of 450, Gilbert 434, Heikes 429, Fanning 415, Plank 411, Hirschy 408, Holling 399, Marshall 395, Carter 394, Reed 389.

The ten high general amateur averages were: Cooper 408 out of 450, Powers 404, Sylvester 404, M. O. Feudner 403, Nauman 403, Forster 398, E. Schultz 397, Bungay 396, Webb 393, Hagerman 391.

On the first day the ten high amateur scores were: M. O. Feudner 140 out of 150, Cooper 138, Forster 136, Golcher 134, Sylvester 134, Webb 133, Iverson 133, Walker 133, Powers 132, F. Schultz 132, Hagerman 130, Dr. Pittres 130, E. Schultz 130.

Out of 150 targets, Crosby broke 148, Gilbert 146, Heikes 143, Hirschy 139, Fanning 134, Holling 133, Marshall 129, Plank 128, Carter 127, King Jr. 126, Seaver 124.

On the second day the ten high amateur scores in three events, 50 targets, were: Walker 47, Cooper 47, E. Schultz 46, Hagerman 46, Powers 46, M. O. Feudner 44, Hawxhurst 44, Forster 44, J. A. Gibson 44, Bungay 44.

Gilbert scored 50 straight, Crosby 48, Fanning 48, Heikes 47, Plank 47, Vaughan 47, King Jr. 46, Reed 45, Seaver 44, Carter 43.

The ten high amateur scores in the Preliminary Handicap at 100 targets were: Hagerman 93, Varien 92, Powers 91, M. O. Feudner 91, E. Klevesahl 91, Carr 90, Golcher 89, G. W. Gibson 89, E. Schultz 88, Naumann 88.

Crosby broke 97, Heikes 96, Plank 94, Gilbert 93, Fanning 92, Marshall 90, Hirschy 88, Reed 88, Seaver 87, Carter 87.

For the final day, the ten high amateur scores in three events, 50 targets, were: Powers 48, Sylvester 47, Cooper 46, Forster 46, M. O. Feudner 45, E. Schultz 45, Barker 45, Golcher 45, Lowry 45, Nauman 44, Hagerman 44, G. W. Gibson 44, McKee 44, Hawxhurst 44.

Crosby broke 47 out of 50, Gilbert 47, Hirschy 47, Heikes 47, Reed 47, Carter 47, Marshall 46, Plank 46, Seaver 46, Haight 45, Holling 45.

Ten leading amateur scores in the Pacific Coast Handicap at 100 targets were: Sylvester 97, Bungay 97, Cooper 91, F. Schultz 91, Mills 90, E. Schultz 90, Webb 90, Varien 90, Nauman 89, Forster 89, Newbert 89.

Gilbert broke 98 out of 100, Fanning 97, Heikes 96, Plank 96, Crosby 94, Holling 93, Hirschy 92, Reed 90, Carter 90, Marshall 87, Seaver 87.

There were nine events on the 15th inst., in all of which there were better purses than ever before given at a Coast blue rock tournament. In going over the following summaries it will be seen that 13's paid in most instances double, or more, the entrance money. The 12's were in one occasion. The purses in all of the events, other than the two handicaps, were divided on the Rose system, 9-5-2 for 15 target and 12-9-5-2 for 20 target events. In each of the three minor events on the 16th and 17th the purses were as good as those distributed the first day, as follows:

September 15th—Event 1, 15 targets, \$40 added, \$1.50 entrance, 15's paid \$7.50, 14's \$3.90, 13's \$1.55.

Event 2, 15 targets, \$40 added, \$1.50 entrance; 15's paid \$12.65, 14's \$7.05, 13's \$2.80.

Event 3, 20 targets, \$60 added, \$2.00 entrance; 20's paid \$14.75, 19's \$11.05, 18's \$6.15, 17's \$2.45.

Event 4, 15 targets, \$40 added, \$1.50 entrance; 15's paid \$9.95, 14's \$5.55, 13's \$2.20.

Event 5, 15 targets, \$40 added, \$1.50 entrance; 15's paid \$14.75, 14's \$8.20, 13's \$3.25.

Event 6, 20 targets, \$60 added, \$2.00 entrance; 20's paid \$10.55, 19's \$7.90, 18's \$4.40, 17's \$1.75.

Event 7, 15 targets, \$40 added, \$1.50 entrance; 15's paid \$6.20, 14's \$3.45, 13's \$1.35.

Event 8, 15 targets, \$40 added, \$1.50 entrance; 15's paid \$7.90, 14's \$4.40, 13's \$1.75.

Event 9, 20 targets, \$60 added, \$2.00 entrance; 20's paid \$12.70, 19's \$9.50, 18's \$5.30, 17's \$2.10.

September 16th—Event 1, 15 targets, \$40 added, \$1.50 entrance; 15's paid \$11.60, 14's \$6.45, 13's \$2.55.

Event 2, 15 targets, \$40 added, \$1.50 entrance; 14's paid \$6.35, 13's \$3.55, 12's \$1.40.

Event 3, 20 targets, \$60 added, \$2.00 entrance; 20's paid \$13.20, 19's \$9.90, 18's \$5.50, 17's \$2.20.

Event 4, Preliminary Handicap, 100 targets, \$7 entrance (penalty entries \$10), handicap 14 to 20 yards, \$250 added and Interstate Association trophy, 47 entries \$342. After deducting the price of targets there was a net purse of \$464.50 divided as follows: 10 moneys (2 for each 10 entries or fraction thereof). \$102.19, \$83.61, \$65.03, \$51.09, \$46.45, \$37.16, \$23.23, \$23.23, \$18.58 and \$13.93.

September 17th, event 1, 15 targets, \$40 added, \$1.50 entrance; 15's paid \$7.55, 14's \$4.20, 13's \$1.65.

Event 2, 15 targets, \$40 added, \$1.50 entrance, 15's paid \$7.45, 14's \$4.15, 13's \$1.65.

Event 3, 20 targets, \$60 added, \$2.00 entrance; 20's paid \$10.05, 19's \$7.56, 18's \$4.20, 17's \$1.65.

Event 4, Pacific Coast Handicap, 100 targets, \$10 entrance (penalty entrance \$15), handicaps 14 to 20 yards, \$400 added and Interstate Association trophy, 57 entries (6 post). The net purse amounted to \$812.50. There were 12 moneys as follows: \$162.50, \$130, \$105.62, \$81.25, \$73.12, \$56.87, \$48.75, \$40.62, \$40.62, \$32.50, \$24.37, \$16.25.

All events were at unknown angles, targets were thrown about 50 yards, five men up, three traps—Sergeant system.

The handicapping committee was composed of M. J. Iverson of San Francisco, W. H. Varien, Pacific Grove; Gny Lovelace, Los Angeles; M. Abrahams, Portland, and F. K. McBroom. That the work of the committee was accurate will be discerned readily upon perusal of the scores.

Other and interesting data in connection with the tournament may be found in communications which appear under the head of "Trade Notes."

Manufacturers' agents, paid representatives, etc., shot in all of the events for targets only. The individual scores and handicaps for the three days are given on another page of this issue.

A Live Pigeon Shoot at Ingleside Monday was the aftermath of the big three-day blue rock tournament which ended on Thursday.

The shoot was an interesting one from a sportsman's point of view, for practically the champion wing shots of the East and West came together. That a local man, Clarence C. Nauman, held down two of the best Eastern pigeon shots was a matter of much pride to the select assembly of shotgun talent that were interested onlookers, and critics as well, at the shoot.

The match began at 11 a. m. with sixteen shooters up. The entrance money for each was \$20. The purse was divided into four moneys, 40, 30, 20 and 10 per cent, distributed among the high guns. The men shot at various distance—26 to 33 yards from the center trap. Pete Walsh (29 yards), led off and handily grasped his bird with one barrel. Pete finished with 24 and was in the money division.

The shooting of both Fred Gilbert (33 yards) and Billy Crosby (33 yards) was closely observed by the other shooters. That these two wing shots are remarkably skillful with a breech-loader was aptly demonstrated a number of times, when birds, difficult for a man with less experience, were dropped with a degree of accuracy and quick perception of flight, rise, etc., that would have been extremely puzzling to the ordinary shooter. Gilbert lost his twenty-third pigeon and finished in the 24 list. Crosby failed to stop his first and eleventh birds and then withdrew.

C. M. Powers (31 yards), one of the Eastern men, failed to connect with bird number 19 and closed his score with 24. W. E. Greene of Pacific Grove (28 yards), a very clever shot, also scored 24 birds. Clarence A. Haight (30 yards), shooting in grand form, lost one of the hardest birds trapped during the day, number 23, but was in the 24 count. Guy Lovelace (28 yards) of Los Angeles also scored 24. C. C. Nauman, with a straight score of 25, won first money. The balance of the purse was divided among the shooters who grassed 24 birds.

A ten-bird pool shoot, \$5 entrance, birds extra, next followed, twelve shooters participating, all shooting from the 30-yard slat. Bungay, Powers, Gilbert, Vaughan and Nauman each planted ten birds straight and divided the pool purse.

A very warm day had its corresponding effect on the "ginger" of the birds, with many of which that quality was apparently dormant when released by the traps, for but few of them were of the sky-rocket variety. The scores follow:

Twenty-five bird match, \$20 entrance, moneys 40, 30, 20 and 10 per cent, high guns, distance handicap.

TRADE NOTES.

Home Products Got There.

Just a few pointed remarks about Selby Factory Loaded Shells.

Do you know that with these goods the high amateur average made by Del Cooper of Bellingham, Wash. the Preliminary Handicap trophy, won by C. D. Hagerman of Los Angeles, 93 out of 100, and the Pacific Coast Handicap trophy—for which Geo. Sylvester of San Francisco and R. H. Bungay of Los Angeles shot a tie, 97 out of 100, finally won by Sylvester, were all records made with Selby's factory loaded shells at the Interstate Association three-day tournament last week at Ingleside?

At the South Tacoma tournament of the Southwest Washington Gun Club Association, the high general and high amateur averages, the DuPont Challenge Cup, the California Powder Works Cup and the Laffin and Rand trophy, were all won with Selby loads. The longest run, 72 breaks, was shot with Selby loads. What better do you want?

SATURDAY, SEPTEMBER 16, 1905.

Peters Points.

A tournament given at Weir City, Mo., September 4th, Mr. David Elliott was high professional, 166 out of 175, and Messrs. C. Dixon and J. H. Welles tied for high amateur average, 162 out of 175. All these shooters used Peters' factory loaded shells.

At Canton, Ohio, September 5th, Mr. C. O. Le Compte won high professional average and Mr. C. J. Schlitz second amateur average, both using Peters' shells.

At Dayton, Ohio, September 4th and 5th, L. H. Reid, representing the Peters' Cartridge Co., won second average, breaking 382 out of 400.

At the Portland State Shoot, September 4th, Mr. G. M. Wheeler, shooting Peters' shells, won the Elm-house cup from the 20-yard mark, score 23 out of 25. In the team race, won by the Portland team, four out of five of the winners shot Peters' shells. Mr. Wheeler was second high professional at Worcester, Mass., September 5th and 6th.

The International Live Bird Championship and the Gillman & Barnes trophy were won September 9th at the Detroit tournament by Mr. H. L. Gillespie of Pittsburg, who killed 15 straight and 6 straight in the shoot-off. Mr. Gillespie gives a full measure of credit for this victory to the Peters' factory loaded shells which he used.

Averages Reported.

Colorado Springs, Colo., August 29th, 30th and 31st, Fred Gilbert, shooting DuPont, tied with W. R. Crosby, shooting New E. C. (Improved), for first general average, 481 out of 500. First amateur and second general average was won with New E. C. (Improved). John Rohrer of Colorado Springs, second amateur and third general average, 475 out of 500, shooting DuPont. H. G. Taylor of Meckling, So. Dakota, third amateur average, 473 out of 500, shooting New E. C. (Improved). The Denver Post trophy was won by J. Appleman of Perry, O. T., shooting DuPont from the 16-yard mark, with 97 out of 100.

Reading, Pa., August 31st, J. M. Hawkins, first general average, 171 out of 180, shooting DuPont. M. S. Brey of Geryville, Pa., first amateur and second general average, 162 out of 180, shooting DuPont. P. B. Pfeiffer of Ambler, Pa., second amateur and third general average, 161 out of 180, shooting DuPont. C. S. Schaeffer of Temple, Pa., third amateur average, 155 out of 180, shooting Infalible.

New London, Ohio, August 31st, D. D. Gross, first general average, 136 out of 150, shooting DuPont. F. J. Smith, of New London, Ohio, first amateur and second general average, 132 out of 150, shooting DuPont. E. R. Stilson of New London, Ohio, second

amateur and third general average, 131 out of 150, shooting DuPont. E. F. Scott of Dalton, Ohio, third amateur average, 128 out of 150, shooting Infalible.

Pittsfield, Mass., September 2nd, J. A. R. Elliott, first general average, 86 out of 100, shooting New Schultz. Hood Waters, second general average, 83 out of 100, shooting Infalible. J. Ransenhansen of Pittsfield, Mass., first amateur and third general average, 75 out of 100, shooting Infalible. P. Vosburg of Pontotoc, Mass., third amateur average, 73 out of 100, shooting Infalible.

Springfield, Mass., September 4th, J. A. R. Elliott, first general average, 196 out of 200, shooting New Schultz. H. Federhen of Boston, Mass., first amateur and second general average, 193 out of 200, shooting DuPont. H. C. Barstow of Rockville, Conn., second amateur and third general average, 189 out of 200, shooting Infalible. G. C. Finch of Thompsonville, Conn., third amateur average, 187 out of 200, shooting Infalible.

It Won the Best Trophies.

Shooters using Ballistite have won four of the best trophies shot for on the Pacific Coast this year.

At the Interstate Association shoot at Ingleside, September 16th, C. D. Hagerman of Los Angeles won the Preliminary Handicap, 93 out of 100. September 17th Geo. Sylvester and R. H. Bungay of Los Angeles tied for the Pacific Coast Handicap, with 97 out of 100.

At Portland, the Northwest Association tournament. J. W. Bradrick won the Anaconda cup, 25 straight, and was third high average, June 22d, 23d and 24th.

At the Pacific Coast tournament, Ingleside, May 28th, 29th and 30th, J. W. Bradrick won the Phil B. Bekeart Challenge Cup, 94 out of 100, and high general average for the shoot.

These performances speak well for Ballistite.

A Sweeping Winchester Victory.

It was the same old story told over again at the First Interstate Association's Pacific Coast Handicap target tournament, which was held at Ingleside, San Francisco, on the 15th, 16th and 17th inst. The shooters of the time-tried and reliable Winchester "Leader" shells carried off the honors of the shoot. The world's champion target shots, Messrs. W. R. Crosby and Fred Gilbert, two men that are in a class all by themselves when it comes to smashing inanimate targets, and men who always shoot the Winchester "Leader" shells, demonstrated the reliability and uniformity of these shells to the utmost satisfaction of every person that saw them shoot. The high expert average of the first day was made by Mr. Crosby, score 148 out of the possible 150. The second high expert average was captured by Mr. Gilbert, score 146 out of the possible 150. The longest straight run on the first day was made by Mr. Crosby, who finished the program events with an unfinished run of 123, which run he continued on the second day until he had scored 157 straight, which now stands as the Pacific Coast record for a straight run. The high expert average for the second day was also captured by Mr. Crosby, score 145 out of the possible 150. Mr. Gilbert finished second with a score of 143 out of his allotted 150, making a run of 142 straight, which is now the second best run of consecutive breaks. The former coast record for a run was held by Mr. Ed. Schultz, 115 straight. The high expert average for the closing day of the tournament was captured by Mr. Gilbert, score 145 out of the possible 150. The high expert average for the entire tournament was tied for between Mr. Crosby and Mr. Gilbert on the score of 434 out of the 450 shot at. The Preliminary Handicap shot for on the 16th was won by Mr. C. D. Hagerman of Los Angeles with the score of 93 breaks out of the 100 shot at in this event. The best score in the event was 97 out of the 100 and was made by Mr. Crosby, but the event being open to amateurs only, Mr. Crosby's score was in glory only. The main event of the tournament, the Pacific Coast Handicap, was tied for between Mr. R. Bungay of Los Angeles and Mr. Geo. Sylvester of San Francisco on the splendid score of 97 out of the 100 shot at in this event. In the shoot-off for the handsome trophy, the first Interstate Association trophy ever shot for on this coast, Mr. Sylvester, shooting Winchester "Leader" shells, outshot Mr. Bungay and was thus awarded the much coveted prize. The highest score in the event was made by Mr. Gilbert, 98 out of the 100, but the handicap being for amateurs only, Mr. Gilbert's score, like Mr. Crosby's of the previous day, was in glory only. The high amateur average of the entire tournament was captured by Mr. Dell Cooper of Bellingham, Washington, with a Winchester "pump" gun. Thus it will be seen that the shooters that used the products of the Winchester Repeating Arms Co. covered themselves with glory and did the best shooting of the tournament.

Of the famous Eastern team of crack shots that was in attendance at this tournament, nine in number, Messrs. W. R. Crosby, H. C. Hirschy, Fred Gilbert, Chas. D. Plank, Jack Fanning, C. M. Powers and D. W. King, Jr., shoot the Winchester "Leader" shells. Mr. Crosby holds the world's long run record—419 without a miss. Mr. Gilbert the second long run record, 317. Mr. Hirschy was the winner of the largest Grand American Handicap at live birds that has ever been held. Mr. Powers is acknowledged to be the amateur champion of the world, while all the other gentlemen are world renowned shotgun shots.

A Red Letter Day for U. M. C. Ammunition.

The Pacific Coast meet of the Interstate Association of Trap Shooters held at Ingleside, Sept. 15th, 16th and 17th, was the most noteworthy event in blue rock shooting ever held on the Pacific Coast. It was marked by machine like methods, it was conducted in a thoroughly business like manner and will be a great educator to all trap shooters, and unquestionably will prove to have lasting and beneficial effects upon this great and clean out-of-door sport on the Pacific Coast.

Mr. Elmer E. Shaner, both by natural gifts and experience, is an ideal conductor for such events, one in which a man must have rare tact and firmness in order to avoid friction. These gifts are notably Mr. Shaner's. Mr. Shaner was ably assisted by Mr. H. C. Hirschy, a man of experience in all clerical details necessary to a successful outcome. Space does not permit of the individual mention of the entire list of shooters making fine scores. The winner of the Preliminary Handicap was Mr. C. D. Hagerman, of Los Angeles, Cal., who shot in magnificent form, breaking 93 out of 100 targets. He was closely followed by W. H. Varien, breaking 92, by E. Klevesahl with 91 breaks, M. O. Feudner 91, C. Carr with 90.

All the above shooters were users of U. M. C. ammunition exclusively. This evidence of reliability and perfection should convince any "doubting Thomas" in the shooting brotherhood of the quality and value of the famous U. M. C. ammunition.

On the following day the important event was the contest for the Pacific Coast Handicap, the cup given by the Association. Mr. Geo. Sylvester of San Francisco, and Mr. R. H. Bungay of Los Angeles tied in this event with 97 breaks each out of 100. Both used exclusively U. M. C. "Acme" shells. In the shoot-off at 20 birds, Mr. Sylvester was the successful contestant with 17 breaks, Mr. Bungay losing by one bird.

In this last shoot at twenty targets, Mr. Bungay used U. M. C. ammunition exclusively. Mr. Bungay's performance was a remarkable exhibition of nerve and steadiness, from the fact that in the 100 bird event it was necessary to make a final 20 straight to tie Mr. Sylvester's score, which he accomplished. At the finish of this game race, spontaneous applause greeted Mr. Bungay. In this same event shooters making an average of 90 per cent or over, were Fred Schultz, 91 per cent; A. J. Webb, 90 per cent; E. Schultz, 90 per cent; W. H. Varien, 90 per cent; and H. B. Jacobsen, 90 per cent; all amateurs and all without a single exception, using exclusively and solely U. M. C. ammunition.

Among the list of amateurs breaking 90 per cent or over, there were but two exceptions to this splendid record for the U. M. C. products, and even in one of these U. M. C. shells were used, with the exception of 25 shells.

On this final day there were in various events entries to the number of 102, and of this number, 81 were users of U. M. C. "Magic," "Acme," "Monarch" and "Majestic" shells, exclusively. A conclusion drawn from the above remarkable record is that no coincidence has place here whatever, simply, that so notably a popularity is and must be based on merit of a high order, and embraces all those qualities demanded by expert shots, as it is a well known fact that in all such contests where strain is necessarily present, ammunition used must represent accuracy, reliability, in fact perfection. So it is no idle boast to give the palm to the U. M. C. goods.

U. M. C. Wins as Usual.

Following the great Interstate Shoot, a Live Bird Handicap took place at Ingleside on Monday, Sept. 18th, 1905, sixteen crack live bird shots, including visiting and local experts, contesting. Fine scores were the order of the day and after an extremely game finish, Clarence Nauman of San Francisco was high gun with 25 straight kills, using U. M. C. ammunition.

In this aggregation of fine trap shots were W. R. Crosby and Fred Gilbert, two professional shooters with world wide reputations, each with 24 kills. C. M. Powers, a celebrated amateur shot, also with 24 kills to his credit. Others scoring 24 were P. J. Walsh, W. E. Greene, C. A. Haight and Guy Lovelace. C. W. Gibson, L. E. Walker, Otto Feudner, R. H. Bungay and F. Turner graced 23 birds each. Added to these were Dell Cooper, J. V. Coleman, with 22, and Emil Holling, 21.

A significant feature of these phenomenal exhibitions of trap shooting talent, among professional and amateur contestants alike, was the showing made by the reliable U. M. C. ammunition. Of the 16, 13 were users of the U. M. C. shells, exclusively. It is decidedly unnecessary to make extended account of this grand showing. The mere calm statement of so notable a fact is in itself sufficient and convincing of the sterling qualities of the U. M. C. products.

Statement of Money Winnings in Cup Events.

A statement of the winnings of money made in the

two cup events will be of general interest to trap enthusiasts. In the Preliminary Handicap a purse of \$464.52 was divided. To those contestants using U. M. C. ammunition solely, of this \$464.52, the sum of \$410.32 was earned. These contestants were as follows:

Contestants.	Shells used.	Money.
C. D. Hagerman.....	U.M.C., "Acme"	\$102.19
W. H. Varien.....	U.M.C., "Acme"	83.61
M. O. Feudner.....	U.M.C., "Magic"	54.20
E. Klevesahl.....	U.M.C., "Magic"	54.20
C. Carr.....	U.M.C., "Magic"	54.20
W. J. Golcher.....	U.M.C., "Magic"	23.23
Gion W. Gibson.....	U.M.C., "Magic"	23.23
E. Schultz.....	U.M.C., "Magic"	16.25
Clarence C. Nauman.....	U.M.C., "Magic"	16.25

Total U. M. C. winnings.....\$410.32
Won with other brands of shells.....\$ 54.20

Purse divided.....\$464.52
In the Pacific Coast Handicap, purse divided, \$812.00, of this amount \$472.15 was won by those amateurs using the products of the U. M. C. Company, exclusively, and were as follows:

Contestants.	Shells used.	Money.
R. H. Bungay.....	U.M.C., "Acme"	\$146.25
F. Schultz.....	U.M.C., "Magic"	93.40
E. Schultz.....	U.M.C., "Magic"	54.80
W. H. Varien.....	U.M.C., "Acme"	54.80
H. P. Jacobsen.....	U.M.C., "Magic"	54.80
A. J. Webb.....	U.M.C., "Magic"	22.70
C. C. Nauman.....	U.M.C., "Magic"	22.70
E. L. Forster.....	U.M.C., "Magic"	22.70
Dell Cooper.....	U. M. C., "Magic"	93.40

Winnings won exclusively with U. M. C. goods. \$565.55

In this event, of the 120 shells used by Mr. Geo. Sylvester, 100 were U.M.C. "Acme".....\$146.25
In this event, of the 100 shells used by Mr. Dell Cooper, 75 were U.M.C. "Magic"..... 93.40

Won with other brands of shells, exclusively.. 100.20

Total purse divided.....\$812.00

U. M. C. high averages—Regular events for three days, 250 birds—Second, third, fifth, sixth, seventh, ninth, tenth, twelfth, thirteenth, fourteenth, fifteenth, sixteenth, seventeenth, twentieth, twenty first, twenty-second and twenty-third. Special team event—Five men, 20 birds each, at 16 yards, was won by the Golden Gate No. 1 team (Fanning, Webb, Feudner, Schultz and Nauman), making a score of 87 out of a possible 100, all using U. M. C. "Acme" and "Magic" shells.

"Figures don't lie," as the saying goes, and it would be a waste of time, words and printers' ink to comment, even briefly, upon what is certainly a significant and rare combination. This combination represents a great average in the number of contestants, honors in fine scores, and a grand percentage in money earned, and is to be credited to the shooters using the products of the U. M. C. Company.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.

HOG CHOLERA.

Hog cholera and swine plague are the principal diseases of hogs that appear in the form of an epidemic and that are considered very infectious and contagious. Both diseases generally appear in any given outbreak, but the general name of hog cholera is applied to such outbreaks as well as to several other diseases that appear among hogs. It has been generally recognized that hog cholera is due to a bacteria commonly designated as the hog cholera bacillus. This germ is present to a great extent in the alimentary canal, and is passed from the body of the sick hog in large numbers, and in this way infect lots and pens where the sick hogs are. Such infection may be easily taken into the body of the well hog with food and water, and in this way soon infect the entire lot.

When the disease appears among the hogs of a given locality, as on a certain farm, it is evident that the pens are infected. This infection may be carried to the pens in a number of ways, but generally by means of some sick animal or on the shoes of parties who have been in pens where sick animals are. In any case the first thing to do is to move the well hogs into fresh lots, and where there will be no communication with the pens where the sick ones are kept. If others take sick the well ones should be moved again, as it will do little good to move out the sick ones and leave the others to take the disease in the infected pen. Washings from infected lots when carried into streams will spread the disease to farms located further down the stream, and hog raisers should be especially careful of their water supply when the disease is in their locality. They should not allow hogs to take water from a stream when the disease is known to be on farms above them.

There has been a great deal of work done to find some cure or preventive for hog cholera. Certain lines of work seem to indicate that a system of vaccination may be perfected that will act in a similar manner on hogs as a means of preventing hog cholera, as vaccination does on cattle to prevent

blackleg. If such a method is found to be reliable the disease will be practically under control. The feeding and care that hogs receive will do much to prevent such diseases, as unthrifty herds are the ones most likely to contract any disease. Plenty of green feed, such as cane, alfalfa, etc., with a good supply of fresh, clean water during the summer months will do a great deal towards keeping hogs in the best possible condition.

The Oklahoma experiment station at Stillwater has devoted considerable time to the study of hog cholera and the transmission of the disease by means of the hog cholera bacillus. This work has been principally along the lines of producing immunity in the small experimental animals and studying the effects of the germ in the hog. To facilitate work of this character it is very desirable to know of the existence of this disease, and any one having diseases of this nature among his hogs will aid the station in this work by communicating the fact and giving a thorough description of the symptoms and course of the disease.

A DEVICE FOR WATERING STOCK.

About this time of year when lakes and ponds become low cattle are always encroaching so as to make them decidedly foul and muddy. Then some day one of the cattle will lie down and die and the ranchers will tell each other that black leg is getting the cattle. After seeing several cattle die very queerly a Weld county man concludes that it is the dirty water that kills the stock and we have an idea he is right about it. As a general proposition whenever these holes are fenced off no more of these queer deaths occur among the stock. Most ditches are not reliable enough to give water for cattle all the time so it is necessary that some means are employed to hold a week's supply of water.

In telling how he arranges this matter the Weld county man says: "A place was selected on the low side of the ditch where a headgate had washed out leaving quite a hole. This was dammed across the lower end, the slides being also raised a little until a small

pond is made forty feet long, sixteen feet wide and 4½ feet deep in the deepest place. An inch and a quarter pipe to the main ditch kept it full and another one and one-quarter pipe provides an outflow. A three-quarter inch pipe runs through the lower end of the dam and about 150 feet off down a hill the pipe runs into a small tank holding four or five barrels. In the tank is a float valve with a small molasses can for a float. When a little band of cattle comes in for water the tank fills up again without attention as the float valve opens up just as soon as any water is drank and shuts up when the tank is full.

"The little pond is fenced so that no stock can get into it and the small tank is set against a fence so that stock may not shove it and is also securely fastened to the fence. The whole thing—labor and all—did not cost more than \$20 and we have water there every day, ditch or no ditch, for about 100 head of stock. It may sound queer but it is the truth that thirsty stock will go right over the main ditch and the 150 feet more to the tank just to drink the tank water, the apparent reason being that the water in the ditch is muddy while that in the tank is settled and clear."

PROTECTION FROM FLIES.

It is hard to make a close guess as to how much of the inevitable decrease in milk flow during the extremely hot season is due to the discomfort caused by flies; however, no dairyman will question the statement that the necessity for fighting these pests affects to some extent at least the work of every cow in the herd. So generally is this fact recognized that nearly every wide-awake dairyman has, at one time or another, given the matter serious consideration, and no doubt employed various means calculated to reduce the annoyance and loss. Of course all realize that it is impossible to afford their animals perfect protection from flies, but there are a number of ways in which relief of a fairly satisfactory nature can be given. First, the use of preparations to be applied with sprayer or atomizer has become quite

general, many of these coming to be regarded as quite effective by repellants. Through application at frequent intervals to stable walls and fixtures, and even to the animals themselves, the fly nuisance is greatly mitigated. Where the cows are milked indoors the practice of keeping the stable as dark and cool as possible will add to the comfort of both cow and milkman during the fly season. The use of cheap blankets to be worn constantly, or at least during daylight hours, is advocated by some. Very inexpensive ones can be made from gunysacking, and if designed to protect mainly the back of the animal they will not prove uncomfortably warm, yet giving protection where it is needed most. Fighting the flies, by whatever method the dairyman may choose, will not be found expensive in the long run since repelling the pests from the stable means rest and contentment for the weary animals, making them easier to handle, to say nothing of the more satisfactory milk flow and of the reduction of chance for contamination of the product, opportunity for which is always dangerously great in fly-infested quarters.—Exchange.

Distemper in Colts.—The following tonic usually does considerable good: Thirty-five pounds of oil meal, 1½ pounds of iron sulphate, nine ounces of nux vomica, four ounces of pulverized gentian and six ounces of pulverized ginger; give the horse 2½ ounces of this mixture three times daily in ground feed. Have the teeth examined as some bad teeth may need pulling while others may be a little sharp.

STANDARD-BRED COLT FOR SALE.

6 YEAR-OLD STANDARD-BRED STALLION for sale—Sired by Monterey 2:09½, dam Silver Queen by Silver Bow 2:16. This colt is a square trotter. Last spring, with less than one month's training, he trotted mile out better than 2:40, but took distemper and had to be taken out of training. Is in good shape now. This colt is a fine individual with good feet and legs, and is closely related to two of the fastest trotters in the world—Lou Dillon on sire's side and Cresco on dam's side. Will be sold reasonable. Apply to or address S. B. VAN DERVOORT, Irvington, Alameda Co., Cal.

ABOUT FEEDING DAIRY COWS.

One fact of great importance, which must not be lost sight of in economical feeding is that the amount, kind and character of the food which an animal requires depends entirely upon the use to which that animal is going to put the food, says Michigan Farmer. A cheap team may be put through an idle time on a kind of feed that would not be suited at all to the needs of a race horse during training season, or of a valuable cow yielding 100 pounds of milk a day during an official test.

In order that a cow may produce the greatest yield of which she is capable she must be given the right kinds of feed, and the correct amount of each. There is little use in paying high prices and establishing a good dairy herd unless careful attention is to be given to the amount and character of the feed, for however well bred and efficient the individuals, they cannot give in their product what they do not receive in their food.

The fact that dairy cows should be fed according to their milk production should not be overlooked. A cow capable of producing fifty pounds of milk a day will require more than twice as much feed as a cow giving only ten pounds of milk a day. This point cannot be too strongly emphasized. Grain feed should not usually compose over half the weight of the ration, ranging from that to nothing, according to the character of the roughage available and the amount of milk given by the cow. In general it is a safe rule to feed liberally on good roughage and vary the grain portion to suit the requirements of the individual. The farmer should, as a rule, aim to raise the greater portion of the feed for his stock upon the farm.

Since rough feed is usually much cheaper than grain, too much importance cannot be attached to securing hay and fodder in the best possible condition. If hay is unduly exposed to dew and rain during the time of curing it loses much, both in nutrition and palatability. It is also important that hay and fodder be cut at the proper stage before becoming too ripe and the stems woody.

When cows have luxuriant pasture during late spring, before the heat becomes excessive or the flies troublesome, the conditions are nearly ideal for dairy cows. The nearer we approach these conditions the year around the better the milk production. It is, therefore, essential to the best yields and most economical results that succulent food be provided for cows during the winter months.

There are two ways of providing this succulent food—by silage and by root crops. My comparing the results obtained at several different experiment stations it is found that corn yields about twice as much nutriment per acre as do root crops. Since roots require much more hand labor, which is so expensive in this country, it is more economical for the corn-belt farmer to get his succulent food during winter from corn silage than from root crops.

Silage is essentially valuable on farms or in communities where rough feed is scarce, for more stock can be kept on a given area of land where the crops are made into silage than

in any other way with the same amount of labor expended. No farmer with ten or more cows can afford to be without a silo.

Dairymen suffer greatly every summer from not supplying proper green feed for their cows during the hot, dry weather of mid-summer. This shortage of feed comes at an inopportune time, since the cows are already beginning to feel the effect of the heat and flies, which of themselves quite perceptibly lessen the flow of milk. If feed is cut short at this time the shrinkage is sure to be large, resulting in a great loss, for it is practically impossible to restore the shrinkage during the period of lactation. A continuous supply of feed is equally essential to the successful maintenance of young and growing animals.

NODULE DISEASE OF SHEEP.

For several years past the veterinary department of the Louisiana experiment station has been conducting experiments in connection with nodule disease of sheep, a parasitic ailment which seems to be quite general over the entire country, with a view of ascertaining some practical method by which infection might be eliminated from pastures. It has long been known that the pasture is the chief source of infection of this disease.

The Louisiana experiment station attempted to keep the lambs free from the disease until they were weaned, and in looking about, hit upon the plan of a "bare-lot" method, in which the ewes were fed soiling crops and the lambs given only their mothers' milk, possibly supplemented with a little green or grain food. It was found by this method that practically all the lambs could be brought to weaning age without infection, at which time they could be turned onto clean pastures without further danger of infection.

From the results of the experiment the station feels justified in making the following deductions:

1. That by the bare-lot method it is possible to raise lambs up to the period of weaning and without separating them from their affected mothers, practically free from nodule disease of the intestines.
2. That in the absence of intestinal parasites, other than the nodule disease worm, lambs intended for feeding for the early or other markets may be raised in this way without their health being impaired or their general condition affected by the disease.
3. That in the case of ewe lambs to be kept for breeding purposes, and which may have become only slightly infected, there is the possibility, owing to the life-history of the parasite, as given by helminthologists (those who make a special study of worms), of auto-infestation and subsequent infection of clean pastures on which the lambs may have been placed.
4. That, although the previous deduction as to such possibility may be correct, there can hardly be any question as to the great reduction in the primary infestation by the bare-lot method, as compared to that brought about where the lambs are permitted to graze on pasture infested through the droppings of their diseased mothers.

5. That the method is so simple and is so free from technicalities that any flockmaster who will take the trouble to observe ordinary care as to the few details can obtain at least fair results from its adoption.

6. That with the supply of some good vermifuge mixture to which the sheep can have free access at all times, in conjunction with the method, more satisfactory results might be looked for than was even obtained in our experiments.

7. That when the lot becomes infected with other intestinal parasites, such as stomach and tape worms, etc., the method alone will not prevent infestation of the lambs by such parasites.

8. That the method is worthy of trial by flockmasters owning breeding ewes affected with nodule disease of the intestines.

The same hogs that enjoyed sunshine in the winter, appreciate shade in the summer. Conditions should be made by which these can be had. Pig pens are often very warm. They are usually small and close and exposed to the sun. The hogs need shade, either out of the pen or in it.

One error in feeding horses is in giving them too much hay. The stomach of a horse is so small that he needs nourishing food, with a moderate amount of roughness.

For Sale.

The Perfectly Gaited Trotting Stallion

ALTA VELA 2:11 1-4

(Reg. No. 22449)

Sire, ELECTIONEER, sire of 166 in 2:30 and grandsire of Major Delmar 1:59½.

KENDALL'S SPAVIN CURE

Fore-Warned

Fore-Armed

Every horse owner can feel safe and sure if he will keep constantly on hand a supply of

Kendall's Spavin Cure

Experienced horsemen, trainers and breeders everywhere know it to be a sure remedy for Spavins, Ringbones, Curbs, Splints and all forms of lameness.

New Orleans, La., 233 St. Louis St., April 19, 1904.

DR. B. J. KENDALL CO.

Dear Sirs:—Please find enclosed a two cent stamp for your "Treatise on the Horse and his Diseases." I have used your Kendall's Spavin Cure for five years and have found it the greatest medicine on earth for what it specifies.

Yours truly, GEORGE J. GALWAY

Price \$1.60 for \$5. As a liniment for family use it has no equal. All druggists. Book "A Treatise on the Horse" mailed free. Address

DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.

FOR SALE.

BROOD MARE, SIRE BY BLACK RALPH 2:20, dam Black Baby by Black Bird 2:22; second dam by Nigger Baby. This mare is a beautiful black, weighing about 1000 lbs. She is very spirited, stylish and of unusually good disposition. Was never trained and, in fact, little used, but has done 2:40 hitched to a heavy cart and driven by an amateur. She is now in foal to Lynwood W.

Also, her Weanling Filly (4 months) by Lynwood W. This filly is of remark by muscular build and very pretty—a bright bay with black points. Every California horseman knows Lynwood W's colts are good. A three-year-old of his did the last quarter of a mile heat in 31½ seconds on the Santa Rosa track September 9th, and this after only three months training.

The price for mare and filly is \$450, or will sell separately. Address the owner.

P. O. BOX 461, Santa Rosa, Cal.

THE AIM OF EVERY GUN owner is to keep his gun faultless—the finer the gun the harder he tries. If he uses "3 in One" the easier he tries.

"3 IN ONE" oils every action part properly, cleans out the residue of burnt or smokeless powder, prevents rust on every metal part, cleans and polishes the stock, contains no acid. Write for generous sample—free. G.W. COLE COMPANY

128 WASHINGTON LIFE BLDG. NEW YORK

STOCK FARMING.

Live stock husbandry not only relieves the farmer largely of dependence on hired help, but offers special inducements in reasonably large profits. Per acre cultivated fields may return larger revenue than animal husbandry, but the expense of cultivation is great and the risk is precarious. The former regime exhausts fertility, while the latter increases the productivity of the soil.

Live stock farming is an adjunct of thriftiness and associated with agricultural prosperity. While the pioneer may be compelled to draw on nature's resources for a few years by raising wheat, corn or flax as a commercial crop, if he is an intelligent, progressive farmer he naturally anticipates a change of system to stock husbandry.

Nature has for centuries gathered fertilizing properties and stored them in the soil to produce the necessities for the maintenance of life, and nowhere are greater natural resources massed than in the rich lands of the West. Grass grows in pristine luxuriance and cattle, sheep, horses and hogs mature rapidly on the nutritious pastures.

There is a great advantage in raising live stock in that it requires less help on the farm and the husbandman soon becomes forehanded, because he always has stock ready to market.

Live stock possesses many advantages in rotation farming, inasmuch as the live stock industry utilizes a variety of crops. Animals are nominally living machines that consume the products of the farm and transform into gold the roughage that otherwise would be wasted. Stock farming, when operated in conjunction with a crop rotation system, increases the average yield of various crops and broadens the capacity of live stock husbandry. Live stock naturally safeguards the failure to cultivated crops and insures the farmer a steady income.

There is no danger of overdoing the industry, as statistics demonstrate that population normally increases faster than live stock husbandry. Consumptive demand for live stock products will broaden faster than production, insuring stable prosperity to the industry.

In the Southwestern states feed can be produced in abundance at comparatively little cost, making animal husbandry a safe and profitable industry. With the best market in the world easily accessible farmers should raise more live stock of the best commercial types. The better quality outsells the low grades 30 to 50 per cent, and the breeders and finishers of the better class of stock seldom have occasion to criticize the market.

THE SWITCHING TAIL.

One of the troubles of the milker is the frequency with which the cow switches her tail into one's face or knocks one's hat off. There are several simple devices to overcome this and one of the best is by arranging a length of wire about three feet back of the animal stretching it from one post to another. Before fastening the one end take a lath and after boring a hole in it run the wire through it. On the other end of the lath fasten an eight-inch piece of barrel hoop, fastening the lower end to the lath with nails and holding the upper end in place with string. Before milking take the cow's tail and draw the hairy bunch through the loop. She will be unable to move it, and after a few trials will give it up and stand still.

An English dairy writer gives the following unique method of ascertaining as to whether or not a cow is with calf: "The cow to be tested is milked separately and as soon as possible after the milk is drawn we dip a straw or timothy stem in the bucket of milk. Have a glass of pure water at hand and allow one drop of the milk to fall in the water—only one; if the milk quickly dissipates and renders the water murky, the cow is not in calf, but if the milk drop sinks to the bottom of the glass before mixing with the water, she is pregnant. If you are not sufficiently expert take the milk of another cow that has newly calved, and pursue the same treatment with both at the same time and you will not fail to note the difference in the way the drop of milk will mix with the water. I have practiced this method of determining pregnancy in my herd for years and have never known it to fail." This is simplicity itself, and it won't cost much to try it.

Sponges. S. Adderley, 307 Market St

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

It is well to know that in many cases certain conditions which cause lameness in the same location in different horses present varied and different phases. It required over ten years' research into the nature of these complex conditions and experimenting to perfect and combine together the properties which form "Save-the-Horse" Spavin Cure, a compound of ingredients never before combined. It is by the concentration and intensity of its penetrating strength by which the properties of "Save-the-Horse" sustain a physiological action and irresistible power to dissolve the deposits, stimulate circulation, absorb and carry off the exudate or secretion and restore an unsound limb to soundness. "Save-the-Horse" is no untried or uncertain remedy: its marvelous power and possibilities have been proven absolutely and positively. No man will fire, blister or treat his horse with anything else if he will investigate and read our booklet and the letters from bankers, trainers and horsemen on every kind of case. Send for them; also booklet and copy of guarantee.

L. O. BALDWIN, Trainer and Driver,
18 Grant Avenue,

GLENS FALLS, N. Y., Jan. 3, 1905.

You have not asked for any testimonial from me, but I feel that it is only fair to tell you what your great remedy has done for me. My son had and still has a very fine mare by Baron Wilkes, and her dam was Hattie Ide by Gilly. He bought her unbroken and started to lead her home, and had not gone half a mile when she went lame. She had two spavins; he called a veterinary. She got better of her lameness and I went to breaking her to drive, and she went lame on the other side. We stopped and had her fired and blistered in both spavins. Rested her six months and commenced to drive her again and she went lame. I had that leg fired again and gave her the usual rest, and she went lame as soon as we began to use her. I saw your advertisement and wrote for a bottle and used it as the directions said. We commenced to drive her and she stood the test. We trained her; worked her twice a week, mile and repeat, and we are still driving her, and she goes as sound as any horse can. If any one will use it according to directions it will cure, and no mistake.

L. O. BALDWIN.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Bill, Windpuff, Weak and Sprained Tendons and all Lameness.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express paid.

"SAVE-THE-HORSE"

Is indicated for any enlargement caused by an injury which leaves a thickened condition of the tissues or skin.

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scaling of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. I thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c. **W. B. Eddy & Co., Whitehall, N. Y.**

Wilcoxson's Perfection Liniment

The Greatest Remedy Ever Known
For Bad Legs.

It penetrates to the seat of trouble at once. It allays fever from any cause. A Safe, Speedy and Positive Cure for Splints, Curbs, Thoroughpins, Sweeney, Capped Hocks, Wind Puffs and all Lameness from Sprains, Kingbone and other bony enlargements. On broken down, weak and injured tendons, ruptured ligaments its power is unfailing. Permanently cures all broken down conditions of the Ankles, Hocks, Tendons or Ligaments, without loss of hair or an hour's let up on the horse. **PRICE \$2 PER BOTTLE** Express charges prepaid on receipt of price. Every bottle guaranteed to give satisfaction or money refunded.

THE CONSOLATION HANDICAP

—at the—
GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

THE WEEKLY BREEDER AND SPORTSMAN

F. W. KELLEY, PROPRIETOR.

Turf and Sporting Authority of the Pacific Coast.

—OFFICE—

36 GEARY STREET, SAN FRANCISCO.

P. O. BOX 2300.

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, September 30, 1905.

THE FIRST VOLUME of the Proceedings of the American Breeders' Association has been received from the secretary, Prof. W. M. Hays, Washington, D. C. It is a book of about 250 pages and contains the proceedings of the first meeting of this organization held at St. Louis in 1903, and of the second meeting held at Champaign, Illinois, last February. In addition to a complete report of these interesting meetings there are articles by such authorities as Prof. W. E. Castle of Harvard University, A. J. Glover, associate editor of Hoard's Dairyman, Luther Burbank of Santa Rosa, Prof. Sandsten of the University of Wisconsin, Geo. T. Moore and W. M. Hays of the United States Department of Agriculture, and many other noted writers. The American Breeders' Association should have a very large membership and every person interested in the breeding of better livestock, fruit or other products should be a member. The membership fee is but \$1 per year for Americans and \$2 per year for members who reside in foreign countries. Any information about this association and the benefits to be derived from membership in it will be furnished by Secretary W. M. Hays, Washington, D. C.

THE SOUTHERN CALIFORNIA CIRCUIT offers many inducements for the owners and trainers of harness horses to race for good purses at the close of the season. Entries will not close until Tuesday, October 24th, giving owner plenty of time to ascertain just how good their horses are before entering them. The purses aggregate \$17,200 and are arranged for all classes of trotters and pacers. The Grand Southern Fall Circuit, as it is called, comprises three mile tracks. At San Bernardino and Santa Ana the purses are \$600 each, and at Los Angeles \$1000 each. But six entries are required to fill and four to start. Records made after tomorrow, October 1st, are no bar. The Los Angeles track is in fine shape and as a big meeting will be given there next June, it will be just the place to winter horses. Low freight rates can be had for carloads of horses sent from all points in central and northern California. Make your entries in time.

HALF MILE TRACKS only take half the water required to put a mile track in shape. In the dry climate of California, water is a very expensive article in the interior of the State. Horsemen who visit Ukiah next week will have an opportunity to see one of the best half mile tracks in California and they will find, if they drive over it, that horses will show their speed there about as well as they will over many of the mile tracks in this State. The Ukiah track is kept at about half the expense necessary to keep a mile track in order.

CALIFORNIANS WIN AT LIBERTYVILLE.

The \$5000 stake for 2:14 pacers at the Libertyville, Illinois track on Friday of last week proved the best contest of the meeting. Through the application of the rule terminating the race at the end of five heats, Bolivar carried off first honors, but only won two of the five heats. Echo Jr. two, and Red King the fifth.

Echo Jr. sold favorite in the pools, with Dorris B. second choice, and Bolivar grouped with the field. Doris B. was not herself, however, and after the great filly had gone four heats, in which she showed remarkable speed in spots only, she was drawn.

Echo Jr. won the first heat in 2:07½ in a terrific finish with Bolivar responding to the gad in great style. The tables, however, were reversed in the second heat, when Bolivar outpaced the stud, finishing the mile in 2:06¼, the fastest mile ever paced in a race on the Libertyville track.

The third heat was all Bolivar's in 2:07¼, with Ed C., who had won his race in fine style the day before, a good second, and Echo Jr. laid up. The next heat

the Iowa stallion went in for blood and succeeded in nosing out Bolivar in 2:07¼.

For the fifth and deciding heat the two favorites went down to the quarter in 31 seconds and to the half mile in 1:02½, but this so intensified their leg weariness that Red King had no trouble in coming on from behind and winning the heat easily in 2:09¼. Curry saving his horse at the finish when he saw who was beating him, as it did not affect his position in the race.

In the 2:23 trot, there were seven starters, Belfast being the favorite, but the California mare, Lady Mowry by McKinney, dam by Nutwood Wilkes, only permitted him to get one heat. Cecil won the first, second and fourth heats with the mare, the time of the four heats being 2:14¼, 2:13¼, 2:12* and 2:12¼, a corking good race and one that shows Lady Mowry to be a mare of much class. She is a four-year-old and is the property of Mr. J. C. Mowry of Irvington, Cal. The California gelding Golden Gate by Bay Bird was third in the first heat of this race, but caught the flag in the second heat.

ALL RECORDS BROKEN.

The most stupendous entry list in the history of harness racing has been received by Secretary Horace Wilson of the Kentucky Trotting Horse Breeders' Association for the big Lexington meeting of October 3-14 next. Three hundred and seventy-four horses have been named in twenty purses closed this week, which, added to those kept in the stakes, brings the total entry up to 628, and breaks the record for entries on American trotting tracks, established by the Lexington Association in 1898 by nearly one hundred.

In the rich Kentucky Futurity twenty three-year-olds remain eligible, including Bon Voyage 2:12¾, Katherine L. 2:12¼, Susie N. 2:13¼, Evania, Elmford, The Phantom, Miss Adbell, Kaldar and other highly tried stake colts. The 1905 Futurity promises to rival the 1904 event in interest.

In the Pacing Futurity for three-year-olds, eleven of the original thirteen remain. In the two-year-old Futurity, twenty-one have been kept eligible. A number of these have already raced successfully and the field is very classy.

In the famous Transylvania Stake, the annual championship, fourteen starters are named as follows: Ethel's Pride 2:07¼, Glenwood M. 2:08¼, Kid Shay 2:08½, John Caldwell 2:09, Bell C. 2:09¼, Turley 2:09½, Mainland 2:09¼, Deleree 2:09¾, Bonner 2:10, Pat Ford 2:10, Morn 2:09¾, Angle 2:11, Miss In Law and Lady Pauline C. Since the death of Sadie Mac, Ethel's Pride will likely be the post favorite, but the field includes the pick of the season's campaigners in East and West, and the Transylvania is not a favorite's race.

In the rich pacing stake, the Tennessee, the remarkable number of twenty-four horses are named, the largest field in its history. Walter Direct 2:04¾, The Friend 2:05¼, Don Carr 2:06, Peruna 2:06¼, Maud Keswick 2:06¼, are prominent.

In the 2:06 trot is a brilliant field made up of George G. 2:05½, Dr. Strong 2:06, McKinley 2:06¼, Wetworth 2:06¼, Snyder McGregor 2:06¾, and Norman B. 2:06¾.

In the great 2:04 pace twelve noted pacers are named, including The Broncho 2:03¼, the champion pacing mare; Nervolo 2:04¼, Baron Grattan 2:04¼, Major C. 2:04, Belle Mc 2:04¼, Locanda 2:03¾, Nathan Straus 2:04½, Pan Michael 2:05, Winfield Stratton 2:05, Frank Yokum 2:05¼, Hazel Patch 2:05½, Black Hal 2:05¼ and Cherry Lass 2:06¾.

The other purses filled as follows: 2:08 trot, 10 entries; 2:10 trot, 22; 2:12 trot, 12; 2:14 trot, 22; 2:16 trot, 25; 2:18 trot, 41; 2:20 trot, 23; 2:25 trot, 24; 2:06 pace, 19; 2:08 pace, 28; 2:09 pace, 21; 2:10 pace, 25; 2:12 pace, 15; 2:14 pace, 16; 2:15 pace, 18; 2:20 pace, 18.

The death of Sadie Mac and the retirement of Tiverton has killed the big special race which Secretary Wilson was trying to arrange, but it is possible that a special between Sweet Marie, Dr. Strong and Wentworth may be arranged between their respective owners, as the latter two feel quite confident of holding their own with the racing champion in a 3-in-5 race.—Kentucky Stock Farm.

SONOMA COUNTY DRIVING CLUB.

The recently organized Sonoma County Driving Club will hold a regular race meeting on the afternoon of Thursday, October 12th, and has issued a program for that day providing for four races. The classes are the 2:12 trot, 2:25 pace, and a mixed race for trotters or pacers of the 2:17 class and a roadster race. The three first named races are open to all, but the roadster race is only for horses owned by members of the club. Entries close Monday, October 9th, three days before the meeting, and the entrance fee is \$5 for each race. The total amount of receipts from all sources will be divided into four equal purses for these events, less ten per cent retained by the club for expenses.

Pools will be sold on all these races, and if anyone desires to start a horse against time for a record they can do so by paying a fee of five dollars and making entry before 7 o'clock p. m., the day preceding the race. All records made at this meeting will stand as the Sonoma Driving Club is a member of the National Trotting Association.

Among the trainers who have been racing their horses at the Hollister meeting this week are Dan Misner, Joseph Cuicello, Dan Leighner, Farmer Bunch, Chas. Whitehead, T. J. Ferguson, Russell Gray, Arthur Neville, T. S. Nuckols, and several others. A complete summary of the harness races at Hollister will be printed next week. We go to press too early to get more than a partial report this week.

FOOF BEATS.

Quite a number of Eastern horsemen are confident that Sadie Mac was scored to death.

The Texas State Fair has offered a \$10,000 purse for a race between Dan Patch and Audobon Boy.

Ashland Wilkes leads the sires of new performers for 1905 up to date. He has nine to his credit.

Expedition 2:15¾ seems to be the leading son of Electoneer as a sire of new performers this season.

Yum Yum, Telephone Central, Hulabaloo and Buster Brown all started in races at Princeton, Ill., recently.

McKinney has three new 2:15 trotters this year—Adam G. 2:11¼, Miss Kinney 2:11¼ and Lady Mowry 2:12¼.

The Bronco 2:03¼ picked up a nail the other day, and will probably be retired for the balance of the season.

The Ukiah fair and race meeting opens next Monday and continues during the week. Saturday there will be three good harness events.

Boracic acid and charcoal, both finely powdered and thoroughly mixed, is an excellent thing to dust into the horse's hoofs to keep them clean and free from thrush.

Russell G. by Nutwood Wilkes took a matinee wagon record of 2:21 in the third heat of a winning race at Cleveland last week. This gelding is owned by Mr. W. P. Murray of Cleveland.

Nutwood leads all stallions again this year as the sire of producing dams. No less than nine of his daughters have new standard performers to their credit since January 1st.

That McKinney-Nutwood Wilkes cross is again to the front as usual. At Libertyville, Illinois, last week, Lady Mowry by McKinney, dam by Nutwood Wilkes, took a trotting record of 2:12¼ in the fourth heat of a winning race.

Robizola 2:12¼, one of the fastest and best bred mares in California is offered for sale. Here is a mare worth buying for racing, road or breeding purposes. She will fill all requirements. Read the advertisement and write to her owner, Dr. J. W. Clark of Santa Rosa, about her.

P. W. Hodges and I. N. Minor, who took Lady Zombro and Morosco 2:12 to the Grand Circuit have met with very bad luck, both horses having been decidedly off and not able to start for the past six weeks, and consequently entrance money is beginning to pile up pretty heavily against them.

Major Delmar trotted the fastest mile of the season at Cleveland September 19th, when he went to beat 2:05¼ to wagon. He made the mile in 2:04, and the time by quarters was as follows: 31¼, 1:03, 1:32¾, 2:04. The same day Morning Star paced a mile to wagon in 2:03, which is the fastest mile paced at that hitch this year.

John A. McKerron 2:04½ now has four standard performers to his credit. Three have taken records this year—Jack McKerron (2) 2:27½, dam Ximenia, dam of Sunland Belle 2:08¾ and two others, by Nutwood; Irene Mac (2) 2:29¼, out of Irene Wilton 2:18¾ by Wilton, and Carrie Mae (3) 2:29¼, out of Carrie Onward 2:14¼. All of these records are actual race records made over poor half-mile tracks and in actual speed contests. It shows that McKerron is to win distinction as a successful sire just as he has done as a trotter.

Two good mares by Chas. Derby 2:20 are offered for sale in this issue. They can be seen at the Dexter Prince Stables, 1509 Grove street, this city, where inspection is invited. Nannie Derby, the five-year-old mare, stands 16.2 and weighs 1150 pounds. She is handsome and stylish and very fast. Has paced a half better than one minute on the speedway. Her only fault is that she is excitable in company. The other mare is four years old, stands 15.3 and is an excellent road mare. Look at these two and others at the Dexter Prince stables.

In spite of the fact that harness racing is at a low ebb in several states just now it is evident that a first-class trotter will bring a big price right now just the same as has been the case for years, says the Horse World. Miss Wilkes could have taken a very large sum of money for Sadie Mac almost any time if she would have considered an offer for that mare. At Poughkeepsie the trotting mare Deloree, that took a record of 2:09¾ there, was sold for \$18,500. It is also reported from a creditable source that an offer of \$13,500 was made and refused for the three-year-old trotting filly Susie N. 2:09¼ by Moko. The fact that trotters are in demand at such values is proof positive that it is not generally regarded that the earning capacity of the trotters will be lowered to the point that will make their campaigning unprofitable. The crusade against betting which has been inaugurated in several states will run its course like all other epidemics and, if the horsemen act wisely, they will eventually secure such legislation as will make racing under reasonable restrictions possible. It is difficult to arrive at any other conclusion than this, and while harness racing interests in several states may be seriously handicapped for a time, they will finally receive such treatment as the wisdom of their supporters shall cause them to merit.

JOTTINGS.

SECRETARY ALBERT LINDLEY of the California State Agricultural Society was in San Francisco this week attending to matters connected with that organization and made a short call at the office of the Breeder and Sportsman. It is very easy to see that Mr. Lindley is an enthusiast in regard to making the California State Fair one of the big annual shows of the West, and that he has the right ideas as to the aims and purposes of such an institution. He believes it should be first of all a great farmers' fruit growers' and live stock breeders' exposition. That the farmers' institutes, the fruit growers' associations and the live stock breeders organizations should be interested in the State Fair and that it should be made not only a great annual industrial exposition but also a sort of school of instruction where the general public will not only be shown the very best of the State's products every year, but also instructed as to why one exhibit is better than another and why the best is the most profitable. At the last session of the California Legislature Secretary Lindley was instrumental in having a bill introduced and passed which requires the Boards of County Supervisors to make a report to the State Board of Agriculture each year as to the condition, resources and annual products of the several counties. These reports will be printed with the regular annual report of the State Board and will be very valuable to intending settlers in the State, as well as to all who desire true and unbiased information in regard to any section thereof. Mr. Lindley believes the next annual report of the Society will be one of the most valuable in the history of the organization.

When the list of new 2:10 performers for 1905 is made up at the close of the year it will be found that California horses furnish a pretty heavy percentage of the entire number. If there is anything that should demonstrate to a certainty the fact that California is one of the greatest speed breeding places in the world, it is that in recent years but comparatively few California bred horses are taken east and raced and although they are compelled to meet the pick of all the other breeding and training centers, they manage to get a pretty fair proportion of the money and in the lists of fast performers always make a good showing at the end of the season.

A match race for \$500 a side has been made to come off over the Alameda track on Sunday, October 15th between two trotters, and from the interest that has been aroused in these Sunday contests recently it is safe to predict that two or three thousand people will turn out to see the sport. Mr. Grondola's mare Daisy May, trained by the veteran Hines, has been meeting and vanquishing about every road trotter in Alameda county during the past few months and the country has been scoured to find a trotter that could take her measure. Mr. Scott, the well known contractor of Oakland, has finally found a horse that he thinks can do the trick and has put up \$250 forfeit in the hands of William Wheeler. He has named the chestnut trotter Faust by Aptos Wilkes that was on the circuit in 1902 and failed to win a heat. Faust is the same horse that kicked and killed Pat McCartney at Salinas some years ago and is a gelding about ten or eleven years old. In 1892 Farmer Bunch campaled Faust and started him in seven races. He got some of the money in most of his races but did not succeed in getting a heat or a record. The races in which he started were won in from 2:18 to 2:23 and he was generally third or fourth horse. Rio Vista George was following the circuit that year trying to pick the winners and often worked Faust out a few heats for the Farmer. If I remember right he drove the gelding a mile in 2:19 at Napa one morning, at least that was the time the boys assured him the horse made, although it was reported on the quiet that 2:25 was nearer the correct time. The match between Faust and Daisy May is to be mile heats, best three in five, and it has been agreed that the winner must give the loser a return match for the same amount, within two weeks from date of first race. This race will be two mile heats, best two in three. Both events are the talk of "horse circles" in Alameda county at the present time.

Good looks and speed are combined in the make-up of that grand colt McFadyen whose race record of 2:15½ made at Santa Rosa this year is the fastest mile by a pacing colt of his age this year. The half-tone engraving of this colt which appears on the front page of the Breeder and Sportsman this week furnishes proof of this statement. Diablo 2:09¼ is a grand looking stallion and nearly all his get are endowed with more than average beauty but he never sired a handsomer or more promising one than this colt bred and owned by Mr. E. D. Dudley of Dixon. In a previous issue the tabulated pedigree of McFadyen was printed so there is no use repeating it here, but it will not be out of place to state that he is out of the great broodmare Bee by Sterling, second dam Flash by Egmont, third dam Lightfoot by Flaxtail, fourth dam Fanny Fern by Irwin's Tuckahoe, fifth dam by Laffer's Consul, running bred. Bee and Flash are both great brood mares, while the old mare Fanny Fern is the founder of a family of fast ones. Her daughter Fern Leaf produced that wonderful pacing filly Gold Leaf that took the world's four-year-old pacing record of 2:11¼ in 1889. Fern Leaf also produced Thistle 2:13¼, sire of To Order 2:12¾, that in turn sired Miss Mack 2:10¼. Nearly one-half the stock included by the late Dr. Hicks in

his first catalogue printed after locating in California traced to this old mare Fanny Fern, and whenever a fast one appears on the circuit that traces to some of his stallions or mares, it is an even bet that Fanny Fern or old Mary by Flaxtail will be reached in the pedigree within three or four generations.

ANOTHER TWO MINUTE PACER.

The fourth pacer to get into the two minute circle is Audubon Boy and his record was made at Readville, Mass., on Friday last, September 22nd. Dan Patch 1:56, Star Pointer 1:59¼ and Prince Alert 1:59½ are the three that entered this exclusive list before him, but those who saw the son of J. J. Audubon accomplish the feat of pacing a mile inside of two minutes believe that he is a rival of the great Dan Patch as the mile was made without a runner or a wind shield in front of the horse.

Audubon Boy's time just equals the record of 1:59¼ made by Star Pointer seven years ago. The press dispatch gives the following particulars:

Audubon Boy started to beat 2:00¼. The weather conditions favored record time. The assistance of a pacemaker was useless, Audubon Boy having distanced his pacemaker before the half-mile post was reached. In making the trial for the record, James Y. Gatcomb, owner of the chestnut stallion, refused to use a wind shield or to have a running horse draw a cart with canvas attached between the wheels in the lead, preferring to make the attempt in the same way that Star Pointer gained the world's record of 1:59¼ at the Readville track seven years ago. This is the present record with the runner or pacemaker going at one side. Dan Patch, in 1902, paced a mile in Readville in 1:59¼ under similar conditions, but as he went to beat that time it was recorded as a losing performance. Since then Dan Patch has gained a record of 1:56, but this mark was made with a running horse in the lead.

It was a little after 4 o'clock when Audubon Boy tried for the record. The first quarter was made in 0:29 and the next in 0:28½, making the time for the

track, Sept. 27th, 1894. He won the race for yearling trotters August 17th in San Francisco, with five starters, time 2:28 and the race for yearlings at Woodland August 27th, time 2:26, with three starters. He died last year in the East. He was by Advertiser out of Beautiful Bells.

F. M. NORTHUP, San Jose—We learn that the mare Vamoose you inquired about last week, while not registered in the Stud Book is by Prince of Norfolk. She had three foals, one by Servitor, one by imported San Pedro and one by imported Del Mar.

LIVINGSTON, MONTANA, RACES.

(Meeting Sept. 4th to 9th, 1905.)

2:35 pace, \$200—Sherlock Holmes won, Floy Direct second. Best time 2:16¾.

2:18 pace, \$250—Reta Huber, by Bozeman, won first and third heats; Carlshad won second heat; Gold Dust and Billings G. also started. Best time 2:13½.

2:40 trot, \$150—Ritchie Baron, by Baron Wilkes, won second and third heats; Sugar Foot won first heat; Robbie and Kellogg O. also started. Best time 2:21.

Three year old trot, \$250—Patsy Rice, by Gold, won both heats; The Maid second; Bill Nevitt third. Best time 2:35½.

Special trot or pace, \$250—Ed Madden won both heats; Albert R., Marle and Charles B. also started. Best time 2:22½.

Special trot, \$200—Macey Medium won both heats; Kellogg O., Dixie and Edna S. also started. Best time 2:34½.

Three year old pace, \$200—Moy won both heats; Copper Shell and Red Bird also started. Best time 2:21.

2:15 pace, \$300—Gold Dust won second, third, fourth and fifth heats; Inferna, by Diablo, won first heat; Modicum and Etta V. also started. Best time 2:14.

2:25 trot, \$200—Ritchie Baron, by Baron Wilkes,

FAUST BY APTOS WILKES

Matched to Trot Against Daisy May at Alameda Oct. 15th for \$500 a Side

half mile 0:57½. When the time was announced the crowd cheered. The third quarter was reached in 1:27½, but before this it was seen that whatever the time of the mile Audubon Boy would have to make it entirely unassisted, the pacemaker then being 100 yards in the rear. Gatcomb did not make a stirring drive at the finish and was 0:31¼ coming to the wire, making the time for the mile 1:59¼, just equaling Star Pointer's time, and giving Audubon Boy that mark, inasmuch as his attempt was for the purpose of beating 2:00¼.

Audubon Boy is a chestnut horse, foaled 1897 and took a record of 2:03¾ in 1902, when he was the heaviest money winning pacer of the year, his winnings amounting to over \$25,000.

His sire J. J. Audubon 2:19 is by Alcione 2:27, sire of McKinney, out of Dolly Pomeroy a producing mare by Highland Grey 824, a horse carrying the blood of Black Hawk 5 and Hambletonian 2. The dam of Audubon Boy is the great brood mare Flaxy, dam also of Royal R. Sheldon 2:04¼ and Red Blm 2:16¼. Flaxy is by Bourbon Wilkes, (son of Geo. Wilkes and the great brood mare Favorite by Abdallah 15), grandam Kit by Clark Chief 89. Few horses are richer in producing blood than Audubon Boy, one of a half dozen horses—two trotters and four pacers—that have beaten two minutes.

ANSWERS TO CORRESPONDENTS.

DR. H. J. HAMMOND, Sacramento—The Year Book does not credit Shikwood Belle with any record, and she is not registered. She may have won a heat in the time mentioned, but the race was not reported to the American Trotting Register Association.

SUBSCRIBER, San Francisco—Dudley Olcott is registered in Vol. 10, his number being 14,830. He is by Albert W. 11333, dam Cecelia (dam also of Amelia 2:13¼) by Poscora Hayward 2898, grandam Creole by The Moor 870. Dudley Olcott's trotting record is 2:18¼. He was bred by Mr. J. B. Haggin.

ENQUIRER, San Jose—Yes; Adbell took the world's yearling record of 2:23 over the San Jose

won second and third heats; Iago won first heat; Sugar Foot also started. Best time 2:22½.

Free for all trot, \$200—Dr. Frasse, by Iran Alto, won second, third and fourth heats; Ritchie Baron won first heat; Lady Spokane also started. Best time 2:17.

Free for all pace, \$200—Jib, by Senator, won both heats; Alpha W. second. Best time 2:10.

BOZEMAN, MONTANA, RACES.

(Meeting, August 28 to Sept. 2.)

2:20 trot, \$1,000—Lady Spokane, by Bozeman, won first, second and fourth heats; Iago won third heat; Idol, Ritchie Baron and Sugar Foot also started. Best time 2:19¼.

2:25 pace, \$250—Floy Direct, by Direct, won second, third and fourth heats; Josephine D. won first heat. Best time 2:16¾.

Three year old pace—Moy won both heats; Coppershell, Red Bird and Albert R. also started. Best time 2:23.

Free for all pace, \$400—Alpha W., by Judge Norval, won three straight heats; Jib second; Modicum third. Best time 2:10½.

Rocky Mountain Stake for three year old trotters, \$300—Patsy Rice, by Gold, won two straight heats; Bill Nevitt and Red Britt also started. Best time 2:29¼.

Free for all trot, \$400—Dr. Frasse, by Iran Alto, won in straight heats; Idol, Lady Spokane and Montanus also started. Best time 2:19¼.

2:18 pace, \$1,000—Floy Direct, by Direct, won second, fourth and fifth heats; Sherlock Holmes won third heat; Rita Huber won first heat; Gold Dust, Billings G., Bob Ayers and Carlshad also started. Best time 2:14.

Dan Patch went against time at Indianapolis for a percentage of the gate receipts. There were over fifty thousand paid admissions and Mr. Savage's share was \$8,700 in cash.

NOTICE.—GREATEST Money Maker on earth Legitimate; guaranteed. Surely risk postal for particulars. Address A. W. COURCHAINE, Agent, Port Clinton, Ohio.

NOTES AND NEWS.

Three new 2:10 trotters in one race is pretty close to the record. Pat Ford, Belle C. and Tom Miller, Jr., went in at Galesburg in the six heat 2:15 trot.

Kalkar, the Kremlin three-year-old who raced at Readville, trotted the middle half of the first mile in 1:03¼ and was timed in 2:12½ in the second. John Young has turned him over to Geers, who will drive him in the Kentucky Futurity.

Sally Pointer by Sky Pointer and of Sister by McKinney, second dam Aileen by Anteeo, third dam Lou Milton, the dam of Lou Dillon, has reduced her record to 2:11.

Effie Powers 2:08¼, the pacing mare that is so old and has been racing so long that they call her "Auntie," was separately timed in 2:06½ in her first start at Hamline this year. She was foaled in 1890.

Colonel Delmar, 2:18¼, that has been winning races in New England, is a brother in blood to Major Delmar, 1:59¼. Both were sired by Del Mar, 2:16¼, and Wilkes Maid, the dam of Colonel Delmar, is a full sister of Expectation, the dam of Major Delmar, both being by Autograph, 2:16½, and from Miss Copeland, 2:25½, the dam of Copeland, 2:09¼.

The pacer Sleepy Tom is now thirty-eight years old and is probably the oldest racehorse in America. He is still full of the fire of colthood and is capable

An agent of Mr. A. R. Tewksbury, of New South Wales, recently purchased from L. E. Brown of Delevan, Illinois, a four months old colt by Parole, dam Meadow Queen, sister to Great Heart 2:12¼ by Mambrino Russell, second dam by Geo. Wilkes.

It is claimed there were 100,000 people on the grounds of the Michigan State Fair on September 14th.

Helen Norte 2:09¼ is Del Norte's second 2:10 performer. Del Norte is getting speed from all classes of mares, but has had very limited opportunities.

Dr. Frasse 2:12¼, son of Iran Alto 2:12¼, is now owned by Mr. J. T. Richards of Salt Lake City, and is not a back number by any means. Dr. Frasse started in the free for all trotting events at the Bozeman and Park County Fairs, Montana, this month, and won both events. At Bozeman the best time was 2:19 and at the Park County Fair the fastest heat was in 2:17.

Mr. J. S. Bransford of Salt Lake City, who purchased the pacer Tom Carneal 2:08½ at Los Angeles during the meeting there in July, also bought the pacer Cavaliero 2:09½ by Stanton Wilkes at the same time. Mr. Bransford will use both horses on the road.

Directum has five new standard performers this season so far.

At the county fairs over in Montana and Idaho, relay races for ponies owned and ridden by Indians are a feature of the programs. The following description of a race of this character at the Billings County Fair is from the Butte Inter-Mountain. The names given are not the names of the horses, but

Susie N. 2:09¼ seems to be headed for that \$20,000 Kentucky Futurity, but Katherine L., Bon Voyage, Rosa Bell and The Phantom will make it quite interesting for the fast daughter of Moko.

W. W. Mendenhall has sold his yearling filly Maytime by Stam B. 2:11¼, dam Elsie Downs, to Mrs. C. P. Bunch of Pleasanton. The sale price was \$350.

The types made us say in this department recently that Chas. Whitehead headed the list of "running" drivers on the California circuit this year. It should have read "winning" drivers.

T. P. Schwartz of Woodland, who is training several thoroughbreds at Emeryville, has recently broken to harness a yearling trotter by Marvin Wilkes (3) 2:18, dam Lucy B. 2:17¼ by Alex Button that weighs 1107 pounds without a particle of coarseness or grossness about him. The colt attracts much attention from horsemen who predict great things from him.

The whole fuss over the selling of pools at Cleveland, is said to have been politics. At the other places in the state where races are being held this year betting on the results is being done as usual.

Sweet Marie will probably go a mile against her own record of 2:04¼ at the Los Angeles meeting in November and if she reaches home in fair shape the fastest mile ever trotted in California will be seen. Alix 2:03¼ trotted the fastest mile ever seen in this State when she tried to beat her record at Los Angeles December 25th, 1894. She failed in the attempt to lower her mark as the mile was in 2:05½, but no other trotter has ever shown as fast a mile this side the Rocky Mountains. The fastest winning heat ever trotted in California is to the credit of Mr. A. B. Spreckels' mare Dione by Eros, whose mile in 2:07¼ at Santa Rosa July 4th, 1900 is the coast record.

Danube started in the \$5,000 trot at Libertyville, Illinois, last week but was just outside the money, being fifth in the summary. Advancer won the race in straight heats, best time 2:11¼.

Sweet Marie failed to lower the record at Readville on Friday of last week. The mare made two attempts but 2:05½ was the best she could do. In her first trial she broke at the third quarter and was not driven out.

Nathan Strauss is a pretty healthy ten year old. His two heats in 2:03½ at Columbus last week prove that. He is the fastest of the get of Director, an honor won last year when he paced in 2:04½. His dam is Mary Marshall 2:12¼ by Billy Wilkes, (son of Harry Wilkes and a mare by Clark Chief), second dam Bennie Snyder, dam of May Marshall 2:08¼, Major Marshall 2:08¼, etc., by Mambrino Abdallah 2201, third dam Hippedeclinch by Nick Monroe, son of Jim Monroe 835, fourth dam Mary by Bay Eagle, son of Grey Eagle. Nathan Strauss was foaled in 1895 and was bred by A. H. Moore of Calmar, Pa.

CARE OF STALLIONS.

As every reader knows there is a great deal of difference in the sureness of stallions as foal getters. The importance of this property in a valuable stallion cannot be easily overestimated. The degree to which it will be possessed by him will depend largely on the way he is handled.

As a rule the stallions which prove most sure as foal getters are those which have been fed and exercised with intelligence. This does not mean that all classes of stallions will be fed and exercised in the same way. The treatment in these respects that would be proper for a heavy Belgian or a Shire would not necessarily be proper for a Standard bred horse or a Coacher.

For instance, it might be advantageous to let the heavy horses take all the exercise that they require in a roomy paddock from day to day, where the light horses in some instances might be inclined to take too much exercise if allowed to take it that way. In some instances the draft stallions are so sluggish that it is necessary to set them to work moderately in order to keep them in the best condition for fulfilling the mission required of them.

With reference to food no set rule can be laid down. The hay and other products should, of course, be good in quality. Oats, bran, and a certain proportion of barley make a good grain ration with now and then a handful of oil meal. The digestion of the animal should be closely watched, as nothing will unfit a stallion more quickly for his work than derangement of the digestive organs.

In many instances stallions are injured by over feeding, especially when enough of exercise is not given. The feeding, however, should be sufficiently generous to keep the animal in good condition.—The "Farmer."

ROSEBURG, OREGON, RACES.

Sept. 13—Trot or pace, 3:00 class, purse \$75—Rockford won, Freak 2-3, Del Wilkes 3-2, Prince Vinnemont 4-4. Time 2:43, 2:36½.

Sept. 14—Trot or pace, purse \$75—Prince Vinnemont 1-1-2-1, Freak 2-2-1 2. Time 2:52, 3:02, 2:52, 2:51.

Sept. 15—Trot or pace, 2:40 class—Freak 2-1-1, Prince Vinnemont 1-2-2, Del Wilkes 3-3-3. Time 2:43, 2:41, 2:42.

Sept. 16—Trot or pace, 2:10 class—Del Wilkes 1-1, Prince Vinnemont 2-2, Freak 3-3. Time 2:48, 2:43.

DIRECTUM 2:05½

A California Bred Champion that is Making a Great Name as a Sire

of limbering up his creaking joints for a speedy furlong or two. He is the property of Peter Beeles of Puyallup, Washington, and made his debut on the turf as early as 1872. The old fellow can now work out a mile at a threeminute clip without apparent effort.

Bruce Sieberts, a horse raiser on the Cheyenne river in South Dakota, has just closed out his entire herd, putting in 500 horses at an average price of \$28 a head for animals of all classes.

In publishing the list of third payments in Futurity Stake No. 5 last week the following were omitted: Brown colt Lookout by Searchlight, dam Bee by Sterling and bay colt by Demonio dam Babe by Starlight, entered by E. D. Dudley of Dixon; also foal by Monterey 2:09¼, dam Lottie Parks by Cupid, entered by T. J. Crowley of San Francisco.

W. H. Morris of Santa Rosa, has sold his fine roadster Clipper W. 2:24½ by Lynwood W., to Mr. Kirkpatrick, a wealthy lumber dealer of New York who has been visiting this State during the past month. Clipper W. is a trotter and much faster than his record which was made at Santa Rosa this year. His dam is Thetis a mare by Robin, sire of Roblet 2:12 and Robizola 2:12¼.

At the Park County Fair, Livingston, Montana, the pacer Jib reduced his record from 2:12 to 2:19 in a race in which he defeated the mare Alpha W. by Judge Norval. Jib is by Senator 21305, a son of Echo, bred by J. B. Haggin at Rancho del Paso. At the Bozeman meeting Alpha W. defeated Jib and paced a heat of 2:10¼. This is pretty fast pacing for Montana.

of their Indian riders: "The Indian relay race was exciting. Simon Bull Tail won three out of four half-mile heats, with Stand on The Bull second. Two Stinks and Swallow Bird dropped out of the race in the second and third rounds, the former having been thrown when entering the stall. Both had refractory horses."

The Billings horses have been returned to Glenville, where they will be seen in the regular matinees of the Gentlemen's Driving Club until the end of the season. Doc Tanner will begin early to get them ready for the Old Glory sale in November.

Zombro 2:11, owned by Geo. T. Beckers, won first prize for aged standard bred stallions at the Lewis and Clark live stock show. Lord Kitchener 2:24½, by Zombro, owned by T. D. Condon, was second, and Nocturno, owned by G. A. Westgate, was third.

Bonnie Mc is trotting in hard luck in the three year old events on the Grand Circuit. She has started twice, and in both races has been distanced the first heat through breaks made just after getting the word. This filly has worked several miles better than 2:15 and has two minute speed.

Next Saturday will be Sonoma county day at the Ukiah race meeting, and three trotting and pacing events will be on the program. There will be a race of half mile heats, best three in five, in which Robizola 2:12½, R. W. P., and several other fast trotters will start. Last year over the Ukiah track Ole by Silas Skinner set the California trotting race record for a half mile track at 1:05¼ and it is thought this record will be lowered next Saturday over the same track.

OTHER PEOPLE'S OPINIONS

American Sportsman: For the first time in the history of harness racing Ohio horsemen have organized for self-protection, on a strictly non-partisan basis. The officers are distributed over the State, and are breeders of the light harness horse, business men of large affairs and gentlemen prominent in the matinee pastime. The organization is wide in its scope and non personal as well as non-partisan. It is intended to diffuse among the people a better understanding of the needs of the breeding industry of Ohio, and a better appreciation of the wants of those who breed and develop and race for both profit and recreation the light harness horse. It is also the purpose of this organization to prepare and circulate statistics showing the vast importance of the horse industry of Ohio from a commercial standpoint. The organization is also intended as an information bureau for all candidates for seats in the legislature of Ohio as to the wants of breeders, and horsemen, in matters of legislation. It would be well for the horsemen of other States to immediately perfect a similar organization, as the only way to get a square deal is to organize and fight for it.

American Horse Breeder: The vast superiority of Rysdyk's Hambletonian over all other stallions of his day as a perpetuator of extreme trotting speed, has long been conceded by every well posted horseman. It is becoming more apparent every season. This fact is strikingly illustrated in the new 2:10 trotters of the present season. Up to September 16th the number of new 2:10 trotters for 1905 was 18, and every one of the 18 trace in the paternal line directly to Rysdyk's Hambletonian, while 14 of the 18 are from dams that trace directly through their sires to Rysdyk's Hambletonian, and the dams of the other four also show a Hambletonian cross somewhere along the line, so that every one of the 18 is inbred to the Hambletonian strain.

The majority of these new 2:10 performers are considerably inbred to Rysdyk's Hambletonian, for 13 of them are by sires whose pedigrees show two or more crosses of that noted trotting progenitor, and 12 of them from dams that inherited two or more crosses of that famous son of old Abdallah. The sons of Rysdyk's Hambletonian that are most prominent in the pedigrees of these 18 new 2:10 performers are George Wilkes (2:22), Alexander's Abdallah, Electioneer and Dictator. One-third of the number, six, trace directly to George Wilkes in the paternal line, and six of the lot are from dams that are direct descendants of George Wilkes.

Five of the sires of these new 2:10 performers are direct descendants in the paternal line of Alexander's Abdallah, a horse that lived to be only 13 years old, and was got when Rysdyk's Hambletonian was only two years old. Katy Darling, the dam of Alexander's Abdallah, was only six years old when she produced him. The dams of three of these 18 new 2:10 performers also trace directly to Alexander's Abdallah in the male line. Two of these new 2:10 performers are by sires and one from a dam that trace directly to Electioneer in the paternal line and two are by sires that are direct descendants of Dictator. One each of the sires of the remaining three new 2:10 trotters are descendants respectively of Edward Everett, Happy Medium and Strathmore.

Next to the Hambletonian strain the most conspicuous one in the above trotters is that of Mambrino Chief 11. The number which are led by Hambletonian sires that inherited Mambrino Chief blood through their dams is 12. The dams themselves of 12 of these 2:10 trotters also show one or more crosses of Mambrino Chief. Most of the Mambrino Chief crosses come through Mambrino Patchen 58, Woodford Mambrino (2:21½), and old Dolly, all of which were from dams which inherited a near thoroughbred cross. The Seely's American Star cross is found in just one-half of these new 2:10 trotters.

It appears from the above that the Hambletonians, Mambrino Chief and Seely's American Star combination of blood-lines, well fortified by race-winning thoroughbred blood, is the most successful one for producing 2:10 trotters. It also seems to indicate that the Wilkes branch of the Hambletonian family is producing extreme speed with greater uniformity than any of its other branches. This apparent superiority of the Wilkes branch, however, is partly due to the fact that the number of stallions of Wilkes descent that are doing stud service is far greater than that from any other branch of the Hambletonian family. The Wilkes Electioneer Nutwood combination especially when the Wilkes is associated with a near Mambrino Patchen cross, is the cream of trotting blood.

Chicago Horseman: The kindly rivalry between Minnesota and Wisconsin in the State Fair line is working to the advantage of the breeders and owners of the light harness horse. The leading spirits of both institutions recognize the fact that the trotter and pacer is a big drawing card at the fairs and the consequence is that both are making greater efforts each year to secure the best in that line. Not only are all the best Western horses entered in the big stakes and purses but the success of the few Eastern men who have raced in the West in the past two years will undoubtedly encourage more of these to make entries in the future. It is a notable fact that no matter how great the attendance the larger portion of the spectators are to be found during the afternoon gathered about the race track. At both Hamline and Milwaukee the attendance during the past meetings has furnished new records at the gate. The State Fair at Michigan, too, has come to the

front with phenomenal crowds and when records of attendance are to be compared this institution will have to be reckoned with. Indiana's State Fair also furnishes a first class place for the racing of the light harness horse and Illinois promises to improve over its magnificent record in the past. It will not be long before these State Fairs will monopolize all the best horses in the West and it is noticeable that the horsemen had rather race for the rich purses offered at these places than to compete for lesser money where speculation is allowed. So long as these big purses are provided the horsemen will trouble themselves very little about the speculative feature of the sport. This will mean that the breeders can continue in confidence to raise colts on an extensive scale for they will find a ready market for the product.

American Horse Breeder: A number of trainers and owners signed a paper at Syracuse in which they declared that they would not henceforth enter their horses in three-in-five races. Just what effect this so-called "Syracuse Compact" will have on the future of racing remains to be seen.

There is no denying the fact that there has been a growing sentiment among trainers and owners the past few years favorable to shorter races. The canvass of the horsemen made by the breeder several years ago and as late as last spring shows that conclusively, if no other evidence were at hand to show it. Recognizing this sentiment, several of the associations have limited the heats to two in three or to three, but experiments, so far, would seem to have left these methods open to a question of doubtful expediency.

That there is good reason for reducing the number of heats in the extremely fast classes, such as free-for-alls, there can be little doubt, as here the horses have to be strung to their limit to win and the contestants are for the most part aged horses whose recuperative power is not as good as that of younger horses, but it should not be forgotten that there is another side to the question. Gameness in man or beast is a quality that every American admires, and it is, next to speed, the most important thing that breeders seek, and short races, heats, best two in three, or limited races of three heats, have a very decided tendency to put a premium on the sprinter as against the horse of stamina and endurance. It is true that the most interesting races have been those events of three-in-five heats, where the heats were split up and the contests prolonged. That three-in-five racing is popular with the public, too, in spite of its defects, there can be no doubt, as evidenced by the attendance at the Providence meeting which, for the past three years, has been the largest of any of the meetings in the Grand Circuit; and Providence has consistently adhered to races of three-in-five heats.

The worst feature of racing, from the owner's and trainer's point of view, as now conducted on the Grand Circuit, is, it seems to us, that there is no uniformity in conditions. One meeting offers a purse, for, say, two-in-three heats, in class 2:25 trot; the next town makes the same class for three in five and the next week it may be for three heats, and trainers are consequently at sea about preparing their horses. Any trainer will tell you that the preparation needed for a two-in-three race is quite different from that of a three-in-five race.

It seems to us that the plan adopted by the New England Trotting Horse Breeders' Association, of ruling out all horses that do not stand for the money at the end the third heat is a good one. It certainly works well in practice and has a decided tendency toward limiting the number of heats in a race.

AT OAKLEY PARK, CINCINNATI.

A fair crowd saw the first days' racing on Monday at the Grand Circuit meeting at Oakley Park. The Horse Review Futurity purse, \$7,000, was the feature of the card and was won by Susie N. the favorite, with W. A. Clark's Bon Voyage second. Bon Voyage succeeded in winning the second heat. Susie N. won first, third and fourth heats.

The two-year-old division of the Futurity went to Ed Custer, Vera Prodigal winning the first heat, in which Custer broke and finished fifth. Custer, however, had no trouble in winning the next two heats and the race.

In the 2:09 pace Stein, the favorite, won the first two heats. While going to the post for the third heat Ethel Mc threw her driver and ran away two miles. After she was stopped and brought back to the judges' stand the race was postponed until Tuesday on account of darkness. Summaries:

It required six heats to decide the \$10,000 Ohio Stake for 2:09 class trotters on Tuesday, the race finally going to Angiola who was back in the ruck in the three preceding heats. Zephyr won fourth money and trotted a good race. Lady Mowry was a starter but was drawn after the third heat. The unfinished pace from Monday was won by Stein.

The summaries:

The fastest heat of the year in a race was paced by Pan Michael in the free-for-all at Cincinnati on Wednesday. The mile was in 2:03. It was the first heat of the race, and the effort took so much out of Pan Michael that he was not better than sixth in the second heat and finished last in the third heat. Helen Norte got second money in the 2:14 class trot, winning the third heat in 2:10. Swift B. was third in the 2:15 pace Bolivar got a heat in 2:08, then Kruger took two in 2:08 and 2:12½, when the finish of the race went over. The summaries:

Jackson's Napa Soda does not tangle the feet.

AN OLD PACING QUEEN.

In 1867 when Warren H. Peabody was at the height of his fame, drawing the largest salary of any trotting horse trainer of that time, he said that he knew old Pocahontas could pace a mile in 2:00.

"Old Pocahontas was the greatest pacer that ever wore iron, bar none," he began. "There was not a horse of her day that could make her race. Hero was the best we had in those days and she distanced him. I saw that race. Charley Dimmick had brought her east and sold her for a big price, \$2500 was what he got. In those days \$250 was a big price for a pacer. They were not fancied at all in the '50s. Well, Jim McMann got her to train. Jim was a big blacksmith and weighed a good 200 pounds. He was a good fellow, but really knew little about training or driving. Now the idea was that if they could get a good match they must win her out in her first race. I guess they did it all right, but that was her first and last match in New York.

"At that time I had a pacer, Tom Wonder. He had a great flight of speed, but could not last. Tom could pace a quarter in 30, the half close to a minute, and then if I could get him to make the mile in 2:30 I was satisfied. Jim Jamison had a horse, Billy Hopper, something like him. I could drive Billy to the half close to 60 seconds and he would come home in 2:20. Well, I could not work Tom Wonder a mile with Pocahontas, nor even a half. McMann would let me get five or six lengths ahead in the last quarter and then come on. That old mare could eat Tom up in a furlong. I honestly think she could pace that last straight away quarter in 25 seconds. I told Dimmick about her speed years after and he said I was not far out of the way and said it would take Lexington to beat her for a mile.

"On the day of the race Hiram Woodruff came to me and wanted to know what I thought of it. I told him the mare would win. He said the Hero people said their horse was good for a mile in 2:20. Then I told Hiram that a two-minute gait couldn't beat her. 'I guess you're right,' was all he said, and the next thing I knew he was backing the mare. We had hard work to place our money. The two went away and that was all there was to it. Hero broke at the first quarter. In the back stretch the mare fairly flew and it seemed to me as if Hero was a quarter of a mile behind at the upper turn. Just then McMann looked back and tried to pull up. There was a great cloud of dust and it looked as if the old mare might give Hero a chance. All down the home stretch Jim McMann tried his best to check the old mare. I guess he stopped her some. Now Jim was very strong, but he could do nothing with the mare. Hero was way back when she won, in 2:17½.

"I waited until I met Jim and asked him what he was trying to do. I told him that had I done the trick he would have said I was a fool. Now we wanted it a close race and were looking for another match. I will always remember Jim McMann as we walked up the stretch. He looked as if he had lost his best friend. 'Warren,' said he, 'I couldn't help it. I didn't think we were going faster than a 30 gait up the stretch, and I thought Hero was close up. From the upper turn to the homestretch I tried to hold her up. You saw me try all down the home stretch. How fast did we come the last quarter?'

"I told him in 35 seconds. He looked glum. 'If I had just given the old mare her head it would have been in 30 seconds,' he said. We had reached the head of the stretch and he pointed to the turn. There were two ridges of sand three or four inches high. It looked like a sleigh track when you turn a corner in light snow. It was where the wagon wheels had sledged. 'It can't be helped,' said Jim. 'No more chances for a match. Great God! How fast she is.'

"He was right. When anyone talked about a match with Pocahontas Hiram Woodruff would say, 'You can't beat her with a two-minute horse.'

"Now Pocahontas could have paced that mile in 2:12 certain, maybe in 2:10. The wagon weighed 180 pounds, Jim McMann over 200. We used to allow five seconds for a wagon with a 2:30 horse. Dexter could trot a mile in harness in 2:17¼ and his best time to wagon was 2:24. The faster you go the greater the allowance. Call it seven or eight seconds and that day she could have pulled a sulky in 2:04 or 2:05. I guess there is a good five seconds difference in the tracks of 1855 and 1890. And that bicycle sulky is worth six seconds, so they say. With modern tracks, training and sulkies, Pocahontas could pace a mile in 1:56, maybe faster."

Two years after this story was told Budd Doble was shown Peabody's reasoning. Always careful, very conservative, the Nestor of trainers said: 'Warren is right the old mare was very fast, very fast. She was before my day and I have often heard it said she was a two-minute horse. I am not prepared to say she was as fast as the old man claims. One day he told me Johnson was not as fast as she and I don't know but what he is right. One thing is certain. We have not gained so much in speed as many think. I take out Nancy Hanks this spring. Her mark is 2:09. She is going to beat it. How much I can't tell. But what trotter, what pacer, with the exception of Pocahontas, was ever able to give his greatest opponent the handicap of a wagon against sulky and beat him? Yet she distanced the best with ease. I am not so sure but what she was the greatest of all pacers. Warren used to know better than any of us. He saw her and was a good trainer and driver at that time.'

In 1896, just after Billy Andrews had given John R. Gentry his work-out over the old Buffalo Driving park in 2:03 (it would have been a good second faster if the runner hadn't stopped last quarter), Frank Baldwin said:

"He is a good horse, but I have seen a faster pacer."

Gen. John Turner turned and blandly said: "Frank, you must be thinking of old Pocahontas. I have heard it said she could pace in two minutes. What is there in the story?"

"Well," said Mr. Baldwin, "I'll tell you what I know. I saw her down in New Orleans. George Effner was there, too; rode Tippecanoe against her. Charlie Dimmick drove her. Dimmick told us he was going to take the mare to New York and sell her for \$2500. He said the Eastern people would give it if she could show a mile in 2:05."

"That was a big price in those days for a pacer," calmly remarked the General. "It is a good price now. Gentry sold last winter for \$6500. Forty years ago we didn't think much of them. A big price in those days, a mighty good price."

"Good as \$25,000 now," declared Baldwin, "the next time I saw Dimmick he was in Cincinnati. I asked him about the mare. He showed me \$2500 and said: 'She did all they asked, and more, too.'

"Well, if I said I was to get \$2500 for a horse if she could pace a mile in 2:05 and got the money to show for it I don't know, I shouldn't be telling the truth," mildly commented the General.

In the fall of 1896 Frank Baldwin and George Effner were to be found every afternoon at the old livery stable on Franklin street. On the day after John R. Gentry beat Robert J. at Fleetwood the two got to talking about Pocahontas.

"What did she look like, Frank?" asked Mr. Effner.

"She was a big mare, with four white feet and a big white face, and a golden chestnut. Her appearance was all thoroughbred. She looked more like old Lexington than any horse I ever saw. She had a big barrel, but then she was carrying Tom Rolfe at the time; foaled him when on the boat on the way to St. Louis. Her gait was peculiar, close, and her stride was very long. She paced just the way Dexter trotted. Never saw but one horse like her. That was Buffalo Girl. She traced to Pocahontas, you know. How is it? Do I get her right?"

"You remember her pretty well. About all I'll add to it is that she was very rangy. Frank, I've got her picture to a sleigh. Come in and see it."

He led the way into the stable office and pointed to a picture on the wall. There was the old mare to a sleigh. A big chestnut, coming through the bunch with that great stride and the high knee action peculiar to Dexter.

"Looks like her," commented Baldwin, and Effner nodded and added. "She was very fast. I never knew how good she was for though I raced against her, Dimmick was very wise. He told me not to bet against her beating 2:10."

"She was fast enough to beat anything of her day, and I guess she would give Gentry a good race. I'd bet on her."

"I think I would, too."

Pocahontas had her peculiarities. She had two gaits only, a pace and a walk. Cicero J. Hamlin saw her when she had been retired. "I watched her get over a pair of bars half way down," he said. "She hitched over them and then went pacing across the field. It was pretty fast, but not a two-minute clip."

Charles Dimmick spent his old age in Kentucky and frequently claimed that Pocahontas had paced for him a mile in two minutes. Of course many ridiculed the statement. But a man named Horatio Gaines, of St. Louis, at one time printed a signed statement that one morning in the fall of 1854 he went to the old Queen City track in Cincinnati and timed Pocahontas in a trial. He said that the pacer was accompanied by a runner, which carried her to the half in 1:10 and then quit. There the mare was given her head and came to the half in 58½ seconds. Mr. Gaines stated the Queen City track was over a mile and slow at that. He added that he would not be surprised to hear that she had paced a mile over any of the fast New York tracks in two minutes or better. Mr. Gaines expressed a belief that a half in 58½ was sufficient to carry the mare way under the two-minute mark.

Pocahontas was well bred. She was by Iron's Cadmus, a son of Cadmus, by American Eclipse. Cadmus was a thoroughbred and, it is claimed, a fair race horse. Iron's Cadmus was taken to Ohio. The dam of Pocahontas was by Big Shakespeare, a son of Shakespeare.—Horse World.

LAST DAY AT COLUMBUS.

The Columbus Grand Circuit meeting came to a close on Friday, of last week. Nathan Strauss, the ten year old gelding by Director paced the fastest race of the circuit this season in the free for all, stepping two heats in 2:03½. The races resulted as follows:

Trotting, 2:19 class, consolation, purse \$2000.
Angle, ch. m. by Axtell.....(Samnders) 2 1 1
Clarita W., ch. m.(Geers) 1 2 2
Time—2:12¼, 2:10½, 2:12.

Pacing, free-for-all, purse \$1200.
Nathan Strauss, b. g. by Director..(Thomas) 1 1 1
Nervolo, b. h.(A. McDonald) 4 4 2
Frank Youkam, b. g.(McGrath) 2 5 4
Dan R., ch. g.(Benyon) 6 2 6
Locanda, br. h.(Snow) 3 3 5
Baron Grattan, b. g.(Geers) 8 8 3
Major C., b. h.(Jolly) 5 7 8
Belle Mc., b. m.(Hogan) 7 6 7
Time—2:03½, 2:03½, 2:07.

Trotting, 2:08 class, purse \$1200.
Kid Shay, b. g. by Nitrogen.....(Rosemire) 1 1 1
Turley, br. g.(Geers) 2 5 2
Robert Mc., b. g.(Jolly) 5 2 5
Jim Ferry, g. g.(Grauk) 3 3 3
John Caldwell, b. g.(Snow) 4 4 4
Hardwood, blk. g.(Benyon) d
Time—2:07¼, 2:07½, 2:08½.

VOLUNTEER SEES KLATAWAH 2:05½.

Without doubt one of the greatest horses ever bred in California is Klatawah, whose three-year-old record of 2:05½ pacing has never been beaten since he made it in 1898. He was bred at Oakwood Park Stock Farm and, as all our readers know, is by Steinway, the stallion which Sam Gamble selected as premier for that great breeding farm, and out of Katie G. by Electioneer, a mare that Mr. Gamble also selected to mate with Steinway. Katie G. has proved herself one of the greatest of broodmares and is beyond question Electioneer's greatest daughter. In last week's Horse Review, Volunteer gives an account of a visit to Danforth Farm, Illinois, where Klatawah is now owned, and the following is an extract therefrom:

As he stands today I consider Klatawah one of the most superb living specimens of the light harness stallion. In general conformation he approaches nearer the type of the blood horse than any others of his breed—save one or two—that I can recall. None of his photographs begin to give an accurate idea of him. He lacks but a fraction of an inch of sixteen hands and stands well off the ground. Involuntarily one is apt to look at a horse's head and legs first. Klatawah's head—which surmounts a long, elegantly crested neck—while distinctly masculine, is equally handsome. It is lean and bony, without a suggestion of grossness, the muzzle taper, nostril delicately modeled, eye beautiful and ear of perfect shape and the smallest I can recollect of seeing on a 16-hand horse. His expression, as you look him full in the face, is amiability itself and that is his temperament. To strangers—or, at least, to me—he was affability personified. He could be driven on the road with safety by any woman at all clever with the reins, being quite fearless.

His limbs, when one considers that he was trained to a record of 2:18½ at two and 2:05½ at three, would surprise an exacting critic. They look, almost, as if he never had been trained. Structurally they are models; flat and cory, the bone itself is heavy, yet the limbs appear slim—which is the hall-mark of true quality in a high-bred horse. The hind leg is unusually straight—a point which some judges object to, but one that I personally prefer. The hook could not be improved.

Comparatively, I should call Klatawah, while he does not lack in length, a short, rather than a long-bodied horse. The lines of his body are beautifully proportioned, and unite with those of his entire physique to produce a total impression of symmetry rare in a stallion of any breed. This symmetry is as clearly apparent whether you look at him broadside, from the front or from the rear—a test so severe that it is seldom a horse emerges satisfactorily from it.

The impression was intensified when I got up behind him. Many a horse—most horses, in fact—present a certain ungainliness from that point of view. Klatawah, I am almost tempted to say, looks better from that angle than any other. His carriage is princely—not flashy, but a aristocratic. He is a natural trotter and can pull two men in a buggy a 2:20 gait with scarce an effort. I rode some six miles behind him and never, during that time, did he take a step on the pace. His trotting gait is bold, free and buoyant, and I have no doubt that he could be given a very fast trotting record.

To complete my description I should add that Klatawah is a rich bronze bay with black points, a small star and the off hind ankle white half way to the hock. His tail is long and full, but his mane is light rather than heavy—again an eloquent testimony of "blue blood." He is a horse of rugged health and great constitutional vigor.

Editor Parlin of the American Horse Breeder says: "A suggestion to breeders that has often been repeated by the writer during the past twenty-five years is mate your best mares of Morgan descent with the best stallions of the Hambletonian family within reach. Keep right on doing so, whether the aim may be to produce first-class roadsters or first-class race winners. This combination of blood is more likely to produce both than any other that has yet been discovered."

Mr. E. D. Dudley of Dixon advertises for sale the handsomest two-year-old Dablo colt in California. He is out of the mare Babe by Dawnlight, second dam the famous mare Bee by Sterling, that is the dam of McFadyen (2) 2:15½, third dam Flash, dam of Javelin 2:08½, etc., by Egmont. This colt is paid up on in the Breeders' Futurity and is an excellent prospect.

Stamboulette 2:10½, owned by Mr. Richardson, is now at Fresno and will probably make the season of 1906 there at the Fresno track. This son of Stamboul is one of the grandest looking stallions in the State and can show a quarter in 30 seconds almost any time. No better gaited trotter ever wore harness and his breeding is very choice.

Nutwood 2:18¾ is now credited with 135 trotters and 36 pacers that have made records in standard time, a total of 171. Onward 2:25¼ has to his credit 145 trotters and 41 pacers, a total of 186, which is the greatest number of standard performers got by any sire that ever lived.

The most severe disappointments of the season are the trotters Country Jay 2:10, that was sold early in the season for \$10,000, and Deloree 2:09¼, for which her present owner paid \$18,500 a few weeks since. Both have gone lame.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

WILD RICE SEED.

The United States Department of Agriculture recently published a bulletin on wild rice seed, by J. W. T. Duvel, Assistant in the Seed Laboratory of the Bureau of Plant Industry. The subject is one that has been a matter of much interest to many of our sportsmen. Efforts have been made to grow wild rice at various places on the coast, but unless we are very much mistaken, every attempt heretofore has proven barren of results. Mr. Achille Roos has lately received a shipment of rice seed from a point in Ontario, which we believe has been properly handled to insure germination in the brackish or fresh water ponds of the San Pablo Gun Club. The seed was gathered but a month or so ago. It is to be hoped the effort will be a successful one. A large quantity of the seed, was sometime ago planted in the ponds of the Elkhorn slough preserve of the Empire Gun Club. Unfortunately the seed was too dry when planted for not a single blade of wild rice from that planting ever gladdened the eyes of the sportsmen interested. The data compiled by Mr. Duvel is the following:

Wild rice is considered one of the most important foods for wild ducks and other waterfowl, and a large number of inquiries have been received from members of gunning clubs throughout the United States asking where good, germinable seed can be secured. It is quite generally recognized that wild rice seed loses its vitality if allowed to become dry, and better methods of storing the seed during the winter have long since been demanded.

The results of investigations begun two years ago show that wild rice seed can be handled without any deterioration in vitality if it is harvested and stored according to methods outlined in the present paper.

The distribution of wild rice is now reported from New Brunswick and Assiniboia south to Florida, Louisiana, and Texas. There are, however, comparatively few localities in which it grows abundantly.

Good reasons exist for assuming that this area can be extended to include all fresh-water lakes, as well as swamps and river bogs, where the water does not become stagnant, throughout the whole of North America south of latitude 55 degrees north. Wild rice also grows luxuriantly along the lower parts of many rivers of the Atlantic Coast States, the waters of which are affected by the action of the tide to a considerable degree, and consequently contain an appreciable quantity of salt. It has been shown that the maximum degree of concentration of salt water in which wild rice plants can grow successfully is equivalent to a 0.03 normal solution of sodium chlorid. This concentration corresponds to 0.1755 per cent by weight of sodium chlorid, which is sufficient to give a slight salty taste to the water.

While it is well recognized that the habitat of the wild rice plant is in shallow fresh water, it is now known that it will grow luxuriantly in water containing little less than two-tenths of 1 per cent of sodium chlorid. Occasional plants have been found growing in water which contained, for short periods at least, nearly double that amount of salt. These facts indicate the possibility of a much wider range of conditions to which this plant may be subjected without hindering its development. It is not beyond the range of possibility—indeed, it is quite probable—that by careful selection plants may be obtained which will thrive on soil that is comparatively dry, at least in places in which the water can be drawn off gradually during the latter part of the growing season.

In September, 1904, Mr. G. C. Worthen, of the Bureau of Plant Industry, collected a cluster of wild rice plants which were growing on the Potomac Flats, near Washington, D. C., in soil which was sufficiently dry to permit the use of a 2-horse mowing machine for cutting down the rank growth of vegetation. This was newly made land, and in all probability the seed giving rise to this cluster of plants was pumped in with the dirt from the Potomac River the year previous.

This amphibious type once established, it will undoubtedly carry with it a strain of seed which can withstand considerable drying without any marked injury to its vitality. Such being true, the methods and difficulties of propagation from seed would be greatly simplified.

Simultaneous with establishing an amphibious type should come the selection of seed plants which are capable of retaining their seed until the larger part of it has reached maturity. These two steps once made, the future of wild rice as a cereal will be assured.

The greatest difficulty to be overcome in extending the area for growing wild rice is the poor germination of the commercial seed. Inasmuch as wild rice constitutes one of the most important foods of wild ducks and other wild waterfowl, many individuals and most of the gunning clubs east of the Rocky Mountains have been asking the question, How can we propagate wild rice from seed in order to establish better feeding and fattening grounds for our game birds?

The many failures in the propagation of wild rice from seed have been due to the use of seed that had become dry before sowing, or to the fact that the seed when sown fresh in the autumn had been eaten by ducks or other animals or was carried away by heavy floods before germination took place.

It is now very generally known that the seed on wild rice, if once allowed to become dry, will not germinate, save possibly an occasional grain. In its natural habitat the seed, as soon as mature, falls into the water and sinks into the mud beneath, where it remains during the winter months, germinating the following spring if conditions are favorable.

Heretofore the plan generally followed, and the one usually recommended by those who have given some attention to the propagation of wild rice, was practically that of natural seedling; that is, to gather the seed in the autumn, as soon as thoroughly mature, and, while still fresh, to sow it in 1 to 3 feet of water.

It must be remembered that the bulk of the seed remains dormant during the winter, germinating first the spring after maturing; consequently, with but few exceptions, fall seeding is unsatisfactory and unreliable. Fall seeding is likely to prove a failure for three reasons: (1) Wild ducks and other animals of various kinds eat or destroy the seed in considerable quantity before it has had time to germinate the following spring; (2) much of the seed is frequently covered so deeply with mud that washes in from the shore during the winter that the young plants die of suffocation and starvation before they reach the surface; (3) in some cases a large quantity of the seed is carried away from the place where sown by the high waters and floating ice prevalent during the latter part of the winter and early spring.

In exceptional cases these difficulties can be overcome; under which circumstances autumn sowing may be preferable to spring sowing. In the majority of cases, however, much better results will be obtained if the seed is properly stored and sown in the early spring, as soon as the danger of heavy floods is passed and the water level approaches normal.

In sowing the seed considerable care must be exercised in selecting a suitable place, securing the proper depth of water, etc. Good results can be expected if the seed is sown in from 1 to 3 feet of water which is not too stagnant or too swiftly moving, with a thick layer of soft mud underneath. It is useless to sow wild rice seed on a gravelly bottom or in water where the seed will be constantly disturbed by strong currents.

Previous to this time, save in a few reported cases, the seed which was allowed to dry during the winter and was sown the following spring gave only negative results. It is now definitely known that wild rice, if properly handled, can be stored during the winter without impairing the quality of germination to any appreciable degree, and that it can be sown the following spring or summer with good success.

The vitality of wild rice seed is preserved almost perfectly if kept wet in cold storage. Nature's method of preservation. This method of storage implies that the seed has been properly harvested and cared for up to the time of storage. The seed should be gathered as soon as mature, put loosely into sacks (preferably burlap), and sent at once to the cold-storage rooms. If the wild rice fields are some distance from the cold-storage plant the sacks of seed should be sent by express, and unless prompt delivery can be guaranteed it is not advisable to send by freight even for comparatively short distances. It is very important that the period between the time of harvesting and the time when the seed is put into cold storage be as short as possible. If this time is prolonged to such an extent as to admit of much fermentation or to allow the seed near the outside of the bags to become dry during transit, its vitality will be greatly lowered.

It is not practicable to give any definite length of time which may elapse between harvesting and storing, inasmuch as the temperature, humidity, and general weather conditions, as well as the methods of handling the seed, must be taken into consideration. Let it suffice to say, however, that the vitality of the seed will be the stronger the sooner it is put into cold storage after harvesting.

As soon as the seed is received at the cold-storage plant, while it is still fresh and before fermentation has taken place, it should be put into buckets, open barrels, or vats, covered with fresh water, and placed at once in cold storage. If there is present a considerable quantity of light immature seed or straw, broken sticks, etc., it will be profitable to separate this from the good seed by floating in water preparatory to storing. The storage room should be maintained at a temperature just above freezing—what the storage men usually designate as the "chill room."

When taken from cold storage in the spring the seed must not be allowed to dry out before planting, as a few days' drying will destroy every embryo.

Seed which was stored under the foregoing conditions from October 19, 1903, to November 15, 1904, 393 days germinated from 80 to 88 per cent. Another lot of seed, which was stored on October 6, 1904, and tested for vitality on April 17, 1905, germinated 79.8 per cent.

The foregoing conclusions are based on the results obtained from two series of experiments as follows:

In October, 1903, a box of wild rice seed was received from Ontario, Canada. This seed, as soon as gathered was loosely packed in moist sphagnum and sent by express to the Seed Laboratory of the United States Department of Agriculture. After a few days, while it was yet moist and before any fermentation had taken place, the seed was divided into four lots

for special treatment, as follows:

(1) Seed submerged in water and placed in cold storage at a temperature of 32 degrees to 34 degrees F.

(2) Seed submerged in water and placed in cold storage at a temperature of 12 degrees F. The seed was soon embedded in a solid mass of ice and remained so until samples were taken for test.

(3) Seed, without the addition of water, put into cloth bags and kept in cold storage at a temperature of 32 degrees to 34 degrees F.

(4) Seed, without the addition of water, put into cloth bags and kept in cold storage at a temperature of 12 degrees F.

In October, 1904, a second consignment of seed was received from Minnesota, and the following additional storage experiments were made by Mr. C. S. Scofield, of the Bureau of Plant Industry.

(5) Seed submerged in water and placed in cold storage at a temperature of 32 degrees to 34 degrees F., as in No. 1.

(6) Seed submerged in water and placed in cold storage at a temperature of 12 degrees F., as in No. 2.

(7) Seed submerged in water in a galvanized-iron bucket and stored on the roof of the laboratory building. The water was changed daily when not frozen.

(8) Seed submerged in water in a galvanized-iron bucket and stored on the roof of the laboratory building, as in No. 7. In this case the water was not changed save to replace the loss due to evaporation.

(9) The conditions for No. 9 were the same as those for No. 8, except that air was forced into the water daily when not frozen solid.

Samples of seed were taken from the different lots and tested for vitality at irregular intervals throughout the time of storage, which, in the former series, extended over a period approximately thirteen months and in the latter series over a period of little more than six months.

Experiments Nos. 1 and 5.—The seed which was submerged in water and stored in the "chill room" showed no deterioration in vitality. The results of the final tests gave a germination varying from 79.8 to 88 per cent. This is practically Nature's method of preserving the vitality of the seed during the winter.

Experiments Nos. 2 and 6.—The seed which was submerged in water and stored at a temperature of 12 degrees F. was all killed before the spring following the date of storage. Soon after being placed in storage the water was frozen solid and the seeds were embedded in a mass of ice, in which condition they remained throughout the experiment, a portion being cut out from time to time for germination tests. The complete loss of vitality in these two lots of seed is attributed not to the freezing directly, but to the thorough desiccation as a result of the continuous low temperature.

Experiments Nos. 3 and 4.—The samples of seed which were stored in cloth bags at the temperatures of 32 degrees to 34 degrees F. and of 12 degrees F. had, for all economic purposes, entirely lost their vitality. The average percentage of germination, as shown by the 37 tests made from each of the two lots, was less than five-tenths of 1 per cent.

Experiment No. 7.—The seed which was submerged in water and stored on the roof of the laboratory building, the water being changed daily, showed a good percentage of germination when the last vitality tests were made. If only a small quantity of seed is desired for the spring planting and cold storage can not be readily secured, good results may be obtained by this treatment; but it is much less certain and probably more expensive than keeping the seed in cold storage, and for this reason is not recommended. The success of this method will likewise depend largely on the temperature of the water.

Experiments Nos. 8 and 9.—On April 22, 1905, samples taken from each of these two lots of seed showed a marked deterioration in vitality. Thoroughly mixed samples from No. 8 showed a vitality of only 58 per cent, while No. 9 had deteriorated to 14.3 per cent.

Too much care can not be given to the matter of packing the seed for transportation, for unless the packing is properly done the vitality of the seed will be destroyed during transit. What is here said applies to fresh seed which is to be sown in the autumn, as well as to seed which has been kept in cold storage during the winter. It must not be forgotten, however, that the vitality of cold-storage seed is more quickly destroyed on drying than that of fresh seed.

For transportation the seed should be carefully packed, with moist sphagnum, coconut fiber, or fine excelsior, in a loosely slatted box. If the time of transportation does not exceed five or six days no special precautions need be taken as to the temperature. During the period of transportation it is quite probable that some of the seed will germinate, but if sown at once growth will not be retarded and the roots will soon penetrate the soil and anchor the young plants.

If the time of transportation is necessarily long, it is recommended, if the best results are desired, that some provision be made for a reduced temperature. The nearer the temperature approaches that of freezing the better. It has been demonstrated, however, that a fair percentage of seed will remain germinable for a considerable time if packed as above described.

On October 10, 1904, Mr. C. S. Scofield sent a small quantity of wild rice, packed in moist sphagnum moss in a well-ventilated box, to Doctor De Vries, of Amsterdam, Holland. On October 14 or 15 this box was placed in cold storage on the steamer in New York Harbor. The box of seed was received by Doctor De Vries in good condition on November 2, twenty-one days after the seed was packed for shipment.

The samples were tested (1) between folds of blotting paper—our regular method for testing the germination of most seeds—and (2) in water. Nature's method of sowing wild rice seed. The latter method gave much better results and was the one finally adopted for the laboratory tests. The seed should be covered with water, the water in the dishes to be changed daily.

Plate I shows the importance of making the germination tests in water, as described in the foregoing paragraph. The seed was covered with water and placed in a germinating chamber maintained at an alternating temperature of 20 degrees C. (68 degrees F.) for eighteen hours, and 30 degrees C. (84 degrees F.) for six hours, until the majority of the seeds had germinated. At this stage the dish containing the seeds was transferred to the worktable, which was exposed to the temperature of the laboratory—approximately that of a living-room. The water in the dish was changed daily during the period of germination, and water was afterwards added at irregular intervals to replace the loss by evaporation.

Germination tests were made at constant and alternating temperatures, ranging from 15 degrees to 35 degrees C. (59 degrees to 95 degrees F.). While no effort was made to show the minimum and maximum temperatures of germination, the percentage was somewhat reduced at a constant temperature of 35 degrees C., and the maximum is not much above that. All of the other temperatures gave good results. The lower temperatures, however, were slightly more favorable than the higher. These facts are valuable to show that the wild rice plant can thrive in either warm or cold water, but better, perhaps, in northern than in southern latitudes.

Summary.—(1) Under no circumstances should wild rice seed which is intended for planting be allowed to dry. Dried seed will germinate but rarely and should never be sown.

(2) Wild rice seed can be stored without deterioration if it is gathered as soon as matured, put into barrels or tanks, covered with fresh water, and, before fermentation has set in, stored at a temperature of 32-34 degrees F. Seed treated in this way germinated as high as 88 per cent after being in storage 393 days. Fresh seed seldom germinates better, and usually not so well.

(3) After the seed is taken from cold storage it should not be allowed to dry. The vitality of cold-storage seed is destroyed on drying even more quickly than that of fresh seed.

(4) For transportation the seed should be packed in moist sphagnum, cocoanut fiber, or fine excelsior. If not more than five or six days are required for transit, no special precautions need be taken for controlling the temperature; but if the time for transportation exceeds six days, provision should be made for a temperature sufficiently low to prevent marked fermentation. A temperature approximately freezing will give the most satisfactory results.

(5) Wild rice can be sown either in the autumn or in the spring. Spring sowing is preferable, thus avoiding the danger of having the seed eaten or destroyed by wild ducks or other animals during the fall or winter, or of its being buried or washed away by the heavy floods of late winter or early spring.

(6) Wild rice should be sown in the spring in from 1 to 3 feet of water which is neither too stagnant nor too swiftly moving, as soon as the danger of heavy floods is passed.

(7) Wild rice is of the greatest importance as a food for wild waterfowl, likewise a delicious breakfast food for man, and the area in which it is extensively grown should be extended. It will grow luxuriantly in either warm or cold water; furthermore, it can be grown successfully in water which is slightly salty to the taste.

(8) In determining the vitality of any sample of wild rice seed the germination tests should be made in water—the condition under which the self-grown germinates.

(9) The seed will germinate well at temperatures ranging from 15 degrees to 30 degrees C. The maximum temperature of germination is above 35 degrees C. (95 degrees F.), but better results are obtained at lower temperatures.

The seed of wild rice sometimes called Indian rice, or water oats (*Zizania aquatica* L.), has always been a very palatable food among the Indians, especially those of the upper Mississippi Valley. Of recent years wild rice has found a place on the menu card of some of our best American hotels. The rich and highly nutritious grains, together with the slightly smoky flavor it has when properly prepared, make it an extremely palatable article of diet. If it were not for the difficulties of harvesting the seed and preparing the finished product for market it is probable that wild rice would find a place in many American homes.

At present, however, the greatest interest in wild rice is created by the value of the seed as a food for wild waterfowl, particularly wild ducks. As a result of this interest the propagation of wild rice from seed has now become a question of considerable importance. That there are favorable districts for the growth of wild rice on the Coast is believed by a number of those interested, once a start has been made it is only a question of a comparatively short time when the much desired wild rice will be growing on many preserves, if not on wild rice farms as a market cereal.

GOSSIP FOR SPORTSMEN.

Waterproofing Silk Lines.—Not long ago I referred to some experiments I had made in attempts to waterproof soft braided silk lines. Up to that time I was not very well satisfied with the results, but since then I have used several silk and linen lines saturated for a brief time in a solution of paraffin and benzine, and am quite sure they have been im-

proved somewhat, or at any rate no harm was done, states a writer in a sporting goods journal.

An angling friend has suggested that I did not soak the lines long enough in the solution, but he believes that if they are soaked in it for twenty-four hours, then dried slowly, results should be quite satisfactory. This seems plausible to me, in view of the action of the line so far tried after saturation for a half hour or more.

I have fished in salt water with a small braided linen line saturated for half an hour in benzine and paraffin a month previously, and which seemed to be perfectly waterproof when used immediately after drying, but which became wet through using a short time. Subsequent use of this line surprised me, for it seemed to be improved a good deal, although when drawn through the fingers none of the paraffin came off the surface as at first. In long casts little water came in on the line when it was reeled in, and it would lie on the surface like a feather until strain was put on the bait. And although the business end of the line would get wet after continued use, it did not swell badly, as before treatment, nor did it seem to stick to guides and tips.

A favorite line of raw silk, used on a casting-rod, was also treated and used during a week's fishing. This is a very soft line, size "H," and soaked up water like a sponge before treatment. Since then, however, it shows some improvement—almost as much as the linen line referred to above. Fishing in waters in which there was considerable vegetable growth, either suspended in the water or on the surface, it did not seem to pick up matter to clog the tip or guides. Altogether, there seems to be some merit in the treatment. At any rate, it seems that if paraffin and benzine will waterproof tents and the like, why will the solution not be good for fishing lines? As an example, I have a triangular awning which was originally used merely to shade my tent from the sun's rays. It is common bleached muslin, or sheeting. It was treated more than three years ago as an experiment. It turned water then like a duck. Within a month it was used again in camp. As it was suspended tightly between three trees, and also guyed between all corners, after a heavy downpour of rain a barrel or so of water was caught in it and held until the weight was too much for one side or the other, when most of it would run off. But none of the water came through this thin muslin, which had alternately been carried in a wad in the bottom of duffle-bags, folded, whipped by the wind, etc., until one would think it little better than a sieve. Still, it is as soft and pliable as when it came from the store.

After the appearance of my previous communication on this subject Mr. J. E. Hindon Hyde sent me a small piece of a braided linen line that the manufacturers had waterproofed with a preparation on which he has secured a patent. He claims his preparation will not rot silk or vegetable fibres, and will withstand the action of the salts contained in salt water. The line from which the bit was sent me was cut had been submerged in Long Island Sound for six weeks, but he said he could not find that it had been injured thereby. It seems softer than an enameled silk line of equal size, and an examination shows that the waterproofing preparation penetrated to its core. I understand that the manufacturers have experimented with this line until they are satisfied with it, and that it will be in the hands of jobbers within a short time. It will be put up in coils on cards bearing two fishes, the trade-mark of the manufacturers, who do not sell lines in their own name, as they market all of their goods through the jobbers.

The braided silk lines called Saline, and sold under the trade-mark mentioned during the past year, are also treated under Mr. Hyde's patent, and were used in fresh water with success. Quite recently Saline enamel finish silk lines for use in salt water have been made, and it is my good fortune to own one. The claim of its makers, that it is absolutely unaffected by any alkaline substance, and will stand the ocean water as well as any fresh water, is a very strong one, but after using one of these lines for a week I like it very much. Mine is size "H," and it was used in salt water where there is much vegetable matter. Water does not affect the line at all, unless it improves it in casting. It is more flexible than an ordinary enameled line, picks up no foreign matter, and runs off the reel smoothly without balling up. One thing I have noticed, is the extreme sensitiveness of this line, the strike of a fish being communicated to the angler's hand very plainly through it. I hope it will wear well, for a line as small as this, which can be used in salt or fresh water, should prove a treasure.

Hunting in Shasta County.—Notwithstanding the deer shooting season is near its close knowing sportsmen are still getting bucks and enjoying healthful outings. A recent trip to the far recesses of the mountainous country of Shasta county made by a party of local sportsmen and associates, was a revelation in the nature of shooting and fishing possibilities to be found in a seldom visited district.

D. M. Hanlon and Frank P. Sheldon of this city, and Charles E. Mayfield, George Nelson and F. E. Shields of Sulsum made up a party of hunters who three weeks ago enjoyed a ten days' hunt in the mountains that was a memorable outing in many respects. The party journeyed to Castella by train, where they met Charles Loftus, an experienced mountain guide, who provided saddle horses and pack mules. Leaving Castella early one morning the cavalcade followed the "Tom Nell Trail" and made camp at 1:30 p. m., near the junction of Squaw and Tom Nell Creek, which streams were found to be teeming with splendid trout of good size.

The party made a stay of three days, enjoying the grand fishing to the utmost. On the advice of the

guide hunting was postponed until another location, in the heart of the rough country, fifteen miles east of Squaw creek was reached. The guide promised when that point was reached to provide a plethora of deer and bear hunting. Near the first camp many does and fawns were seen but bucks were too wary to show up to any extent. A slight tinge of excitement was vouchsafed the campers, for bear tracks were discovered all about the camp each morning, showing that bruin had scented the camp pots and had been nightly prowling for food scraps.

The hunters broke camp on the morning of the fourth day and struck out over an exceedingly rough country, ignoring trails and working east fifteen miles when a new camp was pitched in a hunting district that came up to the guide's laudatory description. The next morning Mayfield made the first kill, a large eight-point buck, Nelson evened matters by bagging a 250 pound black bear. Four big bucks and eight does were seen the first day. The following day Dan Hanlon dropped a fair sized buck and Sheldon and Mayfield worked their repeating rifles unsuccessfully at one of the largest black bears the guide had ever seen in that section. Sheldon claims the bear was large as a Pullman car. On the last day of the hunt the hunters saw and jumped more deer than any of them had ever seen before. The country seemed to be alive with venison. Sheldon, Nelson and Mayfield each killed a buck.

The party were soon satiated with deer hunting and had as much venison as they wanted, taking the smells out of their rifles they returned to camp not wishing to wantonly kill deer they could not use. Seventeen bucks were counted at different times standing and watching the hunters, none of the animals were over 300 yards distant, a number of these deer could have easily been killed. Having but one mule for packing out the venison, it would have been wasteful slaughter to have dropped any more bucks. One of the deer Sheldon killed had eleven points. Quail and grouse were very plentiful in the section visited, but were unmolested as the season for shooting these birds is not open until October 15.

Mr. Hanlon states that the hunting territory visited is one of the best combined fishing and hunting districts it has ever been his good fortune to get into.

Shark Fishing a Honolulu Sport.

One of Honolulu's most exciting pastimes is shark fishing. Large sharks abound off Honolulu Harbor, and a party of fishermen may usually count on bringing back one or two sea monsters from eight to fourteen feet long by going three or four miles from shore. The fish may either be harpooned or hooked, the latter method being the easier. The harpooning is more dangerous and more difficult.

The shark fishers need a small launch, a dead horse, some harpoons or hooks, and some large caliber rifles. The horse is sometimes killed a day or two before the expedition, as sharks are supposed to like their horse meat "high." This is not necessary, however, and is not advisable, for there is no special pleasure in dragging through the harbor a horse that has been dead long enough to really resent it.

The horse is tied at the end of a rope and left to float about sixty feet away from the launch out in the open sea, and then the wait for sharks begins. A shark will usually show up in a very short time. At a distance of sixty feet he is a long green object of indefinite outlines. He approaches the dead horse slowly, until a few feet away, and then veers off to one side and disappears. But he always returns. Over and over again, sometimes for an hour, he will circle about the dead animal, seeming to be as suspicious as any fox.

While the shark is making these repeated investigations the bait is slowly drawn toward the boat. Some interesting glimpses of the shark are obtainable during this process. He will slowly glide through the water up to the food, and then suddenly turn on one side and take a bite. If it is close enough one gets an idea of what he can do in the biting line. In an expedition last month dogs were used as bait, as a horse was not obtainable. Within three feet of the fishers on the boat a huge shark turned, opened his jaws, and seized the dog. A large dead dog was tied to the rope. There was a wriggle of the huge green-looking body, a splash of surface water and the shark moved on. The dog was bitten clean in half.

When harpooning is to be done, the bait is drawn gradually closer until the shark comes right up to the boat. The harpoon is plunged into him and battle begins. The shark will plunge for deep water and tow the boat at a rapid pace. His strength is extraordinary, and the fight is sure to be a long one. There is nothing for it but to tire him out, and the only way to do this is to let him struggle as he will. Gradually he is drawn nearer and nearer to the boat, and soon he is hauled to the surface in a condition approaching exhaustion. Then the rifles come into play, but at the first shot he will often carry the harpoon and rope off with him again and repeat the fight.

There is a spot under the gills, where the main artery is located, where a fatal wound can be inflicted with a large rifle bullet, but shooting in a rocking small boat is not likely to be accurate, and the spot is seldom reached until after firing several shots.

The sharks are more easily hooked than harpooned. From the side of the boat they may be seen swimming about below. The use of a box with a glass bottom makes possible a splendid view of them. On the occasion already referred to the other half of the bitten dog was placed on a large hook and let down among them. Through the glass a huge shark was seen slowly to approach, turn, and seize the bait. In some way or other the hook failed to catch, and the shark let go when the rope was jerked. But he came back and seized it again. Two men pulling as sailors

pull on a halyard, slowly drew him to the surface, where a fine view was had of his head and jaws, with their five rows of sword teeth. This fellow was settled after seven rifle shots.

Duck and Quail Plentiful—Reports from marsh and upland districts that have been under the surveillance of sportsmen, who are awaiting the 15th of October, are to the effect that both ducks and quail are plentiful, the breeding season for the latter game bird having been generally very favorable.

As to the ducks, early storms up north have already caused the appearance in the bay marsh districts of big flocks of northern migrants. In the home breeding grounds, about the bay counties district, the Sacramento, Yolo and San Joaquin, etc., mallard and teal, with a good number of sprig are reported to be very numerous.

At Mount Eden and about that section of the Alameda marshes, sprig are very abundant. In the Alviso marshes and further south in the Monterey marshes, ducks are also plentiful, particularly so on the Empire Gun Club preserve at Elkhorn Slough.

Should rain fall before the opening of the season, October 15th, there will be a scattering of the marsh and tule flocks that will cause the hunters much chagrin.

Eel River Fishing—Despite several statements in print that fishing in Eel river has been backward this season recent returning anglers from that famous stream are positive in saying that the fishing to be had within two weeks never was better for years past. Dr. George Lane states that the fish run from a half pound up to three and four pounds and there are enough of these to satisfy the most enthusiastic angler. Dr. Lane stopped at Weymouth's. At Greig's, Fortuna, a number of anglers have been having good sport. Mr. Frank Maskey is authority for the statement that there has been good fishing on Eel river ever since the early days in August.

Striped Bass Fishing—The dull period in striped bass angling has been broken into at last, according to a reliable report from Eckley station, near Crockett, on Carquinez Straits. Anglers have been anxiously awaiting the appearance of the fish. They have long been due, but where they would appear, or what particular water was to be their resort for the time being, was regarded as problematical. It appears that the straits in and around Eckley and Crockett is the present selection of the fish for breaking the angling deadlock and holding receptions for the entertainment of the rodsters.

For two days the fishermen last week made phenomenal catches. The trolling spoon is the lure. Two anglers one day landed 300 pounds of bass. In twenty minutes Charles Lee caught sixteen fine bass. The fish run from three to fifteen pounds in weight. Anglers who make the trip to Eckley station or Crockett will have no difficulty in procuring trolling boats. The best catches have been made at Eckley, in the coves between the warehouses. The Grangers' Inn, presided over by John M. Golobock, will be found a good place for anglers to put up at when visiting Eckley station.

A Cougar Hunt in Colorado—Mr. C. A. Hardy gives an interesting account of a lion hunt in Northwest Colorado, when the mercury indicated ten degrees below zero. After describing the discovery of the track of the lion, and the sending of the dogs on to find the big cat, the writer proceeds: I have seen and participated in rides after the hounds, both in the East and West, where the only danger was to be apprehended from beneath; but when one has to watch both ground and air, and to dodge the attacks of a labyrinth of protruding branches, as well as keeping a firm seat, the difference between fox hunting and lion hunting is marked. We must have ridden three miles through thickets and over fallen trees, sometimes getting off and leading where the descent was too precipitous, before we came within hearing of the dogs. Now and then a long quavering bay reached our ears, but it was not until we had crossed the last ridge and were riding down into the gulch bottom that the clamour of the dogs broke plainly on the wintry air; and this time, instead of notes long drawn out, it sounded quick and sharp, a perfect babel of angry sounds. Upon hearing our approach the dogs redoubled their noise. Before coming within sight of them we dismounted, hobbled our horses, and softly advanced, taking care to keep hidden among the trees, for fear the lion would jump at sight of us; for, contrary to the general opinion, mountain lions are cowards, and fear man above all things. Sure enough, there, some 20 feet above ground, bracing himself amongst the topmost branches of the green cedar, crouched the "great cat," complacently eyeing the dogs beneath, and occasionally giving an angry spit that only made them rage the fiercer. One of the hounds was so carried away by the sight of his inveterate enemy, that, in his frenzy, and aided by the thickly spreading limbs, he had succeeded in climbing two-thirds of the way up the tree. But, even as we looked, he lost his precarious foothold and fell to the ground amid a shower of bark and needles. The tree that the lion was in stood on a steep hillside, and as we circled about to approach it from above, one of the party took his stand on the lower side and focussed his camera on a clear spot where in all probability the lion would land. When he gave the word, we came into full view, and opened the bombardment with sticks and stones.

The lion shot out from the green branches, and landed full twenty yards down the gulch side. The dogs, unplussed for an instant, by the suddenness of the move, broke into a clamorous uproar, and took after the lion, which had nearly a hundred yards' start, and was making huge leaps along the top of the ridge we were on. It was not long before they caught up with him, for the lion, although covering

some nine or ten yards in each leap, had to stop and gather himself for each spring. Finally he was forced to stop and bay his pursuers on the little point of rock in which the ridge terminated. He stood them off, as we could ascertain from the noise, until we rode up; then, preferring a leap of thirty feet to the gulch below to running the gauntlet of his new enemies, he vanished over the edge of the rim rock, to our unbounded astonishment. The dogs thus thwarted a second time ran wildly about in their frantic endeavors to find a way over the edge to the gulch bottom. We thrust our way through the cedars to obtain a view of the chase, and arrived in time to see two Shepherd dogs which had outstripped the pack, walking on either side of the lion up the opposite ascent, neither offering the least molestation to his majesty, who nonchalantly stepped towards a convenient cedar, leaped into the lowermost branch, and climbed to the top, amid a terrific rending of bark, as the hounds reached the spot. We shot the lion in the jaw and foreleg, and after a terrific roar, the huge beast, with a toss of his head and a wild clutch at the limbs above, went crashing down through the branches. No sooner had he touched the ground than the dogs closed in on him, and then began a battle royal. With indescribable rage the lion struck right and left, his claws wide and extended. The gulch side was very steep at this point, and, as the fight raged, the combatants rolled and slid, amid a perfect cloud of flying snow, while the bloody trail behind gave evidence that harm was done to, at least, our side. When we reached the bottom the dogs were still at him. The Glen Tana Collie dog Tuck had hold of one ear, and shake and strike as he would, the lion could not free himself. The hounds, taking advantage of this fact, attacked him from every side in spite of the ugly cuts the claws on his one good fore paw were making. Finally, with a last effort, the lion shook his head free from Tuck's grasp, and catching a dog with his claws, drew him down to him, and buried his teeth in his neck. We then shot the lion. The dogs were not seriously hurt with one exception.

AT THE TRAPS.

Blue Rock Gun Club—At the regular shoot of the above club at Bakersfield on the 3rd inst. E. N. Schofield was high gun.

The scores were: Schofield 100-78; Stoner 100-75; Higgins 100-57; Ferguson 50-32; Lewellyn 50-23.

The scores made at the club shoot on the 10th inst. were: Schofield 100-78; Stoner 100-77; Packard 100-70; Oswald 100-69; Higgins 100-59; Getchell 50-41; Ferguson 50-41.

A two-day tournament, today and tomorrow, will take place as a fitting windup of a very successful club trap season. E. C. Wilson, C. E. Getchell and E. N. Scofield are the committee to prepare a program and make other arrangements for the event.

In addition to the blue rock shoot there will probably be one live bird event each day. Liberal cash prizes will be offered and in addition there will be a merchandise shoot in which the prizes will be so numerous that everyone can win. Invitations were sent to all the gun clubs in the State south of Sacramento and everything will be done to make the tournament a success in every respect.

The local trap shooting season will wind up tomorrow at Alameda Junction, where a big merchandise shoot will take place under the auspices of the Pacific Coast Trap Shooters' Association.

The ten high scores made in the regular events at 16 yards rise, 250 targets, were: Cooper 231, M. O. Feudner 229, Powers 226, E. L. Forster 226, Nauman 226, Sylvester 222, Hagerman 220, Walker 220, Golcher 219, E. Schultz 219. In the tabulation of scores last week the types gave C. D. Hagerman a total of 391—it should have read 396.

JOHN DAVIDSON.

Dispatches in the daily press announce the death of John Davidson, at Monroe, Mich., on Saturday of last week. He suffered a brief illness. Death was caused by heart failure consequent to a severe cold contracted at Toronto recently. He was seventy-eight years old.

Probably no man was more widely known in the canine world than was John Davidson. He was famous in both Europe and America as an all-round bench show judge of cattle, a breeder and trainer of bird dogs, an expert field shot, and a writer of no mean attainments on such subjects of dog and gun as appealed to his fancy or interest.

He was a Scotchman by birth, and possessed many of the characteristics for which that race is famous—good common sense, a dry and sometimes caustic humor, the moral courage to utter his beliefs in the face of any opposition and the physical courage to stand by them as long as need be. Many there were who thought that he had violent, unreasoning prejudices against what he did not approve and which they did approve, but there is no doubt in the mind of the writer—who knew him well—that his uncompromising attitude on many subjects was due to firm conviction that he was right. His acts were always consistent with his beliefs. There was nothing artificial about him, no affectation of manner nor frills of speech.

While he was courteous of speech and manner, he preferred to eschew all evasion, or insincerity or grand stand plays in business or pleasure.

In the United States, among a large circle of admiring friends, he was known by the endearing sobriquet of "Honest" John Davidson.

His experience in field sports was broad and long. He was a practical sportsman years before the affairs of dog and gun were taken up in this country

in a systematic, intelligent manner. Field trials and bench shows owe much to him. He was identified with them from their inception. He judged at the show of the Illinois State Sportsman's Association, held in Chicago, Ill., June 4, 1874, said to be the first bench show of record held in America. From that time till his demise, he was conspicuously identified with the competitive features of the canine world.

Concerning his official acts as judge, many anecdotes have been told of his sharp wit. One in particular, enjoyed by bench show devotees, has been cherished for the directness with which it closed an incident. After every breed is judged there are a few or more dissatisfied contestants, known colloquially as "disappointed exhibitors." They seek, as a rule, to interview the judge ostensibly as inquirers for information, but really to show him his error or to express their opinion of him. At such times "Honest" John would place his arms akimbo, look over the top of his nose phlegmatically and cynically at the disgruntled owner. Once on an occasion of this kind, the disappointed one concluded by saying, "Well, I don't think you know how to judge." "You don't," replied the judge dryly, "but that's your think, and it's my think that counts."

He was an excellent field shot, an accomplishment in which he took a just pride. Bad shooting on the part of others was sure to excite his derision. He fell into a joke at the field trials of the Central Field Trial Club, at Lexington, N. C., which raised a laugh against him, an event which was very rare indeed. He was acting as one of the judges. The handlers had been ordered to kill a bird, and, nevertheless, missed shot after shot. Finally, a fine point was secured in the open. The field party massed about and watching with keen interest. "Honest John" ordered the dogs to be held a moment while he dismounted to show them how to kill a bird. He took the handler's gun, flushed the bird, shot at it, and missed it entirely, amid the acclamations of the delighted hundreds. He missed it, apparently—it was many years afterward that he learned that the gun was loaded with a blank cartridge. But of such incidents there were hundreds in his life, which his friends took pleasure in relating—the light, humorous portrayal of his character in contrast with the rigid and the serious.—B. Waters in Forest and Stream.

TRADE NOTES.

Peters Points.

Dr. O. F. Britton of the Indianapolis Gun Club, one of the best and most popular of the older generation of shooters, made a most remarkable score on the Indianapolis Gun Club grounds September 9th, breaking 117 straight from the 18 and 19 yard marks. This not only proves that Dr. Britton has not lost his cunning, but also that Peters factory loaded shells are perfection itself.

Some excellent scores were made with Peters shells at the Trinidad tournament, September 4th, 5th and 6th. In the free for all handicap, one of the main events of the tournament, Mr. Wm. Veach of Falls City, Neb., tied with two others on a score of 97 from the 19 yard mark. In the first shoot off, Mr. Veach broke 20 straight and in the second again scored 20 straight, making a total of 137 out of 140, all from the 19 yard line. Inasmuch as Mr. Veach, by virtue of this score, won a handsome \$75 watch, it may be assumed that he will know when it is time to order his next lot of Peters Ideals.

At Austin, Texas, September 9th, Mr. Wallace R. Miller, shooting Peters Ideal shells, loaded with 3 dr. of powder and 1½ oz. of shot, broke 98 out of 100.

Mr. L. H. Reid, representing the Peters Cartridge Company, at the Kendallville tournament, September 12th, won high average for the day, breaking 193 out of 200 targets. Mr. Reid uses Peters regular factory loads No. D167 ½ ch.

At York, Pa., September 4th and 5th, the high average was won by Mr. E. C. Hummer, and high expert average by Mr. Neaf Apgar, both using Peters factory loaded shells.

At Montgomery, Alabama, September 4th, a good crowd of shooters took part in a program composed of a number of target and live bird events. Mr. Louis T. Spinks, representing the Peters Cartridge Company, and shooting Peters factory loaded shells, killed 34 straight in the live bird matches, being the only straight score, and also led in the target events.

Doings of the Old Reliable Parker Gun.

At Dominion of Canada tournament, Ottawa, Ont., August 16th to 18th, Mr. T. M. Craig of Sherbrooke, at 19 and 20 yards, won the Lord Grey cup for high average, with score of 665 out of 710.

W. J. Johnstone of Ottawa made longest unfinished run—99 straight—winning DuPont cup. One-third of guns used at Ottawa were Parkers—a fact that speaks for itself.

Fred Coleman of Philadelphia, Pa., at Meadow Springs, Pa., August 26th, was high gun with score of 16 out of 175; also at Coatsville, Pa., September 4th, with score of 142 out of 150; at Florist, Pa., September 12th, with 185 out of 200, and at Meadow Springs, Pa., September 16th, with 96 out of 100.

S. C. Yoakum of Shamokin, Pa., at Shamokin, from April to September, shot at 1000 and broke 917. An amateur of merit.

Fred Gilbert, "The Wizard," at home, Spirit Lake, Ia., Aug. 22d to 25th, was high man, with score of 771 out of 800, and won the first class cup with 50 straight.

R. C. Derk of Northumberland, Pa., at Lock Haven, Pa., August 15th and 16th, scored first high amateur average with score of 261 out of 290, winning DuPont trophy. At Marysville, Pa., August 26th, Mr. Derk was high amateur average with score of 188 out of 200.

M. E. Atchison of Giddings, Tex., at West Texas

League shoot, July 12th, 13th and 14th, had second high amateur average with score of 458 out of 480. In 50 target race he scored 47 out of 50. In gold medal event he scored 50 straight. At Brenham, Tex., July 17th and 18th, Mr. Atchison was second high amateur average with 403 out of 425. At Fort Worth, Tex., on the last day he broke 112 straight and 218 out of 225. At San Marceca, August 14th and 15th, he was high amateur average from 20 yard mark with score of 299 out of 340.

F. D. Alkire of Williamsport, O., at Dalton, O., August 17th and 18th, made first general average with score of 375 out of 400. At Yellow Bud, O., August 3d, he was first average with score of 156 out of 160. At Williamsport, O., August 9th, he scored 146 out of 150. Also at Williamsport, on August 10th, Mr. Alkire scored 74 out of 75.

Walter Huff of Macon, Ga., at Durham, N. C., June 14th and 15th, made second high average with score of 378 out of 400. At same shoot, Mr. G. M. Collins made first high average, with score of 386 out of 400. At Warm Springs, Ga., June 20th and 22d, Mr. Huff won high average with score of 389 out of 400. At Thomasville, Ga., July 4th and 5th, Mr. Huff won high average with score of 291 out of 310; also at Eu-faler, Ala., with score of 375 out of 400; at Gunthersville, Ala., August 22d, with score of 192 out of 200; at Morristown, Tenn., August 23d, with score of 98 out of 100.

Mr. W. E. Beeson of Grand Rapids, at Grand Rapids, on August 9th, won high amateur average for the day with 192 out of 200, or 96 per cent. The high amateur average for the three days, August 8th, 9th and 10th, was won by O. A. Felger, with score of 596 out of 605. The third high average for three days was won by Guy Deering, with 564 out of 605. Fourth high average for three days was won by W. E. Beeson, with 561 out of 605.

J. E. Vaughan, the "Fred Gilbert" of California, at Pasadena, July 27th, made a score of 99 out of 100, and on July 30th, 98 out of 100, total of 197 out of 200, with a straight run of 143, no miss.

John A. Flick of Ravenna, O., the one-armed wonder of the shooting world, on July 29th, at Turkey Fork Lake, broke 50 straight; at Canton, O., State shoot, in June, Mr. Flick broke 50 straight.

Otto Felger of Grand Rapids, Mich., on August 8th, at Grand Rapids, broke 190 out of 200, or 95 per cent. He made the highest amateur record for the day.

All of the above shooters shoot Parker guns exclusively. The Old Reliable, time tried and proven winner of the age.

Averages Reported.

Trinidad, Colo., September 4th, 5th and 6th, W. R. Crosby, first general average, 388 out of 400, shooting New E. C. (Improved). Harold Money, second general average, 387 out of 400, shooting New E. C. (Improved). H. G. Taylor of Meckling, S. D., shooting New E. C. (Improved), first amateur average, and tied with Fred Gilbert, shooting DuPont, for third general average, 386 out of 400. W. J. Rand of El Paso, Tex., shooting Infalible, won second amateur average, 381 out of 400. George Timberlake of Baileyville, Kas., third amateur average, 381 out of 400, shooting Infalible.

Worcester, Mass., September 5th and 6th, J. A. R. Elliott, first general average, 278 out of 300, shooting New Schultze. E. C. Griffith of Pascoag, R. I., first amateur and second general average, 271 out of 300, shooting Infalible. James McArde of Narragansett Pier, R. I., second amateur and third general average, 260 out of 300, shooting Infalible. G. H. Chapin of Brookfield, Mass., and D. W. Sawin of Gardiner, Mass., tied for third amateur average, 259 out of 300, shooting DuPont.

Cissna Park, Ill., September 6th, W. D. Stannard, first general average, 191 out of 200, shooting DuPont. A. P. Smith of Goodwine, Ill., second amateur and third general average, 184 out of 200, shooting Infalible. Willis Bell of Hoopston, Ill., third amateur average, 179 out of 200, shooting Infalible.

Medford and Portland Tournaments.

The inanimate target tournament given by the Medford, Oregon, Gun Club, on September 22d and 23d, proved to be a most enjoyable affair and well attended. As usual shooters of Winchester products carried off all the honors of the tournament. The first high expert average for the opening day was captured by W. R. Crosby, score 197 out of the possible 200. The second high average was tied for between

Fred Gilbert and C. M. Powers, on 195 out of the possible 200. The longest straight run on the first day was made by Fred Gilbert and was 154 consecutive breaks. The second longest run, 117, was made by W. R. Crosby. All above made by shooters using the Winchester "Leader" shells. The longest straight run on the second day was made by Fred Gilbert, 127 consecutive breaks, while W. R. Crosby ran 102 straight on the same day. The first and second high expert averages for the entire tournament were made by W. R. Crosby and Fred Gilbert, while the high amateur average was carried off by C. N. Powers. Crosby 394 out of 400, Gilbert 392 out of 400, Powers 386 out of 400. Messrs. Crosby, Gilbert and Powers always shoot the reliable and time tried Winchester "Leader" shells, the only kind to shoot if you want to be on the top at the end of a tournament.

It was the same old story repeated at the Portland, Oregon, shoot, September 24th. The shooters that used Winchester goods again carried off all the honors. In the 100 target event, known traps, unknown angles, H. C. Hirschy, shooting a Winchester "Pump" gun and Winchester "Leader" shells, was the high gun with 97. Fred Gilbert, also shooting Winchester "Leader" shells, was second with a score of 96, while W. R. Crosby, shooting the "Leader" shells, and W. H. Seaver, shooting a Winchester "Pump" gun and "Leader" shells, tied on third place with the score of 9 each. In the Globe Trophy event, which covers known as well as unknown angles, regular and reverse pull, and double bird shooting, Fred Gilbert was the high man with the splendid score of 48 out of a possible 50. W. R. Crosby was second high with 46. Seaver third high with 44. Hirschy fourth high with 42. All the above gentlemen shooting "Leader" shells, and in connection Messrs. Seaver and Hirschy used Winchester "Pump" guns.

The twenty-five target event, unknown angles, reversed pull, was also won by shooters that shot the "Leader" shells. The only two perfect scores of 25 straight in this event were made by Fred Gilbert and W. H. Seaver. Out of the 175 regular targets shot at, as mentioned above, Mr. Gilbert scored 169, Messrs. Crosby and Seaver 164 each, while Mr. Hirschy had 160 breaks to his credit. These were the high scores for the day, and were made with the well known Winchester "Leader" shells.

DRYING UP THE COW.

The more highly developed the dairy cow becomes, the more important is it to give her more consideration at the close of her lactation period. Frequently a cow is supposed to be thoroughly dry and turned out into the dry pasture when she should be kept with the cows that are giving milk, and until all secretions in the udder have stopped. It is a mistake to permit the udder to retain any thick, matterly substance; for, undoubtedly, many cases of udder trouble can be traced to not removing this substance from the udder. Moreover, it is not well for the animal to absorb this material into her system.

Occasionally there are cows that persist in giving milk for two or three years without any rest between periods of lactation. In such a case it is better not to force her dry but continue milking. If a cow is forced dry there is danger of destroying a portion, or all, of the udder.

About three months from calving time, most cows begin to decrease in milk flow rather rapidly, without decreasing their grain allowance, while others will go dry only when the grain portion of their ration is reduced and some milk left in the udder after each milking.

It is not the poor dairy cow that gives us any anxiety at this time, but it is the heavy milking animal whose udder we wish to preserve that makes us inquire as to the best method to pursue. There can be no hard or fast rules laid down for the feeding and handling of the cow at this time, but, as a rule, a decrease in the grain allowance is usually effective in reducing her flow of milk. If the cow is thin in flesh it is seldom necessary to make any change in the system of feeding, but her milk flow can be reduced by leaving a small amount of milk in her udder after each milking, and after pursuing this method for a week, milking the cow once a day is usually sufficient.

Of course, a great deal depends upon the cow, and the system pursued in drying her off should be modified according to circumstances. The cow should be dry from six weeks to two months, and it should take not longer than two weeks to thoroughly dry the cow up, but under any condition, all, or nearly all, of the udder secretions should have ceased before she is turned out to receive no more attention. It will not stimulate the flow of milk to remove all substance from the udder when she is nearly dry. If she is thin in flesh she should be well fed until she is in good condition for her next year's work.

THE BREEDER AND THE FEEDER.

The cattle situation at this season of the year brings many features of the trade before the range raisers and handlers. There naturally is a good deal of interest just now as to the outcome of what may develop within the next thirty days. The corn crop usually is the important factor, but cheap corn and cheap feeder cattle should produce cheap beef, and this should not materially change the situation with the feeder, so far as profit in feeding is concerned.

The producer of cattle is on the anxious seat all through the grazing season. He is concerned lest the season fail to bring forth acceptable growing conditions to provide an abundance of summer feed to fatten the cattle. He is concerned lest the feeder demand be cut short, owing to lack of corn crop in the corn belt or some other discouraging feature of the breeding business, check the enthusiasm of the buyer of this class of cattle and thus create a poor market for a large per cent of the young steers that annually are shipped from the range to fill this demand as feed yard stock.

The time of shipment is also a matter to be studied and finally guessed at, whether to ship early or before the great bulk of cattle goes out or to hold off to the later period, get an additional gain of thirty or sixty days and take the chance of a decline, which usually follows through heavy shipments. The feeder on the other hand has an equally difficult problem to solve and eventually enters into the proposition upon more or less of a guess or speculative basis, when he begins to size up and forecast the fat cattle market four to eight months in advance. The early buying of feeder cattle is based upon a short feed, the finishing of an acceptable quality of beef to bridge over the period between the winding up of the grass-fat shipment from the ranges—and the feed yard cattle started on the new crop of corn.

The assurance of a big feed crop of both fodder and grains, especially hay and corn, is made the basis of estimate by both the cattle grower and the feeder in the matter of purchase and sale of the feed yard grades of cattle. One of the most important features entering into the cattle feeding proposition is quality of stock. The higher the quality of the animal, whether it comes from the range as a yearling or two-year-old, in feeder form, or as a grass-fat three-year-old the more certain it is to find a ready purchaser. Quality in beef production is being more closely studied each year by the feeder and fat cattle buyer.—G. W. Heney.

POULTRY NOTES.

A successful incubator man says he still prefers a cellar for his machine. His methods are fresh eggs and regular attention to machine.

Turkey diseases are caused by over-feeding, lack of grit, lice, stagnant pools of water, feeding after swine, and exposure to cold rains.

If a hen has proven an exceptionally good sitter and mother, keep her over until next hatching season, though she does not lay an egg.

Watch out for trouble on the score of lice. They are getting ready now for business when the fowls are confined later to close quarters.

Guinea eggs have a delicious flavor for ice cream, invalids, etc. The flesh is gamey. The birds live in the fields, destroying insects, but never scratching.

Plenty of milk for fowls to drink will increase egg production 10 per cent. But keep water dishes going, too; because hens like a change from one drink to the other. Clean the milk receptacles often.

Don't feed too much corn to growing chicks. Rather give them food that will make bone, muscle and vigor, with just enough carbonaceous food to keep them in good condition, but not fat.

Some writers advise mixing grit with soft feed for the fowls and chicks. This is not at all necessary, as they will pick up all the grit they need if it is kept where they can have access to it.

When the brooding hen refuses to voluntarily return to her coop at night, but squats outside, you can be pretty sure that the coop is either fearfully lousy, filthy or close, or perhaps all three. Investigate.

A bird that is either very thin or overfat, is not a good breeder, whatever its excellence in shape and color. The breeding bird needs to be in such vigorous condition that its chicks may make a good strong start in life.

Treatment of Heaves.—In all cases of heaves it is desirable to change the ration for a time and all water given before eating. All food should be wet with lime water and if considerable hay is used this should be well moistened before being fed. Use care in keeping the stall and manger free from anything which will create dust and have the stable well ventilated at all times. As a medicine give the horse one-half ounce doses of a solution of arsenic night and morning. This can be obtained at any drug store. An ordinary case of heaves will succumb to this treatment, but in bad cases add ounce doses of glyco-heroin, giving three times daily in the mouth, using a syringe. If the combined treatment does not complete the cure the case is hopeless.

STOCK NOTES.

A very simple arrangement will furnish lots of comfort for hogs when made into a shade. Some pens are like ovens.

Some farmers use calf raising as one of their sources of revenue. It is one of the profitable ways in which to dispose of skim milk.

Sometimes it pays to take a fresh start. The whole herd may be sold, and a new stock purchased, or new breeders may be obtained.

The stock raiser who can find a locality adapted to his business, and get a foothold there, had better stay. Every time he makes a move he loses time, and oftentimes loses money.

There is no doubt but that some good horses fail to bring a good price because they are not shown to good advantage, and are not fitted for market.

The young mother sow needs to be let alone for the first twenty-four hours. She does not need even water, unless she comes out for it. Feeding should be undertaken gradually.

Raising fancy horses is always full of risk. A slight scar which would depreciate their value very much would scarcely injure a draft horse at all. Farmers would better raise less expensive horses.

Concerning the wool trade, last week's American Wool and Cotton Reporter said: The wool market continues in a healthy condition although trade is not active, the sale of the past week being the smallest recorded for some time past. But there is considerable business pending and the outlook is regarded as very satisfactory. The London sales are expected to open with prices fully sustained on all grades especially on merinos, which some members of the trade expect to see quoted higher, and the development of the goods market are such as lead to the belief that a good healthy worsted business is to continue with prospects of an improving demand for wools later. Prices are strong, and for low wools there is a slightly better inquiry than there was. Further evidence that the outlook is regarded as a reassuring one with reference to domestic wools is furnished in the action of certain representative members of the wool trade who are contracting 1906 wools in Montana, Wyoming and Utah. In Montana 22c is being paid for next year's wools.

The flavor of hen's eggs is declared by an English medical man to be very materially affected by food. When the hens act as scavengers their eggs are made unfit to eat, but a diet of sunflower seeds produces remarkably fine and sweet eggs.

SOME POINTERS ABOUT MILK-ING.

It is not every one who milks cows that knows how. After having tried all the methods on the 50,000 or more cows I've milked, I have about come to the conclusion that I can get the milk from a cow with as much ease and convenience to myself and comfort to the cow as any one, writes A. Secor in Kimball's Dairy Farmer.

The first consideration is the anatomical construction of the udder. Many do not know that the teats are in pairs. The two front quarters are seldom of the same capacity or formation as the hind quarters of the udder. The teats on those quarters differ, also.

I've seen milkers take a front and hind teat either both on same side or diagonally across. I was taught that way, but soon found that they didn't come out even. Very generally the hind quarters give the most milk, and the front teats are larger and milk out faster than the hind teats, so the result is uneven.

I've seen the new method of milking published in different papers lately. The manipulations seem complicated, but they are not. They differ only slightly from the method I've followed for a few years.

In the first place, I milk as near twelve hours apart as I can. The cows expect relief at that time and are uneasy if not milked on time.

When I drop my stool beside a cow she steps over it, or if not I put a finger on her and she takes her position. I never say "get over there—now hist." A touch of the finger does the whole business of getting the right position.

With a wet cloth I wipe off the udder and teats after brushing loose bedding and dirt from the belly and legs. This manipulation is sufficient to start the milk.

As I rub I begin with the back teat because they are generally short and when full of milk difficult to get hold of. Besides, I prefer to strip, if that has to be done, when my grip is rested, then change when tired to a full hand grip on the front teats. By getting hold of the back teats just as the cow begins to let the milk come you can get and maintain a better grip than to wait till the back quarters are full of milk and the teats reduced in length by the pressure of milk. Still another reason is that the cow wants relief from the back quarters first. They are squeezed by her legs, they give the most, and she is restless till they are emptied, at least partially.

When tired of milking or stripping the short hind teats I go to the front ones and then back to the others if necessary for rest of muscles.

After getting all I can in the ordinary way, I then reach up with thumb and forefinger of left hand and squeeze the milk from the cisterns of each quarter and force it from the teat with the right hand. This is easy when one gets used to it. It takes out every drop of milk and does not hurt the cow. It does away with the strip, dribble of the common method.

The exceptions to this rule are these: A cow may have a sore hind teat. By

beginning on the well fronts and then quietly change to the sore teat the cow is not so apt to make a fuss as if you begin with a sore teat and get her nervous for the whole milking.

Some cows are so constructed that it makes no difference where you begin milking. I generally give my finger muscles the choice then.

When a boy I broke my little finger twice playing ball. I never missed a milking because of it. It taught me how to fold that finger up and use the rest. To this day I milk short teats with the little fingers doubled back out of the way. I can milk teats that others would have to strip.

When a cow has a sore teat I try to put the sore in the palm so it will not be squeezed. Sometimes the teat has to be twisted part way around. Sometimes I have to change hands—that is, milk a left-handed teat with the right hand. But, really, there is little need of having sore teats if the fences are good and loose wire picked up, and vaseline used on cows that get in the mud.

As to the position of the cow, that is easily managed. Teach her to put her right hind foot back to the edge of the gutter. Put your knee in front of her leg and that foot has to stay there. She can not put the left hind leg back any farther than the right one and if she puts it forward, all the better. Let me say that a cow can get out of position with her front feet just as well as with the hind feet. She can put her left front foot way back and throw her belly towards you so you are crowded into the gutter. Or she may put both front feet back and thus force her udder back between her legs so even the front teats can scarcely be milked. In either case the front feet can be placed in position by pushing your right shoe against them. She soon learns her position.

Some cows have the miserable habit of stepping over and keeping the milk-er hitching over to her. Make her stop it. You can feel when she is going to pick up a foot. Reach through with the right or left hand and catch her leg on the cord above the knee and jerk the foot back in place or hold it if she has not yet straddled out. If she can't locate the left hind foot she can not pick up the right one. A few lessons are sufficient.

I don't begin on a heifer to force her to a correct position. The main thing is to teach her to trust you while milking. She may get into all sorts of awkward positions as she turns to lick your neck or chew your coat tail, but she can gradually be taught to keep a good position.

DEAD ANIMALS DANGEROUS.

Some farmers do not realize the danger they hazard by feeding hogs the carcass of any animal that may die on the farm.

Hogs will eat most anything in the meat line. They are made carnivorous by improper rations. And because they seem to hunger for meat, the farmer just lets the hogs eat a dead cow or horse, or chicken, instead of going to the trouble of burying it.

Stop and think a moment and you will see what a risk this is. A cow wastes away for months and finally dies. You may say she had poor teeth and starved to death, or you can't account for her illness. But she died and you skin her perhaps and let the hogs have the carcass. The chances are she died of tuberculosis. You inoculate the hogs if they have not already been infected.

A chicken dies of you know not what. Perhaps it was cholera, or maybe tuberculosis. Such food is not fit to feed to anything, no matter what the doctors may say about the ability of one kind of animal to give a disease to another kind.

Contagious abortion may be spread by feeding the dead calves and after-birth to hogs.

The hog is very susceptible to disease—the modern hog, I mean—and we can not afford to give him but the best and cleanest foods.

One man may be careless about this matter and have a diseased herd of hogs. His hogs go to market with the car load of others. The buyer or slaughterer finds a great loss on the load from that town and keeps an eye open. Another bunch of diseased hogs comes from the same locality. Word is sent out not to buy hogs there at market price because of too much loss when they are slaughtered. If the condition continues to exist—as is

usual—the shipments are refused entirely from that locality. Simply because one man will persist in feeding dead animals or tuberculosis milk to his hogs, a whole community of farmers are cut off from market when they are not furnishing diseased hogs.

The day may come when farmers will welcome the inspection of stock and strict regulations regarding diseased animals. It is folly to fight it.

HORSE BREEDING PROFITABLE.

The horse from time immemorial has been a factor in industrialism and civilization. The evolution of man from savagery has developed use for the horse as a beast of burden and for pleasure use. Countries that lead in commercial development give the greatest importance to the horse. With the manufacture of modern vehicles and agricultural implements the sphere of the horse in commercialism has materially broadened. There appears to be no normal substitute for the horse in the field of industrial evolution, this useful animal being more indispensable to the prosecution of the several industries than half a century ago.

The expense of raising a horse is not of raising a steer, while the horse of a standard commercial class will command around two to three times the price of a steer. The difference in the initial cost is represented principally by the difference in the service fee of the sire. Registered stallions command around three to five times as large a service fee as bulls. The expense of feeding a steer which will sell at \$75 is about as much as feeding a gelding that will command \$250 to \$300. The difference in the expense of raising the two classes of animals is so infinitesimal as not to enter into the calculation of farmers. In early maturity the steer takes precedence over the horse, but not in the expense of raising or profits in the industry.

Breeders need not feel apprehensive about the future demand for horses. Prices generally are very attractive and remunerative to breeders. Since 1896, when prices touched the low point in the industry since the close of the Civil War, values have steadily appreciated until several standard commercial classes have increased in price upward of 100 per cent. It had been anticipated that prices would be nominally stationary since 1900, but an era of wonderful industrial prosperity has steadily increased values annually \$5 to \$10 per head. The higher level of prices has made farther advances the current year.

The gain in values has been achieved in the face of strenuous opposition by horseless vehicle promoters. While the use of automobiles has largely increased it has made no appreciable impression on the use of horses. At the leading wholesale market demand for commercial offerings has ruled broader than the supply at an advance of \$5 to \$10 per head the current year, notwithstanding the first seven months' receipts showed an increase of 11,089 head of classified horses. When exploited intelligently at present prices farmers will find that horse husbandry will pay a handsome profit.—Goodall Farmer.

It is reported upon authority that of the total number of cattle in the United States today considerably over half are what may correctly be called native scrubs. By this is meant that they are not even worthy to be called grades, which term signifies an animal contains some pure blood of one breed or another. The total number of pure breeds in the country is extremely low, being estimated at less than one-fiftieth of the total number of living cattle. The number of grades is estimated at about one-sixth of the entire bovine population of the country. This does not look as if pure bred breeding was being overdone, or even as if the time was very near when it would be overdone. There is surely plenty of room for pure bred cattle breeding yet. There is money in the business, too.

Ticks are a nuisance, and it is almost impossible to keep them off, whether in the woods or on the prairie. There are some direct treatments which are effective. Of these, dipping has proven the most successful.

Southdown sheep in some sections are regarded as healthier and stronger for the South than any other breed; they are easy to fatten and are worth more for mutton and wool.

Angora goats are recommended, because they are not troublesome to keep in a pasture, they are easy to keep, they are free from disease, they keep the dogs away, and are profitable for their hair.

Two Good Ones For Sale.

Nannie Derby, BAY MARE 5 YEARS, weighs 1150 lbs.; handsome and stylish. Sired by Charles Derby 2:20, dam by Red Wilkes. A first-class racing prospect and fine roadster. After two weeks training Charles De Ryder paced her quarters in 29 seconds last spring at Pleasanton track. She trotted a half mile in 1:05 on the speedway and has paced halves on the speedway (driven by T. C. Cabney) in 59 seconds. Only fault—she is excitable in company, but will get over this with training. She is ready to show, and will be driven a fast half at the trotting gallop for any one who contemplates buying her.

Dopella, by Charles Derby; standard and registered; bay filly 4 years old, about 15.3 hands, weighs about 1000 lbs.; handsome and in every respect a first class road horse. A lady can drive her. She has speed and is not only a valuable horse for the road but a high-class brood mare.

A few other fast roadsters for sale at reasonable prices. For particulars and to see the horses apply to DEXTER PRINCE STABLES, 1509 Grove street, corner Baker street, San Francisco.

FOR SALE.

Robizola 2:12 1-4 (REG. No. 33306) Sire Robin 2:37; dam Myrtle 2:13 1/2 by Anteo. Dark bay mare, 15 1/2 hands high; weight 1050. High-class trotting mare. Winner five times on Grand Circuit in 1903. Trotted in 2:10 1/4 this summer. Sound, stylish and a good roadster. For further particulars address DR. J. W. CLARK, Santa Rosa, Cal.

FOR SALE.

THE HANDSOMEST TWO-YEAR-OLD DIABLO colt in California. First dam, Babe by Dawnlight, be a son of Dawn and his dam Directa by Admiral Babe is a half sister to the good colt McFadyen, being out of Bee. Paced a mile in June in 2:27, and is paid up in the Breeders Futurity. For particulars address E. D. DUDLEY, Dixon, Cal.

COMPRESSED PURE SALT BRICKS
AND **PATENT FEEDERS**
Handy. No Waste. No Neglect.
5¢ a month.
Refined Dairy Salt tells.

Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address
The Lawrence-Williams Co., Cleveland, O.

LANDLORD AND TENANT.

It is usual to stipulate in the lease or rental agreement the time when the tenant's occupancy of the premises is so terminate. Frequently the length of the term is stipulated, with a provision added to the effect that the term may be renewed or the premises retained for a certain time longer, at his option.

But there are cases where the term is not definitely stated, or where the provision in the lease is not valid for the length of time agreed on. If the length of the term is stipulated, and the stipulation is valid, little difficulty can arise; but where the length of the term is for any reason uncertain questions arise that frequently lead to trouble between the landlord and the tenant.

Where the length of the term is not stated, the intention of the parties must be determined by the conditions and circumstances of the case. The main factor going to determine the intention of the parties is the manner in which the rent is payable; as, if the rent is so much a week, or so much a month, or so much a year, the courts would construe the tenancy to be by the week, or month, or year, as the case may be. But it has been held that where the property is leased for farming purposes the presumption is that the tenancy was for a year at least. The rent paying periods is not taken as conclusive evidence of the intentions of the parties, it is only taken as a presumptive, and evidence may be introduced to show that the tenancy was for a greater or less period than as indicated by the rent period.

The mere fact that the rent is payable monthly, quarterly, yearly, does not control in all cases. As, where a lease provides for an annual rent, payable monthly it is held to be a tenancy from year to year. Permission to occupy where no rent is reserved is not a tenancy from year to year.

An agreement that a tenant may stay as long as he pays his rent, is held to be void; such an agreement amounts to a tenancy from year to year, or from month to month, according to the rent paying periods.

It is a general rule that every agreement as to the duration of a tenancy must, in order to be binding, fix its termination, either by date or by some circumstance other than the pleasure of the parties.

As stated, the time of termination may be stated in the alternative; that is, a certain time or a certain other time, at the option of the tenant. It is said that an agreement that a tenant may occupy premises until they are sold is valid.

Frequently leases read to make the tenancy for a fixed time subject to termination at any time upon so many days' notice. Such agreements are valid, but it should be understood here that so many days, weeks, or months' notice in the lease means, so long a notice before the termination of one of the rent periods. So that if the lease is by the month subject to termination at any time on a week's notice, this is implied to mean a notice given one week before the expiration of the monthly period. So that if the notice were given only two days before the end of the month, the tenancy would not expire seven days after the giving of the notice, but at the end of the following month.

Much trouble has arisen over the misconception of the meaning of the expressions "week's notice," "ten days' notice," and so on. The meaning is so many days' notice ending with the last day of the rent-paying period.

Of course there is nothing to prevent the parties from agreeing that on certain notice a tenancy may expire at any time during a month, but such an intention should be clearly expressed, by saying, for instance, that if the notice expires in the middle of the month rent shall be paid for the fractional part of the month up to date on which the notice expires.

A tenancy does not expire until midnight of the last day of the term.—Sprague Law School.

Spring seems to be the natural time of year at which all animals should be born. However, animals born in the summer and fall will do fairly well, if properly treated. Thus, two litters a year will do better than one.

Sponges. S. Adderley, 307 Market St

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

"Save-the-Horse" is no untried or uncertain remedy; its marvelous power and possibilities have been proven absolutely and positively. No man will fire, blister or treat his horse with anything else if he will investigate and read our booklet and the letters from bankers, trainers and horsemen on every kind of case. Send for them; also booklet and copy of guarantee.

CARRIAGES FOR WEDDINGS A SPECIALTY. TELEPHONE MAIN 427

THE NEWCOMB LIVERY

GEORGE W. OSGOOD, Proprietor.

120-122 SOUTH FOURTH STREET,

QUINCY, ILL., May 12, 1905.

Some twelve months ago I owned a horse which was practically worthless, due to a very bad Bone Spavin on his right hind leg.

I tried various remedies without success, finally purchasing from the Miller & Arthur Drug Co. of this city a bottle of "Save-the-Horse." After using one-half the contents of the bottle, according to instructions, the horse has never taken a lame step. I would gladly have sold him for twenty-five dollars before using "Save-the-Horse." I have sold him since for ninety dollars, and would not be without "Save-the-Horse" at double the cost.

GEORGE W. OSGOOD.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Boli, Windpuff, Weak and Sprained Tendons and all Lameness.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

STANDARD-BRED COLT FOR SALE.

3 YEAR-OLD STANDARD-BRED STALLION for sale—Sired by Monterey 2:09 1/4, dam Silver Queen by Silver Bow 2:16. This colt is a square trotter. Last spring, with less than one month's training, he trotted mile out better than 2:40, but took distemper and had to be taken out of training. Is in good shape now. This colt is a fine individual with good feet and legs, and is closely related to two of the fastest trotters in the world—Lou Dillon on sire's side and Cresceus on dam's side. Will be sold reasonable. Apply to or address

OFFICE AND YARD—SECOND AND NEW STREETS

SOUTH BETHLEHEM, PA., Sept. 15, 1904.

Mr. Charles Hunter, Danville, Pa.
Dear Sir:—In reply to your inquiry of Aug. 23d, I beg leave to advise that we faithfully applied the medicine "Save-the-Horse" according to directions, and whether it was the medicine or the careful attention we gave the horse, the windpuffs have entirely disappeared and the animal is working every day; and, beside, never lost a day on account of this trouble. I am inclined to think that the medicine is all right and will recommend it to anyone whose horses are afflicted with windpuffs.

Yours truly,
THE ARTIFICIAL ICE CO.
By O. L. PEYSERT.

"SAVE-THE-HORSE"

Is indicated for any enlargement caused by an injury which leaves a thickened condition of the tissues or skin

Horse can be worked with either shin or ankle boots, as no harm can possibly come by either destruction of hair or scalding of the limb. "Save-the-Horse" can be applied in all conditions and extremes of weather.

For Sale.

The Perfectly Gaited Trotting Stallion

ALTA VELA 2:11 1-4

(Reg. No. 22449)

Sire, ELECTIONEER, sire of 166 in 2:30 and grandsire of Major Delmar 1:59 1/4.

Dam, LORITA 2:18 1/4 (dam of Alta Vela 2:11 1/4 and Palori 2:24 1/4) by Piedmont 2:17 1/4; second dam, Lady Lowell (dam of Ladywell 2:16 1/4 and Lorita 2:18 1/4) by St. Clair; third dam, Laura, dam of Doc, sire of Occident 2:16 1/4.

Address all communications to BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

FOR SALE.

BROOD MARE, SIRE BY BLACK RALPH 2:20, dam Black Baby by Black Bird 2:22; second dam by Nigger Baby. This mare is a beautiful black, weighing about 1000 lbs. She is very spirited, stylish and of unusually good disposition. Was never trained and, in fact, little used, but has done 2:40 hitched to a heavy cart and driven by an amateur. She is now in foal to Lynwood W.

Also, her Weanling Filly (4 months) by Lynwood W. This filly is of remarkably muscular build and very pretty—a bright bay with black points. Every California horseman knows Lynwood W.'s colts are good. A three-year-old of his did the last quarter of a mile heat in 31 1/2 seconds on the Santa Rosa track September 9th, and this after only three months training.

The price for mare and filly is \$450, or will sell separately. Address the owner.

THE CONSOLATION HANDICAP

—at the—
GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

Events 3, 6, 12 and 15 are open to Los Angeles, San Bernardino and Santa Ana Driving Club Matinee Horses only. Horses eligible must be owned by a member of the club thirty days prior to date of race and must be driven by owner or a member of the club they represent.

CONDITIONS:

Six to enter and four to start.
Money divided 50 25 15 and 10 per cent.
A horse distancing the field or any part thereof is entitled to first money only.
Entries close Tuesday, October 24th, when horse must be named and eligible to the class in which he is named. Records made on or after October 1st no bar.
The rules of the National Trotting Association, of which the Associations are members, shall govern unless otherwise provided.
Entrance Fee, five per cent of purse, due and payable before the race starts, and five per cent additional from money winners except in cup races no entrance fee is charged.
Positions will be drawn for by the drivers before the start of the first heat. In the succeeding heats horses will start as they finished in the previous one.
Address all communications to the Secretary.

All events are three in five, except cup races which are two in three.
Entries not declared out at 5 o'clock p. m. on the day preceding the race shall be required to start. Declarations must be made in writing and made at the office of the Secretary.
Colors must be named by 5 o'clock p. m. on the day preceding the race, and must be worn upon the track. Colors will be registered in the order in which they are received. When colors are not named or conflict, drivers will be required to wear the colors furnished by the Association.
Horses barred in Trotting events, but will be permitted in Pacing events with the exception of cup events.
Any race that may be started and unfinished on the last day of the meeting may be declared ended and money divided or cup awarded according to the rank of the horses in the summary.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate Mare on December 1, 1905, when name, color, description of Mare and Stallion bred to must be given. \$5 May 1, 1906. \$5 October 1, 1906. \$10 on Yearlings January 2, 1907. \$10 on Two-Year-Olds January 2, 1908. \$10 on Three-Year-Olds January 2, 1909.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace. \$35 to start in the Two-Year-Old Trot. \$35 to start in the Three-Year-Old Pace. \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.

Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3) and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead foal, or twins, or if either the Mare or foal dies before January 2, 1907, her nominator may sell or transfer his nomination or substitute another Mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1905.
Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7000, the amount of the guarantee only. Hopples will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more monies in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

San Francisco, Saturday, October 7, 1905.

RANCHO DEL PASO, the greatest thoroughbred breeding farm in the world, and one of the show places of California, is to be dispersed. The entire stud, comprising thirty stallions and five hundred brood mares, is to be shipped to New York and sold in December, the sale opening December 4th. The Fasig-Tipton Company will hold the sale, which will be beyond doubt the greatest ever held in America. This sale has been expected for some time. Mr. J. B. Haggin, owner of this magnificent farm, now lives in Kentucky and proposes to confine his thoroughbred breeding to his famous Elmsdorf Farm. Rancho del Paso has been managed by John Mackay, undoubtedly one of the greatest horsemen the world has produced, and in twenty years has had a phenomenal growth. In 1881 the only stallion owned by J. B. Haggin was Longfield. Today there are almost forty stallions at Rancho del Paso, from all parts of the world. Like the celebrated breeder of England, the Duke of Portland, J. B. Haggin could boast of owning sons of Prince Charley, Musket and Ormonde. The first important breeding deal of J. B. Haggin was the importation from Australia of Sir Modred and Darebin. The former was wonderfully successful in the stud and gained fame for Rancho del Paso through the successes of Tournament, who won over \$100,000; Ballarat, the great steeplechaser, and the extremely fast sprinters, Dr. Hasbrouck and Bendoran. Ten years ago Goldfinch, Watercress, Golden Dawn and Golden Garter were imported from England, and these horses have since produced many winners. Such stars as Salvador, Firenze and Ben Ali have carried the Haggin colors in races. In recent years J. B. Haggin has not raced any horses in his own name, but such celebrities as Sir Walter, Water Color, Africander, Proper, Dainty, Montana and dozens of others first saw the light of day at Rancho del Paso. In all probability the famous farm, which contains over 44,000 acres of fine land, will within a few years be divided into small farms and sold. It is unfortunate for California breeders that the horses are not to be sold in this State, as it will be a loss to our breeding interests to have all these valuable animals sold in the East.

NOCTURNO 2:26, the handsome black stallion pictured on our front page this week, is owned by Editor G. A. Westgate of the Albany, Ore., Herald, a gentleman who as one of the directors of the State Agricultural Society of Oregon did much to place that institution in the high position it now occupies as one of the great State fairs of the West. Nocturno is a son of Alfonso (he by Baron Wilkes out of the great Alma Mater) and his dam is Darknight 2:25½ by Fieldmont 5650, second dam by Herod 510, third dam by Edwin Forrest 49, and fourth dam the mare Wanderer that was inbred to American Eclipse. Nocturno was a prize winner at the Lewis & Clark live stock exhibition at Portland last week and his daughter Moonlight Belle and son Marillo both won first in their classes. Moonlight Belle also took championship honors, and was pronounced by the judges as perfect a filly as they had seen anywhere.

OWNERS OF THOROUGHBREDS will read with interest the advertisement of the New California Jockey Club stakes for the racing season of 1905 and 1906, which appears in this issue. The stakes are the richest ever offered on the Pacific Coast and the regular overnight purses are increased over what they have been in former years. Racing is to be held at all three of the tracks owned by the club this season, and horsemen are confidently predicting the

greatest racing season ever held in California. The stakes will close Monday, October 23d, and it will be well for all owners to put a copy of this big stake advertisement where they can refer to it handily, and not allow the date of closing to slip their memories.

PACIFIC BREEDERS' FUTURITY is announced. It is for the foals of mare bred this year and its value is guaranteed to be \$7000 by the Pacific Coast Horse Breeders' Association. Many of the best posted horsemen in California predict that within the next three years harness racing will be so revived in this State that the California circuit will be one of the best circuits held anywhere, and the value of the purses and stakes will be increased considerably over what they have averaged in recent years. It therefore behooves every breeder to have his colts well staked and this stake being one of the most important of those given in California should secure your entry. The stake will close for the nomination of mares on December 1st. See the advertisement in this issue.

BRIGHTON BEACH STAKE EVENTS for the season of 1906-1907 close on Monday next, October 9th. To be run in 1906 for two-year-olds now yearlings, are the Brighton Junior of \$15,000, the Neptune of \$7500 and the Venus, for fillies, of \$7500. To be run in 1907 for three-year-olds now yearlings are the Brighton Derby of \$15,000, the Queen, for mares and fillies, of \$7500, and the Broquois of \$7500. See the advertisement in this issue and don't forget that Monday next is the date of closing.

SHERIFF SMITH of Mendocino county did the proper thing when he shut down all the illicit gambling games that were started up in Ukiah during the race meeting this week. There is no reason why a lot of tin horn gamblers should have any more right to break the laws of the State during a race meeting than during a camp meeting.

SAN FRANCISCO DRIVING CLUB RACES.

The San Francisco Driving Club will hold a meeting at the Santa Rosa track on Sunday, October 15th. Four races are on the program as follows:

First race, 2:20 class—D. Leiginger's Ring Rose, J. O'Kane's King V., Geo. Algeo's Mixer, Joe Cuicello's Welladay, T. Cabney's Bob Ingersol.

Second race, free for all—A. Schwartz's Clara L., M. Donnelly's Flora G., C. Lacari's Charley J., V. Verilhae's Gertie A., A. Hoffman's Kitty D.

Third race, 2:40 class—J. Frediana's Lulu E., J. Paulsen's Schilling's Best, D. Seibert's Ed Rea, W. O'Kane's Bay Ike, R. Miller's Senator Hearst.

Fourth race, 2:25 class—J. Pastene's Billy F., Max Levy's, Cash, C. Becker's Dan Alden, C. Faulkner's Dexter Wilkes, J. Lawlor Jr.'s Grace McKinney, C. Mitchell's N. L. B., J. Holland's Headlight.

The second race is a sweepstakes, each owner putting up \$100, the club adding \$200, and the totalisator people, who will handle the betting, adding a certain percentage of the amount handled. This will make the race worth at least \$800, all of which will go to the winner. The action of the club in securing the totalisator for its betting instead of the books, is commendable.

The racing will start at 12 o'clock sharp so that it will be finished in time for San Francisco visitors to catch the afternoon train for home.

The judges will be Messrs. Murray, Benson and Lauterwasser, and the timers Messrs. Coons and Deschler, all members of the club. The starter will be W. J. Kenney, the well known bike manufacturer. Frank Turner, lessee of the Santa Rosa Stock Farm track, has agreed to furnish a chicken dinner at 25 cents each for all who attend.

LOS ANGELES DRIVING CLUB ELECTION.

The annual meeting of the Los Angeles Driving Club was held last Monday evening. Reports of the outgoing officers showed there was \$1448.72 in the treasury, and 102 new members with which to start the new year. A. W. Bruner was elected secretary for the ensuing year, which was the only change made in the list of officials.

Dr. William Dodge was elected president to succeed himself, while C. A. Canfield was re-elected vice president. L. J. Christopher, the treasurer, holds the same office in the Los Angeles Harness Horse Association.

Following are the directors who were chosen: Dr. Charles W. Bryson, Henry N. Henderson, Ed J. Delorey, George A. Pounder, Dr. W. A. Connelly, Henry Berry and J. A. Fairchild. The president, vice president, secretary and treasurer of the club are ex-officio members of the board.

The colt stake gotten up last year for three-year-old colts bred in Yolo and Solano counties was won at Woodland last Saturday by Carey Montgomery's colt Chaser by Diablo. The only other starter was Col. Crawford's colt Colonel C. Chaser won in straight heats. The time was 2:43½, 2:42½ and 2:35½. \$149 went to the winner and \$90 to the second colt.

Pacific Breeders' Futurity No. 6, for the foals of mares bred this year, is advertised. It only costs \$1 to nominate your mare. See the advertisement.

SUCCESSFUL MEETING AT HOLLISTER.

The meeting given at the Hollister mile track last week was one of the most successful ever held in San Benito county. The racing was clean and while no sensational time was made during the four days' racing a number of heats were trotted and paced in standard time. Purses were paid promptly and in full, and all the horsemen who took part in the sport speak in the highest praise of the officials of the Hollister Association who had charge of the meeting. The Ward Totalisator was used for the betting and gave great satisfaction. It was well patronized. The summaries:

Sept. 27—Pacing, 2:30 class, purse \$150.
Dewey, b. g. (Mack) 4 1 2 1 1
Carrie B., b. m. (Mizner) 1 3 1 3 3
Elsie P., b. m. (Gray) 2 2 3 4 1
Senator Hearst, b. g. (Leiginger) 5 1 1 5 5
Margaret B., b. m. (Knuckles) d

Time—2:23½, 2:26, 2:29½, 2:30, 2:31.

Pacing, 2:20 class, purse \$150.
Flora G., ch. m. by Echo Jr. (Leiginger) 1 1 1 1 1
Inferno, b. g. by Diablo (Ferguson) 1 4 2 4 4
Kittie D., ch. m. by Dictatus (Cuicello) 2 2 3 2 2
Prince Charles, ch. h. (Smith) 3 3 5 3 3
Mollie B., b. m. (Mizner) 5 5 4 5 5

Time—2:22½, 2:21½, 2:21, 2:30.

Sept. 28—Special trot, purse \$175.
Mayola, blk. m. by Vallota (Mizner) 1 1 1 1 1
Homeway, b. g. (Cuicello) 2 2 2 2 2
B. T. W., br. g. (Knuckles) 3 4 3 3 3
Ollie B., ch. s. m. (Gray) 4 4 3 1 1
Prince Mack, b. g. (Leiginger) 5 5 5 5 5

Time—2:32½, 2:33, 2:31½.

Mixed, 2:10 class, purse \$175.
Don, s. g. (Mann) 1 1 1 1 1
Louisa A., b. m. (Whitehead) 2 2 2 2 2
Alfred G., b. g. (Mack) 3 3 3 3 3
Lulu E., b. m. (Knuckles) 1 4 1 1 1

Time—2:31½, 2:31, 2:37½.

Pacing, 2:17 class, purse \$150.
Jean Madison, b. m. by James Madison ... 2 1 1 1 1
Irvington Boy, s. g. (Gray) 1 4 3 3 3
Ring Rose, b. g. (Carroll) 3 3 2 2 2
Welladay, b. m. (Cuicello) 4 2 4 4 4

Time—2:29½, 2:30, 2:31, 2:33.

Sept. 29—Special race, purse \$135.
Kittie D., ch. m. by Dictatus (Cuicello) 1 2 3 1 1
Inferno, b. g. (Ferguson) 2 1 2 4 4
Prince Charles, ch. h. by Chas. Derby ... (Smith) 4 4 1 3 3
Flora G., s. m. (Leiginger) 3 3 4 2 2

Time—2:21¼, 2:20, 2:21¼, 2:21, 2:21.

Two-year-olds, mixed, purse \$100.
Salva, b. f. by Dictatus Medium (Wright) 1 1 1 1 1
Sultana Boy, b. h. (Vinagre) 3 2 2 2 2
Margaret B., b. m. (Knuckles) 2 3 4 4 4
Dock, b. g. (Cummings) 4 4 3 3 3

Time—2:33½, 2:32½, 2:28.

Special pace, three in five, purse \$135, three heats.
Carrie B., b. m. (Mend) 1 1 2 1 2
Mollie Button, br. m. (Mizner) 3 2 1 3 2
Senator Hearst, b. g. (Leiginger) 2 3 3 3 3
Alice D., b. m. (Whitehead) 4 4 4 4 4

Time—2:26¼, 2:24, 2:30.

Special mixed, three in five, purse \$135.
Dewey, b. g. (Mack) 2 1 1 1 1
Jean Madison, b. m. (Mizner) 1 2 3 2 2
Welladay, b. m. (Cuicello) 5 3 2 3 3
Homeway, b. g. (Whitehead) 3 5 4 1 1
Irvington Boy, s. g. (Gray) 1 1 5 d

Time—2:29½, 2:25, 2:26, 2:25.

Special mixed, three in five, purse \$100.
Ring Rose, b. g. by Falrose (Cuicello) 1 1 1 1 1
Don, s. g. (Mann) 2 2 2 2 2
Mayola, blk. m. (Mizner) 4 3 3 3 3
Ollie B., ch. s. m. (Gray) 3 4 4 4 4

Time—2:26, 2:26, 2:33.

Special mixed, three in five, purse \$100.
B. T. W., br. g. (Knuckles) 1 1 1 1 1
Louisa A., b. m. (Whitehead) 2 2 2 2 2
Prince Mack, b. g. (Leiginger) 3 3 3 3 3
Alfred G., b. g. (Mack) 4 d

Time—2:34, 2:30½, 2:30.

RACING AT INDEPENDENCE, OREGON.

September 29—Special trot, purse \$50. The Freak 1-1-2-1, Prince Vinmont 2-2-1-2, Binger Herman 3-3-3-d. Time, 2:52½, 2:40, 2:44, 2:45.

Three-year-old, trot or pace, purse \$50; half mile. Teddy R. (ch. g. by Lovelace) 1-1-1, Hannah 2-2-2, Lady of the Dalles 3-3-3. Time, 1:35, 1:37, 1:40.

Half mile dash, purse \$50. Master won. Time 54¾.

September 30—Free for all pace, purse \$200. Byron-lace (b. s. by Lovelace) won in straight heats, Lom-netta 2-2-2, Ben Bolt 3-3-3. Best time 2:26.

Special—Purse \$50. May Tilden 1-2-1, Jim Wilkes 2-2-2. Best time 2:25.

Three-quarter mile dash, purse \$100. Master won, Vincent second, Brookwood third. Time 1:19.

Audubon Boy and Sweet Marie tried to break the track records at Belmont Driving Park, September 27, but both failed. Audubon Boy attempted to lower the track record of 1:59¾, made by Star Pointer, but the best he could do was 2:08½. His time by quarters was 0:30½, 0:59¾, 1:31½ and 2:08½. Audubon Boy drew up lame as he went under the wire, having struck one of his front feet, which is a little sore. The best Sweet Marie could do in attempting to break the track record of 2:04½, made by Cresceus, was 2:06. The time by quarters was 0:30½, 1:00½, 1:33½ and 2:06. Sweet Marie's time for the first half mile was a half second faster than that made by Cresceus.

The Central California Fair opens at Hanford next Monday, October 9th. The half mile track at Hanford is one of the best in the State and has been put in extra fine shape for the races to be held during the fair.

The Ukiah meeting closes this afternoon with an excellent program of harness racing.

JOTTINGS.

THAT THE YEAR 1905 may be remembered as the season when the blue laws and the elements seemed combined to stop harness racing. By the official prohibition of pool selling at some of the principal tracks and heavy rain storms of several days duration at others, now comes the news that the Memphis meeting has been declared off owing to the fact that the Tennessee metropolis is in strict quarantine against the outside world on account of yellow fever which is raging in the States south of that point. This is a most unfortunate condition of affairs. The Memphis meeting has been the climax of the Grand Circuit since Messrs. Jones, Billings and others built the magnificent track there and placed Murray Howe in charge of it as secretary and manager. Great racing and record breaking performances have been the rule every year, and horsemen all over the country and turf writers as well, have come to the habit of refraining from forming opinions as to the greatest trotters and pacers of the year until Memphis had been heard from. Last winter the Tennessee Legislature, realizing the great evil that was being done the breeding interests of the State by the bookmaking running meetings and pestiferous pool rooms, passed a racing law which would abolish them within the confines of the State. Recognizing the fact, however, that the Memphis trotting meeting was not in the same class with these tracks, yet knowing that for constitutional reasons it could not be separated therefrom, a proviso was made in the law that it should not take effect until December 1st, this year, or after the Memphis trotting meeting was to be held, and the hope was expressed that before another year passed the State constitution could be so amended that the law could discriminate between the two. That dreaded scourge, the yellow fever, has made a strict quarantine imperative, however, and there will be no meeting at Memphis this fall.

STAR POINTER 1:59½, the first horse to prove that two minute speed for a mile was not impossible for a harness horse, will, as was stated in the Breeder and Sportsman several weeks ago, make the season of 1906 in California. That he will have a very large number of high class mares sent to his harem is certain. California breeders have the reputation and a deserved one, of knowing a good thing when they see it, and the most prominent and successful amongst them are only waiting for Star Pointer to arrive to book their mares. Charley DeRyder, who has been trainer for James Butler's East View Farm horses at Pleasanton for two winters and who has driven the Grand Circuit members of the string in all their races during that time, has secured a lease of Star Pointer for two years. Star Pointer is now sixteen years old but strong and vigorous, and according to Casper Redfield's theory just coming to his best as a sire as he has had road work ever since he quit racing, and his development has never been stopped. He is owned by William White, proprietor of the Two Minute Stock Farm, near Cleveland, Ohio. It was on August 28th, 1897, that Star Pointer astonished the world by pacing a mile in 1:59½ over the Readville track and the two minute horse was a reality. Among the leading California breeders to hear of the coming of Star Pointer to this State, was Mr. Martin Carter, proprietor of the Nutwood Stock Farm, the gentleman who bred John A. McKerron 2:04½ and many other fast ones. Mr. Carter has probably bred to more "outside" stallions than any stock farm owner in California, and on his farm at Irvington there are fillies and colts by nearly every high class horse that has made a season in California during the past ten years. He has already selected a few of his choice mares to breed to Star Pointer when his California season opens and the blood of the famous Hal tribe will soon be on the farm to mix with that of Director, Nutwood, Electioneer, Geo. Wilkes, Stamboul, Steinway, McKinney, Williamson's Belmont and many other great ones now so conspicuous there.

I see that Zombro 2:11 just walked away with a string of prizes at the Lewis & Clark Stock Show at Portland. This is no surprise as he is beyond a doubt one of the grandest looking stallions in America. Zombro won the first prize for standard trotters, the champion prize and the grand champion prize, three handsome medals that must have pleased his owner, Geo. T. Beckers, immensely. And Zombro's son, Lord Kitchener 2:29½, an own brother to Charley T. 2:13½, was awarded second prize. This was additional glory for Zombro.

Jack Phippen's friends, and there are thousands of them in California, will enjoy the following little "josh" which Mr. Phippen is telling the boys: "I read Murray Howe's Excuse Book," says Phippen, "and thought the list was pretty nearly complete, but I heard one here last Sunday that lays them all in the shade. I will have to tell the whole story that you may understand it. I was working a horse by Boodle 2:12½ here at the San Jose track last summer for T. S. Montgomery. The dam of this horse is also the dam of Thompson 2:14½. He was working miles along from 2:25½ to 2:27. One morning B. O. Van Bokkelen, who had just returned from Emeryville with his stable of runners, happened to be in the stand with Mr. Montgomery, John Gordon and a few other gentlemen, and on seeing the Boodle horse go by said, 'Gentlemen, there goes as great a Boodle as I ever saw. He ought to be going miles in 2:15 or 2:16 as easy as you saw him step that one in 2:25½. All he needs is balancing, and I can

do that so he can trot a mile in 2:15 in thirty days from the time I take him."

Well, time wore along and I worked the horse a mile in 2:22½. Finally Van Bokkelen got the horse to train on a sale deal. The day after getting him of course he had to change his shoes a little and then he tried him the following day. He did not go just to suit Van so he changed his shoes again and again until he had him in his stable 36 days, and on Saturday last worked him out a mile in 2:32½. He noticed everyone around looking for that fast mile, and could not go on the track without someone holding a watch on him. He was six days overtime and the mile in 2:15 had not materialized. In the afternoon Billy Montgomery, one of my groomers, was walking by Van's stalls, when the latter called him over and said:

"Billy, did you ever know Bondette (meaning the Boodle horse) to be lame or sore over the kidneys?" "No," says Billy, "I never knew him to be sore or lame in his life."

Well, sir," said Van, "I have handled a great many Boodles, but this is the first one I could not balance, so I examined him this afternoon after his work and I found he has only one kidney, the other being entirely gone."

It is expected that Murray Howe will get permission from Van to use this excuse in all future editions of his famous book.

The sensation of the four days' racing at Hollister last week was the performance of Salva by Dictatus Medium, dam Aunt Sally by Benton Boy, grandam by Brown Jug. Salva is two years old and is owned by Ed. Wright, a farmer who broke and drove Salva himself, driving her mostly on the road, as the track was not fit to drive on until thirty days before the races. Salva never worked a mile until five days prior to the meeting. She is level-headed, a big, strong filly, and moves like her sire, strong and steady, and like a piece of machinery. She won her race in straight heats in a jog at the finish in 2:33½, 2:33½ and 2:28. Salva has paced quarters in 34½ seconds and could have been driven five or six seconds faster than the time she made in the last heat, although the track was heavy and slow for a pacer. Mr. Wright had two offers of \$500 and one of \$600 for her. He asks \$1000, with a prospective buyer. With an experienced trainer and proper handling she should make a very fast and valuable animal. She won the admiration of everybody. Her sire, Dictatus Medium, is owned by Mr. R. P. Lathrop of Hollister, and is by Dictatus 2:17 out of Belle Medium, the dam of Stam B. 2:11½. He has great promise as a sire of extreme speed.

That colt trotters produce colt trotters is getting to be a pretty well established fact. Last Tuesday Miss Adbell, daughter of the champion yearling trotter Adbell 2:23, won the Kentucky Futurity and took a record of 2:09½, beating the favorites Sadie N. and Katherine L. That Adbell would sire early and extreme speed has never been doubted by breeders and his death was one of the severe losses to the trotting horse breeding industry. He was foaled in 1893 and was by Advertiser 2:15 (son of Electioneer and Lulu Wilkes) out of Beautiful Bells, greatest of brood mares. Up to the close of last year Adbell was the sire of ten standard performers, all youngsters, and this year six more of his get have entered the list. Adbell made his record at San Jose in a match against Father Time. He had started in actual races twice that year previous to this performance, once at San Francisco, where he won the mile dash for yearlings in 2:28, beating Gen. Caution by Caution, Cleopatra by Silver Bow, Steel Spring by Pilot Prince and Rosie Woodburn by Easter Wilkes, and again at Woodland, where the mile was made in 2:26, and he beat Eureka by Ira and Rosie Woodburn. When he trotted to the world's record of 2:23, a mark that has never been beaten, he was driven by Walter Maben and the late Frank W. Covey, superintendent of Palo Alto Stock Farm, drove the runner that accompanied the colt. He trotted the first half in 1:12 and the last in 1:11, and Walter Maben said on dismounting from the sulky that he could have driven the mile a second or two faster, but he wanted the mile to be made without a skip or a break. Miss Adbell is well bred on her dam's side, but not in what would be called fashionable lines. Her dam, Emma T., had a trotting record of 2:17½ and was foaled in 1887, getting her record in 1894 when she was seven years old. She was fifteen years old when she produced Miss Adbell. Emma T. was by Socrates' 287, a son of Hambletonian 10, foaled in 1866, and therefore 20 years old when he sired Emma T. The dam of Socrates was Lady Fallis by American Star 14, who produced Kisbar 2:27½ and Pickering 2:30 and was the dam of the producing sires Norwood, Kisbar, Pickering and Socrates. Lady Fallis was the grandam of Clingstone 2:14 and three others including the stallion Fallis by Electioneer. Fallis is the sire of Bradmoor, Don Marvin and Falrose, all producing sires. The second dam of Miss Adbell is Patsey Labor by Abdallah Pilot 708. Abdallah Pilot was a son of Abdallah 15, and out of Blandina by Mambrino Chief. Blandina had six producing sons including Swigert, King Rene and others. Blandina also produced Barrena, a great broodmare and dam of Bertha, the dam of Don Derby 2:04½, Owyho 2:07½, Diablo 2:09½, Demonio 2:11½ and others. The third dam of Miss Adbell is Lizzie by Austerlitz, an own brother to the famous horse Lodi, whose races with Norfolk are remembered by all California horsemen. It is interesting to know that the winner of this year's Kentucky Futurity is by a California bred stallion and that on her dam's side she is related to such distinguished and well known horses as Fallis, Bertha and Lodi, all of which have made much horse history in this State.

MARQUE'S NOTES OF PACIFIC COAST HORSES.

(From the Horse Review.)

Several weeks ago considerable stir was caused among horsemen by press dispatches sent out from Columbus, which stated that at a matinee there, Sept. 1, the unmarked four-year-old filly Easter Direct, had paced a public mile in 2:03¾. The time was so extraordinary that most people were inclined to be incredulous. I was one of them, but I am so no longer, for I have verified the performance by the testimony of a number of good men who timed it. This is the fastest public or private trial ever made by a green pacer. Her Grace held the honors previously, she having paced at Memphis last fall in 2:04¾.

Easter Direct is owned by E. A. Gammon, of Courtland, Cal., and is controlled by Ed Mills who owns Searchlight 2:03¼. Mr. Mills broke her in the summer of 1904 in California and in six weeks drove her a mile in 2:25. In January of this year she was turned over to Ira Goodrich, the young man who brought out Tuna, 2:08½ and Brilliant Girl. Goodrich tells me that on May 10, at Pleasanton, Cal., he worked her a mile in 2:08¾, and at Detroit one in 2:07¼. She was sick for several weeks in mid-season and was let up on for the time being. She is a good looking brown filly, standing about 15.2 hands, and, like all her famous family, is possessed of a lot of substance—a stout full made one. Her front shoes weigh five ounces each and in addition she wears a two-ounce toe weight. Quarter and ankle boots complete her rigging. Mr. Mills stated that she would return to California in a few weeks to winter and will be raced in the big stakes in 1906.

Many of the best horses on the circuit have gone wrong and are out of it. An exception to this chapter of misfortunes is the fast mare Zephyr 2:07¼. When she started her campaign at Windsor it was common remark that she wouldn't last three weeks. But she has improved steadily and now looks like a 2:06 trotter on good footing. I believe had she been sound all season it would have taken a Sweet Marie to measure her.

The East View Farm has sustained all manner of bad luck this season. The fast three-year-old trotter, The Phantom, got off after reaching the East from Pleasanton, but later rounded to and became right good. Charley DeRyder had hopes of winning a piece of the Review and Kentucky Futurities with him, but after reaching Columbus the colt was taken with a high fever. He may not be able to race in either of these events.

Helen Norte 2:09½ is a new addition to the 2:10 list. She hails from Walla Walla, Wash., and was bred and is owned by Judge Thomas H. Brents, of that city. H. B. Rutherford, her present driver, is responsible for her present education. He tells me that she was a natural pacer, the cross-hobbies being required to make her find the trotting trick. This was done when she was a yearling. When a two-year-old she started a few times, taking a record of 2:26¼. As a three-year-old her campaign was for the most part against aged horses, she taking a record of 2:17. She is now five and is a little mare in height—stands but 15 hands—and a deceiving one as to her strength. When you look her over you find she is made to order. Rutherford tells me that she was laid up after racing this spring at Denver, and is just now getting her strength back. She sustained a mild case of "founder" in the Mountain city, and for a long time had to be let up.

The great race mare Anzella 2:06¾ foaled a filly by John A. McKerron 2:04½ last week. Isn't it unfortunate that it was not a colt? Every visitor to Pat Shank's farm, where McKerron holds court, tells the same story about the foals by him out of Mr. Billings' mares. All are enthusiastic.

The horses of Mr. Billings' stable are in superb condition, excepting, of course, Lou Dillon 1:58½, who has been ailing all season. Lou is being jogged and little has been done with her since her appearance at Chicago during the Inter-City matinee. The track there was in wretched condition and the work she did over it did her no good. Mr. Billings sailed for Europe some days ago and it was his desire that Lou be let up on till next spring. She is in fine flesh now, weighing as much as she ever did in her life. "Doc" Tanner tells me that Mr. Billings, before leaving, spoke of breeding her in the spring to John A. McKerron, and then keying her up for a few farewell efforts against time. By this it must not be concluded that Lou's case is hopeless. It means simply that she got too much of it last season and Tanner, as well as her owner, figures that another severe grueling at this time would be suicidal.

FAST STALLION FOR SALE.

One of the gamest and best race horses ever seen on the circuit was Meridian 2:12½, son of Shinnocolor and a Sidney mare. He is now advertised for sale by Mr. Robert Brown of Petaluma and we have no hesitation in recommending this horse as a good one for any live horseman to make money with in the stud. Meridian's oldest foals are four years old and they are all handsome, stylish with good action and speed, and all larger than he. The compact stallion that breeds large is in nearly every instance the best horse to breed to. Geo. Wilkes, Direct, Sidney Dillon, Directum and many other great sires were of this sort. Meridian can be purchased for a price that is ridiculously low, and an active man can pay for the horse and earn a neat sum beside, from the results of one year's service fees. The horse is sound and can lower his record. He was a good winner when raced and was never outside the money.

Jack-on's Napa Soda does not tangle the feet.

OTHER PEOPLE'S OPINIONS

Henry T. White: It is announced that D. J. Campau, who for years has been the leading spirit in the management of the Grosse Pointe trotting track, will retire from the harness horse world, now that the track has been sold to a syndicate of running horse people. It is also on the cards that the course itself will no longer remain a member of the Grand Circuit and that Mr. Campau will resign as president of that body. The Detroit track has been wonderfully successful from whatever standpoint it is viewed. Racing as good as is seen anywhere has been witnessed there every year since the track was built, and it can not be denied that to Mr. Campau more than to any other one man the success of the venture has been due. It was Mr. Campau who thought out and established the M. and M. and Chamber of Commerce purses that have become classics of the harness turf, and in every other department of the track's management his hand has been ever apparent. That a man endowed with so much energy should have made a good many enemies as he went along is not strange, but Mr. Campau seemingly likes to scrap with those who cross his path, and he generally has had a battle of some sort on hand ever since I have known him. He got mad at the way the old Hamtramck track in Detroit was being run a quarter of a century ago, and never rested until he had revolutionized matters in the old organization and placed it in the front rank of trotting tracks.

It was Mr. Campau who conceived the idea of a track at Grosse Pointe—and he built it. He organized the American Trotting Association because he was dissatisfied with the National. He owns a turf journal published in Chicago; he is president of the Grand Circuit—in short, Mr. Campau is and for years has been the leading figure in the harness racing world. If he is really going to quit, and quit for good, his action is a misfortune to the harness horse interests, as, in spite of his faults, Mr. Campau has done more than any other man to build up and reinstate in public favor a sport that at one time threatened to descend to the level of the running turf.

Trotter and Pacer—A driver who approached the judges at the meeting at Prospect Park, Baltimore, last week with a request for a little favor in the matter of the time which his horse had made in winning a heat, failed to secure the desired concession, but he did not come away empty-handed, for the indignant judges "soaked" a fine of \$25 against him, as a balm to their outraged feelings. It was not any too much, for a man who does not know any better than to offer such an affront to the judges needs to have the impropriety of the proceeding impressed upon him in a substantial manner. It is altogether probable that drivers who ask to have the time suppressed utterly fail to appreciate the significance of their request. The rules specially forbid it under heavy penalties, and the driver who solicits it therefore puts himself in a position of asking an official to perpetrate a fraud and render himself liable to punishment and disgrace for his (the driver's) special accommodation. This is unreasonable, to put it mildly, and it is no wonder that a self-respecting judge will treat such a proposition as an insult. The fact ought never to be lost sight of that whenever a driver is favored by having the time set back for the purpose of keeping his horse in a certain class, it is done at the expense of the rights and interests of every other man who is compelled to compete against that horse in the future. If he has fairly raced himself into a faster class, and is not compelled to start in that class, he dishonestly cheats every horse that he may thereafter defeat. As long as the record classification exists suppression of time must be considered to be as reprehensible as any other species of fraud which afflicts the sport, and it can not be too severely discontinued.

American Horse Breeder: It seems somewhat singular that Mambrino Patchen 58, the most successful brood mare sire of his day, did not impart to any of his sons the ability to equal his sire in this respect, yet it is evident that such is the fact. The most successful sons of Mambrino Patchen as sires and perpetuators of standard speed are Mambrino King, Mambrino Boy 2:26½, Byerly Abdallah and Dr. Herr. Ranking them according to their success as sires of standard speed, they come in the order named. Mambrino King is also far ahead of any of the others as a brood mare sire. At the close of last season his daughters were credited with 57 trotters and 36 pacers that had made records in standard time, a total of 93.

Mambrino King was got when Mambrino Patchen was nine years old, consequently was ten years younger than his sire. In order to make a fair comparison between them, we must refer to Mambrino Patchen's list in the Year Book for 1894. A reference to that work shows that the daughters of Mambrino Patchen had then produced 104 trotters and eight pacers, a total of 112, or 20 per cent more than the daughters of Mambrino King were credited with at the close of 1904, and yet the daughters of Mambrino King have produced a greater number of standard performers and also of extremely fast ones than the daughters of any other two sons of Mambrino Patchen. Most of our readers will remember that the dam of Mambrino King was by Alexander's Edwin Forrest and from a running-bred daughter of Birmingham, he a thoroughbred son of Stockholder, by Sir Archy.

The son of Mambrino Patchen, whose daughters have produced the next highest number of standard performers is Mambrino Boy 2:26½. At the close of

last season the daughters of Mambrino Boy were credited in the Year Book with 31 trotters and 6 pacers, a total of 37. Among them are Allerton 2:09¼ and Axtell (3) 2:12. The dam of Mambrino Boy was Roving Nelly. She was by Strader's Cassius M. Clay Jr. 22. Her dam was by Berthune, a thoroughbred son of Sidi Hamet, by Virginian, and he by Sir Archy, second dam by Thornton's Rattler, a son of Sir Archy, and third dam by imported Spread Eagle. It appears from this that the dam of Mambrino Boy was from a mare that was from running-bred ancestors on both sides. Mambrino Boy has sired in all 15 with standard records, 12 of which are trotters. This is a greater number of standard performers than are credited to any other son of Mambrino Patchen with the exception of Mambrino King.

Byerly Abdallah ranks third among the sons of Mambrino Patchen as a sire of standard performers. He received a much stronger trotting inheritance from his dam, however, and much less of the thoroughbred element than the two sons of Mambrino Patchen, that surpassed him as sires of speed. The dam of Byerly Abdallah was Lady Ayres, by Redmon's Abdallah, a son of Alexander's Abdallah, and his second dam was the great brood mare Lady Abdallah by Alexander's Abdallah, making his dam closely inbred to that famous son of Rysdyk's Hambletonian. Byerly's Abdallah was credited at the close of last season with nine trotters and four pacers that had taken standard records, but has had rather poor success as a sire of producing dams. The Year Book for 1904 credits his daughters with but seven standard performers, five of which were pacers.

Dr. Herr ranks fourth among the sons of Mambrino Patchen as a sire of standard performers with eight trotters and four pacers to his credit. His daughters however have proved far more successful as producers than those of Byerly Abdallah. According to the last Year Book they had produced 14 trotters and 16 pacers with standard records, a total of 30. This is nearly four times as many as were credited to the daughters of Byerly Abdallah, though his trotting inheritance was much less and his thoroughbred inheritance much greater than that of Byerly Abdallah. The dam of Dr. Herr was by Alexander's Edwin Forrest 49. His second dam was Telltale, dam of Tattler 2:26, a thoroughbred daughter of Telamon. The latter was by Medoc, a son of American Eclipse, and his dam was Cherry Elliott, a thoroughbred daughter of Sumpter, by Sir Archy. The third dam of Dr. Herr was Flea by Medoc; his fourth dam by Sumpter and his fifth dam by Doublehead, a son of Turpin's Eclipse, by imported Diomed.

Mambrino Chief and his descendants have almost universally been more successful in perpetuating speed through the female than the male line. It is doubtful if any other of the trotting families has derived greater benefit from thoroughbred crosses than this. The fastest trotters and best campaigners got by Mambrino Chief also his most successful sons and daughters, also grandsons and granddaughters, as perpetuators of speed, have in the majority of cases inherited close and strong infusion of thoroughbred race winning blood. Mambrino King is a good illustration of this. His sire, Mambrino Patchen, was by Mambrino Chief, and from a daughter of the thoroughbred Gano, by American Eclipse. The second dam of Mambrino Patchen was by a thoroughbred and his third dam had the appearance of a thoroughbred, although she was a natural pacer.

The dam of Mambrino King was by Alexander's Edwin Forrest, a horse that had no known trotting inheritance. He was from running-bred ancestors on both sides, yet he got two trotters that made standard records. The second dam of Mambrino King was a running-bred daughter of Birmingham, he by Stockholder, a son of Sir Archy. The second dam of Mambrino was mated with Mambrino Chief, the paternal grandsire of Mambrino King, and the produce was Fisk's Mambrino Chief Jr., that was the sire of six trotters with standard records, and whose daughters produced 24 with standard records, 19 of which were pacers. The superiority of Mambrino King as a sire, to Fiske's Mambrino Chief, was without doubt due largely to his additional thoroughbred inheritance, the same element that made Mambrino Patchen so much more successful as a transmitter of speed than his own sire Mambrino Chief.

Horse Show Monthly: It appears to the writer that promoters and secretaries of horse shows, especially those given in the West, have been lacking in the intelligent and broad qualities of promotion and publicity. It seems that the foundation of show patronage had not been laid upon sound ground. Nor has the show been thoroughly advertised as an invaluable instructive feature. Rather it has been exploited as a mere social function, a display of clothes and vapidity.

While the social part of the show is all right, it is not upon it, but upon the intrinsic merits of the exhibition as an instructive and enlightening proceeding that promoters of horse shows must depend for regular and consistent year-in-and-year-out patronage. The fashion plate, the dilettante and the debutante care little for the show as an exhibit of horses, and very soon grow weary of its a social function.

It is upon the farmer and breeder, the buyer and seller of horses that horse shows must depend for support. It is upon these men, from these classes, that the hundreds of shows in Great Britain and France depend. They are the men upon whom it should depend. It is to their interest, if not their pleasure or taste, to attend. Hence they are sure to be there.

Secretaries of American shows have not catered to these people. Their sole idea has been to sell a lot of boxes, on the "fashion" and "society" plea, to a lot of people who know not a thing and care less about horses. No effort has been made to interest the

breeder of heavy harness horses, the breeder of the saddle horse or the dealer at large.

When the small breeder and the farmer learn that it is greatly to their advantage to attend these horse shows that they may learn what the type, style or fashion in horses is, just as dry goods and millinery buyers go to the markets in spring and fall to study styles, the horse show will be upon a sound and substantial basis. When secretaries learn to reach for and secure "attractive" exhibits, and, above all, to learn how to exploit and advertise these exhibits, the halcyon days of the horse show will have arrived.

The days of "fashion," "break-into-society-this-way," "be-in-the-swim" and stuff of that sort are played out. If they are not, they should be. The days of donations, hold-ups, subscriptions, etc., are done. The horse show is a valuable educational institution. As such it deserves success, and will, if properly managed, stand upon an enduring foundation.

Horse World: To a novice in the business, all legs look alike to a certain degree, but when it comes to make a close investigation and compare parts and relationship we find that there is a great diversity of type and quality in different horses and different breeds, says a writer in an agricultural exchange. In every horse, however, there are necessary qualities of foot and limb, irrespective of breed. It is said, for instance, that "no foot, no horse," but every horse has feet, and most of them have fairly good ones, provided they are set on good legs. It is the leg, then, that we shall first consider.

It is a common saying that a horse should have "flat bone." This is but partially correct, for there is no such thing as flat bones in the leg of a horse. The leg bones are like the blade of a razor in shape, with the back of the blade turned to the front and the thin edge to the back. Such a bone presents a flat surface looked at from the side, but cut through a section will have an elliptical shape. When the leg appears to be round that fact is caused by lack of development of back tendons and the presence of a surplus covering of coarse tissue. What we are after is a "flat leg." This is denoted by a clean practically tissueless bone from the back of which the tendons stand out distinctly, and so that they can be readily grasped in the hand. From such a tendon and bone in the best draft horses of the Clydesdale breed and the improved English Shire the hair should grow as a silky fringe. Such hair or "feather," as it is often called, should not hide the bone and tendons nor surround the leg. Neither should it be coarse and kinky, like the dead horse hair stuffing of a sofa, or be so profuse in growth as to be plainly a nuisance. Hair of right quality is a sure evidence of flat, compact, "gun-metal" bone, and as a rule goes along with clean, well-marked tendons. Such bone is seen in the best class of breeds mentioned, but it is by no means special possession of these breeds.

When we find a clean leg and good joints the spring of the pasterns should be the next consideration, for no matter how nice may be the quality of the bone and tendons these qualities are largely destroyed by a steep pastern, which makes the action stilty, stiff and sure to cause trouble from severe concussion. We require oblique pasterns to offset concussion—to gradually or easily convey the concussion from the feet to the pillar of the leg bones above it. Looking at the profile of the leg the angle of the front of the hoof should be exactly that of the pastern. Any serious departure from an angle of forty-five degrees is to be considered a grave error not to be set right by paring or shoeing, and to be rejected, if possible, in breeding. A springy pastern possessed by a horse having clean bone and well-marked tendons with or without the fine hair alluded to above may be taken as indicative of free, straight action.

Action and quality go together, and it remains in examining a horse to see that this is the case when he is moved at a walk or trot. If his legs are properly set and his joint under proper control he will go and come without "padding" or "wobbling." The feet will be carried in a straight line, and rise and fall rhythmically, showing the shoe soles both fore and aft. A plummet line dropped from the center of the knee and pastern joint and back of the foot and the same line hung from the hip joint should cross the center of the foot and divide the gaskin in the middle. By this rule it will be easy to notice whether a leg good or bad is in or out of the proper position and whether the hind leg is crooked or sickle-hocked, hence prone to curbs and other ailments.

GRECO'S COLTS ALL TROTTERS.

Rohnerville, Calif., Sept. 25, 1905.

Editor Breeder and Sportsman: Dear Sir—In the Breeder and Sportsman of September 23 appeared an item saying that a yearling by Greco paced a half mile at Ferndale in 1:36, which we ask permission to correct. The colt did do a half mile easily in that time, but at the trot. Greco's oldest colts are yearlings and of the number yet broken every one trots. Not one has shown the least inclination to pace. The colt above mentioned has since trotted on the home track much faster; a half in 1:27, a quarter in 41 seconds and an eight in 20 seconds.

A yearling filly by Greco out of a mare by Electric, has trotted a half mile in 1:30, a quarter in 42½ seconds and an eighth in 20½ seconds. The two have been broken to harness less than three months.

Very truly yours,

W. R. JOHNSON, Trainer.

A DEMAND THAT CAN BE SUPPLIED.

San Francisco, October 1st, 1905.

One of the greatest problems of the times now to solve is the breeding with some degree of certainty of the high class carriage horse. The breeder's ability to produce upon California soil the equal of the world's best light harness horse performers has been thoroughly demonstrated. The breeding of all classes of domestic animals is conducted by individual enterprise, and is the outgrowth of ideas, therefore the fixity of type is greatly affected or destroyed altogether by the variety of opinions entertained by people of different tastes engaged in breeding. Hence there is a general lack of that uniformity of character so highly esteemed and so necessary in animals that are used for breeding.

Realizing that the highest degree of success in all things is only accomplished through the united and persistent efforts of enthusiastic and intelligent workers, and being inspired by an ambition to achieve greater perfection, more uniform production, higher physical qualities, greater endurance, more speed and more action in the breed of carriage horses of our own country, the United States Government is now working to the establishment of a model which shall become a standard to which all coach-saddle horse breeders may look as type-fying in form and qualities the ideal breed of carriage horses.

There are four styles of horses for which there is a genuine and earnest demand all over the land to-day, and for this demand there is not sufficient supply and in some instances no source of supply. First the handsome coach horse, second the handy, sound work horse, third the prospective 2:05 or better light harness performer, and fourth the handsome and gentle in all places saddle horse.

The coach horse must be from 15 to 16 hands, handsome, docile, of fine form, good solid color, gentle in all places, of high show action all around, and able to pull a coupe or carryall from seven to ten miles an hour.

The valuation and requirements of the handsome handy work horse, and the speedy light harness performer, are well known to my readers. Such horses will sell readily and at good prices in any part of the world, and whoever breeds them will find himself breeding to a profit and a good profit at that.

All over the country one hears the question asked, "Where can I find a pair of fine appearing carriage horses from 15 to 16 hands, stylish, sound and serviceable?" The question does not get one satisfactory reply in ninety-eight. Why is this? Is it because of unwillingness to pay a good price? No; the gentleman that wants them is as a general rule a liberal buyer and an offer of one, two, three, or even five thousand dollars for such a pair is not uncommon. It is not price, nor is it lack of activity to hunt for them, either on the part of the gentleman who wants them, or the dealer whose business it is to supply them, for there is no part of this broad land in which there is a probability of finding such horses, where they have not been sought.

It is astonishing to me that the California breeders who pride themselves upon the keenness of their perceptions have not foreseen and prepared themselves to meet so lucrative a demand, and one that is growing year by year and right in the face of the automobile fright. As long as there is a world there will be gentlemen of wealth, and as long as there is wealth there will be a demand for every high class carriage horse. The horse and the automobile are useful and each has its place. The admirer and owner of the machine is generally a lover of the horse.

The natural instincts of the American people naturally incline them to the admiration of a great horse of any class, but they should not be swept into the whirlpool of horse breeding on sentiment alone. It takes more than the love of the horse to be a successful breeder.

Many will ask what is the shape and what are the requirements that constitute a carriage horse? He should be harmonious in all proportions, such as high withers; deep brisket; prominent breast; well sprung ribs; good flank; head of medium size, clean and bony; jaw not too prominent; frontal broad; large clear eye; ear small at base, of medium length and sharp at point; throat small; neck long with slight crest; sloping shoulders; prominent muscles; back short and powerfully muscled over the loins; curve to the tail; strong hocks, legs and feet, with flat bone and large cords; trotting action quick, high and round, free and clean, with not too long a stride. Such a horse crossed on mares of a few handsome branches of the trotting families might and probably would give us what is wanted—the horse of the future.

Years ago the Morgans were the horses par excellence. They were handsome to look at and tough as wire nails. They had good strong legs and strong hearts and stomachs. In color they were blacks, browns, bays or chestnuts. Their hair showed the luster of health and the gleam of sunlight, and they were spiced with the temper of nerve force, but never stubborn. Physically they were not large horses, but they were all horse. Many were about 900 pounds in weight and under 15 hands, but in harness they looked larger.

You breeders that remember the form and type of the Morgan horse should realize that horses of that type, weighing from 900 to 1300 pounds, is what the world is looking for. This high type of the carriage horse has been produced and can be again by intermingling the best branches of the Hambletonian, Morgan, Bashaw, Sadi Hamet, Robert McGregor, American Clay, German Coach, French Coach, Hackney, Black Hawk, Indian Chief, Edwin Forrest, Pals Highlander, Blackwood, Stump the Dealer, Mambrino Patchen, Drummonds Hunt and the Percheron. Many branches of the thoroughbred should be avoided as they lack the conformation and also high action.

SAMUEL GAMBLE.

CINCINNATI RACES.

Only a fair crowd witnessed the Grand Circuit races at Oakley Park Friday and the favorites were unable to land any money. In the first heat of the 2:15 trot Albert C. won the first heat, but Boreazelle, the second choice, took the next three easily. Maud Keswick, the favorite, succeeded in winning the first two heats of the 2:06 pace, but Hazel Patch took the next three heats and the race.

Gold Dust Maid won the 2:12 trot in straight heats. Mainland, the favorite, finished sixth in the first heat and was beaten out a neck in both the second and third heats. In the third Mainland was winning, but he broke ten feet from the wire. Summaries:

Trotting, 2:15 class, purse \$1000.			
Boreazelle, br. h. by Boreal... (Demarest)	2	1	1
Albert C., g. g. (J. Dickerson)	1	2	3
Bowencher, br. g. (W. McCarthy)	6	6	2
Artois, b. m. (L. Turner)	3	3	9
Italia, b. m. (V. Nichols)	8	8	4
Nance Holland, b. m. (E. Hall)	5	5	5
Imperial Allerton, b. h. (S. Pasig)	8	7	7
Princess Xenia, br. m. (Roth)	7	9	8
John Timpey, b. g. (W. Snow)	4	1	6
Nellie Price, blk. m. (C. Phiguelly)	d		

Time—2:12, 2:11½, 2:11½, 2:14½.

Pacing, 2:06 class, purse \$1000.			
Hazel Patch, blk. h. by Hard Patch....	3	3	1
Maud Keswick, b. m. (James)	1	1	2
Don Carr, blk. g. (F. Clarke)	2	2	5
Fantine, b. m. (H. Jones)	5	4	3
Major McKinley, b. g. (O. Ames)	4	5	7
Allerton, g. h. (J. Brady)	6	7	6
Riley R., blk. g. (S. Pasig)	8	6	3
Foxie Curd, blk. m. (J. Rea)	7	8	8

Time—2:01¼, 2:05¾, 2:06½, 2:07¾.

Trotting, 2:12 class, purse \$1000.			
Gold Dust Maid, blk. m. by Silverthorn....	1	1	1
Mainland, b. h. (A. Thomas)	6	2	2
Lady Pauline, br. m. (J. Chandler)	2	8	6
Morn, ch. g. (G. Brinkerhoff)	5	3	2
Kindest Kind, ch. g. (A. Padgett)	3	4	7
Danube, br. h. (C. De Ryder)	4	5	5
Bonner, b. g. (H. Jones)	8	6	4
Dr. Puyteron, br. h. (F. Jolly)	7	7	7

Time—2:11¼, 2:11½, 2:11¼.

The meeting closed on Saturday with a small attendance. The card was a good one, but was ordinary from a Grand Circuit standpoint.

Jubilee, after finishing sixth in the first heat and fourth in the second heat of the 2:13 pace, won the next three heats easily. Norrie had no trouble in winning the 2:10 trot in straight heats. The 2:16 pace, the last event on the card, went to Harold Brooks in straight heats. Summary.

Pacing, 2:13 class, purse \$1000.			
Jubilee, blk. g. by Satrap... (D. McEwen)	6	4	1
Star Patch, br. g. (W. Dagler)	1	1	2

Jimnie C., br. g. (McPherson)	3	10	d
Lady Coleridge, br. m. (F. Jolly)	9	9	d
The Prince, b. g. (J. Brady)	d		

Time—2:10¼, 2:08¼, 2:09½.

LEXINGTON RACES.

The Kentucky Futurity, the greatest stake for three-year-old trotters in the world, was won by Miss Adbell at Lexington on Tuesday last. This filly is a daughter of the Palo Alto bred champion yearling trotter Adbell 2:23, son of Advertiser and the great Beautiful Bells. Her dam is Emma T. 2:17½ by Socrates 287, second dam Patsy Labor by Abdallah Pilot 708, third dam Lizzie by Austerlitz, a son of imported Yorkshire. Miss Adbell was driven to victory by Alonzo McDonald. Susie N. was the favorite and won the first heat in 2:11¾, which made her a still greater favorite, with Katherine L. as second choice over the field of high class three-year olds, and she was plunged on heavily by the talent. Miss Adbell won the race very handily however in the next three heats in 2:09¾, 2:10 and 2:11¼. The record of the race is held by Grace Bond, whose three winning heats were in 2:09¾, 2:09¼ and 2:09¾. Mr. W. A. Clark's colt Bon Voyage, winner of the two-year-old division last year, won fourth money. Marechale, a son of Margrave, getting third. The 2:08 pace resulted in a great contest, Maud Keswick, the Canadian mare, finally winning in the sixth heat.

The 2:09 class pace went to Texas Rooker in straight heats. The summaries:

Pacing, 2:08 class, purse \$3000.			
Maud Keswick, b. m. by Keswick, dam by Tariff.... (James)	1	1	6
Don Carr, blk. g. by Arrowwood, dam Miss Lee by Walkill Prince....	2	2	2
..... (Clark)	2	2	1
Citation, b. m. by Norralson, dam Strathmore.... (McMahon)	9	3	1
Ethel Mc., ch. m. (McCarthy)	8	5	5

Elmwood, br. g. (Snider)	10	9	8	3	2	ro
Larry Ginter, b. h. (Highly)	11	10	4	4	4	ro
Allerton, gr. h. (Brady)	7	8	9	7	5	ro
Baron Rogers, b. g. (C. Marvin)	6	7	10	9	6	ro
Peruna, b. h. (Murphy)	4	4	3	d		
Nancy H., blk. m. (Benyon)	5	6	7	d		
Eleanor, ch. m. (Dean)	3	d				
Stein, b. g. (S. Thomas)	d					

Time—2:06, 2:03¾, 2:07¾, 2:07¼, 2:07¾, 2:11¾.

Kentucky Futurity, value \$14,000, for three-year-old trotters.

Miss Adbell, b. f. by Adbell.... (McDonald)	4	1	1	1
Susie N., ro. f. by Moko.... (Murphy)	1	2	3	2
Marechale, b. c. by Margrave.... (Fleming)	5	3	2	7
Bon Voyage, b. c. by Expedition.... (Garrity)	2	4	5	4
Rosabel, b. f. by Adbell.... (Kenny)	8	8	4	3
Katherine L., b. f. by Liberty Chines....				
..... (Stinson)	3	5	7	6
Wigman, blk. c. by Wiggins.... (Thomas)	7	6	6	5
The Phantom, blk. c. by Boreal (De Ryder)	6	7	8	8

Time—2:11¼, 2:09¾, 2:10, 2:11¼.

Pacing, 2:09 class, purse \$1000.

Texas Rooker, b. g. by Texas Rooker....				
..... (McAven)	1	1	1	1
Hal C., ch. g. (Benyon)	2	2	2	2
Shylock, b. g. (McMahon)	5	3	6	
Byrl Wilkes, b. g. (Snyder)	6	4	3	
Ben F., b. g. (De Ryder)	4	5	4	
Oregon Maid, b. m. (Helman)	8	6	5	
Queen of Spades, blk. m. (Snow)	5	7	8	
Bad News, b. g. (Birney)	7	8	10	
Sunny Slope, (Shirley)	11	9	7	
Owyho, ch. h. (Murphy)	9	10	9	
Joe Interest, b. h. (B. Walker)	10	d		

Time—2:05¾, 2:05¾, 2:06¾.

A rank outsider won the two-year-old division of the Kentucky Futurity on Wednesday at Lexington, the race going to the bay filly Lightsome in straight heats. She was bred by James L. Dodge of Paris, Kentucky, who drove her in the race. The filly is by Constantine 2:12¾ (a son of Wilkes Boy and inbred to Mambrino Patchen on his dam's side), out of the pacing mare Bourbon Light 2:18¼ by Bourbon Wilkes. Ed. Custer, winner of the Kentucky Stock Farm Futurity at Oakley this year, was the favorite for the race, but had a bad start in both heats. Vera Prodigal by Prodigal out of Vera Capel 2:07½ was second in the first heat and third in the second, in which she was beaten out by Chas. Marvin's filly Silko by Moko, who came near beating Lightsome for the heat. The time, 2:14½ and 2:16, has only been beaten once in this race, in 1902, when Katherine A. won in 2:14 flat.

The 2:06 trot resulted in a sensational contest, although Wentworth was distanced in the first heat. After Dr. Strong and Snyder McGregor each took a heat, Norman B. came along and captured the third and fourth after interesting contests. Dr. Strong was the original favorite. The time marks a new world's record for four heats. Boreazelle won the 2:14 trot, and W. A. Clark Jr.'s Morone was a good second. The 2:12 pace went to Lyddite. McCoy of Washington Courthouse, O., was suspended for not driving Lyddite out. Snow was put up and won the race. The summaries:

Kentucky Futurity, for two-year-olds, purse \$5000.			
Lightsome, b. f. by Constantine (Dodge)	1	x	
Vera Prodigal, br. f. (O. Hilds)	2	3	
Silko, br. g. (Marvin)	8	2	
General Francis, br. c. (Foote)	3	9	
Silence, br. c. (Evans)	4	5	
Labondie, b. f. (Sanders)	9	4	
Quisetta, b. f. (Nolan)	5	8	
Ed Custer, ch. g. (Chandler)	6	10	
Daffodil, br. f. (Ames)	10	6	
Sheeney, ro. c. (Thomas)	7	7	

Time—2:14½, 2:16.

Pacing, 2:12 class, purse \$1000.

Lyddite, b. m. by Bobby Burns....	1	2	2	1	1
..... (McCoy and Snow)	1	2	2	1	1
Jubilee, blk. g. by Satrap (McEwen)	6	1	1	4	6
Inter Ocean, b. g. (Thomas)	1	7	8	7	2
Penchie, b. m. (Miller)	5	8	7	2	3
Ethel Rice, b. m. (White)	2	3	3	3	ro
Crystal, blk. m. (Valentine)	3	4	6	5	ro
Red Ash, b. h. (Falls)	7	5	4	5	4
Lookout Hal, b. h. (Nuckols)	8	6	5	dr	

Time—2:07¼, 2:08¼, 2:09½, 2:09, 2:11, 2:14.

Trotting, 2:06 class, purse \$1500.

Norman B., blk. g. by Phallax.... (McCarthy)	3	2	1	1
Dr. Strong, gr. g. by Strong Boy.... (Geers)	1	3	3	2
Snyder McGregor, ch. g. by Gilman McGregor.... (Hogan)	2	1	2	d
Wentworth, blk. g. (McCargo)	d			

Time—2:05¾, 2:05¾, 2:06¾, 2:07¾.

Trotting, 2:14 class, purse \$1000.

Boreazelle, b. h. by Boreal.... (Demarest)	1	1	1	
Morone, blk. g. (Garrity)	4	2	2	
Nancy Holland, b. m. (Hall)	2	8	7	
Imperial Allerton, b. h. (Geers)	6	4	3	
Kindest Kind, ch. g. (Padgett)	3	7	5	
Swago, b. g. (Thomas)	8	3	5	
Evelyn Byrd, b. m. (Dwyer)	5	5	4	
Lambie Rose, b. m. (Benyon)	7	6	3	
Dupuytrin, br. h. (Jolly)	9	9	d	

Time—2:11¼, 2:10, 2:09¼.

Mr. W. H. Lumsden's filly Bonalet by Bonnie Direct won the pacing division of the Kentucky Futurity on Thursday in straight heats, taking a record of 2:09¼ in the first heat. Miss Adbell was second. It seems that two daughters of Adbell were entered in the Kentucky Futurity for this year and both by the same name. One proved the winner of the trotting division, and the other won second money in the pacing division. The pacing filly is out of Luzelle 2:15¼ by Patron. The five-year-old bay mare Ethel's Pride, the crack daughter of Directum and Ethelyn, won the classic Transylvania race in straight heats, reducing her previous mark in the second heat by three-fourths of a second. The race was a very lucky one for Ethel's Pride, as she just managed to beat Ed Geer's gelding Turley in the first two heats, while Mainland came with a rush down the stretch in the third heat and almost nosed out the mare for first position. John Caldwell won fourth money in this race.

The 2:18 class trot had so many entries that it had to be divided. In the first division the mare Miss Kinney by McKinney won two heats, reducing her record to 2:10¾, and A. Penn won two, when the finish went over until Friday. The second division was finished in straight heats, Mainsheet, a son of Director General, proving the winner in the fast time of 2:08½.

NEWS AND NOTES.

2:09½ and 2:10½. Lady Mowry was fifth in the summary of this event, in which there were ten starters.

Dan Patch paced a great mile in an effort to beat his record. He just equalled his previous mark of 1:56, the quarters being 0:29¼, 0:58¾, 1:27¼, 1:56. As the Lexington track is not considered as fast as the track at Memphis, where he made his record last year, horsemen think he is a faster horse this season than ever before in his life. The summaries of the race follow:

Pacing, futurity, for three-year-olds, purse \$2000.
 Bonale, br. f. by Bonnie Direct....(Benyon) 1 1 1
 Miss Adbell, b. f.(Kenney) 2 2 2
 Josie M., b. f.(Jones) 3 3 3
 Countess at Law, b. f.(Voorhees) d
 Time—2:09¼, 2:10¼, 2:10½.

Transylvania, 2:12 trot, purse \$5000.
 Ethel's Pride, b. m. by Directum....(Andrews) 1 1 1
 Turley, br. g.(Geers) 2 2 4
 Mainland, b. h.(A. Thomas) 3 3 3
 John Caldwell, b. g.(Thompson) 4 4 4
 Kid Shay, b. g.(Rosmire) 5 5 5
 Deleres, b. m.(Murphy) 6 6 6
 Morn, ch. h.(Brukerhoff) 7 7 7
 Belle C., br. m.(Higbee) 8 8 8
 Pat Ford, ch. g.(Kenyon) d
 Time—2:08¼, 2:06¼, 2:07¼.

Trotting, 2:18 class, purse \$1000.
 Mainstreet, blk. h. by Director-General....(Thomas) 1 1 1
 Czarina, b. m.(McCargo) 2 5 2
 Pat T., b. g.(Patterson) 3 2 4
 Joe N., blk. g.(McDonald) 4 3 3
 Lady Mowry, b. m.(Cecil) 5 4 7
 Roscoe, g. g.(Murphy) 6 3 5
 Venago, ch. g.(Benyon) 7 8 6
 Ashland Dorf, b. h.(Stout) 8 6 9
 The President, b. h.(Caturis) 9 7 8
 John Turney, b. g.(J. Turney) 10 d
 Time—2:08½, 2:09½, 2:10½.

PERALTA REACHED NEW ZEALAND SAFELY.

Our readers will remember an item printed in this paper early in August this year, stating that Mr. E. Topham of Milpitas, Santa Clara county, had sold to Mr. H. J. Tasker of Christchurch, New Zealand, through an advertisement in the "Breeder and Sportsman," the bay stallion Peralta, sired by Nutwood Wilkes 2:16½, dam Rose McKinney, dam of Almaden (2) 2:22¼, by McKinney 2:11¼. The stallion was shipped to New Zealand on August 10th on the steamship Sonoma of the Oceanic line, and reached his destination safely as the following letter will show.

Christchurch, September 11, 1905.

F. W. Kelley, Esq., Proprietor of the Breeder and Sportsman:

The stallion Peralta which you purchased for me has arrived in New Zealand without a blemish on him and in splendid condition.

Have seen a lot of horses landed off of boats one time and another, but have never seen one in such good shape and heart as was Peralta. There wasn't a ruffle on him. Am sure you will be pleased to hear this after the trouble you must have taken to deliver the horse so satisfactory. There is a lot of credit due to Mr. J. K. Koughan, the chief officer on the S. S. Sonoma, as several of the passengers told me that he, Mr. Koughan, paid every attention possible to the horse. He was packed and padded beautifully and I don't think he could have possibly come to any harm in any weather. Of Peralta himself am more than pleased. Is just the sort of horse to suit the mares over here and am in hope of him trotting fast some of these days. It must seem poor pay to you, sir, but I tender you my most sincere thanks for the many kindnesses, promptness, and attention you have given me in securing Peralta. Am quite sure you have done the business more satisfactory to myself than I could have, had I been in California.

Yours most truly,

H. J. TASKER.

Empire Hotel, Christchurch, New Zealand.

OFFERS SEVERAL GOOD ONES.

Chas. A. Durfee, formerly owner of the stallion McKinney, has a number of high class and highly bred horses that he wants to sell. Mr. Durfee's residence is in Oakland and the horses are at the San Jose track, and getting pretty expensive, for a man who does not own pasture land but has to rent box stalls, to keep. There are four black mares by McKinney, a weanling filly by Lecco 2:09¾, and a yearling by Iran Alto 2:12¼, both out of Rose McKinney, the dam of Almaden 2:22¼ as a two-year-old, winner of the Breeders' Futurity and Incident Stakes. One of the McKinney mares is out of Stemwind, the dam of Directum 2:05¼, another is out of Babe by Ferdinand, son of Strathmore, and another is out of Fontanita by Antevolo, second dam Fontana, dam of Silas Skinner 2:17. The mare, Rose McKinney, is out of Queen Bee by Forest Clay, grandam by Almont Lightning, sire of Zombro's dam. This mare Durfee says is the finest lady's driving mare in the country, belag afraid of nothing on earth, and will eat her oats off a steam engine or an automobile if necessary, and will stand on the street untied long enough for a lady to enter a millinery store and select a new hat. That's quite a while, but Mr. Durfee says the mare will do it. He also has a three-year-old McKinney stallion for sale—"the best bred one living," and a McKinney gelding with a record of 2:17¼. Mr. Durfee wants to sell and the prices he asks are reasonable.

Mr. Frank Overacker of Centerville, Cal., has purchased a nomination in Pacific Breeders' Futurity for his filly foal of 1905 by Arner 2:17¼, own brother to Don Derby 2:04¼, Diablo 2:09¼ and Demonio 2:11¼, dam Fannie Vasto by Vasto. Mr. Overacker's filly is large and finely developed and a natural pacer of great promise. Mr. Overacker purchased the nomination from C. A. Durfee, whose mare Lasman, originally nominated in the stake, failed to foal.

Miss Patchen 2:09¾ is the fastest two-year-old pacing filly of the season.

Bon Voyage 2:12¼ by Expedition, is now the fastest three-year-old trotting colt of the year.

Mrs. Emma Murray, owner of the stallion Diablo 2:09¼, died in this city last week from heart disease.

C. K. G. Billings sailed with his family September 20th for Europe. He expects to return to this country in November for a short stay and will then return to the other side where he will remain for a year or more, traveling throughout foreign lands.

The management of the Belmont Driving Club, Philadelphia, is endeavoring to arrange a match race between Frank Yoakum, The Friend and Owyho. A reasonable purse will be offered, with an extra purse for each heat below 2:08. Three heats are suggested and the week of October 23 as the time.

Wentworth now holds the trotting record of the season for the Grand Circuit and is tied with Tiverton as the fastest race gelding, having stepped the second heat of his winning race at Columbus in 2:04½. Dr. Strong was right at his side at the finish.

The Colorado Springs trotter Woody R. fell dead from the rupture of a blood vessel while finishing in the lead in the 2:19 class at Cincinnati. The horse was owned by E. G. Davis and was valued at \$5,000.

Five horses by The Director General, son of Director 2:17, are reported to have beaten 2:12 this season. Saddle Fogg, 3, is credited with trotting a mile at Lexington recently in 2:10½. William P., 4, a pacer, trotted in 2:09½ also at Lexington, General Starr, a green trotter, owned in New England, stepped in 2:11 and The Sergeant trotted a mile at Terre Haute in 2:14. The Director General is owned by that popular reinsman, George Starr.

Canada has not yet bred a 2:00 horse, but is getting near the line. Gallagher 2:03¼ is the fastest pacing gelding, Maud Keswick 2:04¼ the fastest pacing mare, Wentworth 2:04½ her fastest trotter.

Meridian 2:12 1-4

There have been an even half-dozen miles trotted and paced over the Readville track as follows: Star Pointer, 1:59¼ and 1:59¾; Dan Patch, 1:59¼; Audubon Boy, 1:59¼; Prince Alert, 1:59½; and Lou Dillon, 2:00. There have been several others within a fraction of "even time." So Readville has a right to the title of "the two-minute track."

After Susie N. beat Bon Voyage at Columbus, W. A. Clark, Jr., owner of the colt offered Tommy Murphy \$17,500 for the daughter of Moko, but the offer was respectfully declined.

Dr. J. W. Day of Rochester has a four-year-old colt by Bingen 2:06¼, that he recently worked a mile over the Syracuse track in 2:12¼, last half in 1:04, last quarter in 31¾ seconds.

The remarkable success which has attended the county fair meetings all over the United States this season is but one more proof of the growing popularity of the light harness horse.

When a horse becomes old its teeth become long and sharp on the edges until many times it is almost impossible to eat food. When an aged horse thus refuses or fails to eat well and gaunts up easily when at work, the chances are that the teeth need attention. It seems strange, but this is the last thing that some folks think about when a horse is out of condition. The grinders are located well back in the mouth where they are not easily examined. Have the teeth examined and dressed by a veterinary.

Some of the dairy farmers in Vermont find it profitable to raise a good colt or two every year. S. D. Caldwell, Enosburg Falls, Vt., is one of them. In a recent letter he states that he sold a two-year-old May last, for \$300, was offered \$350 two weeks ago for a six-year-old and has a 14-3 hand yearling that is worth \$200. All three of the above were got by Young Wildie (2:22½), a California bred horse, whose sire was Electioneer and whose dam, Beatrice, was by the thoroughbred Wildie, second dam by Mohawk Chief and third dam by John Nelson, son of Imported Trustee.

An effort will be made to place Todd 2:13¾, the half brother of Saddle Mac 2:06¼, in the 2:10 list at Lexington.

If you own a thoroughbred don't fail to read the big stake advertisement of the New California Jockey Club in this issue.

An advertiser in this week's issue announces that he has a McKinney-Sidney filly for sale. She will be four years old next spring, is a dark bay, and broken to drive. Read the advertisement for further particulars.

Sweet Marie reduced her record to 2:04¼ in a race against time at Readville last Wednesday. The quarters were 0:31½, 1:02, 1:32¾, 2:04¼. McDonald believes he will yet drive her a mile in two minutes.

The Ward totalisator was used at the Hollister meeting last week. The association received more money for its share of the percentage than it ever received before, and the public were well pleased with the system.

Norman B. by Phallas won the fastest four heat race ever trotted when he won the 2:06 class trot at Lexington last Wednesday. The race was best two heats in three. Dr. Strong won the first heat in 2:05¾, Snyder McGregor took the second in 2:05¼, and Norman B. the next two in 2:06¾ and 2:07½.

J. W. Lipson, of Hanford, has purchased a Flower City cart from the San Francisco Wheel and Novelty Company, Sixteenth and Valencia streets, this city.

All the Rancho del Paso thoroughbreds, comprising thirty stallions and five hundred brood mares, are to be sold at auction in New York in December. The preliminary announcement appears in our advertising columns.

A coal black gelding by Knight, sound and gentle and with speed, is offered for sale by a San Jose advertiser in this issue.

One of the surprises of the year is the black trotting gelding, Wentworth, which defeated George G. 2:05¼ at Columbus last week, and took a record of 2:04½, the fastest mile by a trotter this year. Wentworth went through the Grand Circuit several seasons ago, and was looked upon as an outclassed trotter, but he appears to have taken a new lease of life.

Mendovena, a six-year-old daughter of Mendocino 2:19½ out of Avena 2:19½ by Palo Alto 2:08¾, trotted a good race at Pekin, Illinois, September 27th, where she won second money and was a good second in 2:15½.

Mr. A. Edstrom of Merced advertises an 18-months-old road pacing stallion of the famous Hal family for sale. This is the blood that produces extreme race winning speed at the pacing gait. Look over the advertisement. This may be just the colt you are looking for.

Here is a new variety of horse feed. The Hollister Advance says that Blessing Brothers of that city purchased fifty tons of bird seed straw in the San Juan valley to be used as bedding for their horses, and find that the horses all eat it with avidity and thrive upon the diet.

Adrian Wilkes, son of George Wilkes, is another sire to be represented by two new 2:10 per formers this season, his two being Lillian, pacer, 2:08½, and Miss Adrian, trotter, 2:09½.

Charlie Niles, one of the most familiar figures on the Western trotting turf, drove his last race at Libertyville last week and has bid good-by to the sulky for good. For a quarter of a century Niles has been identified with the development of the harness horse in the West and probably has given three or four score records in standard time. He became conspicuous first when he brought out the pacer Roy Wilkes 2:06½, and he was in his stable when he was sold for \$10,000. At Paris, Ill., on September 8, he was thrown from a sulky and received painful injuries. In fact, it was miraculous that he was not killed, as several horses stepped right over him; and this fact has something to do with his retirement.

THE HORSE.

Here is a Bombay native student's essay on the horse, says the Liverpool Post:

The horse is a very noble quadruped, but when he is angry he will not do so. He is ridden on the spinal cord by the bridle and sadly the driver places his foot on the stirrup and divides his lower limbs across the saddle and drive his animal to the meadow. He has a long mouth and his head is attached to the trunk by a long protuberance called the neck. He has four legs, two are in the front side and two are afterward. These are the weapons on which he runs; he also defends himself by extending those in the rear in a parallel direction toward his foe, but this he does only when in a vexatious mood. His feeding is generally grasses and grains. He is useful to take on his back a man or woman as well as some cargo. He has power to run as fast as he could.

He has got no sleep at night time and always standing awake. Also there are horses of short sizes. They do the same as the others are generally doing. There is no animal like the horse; no sooner they see their guardian or master they always crying for feeding, but it is always at the morning time. They have got tall, but not so long as the cow and other such like similar animals.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 16—Saturday Fly-Casting Contest. Re-entry. Stow lake, 2:30 p. m.
Sept. 17—Sunday Fly Casting Contest. Re-entry. Stow lake, 10 a. m.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Closed season for English snipe.
July 1-Feb. 15—Dove season open.
Aug 1-Oct. 15—Deer season open.
Oct 8—Vallejo Gun Club. Blue rocks. Floden Station.

Bench Shows.

Oct. 3, 6—Texas Kennel Club. Dallas, Tex. W. H. Ordway, Secretary.
Oct. 3, 6—Danbury Agricultural Society, Danbury, Conn. G. M. Rundle, Secretary. Jas. Mortimer, Superintendent.
Oct. 11, 14—Spokane Kennel Club. Spokane, Wash. A. B. Jackson, Secretary.
Oct. 17, 20—Frederick Agricultural Society, Frederick, Md. J. Roger McSherry, Secretary.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 28-Dec. 1—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.

1906.

Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.

Field Trials.

Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundy, Secretary, Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chaplin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Huntsville, Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Roehm, Secretary, Dayton, O.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov.—Indiana Field Trial Club, (Week following Illinois Champion Stake). C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary, Richmond, Va.
Dec.—Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 126 Maiden Lane, New York.
Dec. 2—Continental Field Trial Club, 11th annual trials, John White, Secretary, Hempstead, Long Island.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan.—Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

THE LONE FISHERMAN.

(By W. F. Hillegass.)

I only wish, and wish, and wish,
That I could fish, and fish, and fish,
On San Antonio the livelong day,
Holding down a box or bunch of hay,
Watching the current's lazy glide,
Fishing for the bass that hide,
Sad and pathetic, on that free soil
Anglers must toil, and toil and toil
And cast and sweat and cast and moan,
Ne'er catch a fish and ———, groan,
Grow old and bald, before his wish
Matures to land the festive fish.
Ah! life might be a pleasant dream,
If one could sit beside that stream,
With rod in hand at early dawn,
No comrade, save Mr. De Mijaw,
(The latter filled with lemonade),
Sure producer of the drowsy shade,
What higher bliss could mortal wish,
Than sit like this, and fish, and fish?

Oh! to fish like Bliss is blissful fishing,
For that cuts out a deal of wishing.

Anglers who have tried the Paper Mill recently have caught quite a few 8 and 10-inch fish in the stream between Tocaloma and Point Reyes.

Duck shooting in the marshes near Point Reyes promises well for the 15th.

A SIERRA HUNTING FIELD RUINED.

The region about Webber lake was once a splendid hunting country for mountain quail and grouse. In the "flats" of that section the birds found an ideal breeding place. Now all is changed, the country where once herds of the beautiful plumed quail and the pine grouse reigned supreme is a scene of nauseating desolation.

Early this season the anglers and other visitors at Webber lake noticed the presence of many quail and grouse, the birds had a most favorable year and large broods of "chicks" were anticipated. The season had been an early one and it was sanguinely believed that the birds, old and young, would have a chance to thrive and get away to the higher breeding grounds before the hands of sheep, which are annually sent up in the Sierra valleys to feed, came on the country like a devastating scourge.

The birds bred plentifully, but before they were ready to get away the sheep were upon them. Nests and eggs were destroyed and numberless young chicks were trampled to death. The sheep came into the country and spread over every bit of territory where a blade of vegetation was to be found. What they did not devour they destroyed, for the animals were so numerous that not a square foot of country escaped a harrowing from countless sheep trotters. Even the willows were denuded of every leaf as high up as the nibbling sheep could reach. Furthermore, the presence of thousands of sheep in the flats was the cause of a perceptible unsanitary condition of the dusty ground.

The same conditions will apply to the Sierra valley, also a splendid quail and grouse country heretofore. Sportsmen who have enjoyed a yearly hunting trip to these sections claim that the birds are on the road to a certain extermination. Where once were many beves of 80 to 100 mountain quail, now it is hard to find a bevy of 15, and these are all old birds. As with the quail so it is with the grouse. And worse news, the same conditions prevail in many sections of Nevada.

To offset this lamentable state of affairs several local sportsmen propose to lease five or six sections (640 acres each), in the vicinity of Webber lake, which are owned by the railroad. Friendly influences are to be induced to augment this area by securing leases also of surrounding tracts. The territory leased will produce as much revenue to the owners as the sheep graziers pay. The lessees propose to sub-let to cattlemen. The cattle herders will practically become patrolmen of the leased lands and will keep off the sheep men. In this manner a reserve breeding section for quail and grouse will be secured. However laudable the project is, it will be the saving of only a fly-speck of territory, comparatively, against the annual mutton raiders.

WASHINGTON GAME AND FISH LAWS.

In answer to a recent communication asking information relative to certain features of the Washington game laws, the following summary is presented.

The open season began in Washington on September 1st. A comparison of the northern statutes with the California laws is interesting. Among other things it will be noticed that the license system is in vogue and that many useful birds are protected.

Following is a brief summary of the game laws of the state of Washington:

"Elk—Closed to October 1, 1915.
"Moose, antelope, mountain sheep or mountain goat species—September 15 to November 1.
"Caribou—September 15 to December 15.

"Hunter is limited during the open season to kill one male of the moose, antelope or caribou species, and two males of the mountain sheep or mountain goat species. Females of the above named must not be killed at any time.

"Deer—September 15 to December 15, unlawful to kill any spotted fawn. Hunter is limited during the open season to kill four deer. Deer may be hunted in Sound counties with dogs during the month of October. It is unlawful to kill for the hide or horns, fire hunt, trap or ensnare any of the above named animals. Unlawful to hunt deer with dogs on any island.

"Grouse, etc.—In all counties west of the western boundary of the counties of Okanogan, Chelan, Yakima, Kittitas and Klickitat, grouse, partridge, prairie chicken, sage hen, native pheasant or ptarmigan, September 1 to January 1. Hunter is limited in open season to kill ten of the above named birds in any one day. In other counties east of the western boundary of the aforesaid counties, August 15 to November 15. Hunter is limited during the open season to kill in any one day ten of the above named birds. In Kittitas county, prairie chicken September 10 to October 1, and hunter is limited during the open season to kill five in any one day.

"Quail—October 1 to January 1. Hunter is limited during the open season to kill fifteen quail in any one day. Quail are protected in all counties east of the Cascade range until September 15, 1908.

"Mongolian quail—Mongolian quail in counties of Okanogan, Chelan, Yakima, Klickitat and Kittitas, are protected until October 15, 1906. In counties east of the western boundary of the aforesaid counties the above named birds are protected until September

15, 1908.

"Mongolian pheasants—lawful to kill male birds of the Oriental, Golden, Silver, Ring-Necked, Copper-Bronze, Chinese or Mongolian pheasants between the 15th day of October and the 31st day of December in any one year.

"Water fowl—All kinds of ducks, swan, sandhill crane and snipe, September 1 to March 1: geese and brant, September 1 to May 1. Hunter is limited during the open season to kill twenty-five ducks, geese, brant or snipe in any one day, and may sell, during the month of November only, twenty-five ducks, geese, brant or snipe. Unlawful to fire at any of the above named birds from any gasoline launch, naphtha launch, steam launch, or other boat propelled otherwise than by hand.

"Unlawful for any person to use any sink box, sneak boat, swivel gun or other gun than one fired from the shoulder. Unlawful to kill any water fowl at any time between one hour after sunset and one-half hour before sunrise. Lawful to build any structure on land for the purpose of shooting therefrom any water fowl. Unlawful to fire off any gun, build any fire, flash any light, or burn any powder or other inflammable substance upon the shores of any feeding grounds frequented by water fowl. Unlawful to disturb or remove from the nest the eggs of any game bird.

"Mercer island in Lake Washington is a game preserve. Unlawful to kill any game animals or birds, at any time, on this island. Penalty for the violation thereof, \$50 fine.

"Song birds protected—Unlawful to kill, trap, or ensnare, or take the eggs of any song bird. Unlawful to purchase, offer or expose for sale, transport, or snip within or without the state, any wild bird other than a game bird, except as hereinafter permitted. No part of the skin, plumage, or body of any wild bird, other than a game bird, shall be sold or had in possession for sale.

"Certificate may be granted by the state game warden to any properly accredited person of the age of 15 years or upward to collect birds or their eggs for strictly scientific purposes.

"Unlawful for any company, firm or corporation, hotel keeper, restaurant, market or cold storage plant to offer for sale, or keep or have in their possession at any time of the year, any of the game animals or birds, except the number of ducks, geese, brant and snipe permitted to be taken and sold during the month of November, which is twenty-five.

"Unlawful for any steamboat company, railroad company, express company or other common carrier, their officers, agents or servants, and every other person, to transfer, carry, or take out of this state, any of the game birds or animals protected by the laws of the State of Washington. Provided, that the above named companies or persons may receive and transfer from one point to another within this State, when said game birds or animals are accompanied by affidavit of the shipped that the same are not shipped for sale or profit. Provided that upon the granting of a similar privilege by the States of Oregon or Idaho to the residents of the State of Washington any resident of the State of Oregon or Idaho may personally take with him any game to the limit of one day's hunt killed by himself in the State of Washington."

The following information, issued by the county auditor of Pierce county, will also be found of interest:

It is always unlawful to buy, sell, offer for sale, barter or trade at any time, game animals or birds, except ducks, geese and brant in November.

To hunt without a license

To transport game or fish for market, except ducks, geese, brant and snipe in November, and then not over twenty-five can be sold in one season by one individual.

To use any boat other than one propelled by hand, excepting a sneak boat, in water-fowl shooting.

To use any gun other than the one fired from the shoulder.

To fire a gun, or use a flashlight on water-fowl feeding grounds one hour after sunset to one-half hour before sunrise.

To remove or disturb nests or eggs of any birds.

To in any way interfere with song-birds or have skins or plumage of same.

To have game in cold storage out of season.

To receive game or birds for shipment except in open season. Then affidavit must be made that they are not shipped for sale or profit.

To kill females of any game animal, except deer in open season.

To run deer with dogs, except west of the Cascades in October on the main land only.

To fire, hunt, trap or ensnare, or hunt for hide or horns of any protected animal or birds.

To catch or kill game by any other means than hook and line

To shoot on Mercer island in Lake Washington.

To take fish in any manner within 300 feet of any fishway.

To pollute any stream frequented by game fish.

To shoot on enclosed land without permission.

To dump sawdust or mill refuse in any waters of the State.

To kill geese, brant and other water-fowl on Columbia and Snake rivers in Klickitat, Walla Walla, Franklin, Yakima, Kittitas, Douglas, Columbia, Garfield and Whitman counties.

To hunt deer on any island in the State.

It will be seen from the foregoing that the variety of upland birds is a satisfactory one for the most enthusiastic sportsmen. We note a prohibition against the curing of game fish, so called, and the prohibition of the use of nets.

Grouse, prairie chickens, sage hens, partridges, pheasants, or ptarmigan are the birds which the law allows hunters to shoot after the first of September,

while all water fowl, such as ducks, geese, sandhill crane, swan, snipe and brant are also in open season.

There are many splendid spots for hunting near Tacoma in Pierce county. Those well informed state that there is no particular section that can be designated as especially favorable. One year a certain area may have been teeming with game, while the next season it is deserted. Pierce county is noted for its fine game birds and many parts of the country are usually well stocked with game.

For some time the law has prohibited the killing of pheasants, but this year male birds may be shot between October 15 and December 31.

Those who have been in that country recently state that grouse are not very abundant, but again, other reports show that there are not a few of the birds and they will probably be also shot in large numbers.

The fees for hunters' licenses are: County residents, \$1; non-residents, \$5; non-resident, aliens, \$50; state residents, \$5; non-residents, \$10; none-resident aliens, \$50.

Sheriffs, deputy sheriffs, constables, city marshals or police officers and forest rangers are ex-officio game wardens and may arrest without warrant any person violating any of the game laws of the State.

Unless otherwise provided for, a penalty of not less than \$10 nor more than \$500, with costs or imprisonment for violation of the game laws of the State is provided for. Possession of any game birds, fish or animals out of season is prima facie evidences of violation of the laws.

GOSSIP FOR SPORTSMEN.

A New Game Bag.

One of the cleverest devices for carrying a string of ducks or other game, camp duffle or any of the usual dunnage hunter's find it necessary to carry to and from camp, ark or shack is the recent invention of Wm. Bay, a well known member of the Field and Tule Club and a popular sportsman as well. This contrivance is a double ender to be slung on the shoulder. The ends are belled, the middle forming a compact strap with an opening slit. The birds can be laid in the bag without taking them from the strap, thus keeping them in good shape and condition. The bag opening is arranged with clasps so that anything can be put in or taken out easily. Inside pockets and ventilating holes are provided. All in all the bag is away ahead of anything else in its line and is the most perfecting outing bag before the public to-day. It must have met with the approval of experienced sportsmen judging from the rush of orders received by Clabrough, Golcher & Co., 538 Market street, who are the agents for the "Perfection Outing Bag."

Eel River Fishing.

Recent reports from Eel River, Weymouths and Fortuna, are to the effect that the fishing is excellent. Plenty of fish, none under a half pound, and large steelheads are being taken. John Butler and J. Dougall one day last week landed 70 nice trout. Butler in addition hooked and landed a 16-pound steelhead.

For the Fall Season.

A variety of special innovations for sportsmen, as well as staple goods, are now on sale at Shreve Barber & Co.'s, 739 Market and 521 Kearny streets. A specialty of this firm is sportsmen's clothing of every kind. A line of light English cloths for hunting and fishing suits must be seen to be appreciated. The stock of laced hunting boots and gaiters carried is high class in every particular. Everything in the line of sportsmen's equipments—up to date in every respect—can be found at either store.

New Decoys.

In stormy weather low setting decoys do not show up well. Some sportsmen, to overcome this, so fix their decoys, particularly the wooden canvasbacks, that they will loom up larger. This is a decided advantage in luring the birds from a distance.

To meet a long felt want there is now on the market a large sized decoy—the Mammoth—for both "can" and "sprig" shooting. These new stools have met the approval of every sportsman who has seen them. Clabrough, Golcher & Co. have them. Get your orders in early for the stock on hand is going fast. They have also a fine line of bluehill, teal and other decoys; guns, shell boxes; in fact everything a sportsman wants for marsh or upland shooting.

Wild Rice in California.

We are informed by Mr. Chas. H. Shaw that wild rice was planted several years ago in the preserves of the Colusa Gun Club, which are located on lands belonging to the Crocker Estate. The experiment was a success, the seed took root and grew. At the present time the wild rice is to be found growing on hundreds of acres of fresh water marsh land in Colusa county.

Hurlingham Gun Club.

Anent the abolition of pigeon-shooting at Hurlingham, London Truth says: It was suggested that there were other questions in connection with the management of the club which required consideration. At an outcome of the controversy that arose, a committee comprising several of the leading members has been appointed to inquire into the club's finances. In some quarters there was an attempt—not altogether justified by the facts of the case—to show that the pigeon-shooting involved an unduly heavy expenditure. It is now believed, however, that it is rather in the matter of certain official salaries and official sinecures that extravagances have prevailed, and that in these and other directions a considerable saving can be effected without any impairment of the attractions of the club.

BRITISH COLUMBIA FIELD TRIALS.

The third annual trials of the British Columbia Field Trials Club were started at Ladnor, near Vancouver, B. C., on September 21st and closed on the 25th. Major J. M. Taylor judged.

The Derby had 19 entries, and the winners were. J. W. C. Rodfield first, Tony Spot second, Uncle Dudley and Aunt Marie equal third.

The All Age stake was concluded on Saturday afternoon, the winners being as follows:

First—"Policy Girl," black, white and tan English Setter bitch, owned by J. W. Considine of Seattle; J. E. Lucas, handler.

Second—"Kilgarif," black, white and tan English Setter dog, owned by J. E. Terry of Sacramento; W. B. Coutts, handler.

Equal third—"Diamond Spot," black and white Pointer bitch; S. Hansen, owner and handler "Abbot's Jock," liver and white Pointer dog, owned by H. H. Abbott; S. Hansen, handler.

The stake had 22 starters, of which ten were taken into the second series. Among the dogs running there were no fewer than 16 previous winners in Washington, British Columbia, California and Eastern trials, including Ch. Peach Blossom, winner of the Illinois championship in 1903. This fact and the fact that Mr. W. B. Coutts, the California handler, stated before the trials that the dog winning third place in such company would be worth at least \$3,000, shows the status of the British Columbia Club this year.

The Membership Stake was also run off on Saturday, resulting as follows:

First—"Point," owned and handled by D. G. Macdonell.

Second—"Roy's Lady," owned and handled by Miss W. E. Davie.

Third—"Lady Roberts," owned and handled by J. L. G. Abbott.

The winners of first and second received handsome cups presented by Mr. C. W. Minor of Victoria and Mr. H. Abbott of Vancouver.

The Championship Stake was the concluding event of the trials and was run off Monday. Owing to some dissatisfaction among the owners of dogs over Major Taylor's awards, only two dogs entered this event, ten other entries being withdrawn. Mr. H. H. Abbott's "Jock" was first and Mr. D. G. Macdonell's "Point" second.

"Munzie" Lucas got there at last and landed a good dog for first in the All Age.

Miss Winnifred Davie of Victoria is a thorough sportswoman; she has had entries in both the B. C. and Pacific Northwest trials and has run a winning dog previously. May good luck keep pace with her judgment and enthusiasm.

DOINGS IN DOGDOM.

They Were California Bred.

A communication received from one of the exhibitors at the recent San Mateo show questions an award made for the best kennel of California Collies, and is as follows:

"I showed three Collies for Mr. Arthur Letts of Los Angeles at San Mateo. There was a special offered by Mr. Jas. Moreland for best kennel of three California bred Collies.

"I am informed that a protest against Letts' Collies was made, claiming that the dogs are not California bred.

"The facts are these: Letts bought Old Hall Sylvia in England and had her bred to Wishaw Leader in England. The bitch arrived safely in California and after getting here gave whelp to these three dogs. Are they California bred or not?"

"The rule of the A. K. C. does not cover their case as it only specifies that a bitch owned in America and sent to Europe to be bred and which is returned and whelps here shall have her progeny called American bred. It seems to me that as both bitches were served in England and both arrive in this country and whelp here, that if the one litter is American bred the other must surely be so called.

"It seems unlikely that this question has not been thoroughly thrashed out in the councils of the A. K. C. many a time and I am in hopes that you might recall a case which would serve as a precedent.

"You will notice that the rule regarding American bred dogs refers only to bitches sent from here abroad and has not been changed during the recent alterations of rules. Will you let me hear what you think about it?"

We can not recall any case that might serve as a precedent. It seems to us that the rule, inferentially, covers this particular case. The bitch was owned by an American fancier. The fact that the bitch had not been in the United States before being bred, for her American owner, in England, is within the spirit of the law, if not the letter. Barring the sending of the bitch to England by Mr. Letts, the case is in compliance with the intention of the rule. The domicile of the bitch was in California, the home and residence of the owner.

Under the circumstances, it strikes us forcibly that the protest should not stand.

A Good One Gone.

The famous wire-hair champion Hands Up died in New York, September 29th, from an acute attack of jaundice. Hands Up so far is the only American-bred Fox Terrier to successfully compete against the cracks in England. In spite of the handicap imposed by the quarantine regulations, he made the trip to England in 1900 and on his appearance at the Crystal Palace won third in the open class with four champions and six other winners behind him, second in the limit class and first in the novice class. He also won first in the open class at Liverpool. He then returned to this country. On this side he won the

Challenge cup in 1900 and 1901 for the best Fox Terrier at the Westminster Kennel Club show. Hands Up was a son of the famous Go Bang out of Belle Doyal, the latter being sister to three celebrated champions in England—Belmont Vivid, Belmont Vesper and Rowton Rebecca. He was whelped in September, 1898, and has left progeny that will be of future benefit to the breed.

National Beagle Club of America.

Mr. Thomas Shalleross of Providence, R. I., and Mr. Thomas D. Griffith of Redmond, Md., have accepted the invitation of the National Beagle Club of America to judge at its Sixteenth Annual Field Trials, to be held at Stevenson, Baltimore county, Md., during the week commencing October 30th, 1905. Stevenson is in Baltimore county, Maryland, about twelve miles from the City of Baltimore, and is reached from the Union station, Baltimore, on the Green Spring branch of the Northern Central railroad, Baltimore division of the Pennsylvania railroad.

The headquarters of the club during the trials will be at Avalon Inn, Stevenson, Baltimore county, Md.

The Dog Book.

To the lover of the Pointer, part IV of Mr. James Watson's work appeals strongly. Chapter XVIII is devoted to this breed in a most interesting manner. Among the illustrations is a particularly good portrait of Ch. Oregon's Jessie II, a stylish bitch, well known to the Coast fanciers. Field Spaniels, Cockers, Norfolk Spaniels, Welsh Spaniels or Springers, and the Irish Water Spaniel are treated in no less an entertaining spirit than the Pointer. The illustrations are high class. The part maintains the high standard that was inferred by the excellence of the first parts. The work is one that appeals to the student and is a necessary textbook for the fancier.

AT THE TRAPS.

At the final shoot of the Millwood Gun Club September 24th, the winners of club prizes for the season were: Club championship cup, Captain W. H. Price; special trophy race, gold cuff buttons, W. Johnson; diamond pin race, Clarence Ashlin; club championship medal, R. Haas; special condition race, 500 Selby factory loaded shells, R. Van Norden; special race, 100 Selby factory loaded shells, G. Collins, Jr.

The Los Angeles Gun Club's nineteenth semi-annual blue rock tournament is billed for to-day and to-morrow. Twelve races are on the card for each day, all of which are 15 target events save the two-man team championship, 25 targets per man; Tufts-Lyon's medal contest at 50 targets; the five-man team championship, 25 targets per man, and the individual championship, 50 targets.

All events are open to all amateurs except the medal and trophy races, for which only residents of Southern California are eligible. All events, but medal and trophy races, count for high average. Moneys will be divided on the "Chick" system. Trade representatives to shoot for targets only. The added money purse is \$100, prizes and medals are valued at \$200.

Sam R. Smith is president and Chas. Van Valkenberg secretary of the club. A large attendance is anticipated.

Holders of Medals, Trophies, etc.—Individual Championship Medal, C. Walker, score 49-50; Tufts-Lyon Arms Co., medal, Guy Lovelace, score 43-50; Two-Men Team Trophy, Fred Mills, O. V. Orr, score 46-50; Five-Men Team Trophy, C. D. Hagerman, P. Densel, L. Greer, G. Knight, E. Gilbert, score 112-125.

Under the auspices of the Vallejo Gun Club a big merchandise prize shoot will be the card at Flosden station tomorrow. A number of local shooters as well as a representation from Napa, Santa Rosa, Petaluma and other points will be present. This shoot will terminate the Vallejo trap season.

An impromptu trap shoot took place at the Claremont Country Club traps, Oakland last Sunday. A squad of local shooters were present on the invitation of Mr. J. O. Cadman. Weather conditions were perfect and good scores were the rule. Ed Schultz was high gun with 188 out of 200, J. O. Cadman broke 181 out of 200.

The feature of the day was a five man team contest. The shooters and scores made were:

Team No. 1—50 targets per man—Ed Schultz, captain; Harold Havens, Clarence Nauman, Clarence Haight and George McNear, Jr.—Total, 214.

Team No. 2—Peter McRea, captain; Fred Schultz, J. O. Cadman, W. Havens and W. J. Golcher—Total, 214.

On the shoot out at 25-targets, No. 1 squad won by 2 birds.

In a second 50 target team shoot McRea's men won on the score of 221 to 210.

Following the shoot the visitors were entertained at lunch in the club house, Mr. Cadman being the host.

At Biggs, Butte County, the Biggs Gun Club held a two-day bluerock shoot last Saturday and Sunday, which was largely attended by the local sportsmen and the various manufacturers' agents of the Pacific Coast, as well as by visitors from other points.

The high average for the two days, was won by F. M. Newbert of Sacramento. G. W. Gibson of Williams, in a very closely contested event, won the Northern California championship.

F. M. Newbert in an easy race, annexed the Gold Dust trophy. In the three-man team shoot Newbert, Ruhstaller and Monte Newbert of Sacramento made the remarkable score of 58 out of the possible 60.

with Mr. Rihstaller credited with a 20 straight, thus "skinning" the Newbert brothers, who are about as good as they make 'em, says the Union.

The visiting shooters state that the treatment accorded by the "plain" folks was the "best ever," and that the arrangement of the grounds and the general management of the tournament was all that the most discriminating shotgun "crank" could desire. In addition to the trophies and medals and honors, the Sacramento "bunch" brought home a goodly lot of prizes from the merchandise events.

The visiting shooters have only the kindest of feelings for their interior sportsmen friends, and hope that at the Sacramento tournament next spring the visitors will be as lucky as were the local shooters at Biggs.

The first annual tournament of the Medford Gun Club was held September 22d and 23d with fifty shooters present. The program consisted of 10 events, 200 targets each day, 20,000 of which were trapped. The weather conditions were perfect and the early predictions that good scores would be made were fulfilled.

The shoot was held beneath a grove of massive oaks, which with tents dotted here and there and tables loaded with fruit and eatable of all kinds made a very attractive ground for the smashing of mud saucers.

Besides the Oregon shooters and manufacturers' agents there were present: W. F. Crosby of O'Fallon, Ill.; Fred Gilbert of Spirit Lake, Ia.; Rollo Heikes of Dayton, O.; H. C. Hirschy of Minneapolis, Minn.; J. S. Fanning of New York; Thos. Marshall of Keithsburg, Ill., all professionals of the first calibre and C. M. Powers of Decatur, Ill., the clever amateur. Among the trade representatives were C. D. Plank of Denver, C. A. Haight, E. Holling, W. S. Wattles, H. T. Hoyt, W. H. Seaver of San Francisco, F. L. Carter and F. C. Howe, M. O. Feudner, Ed Schultz, W. H. Varlen of Pacific Grove, and J. W. Bradrick were also present.

Crosby won the high average in the professional class by breaking 394 out of 400, and was presented with a beautiful mounted Mongolian pheasant for doing the trick. He also made runs of 126 and 101 without a miss. Gilbert came next with 392, and made runs of 118 and 154. The latter is within three birds of the Pacific Coast record, which was made at San Francisco by Mr. Crosby in the Interstate tournament. Heikes followed, only missing 10, and made a run of 117 without a miss. Fanning created a separation with 381, Marshall with 356 and Hirschy with 361. C. M. Powers shot in his usual good form, only missing 14. C. D. Plank shot well the first day and retired on the second on account of illness.

First general average for amateurs was won by C. M. Powers, second by M. O. Feudner, and third by W. H. Varlen.

The lady shooters shot well, first general average going to Mrs. Young of Portland, second to Mrs. Snyder of the same city, and third to Mrs. Holmes of Salem.

Miss Hazel Enyart, after breaking the first target she ever shot at, retired with 100 per cent, beating Crosby for high average; besides, she has the honor of having killed the bear which was served to the shooters at Hotel Nash, with mountain trout also on the bill of fare.

Special mention should be made of the ladies of the "Booster Club" for the clever manner in which they entertained the shooters, and if our readers do not believe what the program said, "that they would be made to go some," ask Marshall, Gilbert, Powers and a few more who were duly initiated. The "Hoo Hoo Squad" must not be overlooked, as they went through a very difficult drill to the great amusement of all present.

The shoot ended at an early hour on the second day, and for the benefit of many spectators who arrived a little late Messrs. Marshall, Heikes, Hirschy, Gilbert and Powers shot an exhibition match of 50 tar-

gets each, Mr. Powers making a clean score.

F. L. Carter and W. A. Hillis, representatives of the Peters Cartridge Company, gave an exhibition of fancy rifle shooting, which was interesting and greatly enjoyed by all.

A number of shooters from Medford, Ashland and other points also participated and displayed excellent marksmanship. A few of them did nearly as well as some of the professionals. They will be heard from in future tournaments. Most of the shooters left in a special car Saturday evening for Portland and other northwest cities, en route home.

The San Francisco sportsmen on their return from Medford were unanimous in high praise of the Web-footers for their good fellowship. W. S. Wattles states that the shoot was a big success from every standpoint. The spontaneous hospitality extended the visitors by the citizens of Medford was unremitting and bounteous. Much credit for the success of the shoot is due T. E. Enyart and Edgar Hafer, who will be remembered as participating here at the Interstate shoot. The Medford grounds are splendidly appointed and beautifully situated. The visitors and participating shooters were the guests of the Medford ladies, who served an appetizing lunch on the shooting grounds each day. The tables were beautifully decorated and presided over by Mesdames B. P. Theiss, H. E. Boyden, J. A. Perry, A. M. Short, J. G. Van Dyke, J. P. Reddy, H. W. Streets, T. E. Pottinger, E. A. Welch, C. H. Hafer, I. L. Hamilton, C. H. Edmunds, Miss J. D. Rowling and Miss Hazel Enyart.

Following the shoot the sportsmen were entertained at an operatic performance in the Medford Theater. The trip was a memorable one and most enjoyable in every respect.

The Santa Cruz Rod and Gun Club members kept the traps working on September 17th. In the club shoot at 25 targets the results were: Pearson 23, High 9, Jones 16, Heath 11, Wilder 22 (15 straight), Kober 21, Cox 18, Hale 14.

At the Blue Rock Gun Club shoot, Bakersfield, September 24th, F. N. Schofield was again high gun. The scores were: Schofield, shot at 125 targets, broke 105; Ferguson 100-79, Stoner 125-79, Getchel 130-74, Henry 100-61, Higgins 100-47, Nelson 50-35.

Ralph Slusser of Mt. Olivet is high average man of the Santa Rosa Gun Club for this season. Out of a total of 300 targets he broke 282, winning the club championship medal and the Latlin & Rand cup. At the last club shoot, in the club race, he broke 20 straight.

The shotguns of thirty trap shooters at Alameda Junction on the 1st inst. sounded the requiem of the local trap shooting season for 1905. The occasion was a wind-up gathering of the shooting enthusiasts under the auspices of the Pacific Coast Trap Shooters' Association.

The main feature of the day was a merchandise prize shoot at twenty targets. The high scores were made by W. H. Seaver and E. L. Forster, 20 straight each; A. J. Webb 19, L. S. Mayfield of Napa 19, E. Gamble 19, E. Klevesahl 19, M. Lorenson 19.

Four other events at twenty targets were shot. Straight scores were made by Rooney of Vallejo three times and E. Gamble once.

A team shoot between the Union and Vallejo gun clubs was won by the former. The scores were:

Union—Klevesahl 25, Daniels 24, Jacobsen 24, Foster 23, Webb 23. Total, 119.

Vallejos—Rooney 22, Mayfield 22, O'Hara 21, Clark 20, Lewis 24. Total, 109.

In a special match between Captain Thomas L. Lewis and Dr. Hutton at 25 targets Lewis won, with 24 against 20. Lewis has shown remarkable improvement in target shooting for the past year.

Among the visitors were a number of shooters from Vallejo, Napa and Santa Rosa.

The high averages were: E. Forster 95, Rooney

94, Webb 94, Seaver 92, Gamble 91, O'Hara 87, Lewis 86, Mayfield 82 and Hesse 79, out of a total of 100 targets. Special mention may be made of Mr. Rooney, a young member of the Vallejo Gun Club, who has developed championship qualities this season, three 20's straight, a consecutive run of 66 is quite an achievement for one day.

The scores made in the five events at 20 targets each were:

Forster 19, 19, 18, 19, 20; Rooney 20, 20, 20, 17, 17; Wedd 19, 19, 19, 18, 19; Seaver 17, 18, 19, 18, 20; Gamble 19, 20, 19, 14, 19; O'Hara 18, 16, 18, 19, 16; Lewis 18, 17, 18, 15, 18; Mayfield 19, 13, 16, 15, 19; Hesse 15, 13, 17, 16, 18; Klevesahl 19, 16, 18, 19; Mann 16, 16, 17, 14, 10; Sorenson 15, 17, 19, 19; Daniels 19, 18, 17; Dr. Hutton 17, 17; Murdock 11, 15, 16; "Slade" 17, 10, 15; Masterson 14, 14, 14; T. Fanning 19, 18; Jacobsen 17; Eug. Forster 17; Clark 16; Knick 16; Hunt 16; W. Lynch 15; Sandidge 12; McGregor 8; Snieder 6; Hill 2; J. Lynch 5.

Captain Thos. L. Lewis of the Union Gun Club announces that he has had the misfortune to lose one of the Union Gun Club monthly medals. These trophies were given to the monthly winners, in each of the four classes of shooters, after each monthly club shoot and worn for a month by the winner. In making the final awards, one of the medals was missing. The finder will confer a favor on Mr. Lewis by returning the medal to 86-88 First street. The trophy it is believed was mislaid or lost at Ingleside.

TRADE NOTES.

They Won Again.

U. M. C. shells won the highest honors in the seventh monthly club shoot of the Union Gun Club. Edgar L. Forster scored 152 out of 175 targets; most of his scores were made from 18 and 20 yards rise. Mr. Forster shot a Remington gun almost throughout the season of 1905.

Mr. Fred Feudner was the runner up with 157 breaks. He also used U. M. C. shells.

A. J. Webb, W. E. Murdock and H. P. Jacobsen all won medals for September with U. M. C. shells.

The Blue Rock Tournament held at Biggs, Cal., on September 30th and October 1st, '05, marked the close of the trap shooting season in Northern California. Thirty shooters faced the traps, the membership being of a high order. The highest events were the contests for the Gibson cup and medal for the championship of Northern California. The Gibson cup was won by Mr. M. E. Phillips of Colusa, Cal., and the championship medal by Mr. Gion W. Gibson of Williams, Cal. Both of these shooters using U. M. C. ammunition, exclusively.

At the Pacific Coast Trap Shooters' Association shoot, Alameda Junction, October 1st, W. A. Rooney made three 20 straight in three events, during a run of 66 consecutive breaks. E. Klevesahl 25 straight, E. Gamble and E. L. Forster 20 straight, Gamble and Dr. Hutton 15 straight and the winning five-man team race—all made with U. M. C. ammunition exclusively.

The phenomenal shooting for the entire season made by users of U. M. C. ammunition all along the entire Pacific Coast, both at blue rock and live bird events, also in records and moneys won, is a demonstration satisfying to shooters of accuracy and reliability of these world famous goods made by the Union Metalle Cartridge Company.

Winchester Wins.

Shooters of Winchester "Leader" shotgun shells have about cleaned up everything in sight during the past month at the numerous trap shooting tournaments which have been held throughout the United States. At the Interstate Shoot held at Colorado Springs, W. R. Crosby and Fred Gilbert tied for the high expert average, with the score of 481 out of 500, and the first and second amateur averages were also won by shooters using the "Leader" shells. The Denver "Post" trophy was captured by J. Appleman, who also used the same shells. At the Almira Gun Club Tournament, which was held at La Grange, Ill., Messrs. Barclay, Winberg and Webber won first, second and third amateur averages respectively, all shooting the "Leader" shells. At the Worcester (Mass.) Gun Club Tournament, J. A. R. Elliott and E. C. Griffith won the high expert and high amateur averages respectively, both using Winchester "Leader" shells. At the Reading, Pa., tournament, J. M. Hawkins captured the high expert average, and M. S. Brey, P. B. Pfeiffer and Geo. Schaeffer won the amateur averages in the order named, all shooting the "Leader" shells. At the Nashville, Tenn., tournament, C. G. Spencer and Andy Meadors won first expert and first amateur averages, respectively, both using the "Leader" shells. At the Tacoma, Wash., Gun Club shoot, Fred Gilbert was the high man with the splendid score of 192 out of 200. Mr. Gilbert always shoots the "Leader" shell. Second average at this shoot was captured by H. C. Hirschy, shooting a Winchester "pump" gun and the "Leader" shell, score 190 out of the 200. At the Pacific Coast Trapsshooters' Association tournament, W. H. Seaver, shooting a Winchester "pump" gun and the "Leader" shell, won the first prize on a perfect score, and during the day scored 132 out of the 140 he shot at. W. A. Rooney made the longest straight run at this tournament, 66 consecutive breaks, using a Winchester "pump" gun.

Peters' Points.

At Colorado Springs, Colo., August 29th to 31st, a goodly percentage of shooters present used Peters factory loads and did excellent work with them. A bunch of shooters came from Nebraska of Peters' adherents and all gave a good account of themselves. Mr. Cal T. Callison, a Peters Cartridge Co. representative at Salt Lake City, won second professional average for the three days.

Medford, Or., Blue Rock Tournament, Medford Gun Club, September 22d, 23d, 1905--

THE DAIRY COW.

From a paper read by L. A. Sweet before the Minnesota Dairymen's Convention in 1903, the following extracts are taken:

The dairy cow is the cow that under favorable surroundings and with a sufficient amount of the proper kind of food, will produce a reasonable profit on her value after paying for feed and care.

Any cow that will not do this should not be classed as a dairy cow no matter what her breed.

In the selection of a typical dairy cow a few points might be observed that would serve the buyer well. First, she should be reasonably young and have the appearance of health. Second, she should have a reasonably large udder, full before and behind, with plenty of room for expansion, with medium sized, well placed teats, far enough apart to allow free movements of the hands and fingers without interfering with each other; her udder should be free from flesh and capable of a large expansion.

Third, the milk veins should be large and kinked and should enter the body well at the front with a large well or passage for the vein into the body. Fourth, she should have a large barrel, showing large digestive organs.

Her frame should be heavy enough to carry around her digestive organs, with what muscle that is needed to keep the machinery of life in motion. Her body should be wedged shaped.

Her tendency should be to not lay on flesh, and last but not least, she should be able to perform under good treatment, making at least 250 pounds of butter per year.

If the farmers of this state will stop and think that butter from the dairy cow that produces from 250 to 400 pounds of butter yearly can be made at a cost for feed not to exceed \$30 per year, and that it is about the only branch of farming that does not have its way-ups and way-downs, as the beef business and the pork business do, I think there would be more of us hunting for the special dairy cow. We have less cows in the United States today than we had ten years ago according to the population, and prices have been good for butter and reasonably steady.

I will quote you the New York market for a few years back: Average for 1896, 18½c; '97, 19½c; '98, 19½c; '99, 21½c; 1900, 22.4c; 1901, 21.6c; 1902, 24.76c; and for 1903 it will probably average about as high as 1902.

The good dairy cow will make from three-fourths of a pound to 1¼ pounds of butter daily on a ration that would be only one-third of a feed for a fattening steer. The butter will sell for about 2c per pound under the prices quoted above and the beef will hardly average 5c per pound.

Right here let me say that my herd is just a good average of a dairy herd.

In 1901 they made me \$58.79 worth of product each, with a cost for feed and pasture of \$26.25 per cow, or a net profit of \$32.54 besides the skim milk and buttermilk. And in 1902 with practically the same cost for feed and pasture they made me a profit of \$41.54, and everything indicates a still larger profit this year.

Some say, "O, you pet your cows." That is right, we do. And another man will say, "How much did you feed your cows to get that return?" And when I tell them what the feed cost and that I have charged them a good price for all they have eaten, they pass on and shake their heads and think probably I am telling what is not true. Farmers! there isn't one of you but who can make as much profit from your cows as the man that keeps the dairy cow, if you will keep as good a class of dairy cows and give them the right kind of care and feed.

As to the relation this dairy cow holds to diversified farming I would say:

Every farm that is kept in proper condition for the raising of crops must have some fertilization.

This means that some kind of stock must be kept on the farm, and what can be more profitably kept than the dairy cow?

The skim milk from a herd of dairy cows is valuable as a part ration for growing pigs and calves; it is one of the feeds on the farm that is almost indispensable.

Too much attention has been paid to the beefy tendency of the cow, and our good, old, native dairy cow has been transformed into the dual purpose cow or double purpose cow, and a great many farmers are trying to feed her

and milk her for profit. But I am sure if many of them should charge her in detail with all she eats they would find the ledger account balanced on the wrong side.

Let us wake up to the fact that we must have better cows, teach the beef trust a lesson, grade up a better class of cows and let this double-purpose fad die out. Now is a good time to kill it; let those high fellows use our beef as we grow it. A half blood Jersey heifer was just butchered on my farm; she was one year old last June, she dressed 400 pounds and is good beef, much better than the average beef that can be bought in our markets here. The dairy cow and hog raising go hand in hand in the opinion of the writer; butter will always be a good fair price.

A BEAR CAMPAIGN IN WOOL.

That there is to be a bear campaign in wool seems apparent. Not that wool is going to be worth less intrinsically or that stocks will become burdensome or that manufacturers will need less, but that speculators want their rake-off. Last season the speculators in the staple did well. Growers, unaware of the depleted condition of stocks or manufacturers' necessities, eagerly accepted bids last fall that looked to them advantageous, but in the light of this year's rise show that they parted with their property cheap. Many who contracted their 1904 clip six and eight months in advance lost 5 cents a pound by the transaction. The speculator was aware of the situation; the grower was not.

Naturally speculators are anxious for their share of the profits of the 1906 clip. Their bids on a basis of 1905 prices have already been rejected. Growers are alive to the fact that what their product is worth to speculators it is worth to them. The wool producer is no longer in straightened circumstances; he has passed the period of indigency and, what is more, is thoroughly imbued with confidence.

Some operators believe that bids on the 1906 clip will be lower from this time henceforth. Boston and Philadelphia want to secure options and the only way this can be done is by disturbing the serenity and confidence of the grower. In other words, bearish sentiment is to be industriously injected into producing circles. Bids are to be lowered and the speculator instead of displaying anxiety will assume an air of indifference. If he can secure the assistance of Western bankers this campaign may win simply because the average wool-grower depends largely on the advice of the man who handles his money. If bankers begin to talk lower wool the logical deduction to be drawn is that they are working hand in hand with the speculators. This line of argument is by no means illogical. The wool speculator is well posted and no matter what price he is willing to bid for next year's clip he expects the staple to be worth more at shearing time. Speculators do not always win, but unfortunately they beat the grower three times out of five.—Breeder's Gazette.

Sponges. S. Adderley, 307 Market St.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Rickets and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for use. Send for descriptive circulars, testimonials, etc. Address The Lawrence-Williams Co., Cleveland, O.

RAMBOUILLET SHEEP.

The Rambouillet is a pure-bred Merino tracing direct to the very choicest flocks of Spain, writes Roscoe Wood in Breeders' Gazette. They took their name from that of the royal estates of King Louis XVI of France, who, through his relations with Spain, political and otherwise, secured about 360 head of the largest and choicest Merinos in all Spain; in fact, they were the tops of the best flocks. Thus was started, in 1786, the flock from which the Rambouillet has been bred, and this has been done without the admixture of outside blood.

That marked improvement was made along the lines of both wool and mutton is proved conclusively by the careful records kept at the government farm at Rambouillet. For in spite of all the political upheavals in France since the founding of this flock, the farm and flock have been maintained continuously by the government. And it is worth while to note that size and form of carcass were considered just as important as quality and weight of fleece, which accounts for their superior size to the American or Delaine Merino. By this careful and scientific system of selection and breeding they have succeeded in producing rams that when mature weigh from 240 to 320 pounds, and shear from 20 to 30 pounds of fine Delaine wool; ewes weigh from 150 to 210 pounds and shear 12 to 16 pounds.

As to hardiness, they maintain this important characteristic of all Merinos to the full extent. They can stand grief and exposure, short feed and the like when necessary as well as any breed and better than most, but for the farm this is not necessary, and they appreciate and respond to good feed and proper care proportionately well.

Of all breeds, Merinos, and especially Rambouillets, most quickly and easily adapt themselves to varying conditions. While all sheep are best suited to a slightly rolling country with a limestone soil, yet we know of many flocks on soil such as mentioned, and of these the Rambouillets have given as good satisfaction as the others. Some of the leading stud flocks of Rambouillets in this country at the present time are maintained on level black land, which is known as pre-eminent corn soil.

As compared with the breeds mentioned for selling quality on the market, we will answer by a little personal experience. A few years since we were feeding a fair-sized flock of good quality black-face lambs for spring market, that is, the lambs would be nine to twelve months old when marketed. At the same time we had in stock a flock of Rambouillet lambs which were receiving good care but hardly as heavy fed as the others. When we sold the black-faces, after weighing them up, we drove the Rambouillets on the scales, and as they came out we said to the buyer of the others, "How much for them?" "Just the same as the others," and we were getting the top figure, based on Buffalo market. Comparing weights, we found a difference of about two pounds per head in favor of the Rambouillets, although the average lots would probably run about the same.

And we may add that this comparison occurred when wool was not bringing anything like present prices, so that it may be seen that it was not the fleece, but their mutton qualities which made their value.

We often hear about the Merino being of no account for mutton, not fit to eat, and the like, but we have yet to learn of the lot of good plain-bodied Rambouillets that will not sell for just as much as any breed on the market, other conditions being equal. And in addition, the fact that they are good shearers and maintain their weight of fleece with age makes them a valuable sheep to the general farmer.

Also, one three-year-old Stallion—the best bred one ever sired by McKinney. A grand young horse; has trotted a half in 1:14 as a two-year-old.

Will sell one or all of the above at fair prices. Address C. A. DUFFEE, 529 Thirty first St., Oakland.

Or Race Track, San Jose, where horses may be seen at any time

McKINNEY--SIDNEY FILLY FOR SALE.

A GOOD INDIVIDUAL—FOUR YEARS OLD next spring; dark bay in color; double gaited; very ambitious; broken to drive. Was driven to cart for three months in spring of 1905, but not worked for speed. The filly shows every inclination of coming fast when given a chance. The animal is sound and has a good disposition. To be sold for the reason that owner is not prepared to keep her.

Price, \$500.

Address Box L, this office.

MERIDIAN 2:12¼ FOR SALE.

MERIDIAN 2:12¼ IS A STANDARD-BRED dark brown Stallion, foaled 1892. Excellent disposition; perfect conformation; aure foal getter. His oldest colts are four years old and all his get have style, good action, good size and speed. He is by Simmocolon 2:13¼ (sire of Dan Q. 2:07¼ and 12 in 2:30 list); dam Sidne 2:23¼ by Sidney 2:19¼; next dam Addie S by Steinway. Started seven times in races, won four first monies and was never outside of the money. He is sound, in good condition, will be sold cheap. For further particulars address

R. S. BROWN, Petaluma.

FAST PACER FOR SALE.

COAL BLACK GELDING, SEVEN YEARS old, 16 hands high, weight 1050 lbs. Guaranteed sound and gentle. Sired by Knight, dam by Ned Clifford, son of Director. With two months' training has worked a mile in 2:21, quarter miles in 33 seconds. For terms apply to

W. H. WILLIAMS, San Jose Race Track, Or L. P. COOPERS, 168 S. First St., San Jose.

HAL PACING COLT FOR SALE.

ONE ROAN STALLION COLT, 18 MONTHS old, a model individual and in time fit to go to the best mares in the country. Sired by American Hal, full brother to Blue Hal 2:14¼ by Tom Hal, sire of Brown Hal 2:12, sire of Star Pointer 1:59¼. First dam Corman by pacing stallion Newsboy 2:22¼; second dam Sky Blue by Tom Hal (sire of Brown Ha 2:12, Hal Pointer 2:04¼, Little Brown Jug 2:11¼, etc.). This blood has produced more extreme speed than any in the country.

For particulars address

A. EDSTROM, Merced, Cal.

Two Good Ones For Sale.

Nannie Derby, BAY MARE 5 YEARS old, 15½ hands, old. Stands 162 hands, weighs 1150 lbs.; handsome and stylish. Sired by Charles Derby 2:20, dam by Red Wilkes. A first-class racing prospect and fine roadster. After two weeks' training Charles Derby paced her quarters in 29 seconds last spring at Pleasanton track. She trotted a half mile in 1:05 on the speedway and has paced halves on the speedway (driven by T. C. Cabney) in 59 seconds. Only fault—she is excitable in company, but will get over this with training. She is ready to show, and will be driven a fast half at the trotting gait for any one who contemplates buying her.

Dopella by Charles Derby; standard and registered; bay filly 4 years old, about 15.3 hands, weighs about 1000 lbs.; handsome and in every respect a first class road horse. A lady can drive her. She has speed and is not only a valuable horse for the road but a high-class brood mare.

A few other fast roadsters for sale at reasonable prices. For particulars and to see the horses apply to **DEXTER PRINCE STABLES**, 1509 Grove street, corner Baker street, San Francisco.

FOR SALE.

THE NEWCOMB LIVERY

GEORGE W. OSGOOD, Proprietor.

120-122 SOUTH FOURTH STREET,

QUINCY, ILL., May 12, 1905.

Some twelve months ago I owned a horse which was practically worthless, due to a very bad Bone Spavin on his right hind leg.

I tried various remedies without success, finally purchasing from the Miller & Arthur Drug Co. of this city a bottle of "Save-the-Horse." After using one-half the contents of the bottle, according to instructions, the horse has never taken a lame step. I would gladly have sold him for twenty-five dollars before using "Save-the-Horse." I have sold him since for ninety dollars, and would not be without "Save-the-Horse" at double the cost.

GEORGE W. OSGOOD.

SOUTH BETHLEHEM, PA., Sept. 15, 1904.

Mr. Charles Hunter, Danville, Pa.
Dear Sir:—In reply to your inquiry of Aug. 22d, I beg leave to advise that we faithfully applied the medicine "Save-the-Horse" according to directions, and whether it was the medicine or the careful attention we gave the horse, the windpuffs have entirely disappeared and the animal is working every day; and, beside, never lost a day on account of this trouble. I am inclined to think that the medicine is all right and will recommend it to anyone whose horses are afflicted with windpuffs.

Yours truly,
THE ARTIFICIAL ICE CO.

WILLIAM MEAD, Acting Secretary,
SANTA MARIA, CAL.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

DEXTER PRINCE STABLES

TRAINING, BOARDING AND SALE

Cor. of Grove and Baker Streets, just at the Panhandle Entrance to Golden Gate Park (Take Hayes, McAllister or Divisadero Street Cars)

Best located and healthiest Stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by automobiles or cars.

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curl" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc.

W. B. Eddy & Co., Whitehall, N. Y.

Wilcoxson's Perfection Liniment

The Greatest Remedy Ever Known For Bad Legs.

It penetrates to the seat of trouble at once. It allays fever from any cause. A Safe, Speedy and Positive Cure for Splints, Curbs, Thoroughpins, Sweeney, Capped Hocks, Wind Puffs and all Lameness from Sprains, Ringbone and other bony enlargements. On broken down, weak and injured tendons, ruptured ligaments its power is unfailing. Permanently cures all broken down conditions of the Ankles, Hocks, Tendons or Ligaments, without loss of hair or an hour's let up on the horse.

PRICE \$2 PER BOTTLE Express charges prepaid on receipt of price. Every bottle guaranteed to give satisfaction or money refunded.

THE CONSOLATION HANDICAP

—at the—

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

GUARANTEED

BY THE

GUARANTEED

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1905.

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES TO CLOSE MONDAY, DEC. 4, 1905.

ONLY \$2 TO NOMINATE MARE.

\$4250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners and \$200 to Owners of Stallions. Money Divided as Follows:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate Mare on December 1, 1905, when name, color, description of Mare and Stallion bred to must be given. \$5 May 1, 1906. \$5 October 1, 1906. \$10 on Yearlings January 2, 1907. \$10 on Two-Year-Olds January 2, 1908. \$10 on Three-Year-Olds January 2, 1909.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace. \$35 to start in the Two-Year-Old Trot. \$35 to start in the Three-Year-Old Pace. \$50 to start in the Three-Year-Old Trot.

All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.
Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.
Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (3 in 3) and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.
If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before January 2, 1907, her nominator may sell or transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1905.
Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7000, the amount of the guarantee only. Horses will not be barred in pacing races.
Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.
Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more monies in each Division than there are starters.
Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

San Francisco, Saturday, October 14, 1905.

THE AMERICAN TROTTER is the universal pleasure horse of the people of the United States. From Maine to California he is bred, owned and driven by farmers, mechanics, millionaires, statesmen and tradesmen, and there is not a county in the entire country where the trotting horse is not owned and loved for his docility, and his speed. The country boy is raised with trotting colts, breaks them to harness and drives them on the road, and there is hardly a person, be he the owner of millions or the worker for a small wage, who does not enjoy riding behind a good roadster, or a pair of them. Dr. Neal, the editor of that excellent publication, the Western Horseman, recently expressed his views about people who love the trotters in the following manner:

"The breeding and development of the trotting horse is an interesting study, and there is a fascination about breeding and developing trotters which appeals strongly to thousands of people in all parts of the country. The writer has traveled pretty extensively during the past twenty years in many States, and has visited many out of the way places, but has yet to find a city, town or hamlet where one or more persons could not be found who were interested in breeding trotters. The trotting horse enthusiast is found in all walks of life, and his admirers are not confined to any one class or condition of people, and some of the most sincere lovers of the trotters are to be found in the pulpit, on the stage, in the big financial institutions of the country, on the farms, in stores, shops and factories; in fact, the popularity of the trotting horse extends into every part of American life. Only a few weeks ago the writer met a Catholic priest, a warm-hearted, lovable man, devoted to his calling, who was one of the best posted men on trotting horse affairs he ever met. In the same city lives a railroad engineer, who drives a big locomotive across the country, pulling one of the fastest railroad trains in the world, and this engineer loves a trotter next to his wife and babies.

"One of the leading officials of the railroad which employs this engineer is also an enthusiastic lover of trotters, and his only recreation is to breed a few trotters each year. Up in Pennsylvania there lives a man who is one of the largest coal and timber operators in the world, a man who annually transacts millions of dollars' worth of business, and employs thousands of men, and is one of the busiest men in the United States. Yet this man finds time each year to spend a week or two on the Grand Circuit watching the trotters. Down in Southern Ohio there lives another big coal and timber operator, whose business each year mounts up into millions, but he is never too busy to discuss the breeding and development of the trotter, and he breeds numbers of good horses each year. There are Senators and Congressmen, widely known in the halls of Congress, many of them who are real admirers of the trotters, and several members of the President's official family take a deep interest in the breeding and development of the light harness horse.

"In every state there are ministers, lawyers, physicians and men high in official life who love the trotters, and take great delight in watching the breeding and development of the trotter, and yet some people wonder at the hold the trotter has upon the American people. This is the class of people who keep alive the interest in the trotter, and they are interested in him not because they want to speculate on his chances of winning races, but simply because they love the horse, and take delight in seeing him in contests of speed. The liberal-minded, conservative people of the United States see no particular harm in speculating on trotting races and buying pools, but it is not because of this phase of trotting racing that they admire the

trotter, and, while many of them buy pools, it is pure love for the trotters that keeps them in the business. Just so long as this class of people continues to give its support to the trotting horse business, just so long will the trotter retain his popularity. There is no danger of the light harness horse losing his present high degree of popularity with the best class of people in every State giving him their support."

DAN PATCH is the king of all harness horses beyond dispute. No horse has ever appeared that could pace a mile in two minutes with the ease he accomplishes the effort, and no horse has ever approached the records he holds for miles below that mark. His latest is a mile in 1:55½ at Lexington last Friday, breaking his own world's record of 1:56, made at Memphis last year. The first quarter was in 29½ seconds, the next in 28 seconds, the third in 28¾ and the last quarter in 29 seconds. When we stop to think that there are many thoroughbred horses that cannot run and pull a sulky that fast, the greatness of Dan Patch is more pronounced. For three years this wonderful stallion has made heavy seasons in the stud and come out in the fall and broken the world's pacing record. His handsome proportions, his game-ness and his marvelous speed are the admiration of horsemen all over the world. His owner, M. W. Savage, of the International Stock Food Company of Indianapolis, is to be congratulated on the possession of such a noble animal. Dan Patch stands on a pedestal above all other equines and "none but himself can be his parallel."

WE ARE OFTEN ASKED to decide wagers made by our readers, and are always willing to interpret the rules laid down or in general use which govern contests of all kinds, provided the parties asking for decisions will send in the conditions under which the wagers are made. It is not possible for any one to form an intelligent opinion in regard to the way a wager should be decided unless he knows the full conditions of the bet. We were asked to publish in this issue of the Breeder and Sportsman an opinion as to the winner of a bet made by two well known harness horsemen during the California Circuit races, but as the conditions of the bet were not given, we have nothing to base a decision on. Parties asking this journal to decide wagers between them should send to this office a copy of the conditions of the wager, to which the signatures of both parties should be affixed.

THE DISPERSAL SALE of the Rancho del Paso horses, which will take place in New York, December 4th, is the talk of turfdom. The sales will be held by the Fasig-Tipton Company and William Easton will be the auctioneer. There are thirty grandly bred stallions, including the imported horses Watercress, Star Ruby, St. Gatten, Goldfield, Golden Garter and others, and five hundred brood mares. Catalogues will soon be issued and will be sent to those who apply to the Fasig-Tipton Company, Madison Square Garden, New York, for them. California breeders who cannot attend the sale, should send commissions on and buy what they can afford to. The dispersal of this great farm offers the chance of a life time to small breeders.

SHORTHORNS from the celebrated Humboldt herd of Rush & Pierce, Suisun, are to be sold at that place on Thursday next, October 19th, by Fred H. Chase & Co. This is the first annual auction from this herd and farmers should not allow this opportunity to improve their stock to escape them. The cattle to be sold are all high class individuals, full blooded and registered, and are the result of years of intelligent breeding. The purchase of a good young bull or a few heifers will raise the standard of a herd of common cattle in a few years if intelligently managed, so that they will be worth twice as much in the market as can be got for ordinary cattle. Try to be at Suisun next Thursday if you are interested in cattle.

THE STAKES WILL CLOSE on Monday, October 23d, with the New California Jockey Club. There is added money in every instance where the stakes are from \$2000 to \$3000. The Burns Handicap, which is a guaranteed stake, is for \$10,000. Look over the list of these rich stakes in the advertisement which appears on another page in this issue.

A BIG ENTRY LIST is due the Southern California Circuit of harness racing, and every breeder, owner and trainer in the central and northern part of the state should make it his business to assist our southern friends in securing the same. They are using every effort to build up the game down there and

successful fall meetings this year mean greater and better meetings next year with two \$5000 stakes. Every horseman that can possibly afford to attend the racing on the Southern Circuit next month should be making his plans for the trip. Now is the time to boost. With the proper encouragement to those who give harness meetings in California, there can be a circuit built up on this Coast that will be the equal of any circuit held anywhere in the United States.

ADMIRAL DEWEY, son of Bingen and Nancy Hanks, lowered his record to 2:04¾ at Lexington last Wednesday. He started to beat his record of 2:06¾ and lowered it two full seconds. This makes Admiral Dewey the third fastest trotting stallion. Cresceus holds the world's record with a mark of 2:02¾, and John A. McKerron has second place with a record of 2:04½. Directum is in fourth place, his record being 2:05¼, made in a race. Onward Silver's mark is the same, but it was made against time and with a wind shield in front.

ENTRIES for the Santa Maria meeting will close October 23d. There will be six days' racing with one harness and two running events each day. See the advertisement in our business columns.

PONY RACING TODAY AT SAN MATEO.

The race meet of the California Polo and Pony Racing Association which commences today on the track of Charles W. Clark at San Mateo is expected to bring out some keen racing.

Rudolph Spreckels and Mr. Clark will have the greatest number of entries, while J. Chancey Hayes of Oceanside will send up five from the south. W. E. Pedley of the lower country will also be represented by Carlotta, while Mr. Thorne of Palo Alto will have one which he figures should carry off some of the cups. He has entered Pegasus. Mr. Thorne banks his hopes on the fact that he has the same trainer handling his entry that had so much to do with the coming out of Dr. Leggo.

What is thought to be the feature of the card for today is the half-mile event in which Midlove and Uletma will come together. Both of these entries have been "prepped" to the hour and Mr. Clark and Mr. Spreckels are centering all the efforts on these two for the time being.

Among those which will carry Mr. Spreckels' colors are: Uletma, Boastful, Hopeful, Don and Carlolly. Mr. Clark has entered Midlove, Ethel G., Bas Blancs, Alverne and Queen Rucker.

Of Mr. Spreckels' entries, Uletma, Boastful and Carlolly have never raced on the association track. In fact the last two have never been raced on any track. In the workouts, at Mr. Spreckels' farm, they have turned up considerable speed and will be backed for the honors in the events in which they start.

The number of stables represented today will not be as large as in previous years, but what may be lacked in number of owners represented has been more than made up by the quality and number of entries from the stables that take part in the meet.

It is the opinion of those who have visited the Clark track the last week it would be hard to find a finer lot than those which are stabled there at the present time. Cost has been the last consideration, which has resulted in some of the best bred ponies being located in San Francisco.

This is accentuated by the fact that Mr. Spreckels has just secured through Mr. Leighton, secretary of the association, some fifty head of the finest ponies in the northwest.

Those secured are mostly seven-eighths thoroughbred, being sired by Jim Miller and Steamboat Charlie.

A week from today another card will be presented and the winner of the Midlove-Uletma race will have to go a little longer distance with more weight. It may be that Marigold will be a contestant at this time, in which case there will be "a hard guessing bee."

Thomas H. Williams, president of the New California Jockey Club, will act as presiding judge, while Thomas A. Driscoll, who has just returned to Burlingame, will be the senior steward. Fred Mulholland will act as starter.

The first race on the card has been called for 2:15 p. m. There will be five races.

The entries for the events next week will close next Wednesday with the secretary.

Mr. Leighton states that there will be another meet the latter part of next month, commencing on Thanksgiving day. It is thought at this time many of the owners now absent from the city will have returned and be represented. Another meet is likely to take place around the first of the year or in the early spring. These races will be principally for the polo ponies that are in active service. So many foreign polo players are expected here this winter that it is thought a full card can be made up exclusively of the mounts.

Mr. Leighton expects teams from the East, England, Australia, Honolulu and the southern part of the State. Among the noted visitors will be Sir Rupert Clark of Australia, who may bring over a wonder in the three-year-old race line to be raced at Oakland. If he is successful in carrying off the honors he will ship his entry to the east and race it over the summer tracks. With Sir Rupert will come the Australian polo team.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

IMPRESSIONS OF THE PORTLAND LIVE STOCK SHOW.

To this view, the best feature of the Lewis and Clark Exposition is its great live stock show just over. Necessarily, in some particulars, the exposition shows local flavor. But in respect of its live stock show rank is taken with the great world's fairs. Quantity was sufficient. Quality was up to highest expectations. The United States and Canada responded cordially to invitations for entries. Notable imports from England, France, Belgium and Germany were shown. Horses, cattle, sheep, goats, and swine had proper share in public attention and interest.

Home breeders won blue ribbons. It was thought that Eastern men, skilled in fitting and giving polish, would have the Pacific Coast at a disadvantage. Not so. Oregon and the Coast made possible the Exposition. Oregon and the Coast made the stock show and shared in the glory. California sent the famous Pierce Holsteins, the Glide & Son, the Eakle and the Rush & Pierce shorthorns, and the owners came along, other delegates were present, including Prof. Majors, U. C., professionally and personally held in high esteem in Oregon.

Perhaps the horse and the shorthorn had the leading parts.

Horses there were in type from Darley's Arabian to the ton and a quarter drafter from Normandy, the Low Countries or the English shires.

The standard bred class was rather light in numbers, but showing quality. The judges pronounced the stallion field in merit quite in a class by itself. Zombro took leading place, the showy blacks, Lord Kitchener and Nocturno, dividing honors. From a show standpoint, the younger horses, with bloom and action, had the advantage, but Zombro's ability as a sire and his history as a good three-year-old were properly taken into account. These young horses, however, showy, built for endurance, carrying the blood of Black Hawk 5, Edwin Forrest 49, Mambrino Patchen 58, and thoroughbred in close ancestry, weighing 1100 to 1200 pounds, come close to that magnified Morgan ideal recently suggested through the Breeder and Sportsman by Mr. Gamble. And it cannot but be cause of congratulation to believers in progressive breeding that Lord Kitchener is a handsomer horse than his sire. If he proves as good a sire, so much the better. Junior stallions, mares and young stuff were attractive. Brook Nook Ranch of Montana won ribbons enough to carpet one of its fertile meadows. The Alfonso family won firsts, group and family prizes and grand championships in giddy profusion, and showed breedy and handsome form. Altamont 3600 was represented. Old Altamont did much for the harness horse in Oregon and spent his last days in California and his blood lines are here valued in matron or sire.

Lambert Boy and his son Newsboy represented the Morgans, being the real thing in blood and form, good individuals and typical in conformation to the type of that valuable line.

Of thoroughbreds, there is little to report. An entry or two saved the distance of friends of the galloper.

McLaughlin's French Coach and Crouch & Son's German Coach classes, high actors, at home in the arena, shown to best advantage, were popular with the grand stand, and in numbers and quality were fit to show anywhere. McLaughlin's Apropos was head of the class. To the observer with standard bred inclinations, the French Coach is nearer the mark as a heavy harness horse than the German, the latter being too heavy without the harness, and, untrained, lacking the special shoeing and tail surgery in vogue, gaited too much like the old Mission Street bob-tail cars which used to run to Woodward's Gardens.

One Hackney showed, a good one though, and a solitary Cleveland Bay, lone fisherman by a great stream.

Rosa Bonheur would have found material for many "Horse Fairs" in the draft classes. Percherons led. McLaughlin Bros. swept the field with a magnificent line of this famous breed.

Canadians won with Clydesdale and J. L. Edson of Silverton, Ore., gathered in first premium, championship and grand championship with Red Lynch Conqueror, a grand Shire. There was little competition in this class.

Crouch & Sons led with Belgians, a drafter much in favor in the Northwest.

One Suffolk was shown, a good specimen of this famous old cart horse, owned by Fanson & Son of Danville, Ill.

Missouri contributed a mammoth mule and a carload of his ancestors, all of which were placed on the firing line and did their part in drawing crowds. Yolo County and the San Joaquin would have been much edified and refreshed with this exhibit.

The cattle barns were filled with grand stock. Beef and dairy advocates found ready texts. Friends of the dual purpose cow pointed with pride to the Red Poll and the Devon. White faces came from many fine Hereford breeders. But the Shorthorn display was magnificent. The atmosphere reeked of Bonnie Scotland. Men whose word is authority give the Lewis & Clark show credit in respect of Shorthorns of equalling any show on record. The uniform excellence of animals shown is remarkable. King Edward, first premium aged bull, also champion and grand champion, was shown by J. H. Glide & Son of Sacramento, who also won other honors in this branch of the show. Rush & Pierce took several ribbons. C. E. Ladd and H. W. Peel were the other principal exhibitors, representing Oregon and Washington with a grand array of entries of this noble breed.

The Galloways shown by Clark of Minnesota and Brown & Son of Missouri, were exceptionally fine. A fair display of Aberdeen Angus was made by Oregon breeders.

The lover of the Jersey was in his element. Such herds as those of the Ladd Estate, among the chief Jersey herds of the world, D. H. Looney, H. West, Atkinson Bros., and others, are a source of pride to Oregon and glory to any dairy country as well as to all those who appreciate grace, beauty and usefulness in the cow. The Ladd Estate received chief place in awards, with the Looney herd second and other honors distributed among smaller breeders. The Ladd Estate showed Loretta D., the famous winner of the dairy test at St. Louis, but the cow being dry at present was not entered in the contests. Loretta D. is a strong, rugged cow, inclining to coarseness, but a great producer.

Holsteins were there to "beat the Dutch." For Holland could not show a better collection. The Pierce herd from California attracted especial attention. Mr. Pierce's chief herd bull, Jetse (imported), is perfect in type, a grand specimen of the breed to whose ideals he is so true. Jetse did not show quite as much form as usual, the long journey being a decided handicap. The Pierce cows and young stock were first class. Irwin of Minneapolis, the Hazlewood Company of Spokane, Frakes of Scappoose, were the other exhibitors. It was a surprise to most when the Frakes bull, Oregon Lunde de Kol, was placed first. This bull is coarse, beefy in form, not a Holstein type at all, and might be expected to win only in a weight contest. The Frakes cow, Mechthilde, is a grand individual, perfect in conformation, lacking nowhere unless it be a shade in facial turn and winning place worthily.

A herd of Ayrshires and a herd of Brown Swiss were shown. The only families of these varieties, so far as this observation goes, in the North Pacific.

Sheep, goats and swine had their innings, and, while not shown in great numbers, had enough quality and variety to interest any requirement. One hog breeder displayed upon his walls his ambition to "Make two pounds of pork grow where one grew before." Smith of Hazlewood was this humorist. It is a vital point in this whole business.

It is evident that the Pacific Coast claims greatness, and must continue to do so, largely along agricultural lines. Live stock interests are second to none in the farming world. The show is educational. To learn of care, of feeding, of fitting, is a call first and last for the blue ribbon end of the show ring.

The Live Stock Show was popular. Attendance was good. Everybody was there but some of the leading officials of the Exposition, who ought to have been. Judges in the main were satisfactory. Credit is due Director Withycombe of the Oregon Experiment Station, who suggested holding the show, to Superintendent Wisdom, who made and managed it and to Mr. George Gamble, who was always the right man in the right place with balm for the wounded and comfort for the disappointed.

G. A. WESTGATE.

HENRY DUNLAP SELLS HAROLD D. FOR \$3250.

Philadelphia, Oct. 4, 1905.

Editor Breeder and Sportsman—I drop you a few lines to let you know that Harold D. holds the speed track record at Philadelphia. He won the fastest half mile two in three contest ever raced on the Philadelphia speed track. He was driven to wagon and won his heats in 1:00 3/4 and 1:00 1/2, beating such horses as You Bet 2:07, Judge Mills 2:08, Wilkie Egbert 2:10 1/4, Robert M. 2:06 3/4, Billy 2:14 and Iowa Joe, said to be the fastest horse in the Driving Club here. This race took place last Saturday before ten thousand people. After the race I sold Harold D. to James R. Brown, 2418 North Thirty-first street, Philadelphia, for \$3250.

When I arrived at Saugus, Mass., with my horse after leaving California, he was sick and would not eat. They took me out of the sulky before the fourth heat and put Gillis up, and he got Harold D. shut out, but according to the rule they had to give me a position and let the horse start again. I finished fourth with him. One month after that I started him at Rochester, N. H. There were just three of us in the race and I managed to keep from getting the flag and got third money. At the next town, Concord, he was not in the money, and as he was getting no better I turned him over to a veterinary for a week and he got better.

I came to Philadelphia a month ago and Harold D. got to eating well and soon got strong, showing his old speed in his work. You can see by his work last Saturday that he is quite a horse right now. I fully expect him to get a mark of 2:05 next year. He is the best horse in a race I ever saw. They scored me twenty-two times in the first heat at Saugus, and he was pacing all the time, although a sick horse.

I will be home some day next week and glad to get back. I must say they turn out better to the harness races in California than they do in the New England States.

Respectfully, H. H. DUNLAP.

ENTITLED TO PRIVILEGES OF THE TRACK.

Judge Hunt of the Superior Court of San Francisco rendered a decision last Saturday in the case of Sanfason against the New California Jockey Club, in which he gave the opinion that the club had no right to keep a person from the privileges of the track who is caught "flashing" or "signaling" the result of races.

During the last racing season Sanfason sought admission to the Emeryville track and signaled the results to bookmakers doing business in San Francisco. The racing officials admitted they ejected him from the track upon the ground that he was guilty of immoral conduct and of violating the ordinances of San Francisco in sending the results to determine bets made in illegally run poolrooms.

The statute of 1893, says Judge Hunt, make it unlawful to refuse admission to any theater, racetrack or other place of public amusement to any person

over 21 years of age who presents an admission ticket unless such person is drunk, lewd or of immoral character.

The question is whether the defendants had a right to expel the plaintiff for violating a city ordinance and whether such violation of a city law would make him an "immoral character."

The court holds that it would not for he says "Should a man be arrested and fined for neglecting to repair a sewer or for spitting on a sidewalk, he is guilty of immoral conduct. Neither could a man be denied admission to a San Francisco theatre for violating an ordinance of Alameda county."

As to "flashing" the result an individual has the same right in this respect as the newspaper reporters who send in the results of a prize fight.

A BIG AUCTION SALE.

The Meek Estate, comprising several thousand acres of the finest land in California, situated between the towns of Haywards and San Lorenzo in Alameda county, has been divided amongst the heirs, and on the 27th and 28th of this month the personal property of this great farm is to be sold at auction. There are 150 head of horses and mules, large numbers of wagons, carts, buggies, bikes, harness, and everything required to run a big farm of this kind. Among the horses there are several fine road teams, gentlemen's driving horses, family horses, and many fine draft horses and mules. This will be one of the biggest auction sales ever held in California, and it will take two days to sell everything.

The Meek Estate has bred many fast trotters and pacers in the past, and while at an auction sale in 1904 nearly all the trotting stock was sold, there are quite a number of well-bred mares and geldings still on the farm that have been used as road horses and will be sold at this sale. Among them is Charley Steele, one of the best roadsters in the State. He is a full brother to Janice 2:08 1/4. A hay mare by Welcome 2:10 1/2 out of Edwin 2:21 1/2 by Sidney, is also a very fine road mare, perfectly gentle and can be driven by a lady, is also to go in this sale. Another is the mare Crieri 2:20 by Direct 2:05 1/2, out of Cricket 2:10 by Steinway. This mare is a fine roadster and will make a great brood mare. A thoroughbred saddle horse, thoroughly broken and but four years old, will also be sold. The draft stock is an especially fine lot of well-bred and fine looking animals. The wagons, carts, harness, agricultural implements, etc., are all in good repair. The dates of the sale are October 27th and 28th.

STICKLER FOR RULES LOST.

When the rain prevented racing at Electric Park yesterday the horsemen gathered in the main building and talked horse, says a Baltimore writer. The question of making horsemen engaged in a race comply strictly with the rules was a subject under discussion, when one of a party told the following story:

"I was officiating at a meeting held at one of the lower Maryland county tracks a few seasons ago when I saw a stickler for rules get it in the neck in a most unexpected manner. There was a little fellow driving in the race, and his horse was winning. When he won the first heat he jumped on the scale and did it cleverly, the beam raising when he landed, and the clerk marked him as that weight.

"Another fellow in the race watched the little man do the scale-jump act after he had won the second heat. When he won the third heat and did the jump act again, the other fellow was right there and demanded that he stay on the scales and weigh properly. When this was done the winner of three heats was found to weigh but 135 pounds instead of the necessary 150. The clerk reported the fact to the judges, who promptly disqualified the horse which had won the three heats.

"Now, this was all right and proper. The fellow who had insisted on making the little fellow weigh had finished second in each heat, and thought that when the judges disqualified the man short of weight the winning of the race would then and there be awarded his horse without the time record made by the disqualified horse. Well, the judges did nothing of the kind. When they disqualified the horse whose driver was short of weight they ordered the race to continue until a winner developed.

"The fellow who had protested was in for it, and went out and won the next heat, though he was forced to take a fast mark in doing it. In the fifth heat his horse made a bad break and was distanced. Instead of getting the second money, which he had won when he had the other fellow's horse disqualified, he got no money, but penalized his horse with a fast mark. The fact that the two drivers in the story were both driving in races at this meeting called to my mind the incident related."

A big sale of trotting and pacing horses is planned by Fred H. Chase & Co., the well known live stock auctioneers, to take place at Pleasanton race track some time in February next. It is proposed to conduct this sale on the same lines that the big eastern combination sales are held, and on the day before the horses are sold all that are to be sold as speed or road horses will be shown on the track and timed by experienced timers and the time announced. Among those who have already promised consignments to this big sale are Mr. A. B. Spreckels, who will send thirty head from Aptos Farm; Mr. W. A. Shippee, Oakwood Park Stock Farm, and Mr. A. J. Molero. This sale will be extensively advertised and will be one of the largest ever held in California. During February there are always many eastern buyers in California looking for good prospects who would rather buy at auctions than any other way, and there is no doubt but the sale will be a big success.

Jackson's Napa Soda does not tangle the feet

OTHER PEOPLE'S OPINIONS

Western Horseman: No, there is no such thing as holding a successful county, district or state fair without harness horse racing. It has been tried many times and always with the same results—a financial loss. A recent shining example is that of the Wabash, Indiana, "Farmers' No Horse Race Fair," promoted and conducted by the Daugherty Bros., with Will H. Fleming as acting manager. As a "Pumpkin and Pig" show, with a complete and valuable list of prizes for everything produced on the farm, in the local work shops, in the household kitchen, and fancy work domestic corner, with "side shows" and special attractions galore—and not a device of any kind at which a penny could be jeopardized by chance, the "Farmers' Fair" had every attraction except "hoss racing." And what was the result? Not enough farmers—the class of people some would have us believe do not care for horse racing, attended to pay the gate keepers, and had not the citizens of Wabash, with whom the promoters are exceedingly popular, turned out in force through pure good fellowship, the Daugherty Bros.' great combination sale plant, at which place the "Farmers' Fair" was held, would hardly have paid the loss. This is the usual experience in trying to run a fair without horse racing.

Horse World: It is apparent to all who have given the matter any attention that it is time some better plan of identifying horses be adopted by the parent trotting associations. In spite of the efforts which are put forth to prevent the masquerading of horses on the harness tracks it is a fact that there has been more ringing this year than almost any year that can be recalled. There is hardly a racing circuit of any importance in which there has not been one or more horses suspected of being ringers. Several which are doubtless ringers have managed to get away with quite a lot of money before suspicions became strong enough to cause their earnings to be protested, and others have vanished almost instantly, suspicion being turned toward them at once. Several plans for better identifying horses have been proposed, and it seems as though the two parent trotting associations ought to get together during the coming winter and combine upon some plan for making it less easy for unprincipled men to indulge in this form of cheating. Even with the adoption of the best of the methods suggested there will doubtless be some ringling, but that it cannot be prevented in a great degree seems hard to believe. The evil is one that ought to be dealt with before another racing season opens, and it is to be hoped that the men who manage the affairs of the National and American Trotting Associations will take this view of the matter and act accordingly.

Spirit of the West: The racing season of 1905 is nearing the end. It can be said without fear of contradiction that the season of 1905, especially in the West, has been the most successful in the history of the light-harness horse. When Spirit of the West in years gone by expressed the opinion that there were ample interest in the West, and sufficient foundation trotting bred stock for the West to become an important factor in producing high-class race horses, and conducting first-class meetings there were a few people who were inclined to hold different views, but time has proven the soundness of our opinion, and to-day no section of country on the map is in a more prosperous condition than is the West in the production of high-class standard bred horses and the holding of successful race meetings. The stigma of being under the dictation and control of the gambling element does not now and never will obtain in the West as it did and does now in many prominent Eastern race centers. There is a difference between permitting men who are inclined to place a wager on a horse race who are interested in the production and development of the industry, and permitting a class of men who have not one dollar invested in the business and follow the race course only to gamble and dictate to the association. The West is on the right track and it should continue along the same lines. There is reason in all things, and the public does not censure a certain amount of genteel sport, but it will not stand for open violation of order and decency.

Farm and Home: Except in the development of the trotting horse the United States has little to boast of in the line of horse improvement, and it may be questioned as to how much must be allowed for skillful driving, better tracks and appliances. The recognized breeds of horses are the results of continued and persistent devotion to an acknowledged standard of excellence for that particular breed. And until farmers recognize and follow the experience and practice of those who have preserved certain qualities and characteristics by breeding in the same line for generations, they will not achieve success. Specimens of the range horses brought eastward indicate quite clearly what continuous breeding from stallions of the same class will do with the native unimproved mares as foundation stock. Size, form and color of potent sires are reproduced and fixed in the offspring after a few generations. But the mental characteristics of temperament incident to the half wild mares it seems were more difficult to overcome than physical conformation. In the early days of the Shorthorn herdbook the offspring of females having four crosses of pure bred sires became eligible to record as full bloods, because in such cases, the good qualities of the dominant breed were, to all appearances, fixed and transmissible. This is the lesson the farmer must learn and abide by. So far as the principle of breeding is con-

cerned, it does not matter which class of horses he fancies or desires—roadster, coach or draft—he must stick to the same class of sires, coupling the best to the best with the assurance that success will follow.

Breeders' Gazette: It is wonderful how closely the search has been prosecuted for the young stallions of size and substance and general excellence of appearance. Our information is that in France, Belgium, England, Scotland and Germany, there is hardly one left that would do to bring to this country with any hope of making any adequate return on him. Letters received tell, too, of flying orders off the wires calling for this or that number of stallions to fill out a load or eke out one already left for foreign shores. The way these foreign importations have melted from first hands after they have landed has never been equaled in the history of the trade, and in domestic transaction there is marked activity.

In these foreign countries the trouble now is, not how to sell the horses but to get them to sell after they have been obtained and gathered together into the dealers' stables. Over there the breeders of pure-bred stock assuredly are in clover and there are cogent reasons why the trade in this country is turning more and more to buy the product of American studs. There is no reason why there should be a value for an imported horse and another and far lower one for a home-bred horse of equal merit and pedigree. Indeed, we learn that in some parts of this country and for some uses the home-bred commodity is already esteemed if not the best at least the price-equal of his imported brethren. Therefore it will stand our breeders in hand to go slowly, taking advantage of the rising tide slackening back at the right time. Indeed it looks very much as though this is the time in the affairs of that trade which if taken at the flood will lead on to fortune. There may be no occasion for unseemly haste, but there is reason for unremitting work in gathering together stocks with which to carry on the future work. Times are good, demand is rarely distributed over many classes, and many new men are getting into this business of breeding of pure-breds but the top of the wave should not be let slip to obtain some few of the real topers that are in time to come to be the great winners, and best of all for the sires and dams of the equine prodigies that American generations yet unborn will honor as well as their imported ancestors.

NEW 2:10 LIST.

Trotters.

Sadie Mae by Peter the Great 2:07½, dam Fanella 2:13 by Arion 2:07½	2:06¼

GRAND SOUTHERN FALL CIRCUIT.

Secretary A. W. Bruner has sent the following circular letter to the horsemen of this coast:

Los Angeles, Cal., Oct. 5th, 1905.

I wish to call your attention to the closing of entries on October 24th for our San Bernardino, Santa Ana and Los Angeles fall meetings and trust that every horseman will make it a point to give us every entry possible. We have spent our time and money in forming this circuit for the benefit of the harness horse interests and it is now up to the horsemen to make it a success from a racing standpoint by giving us a good, liberal entry. From a financial standpoint, we have taken care of that end of the game and your money is ready at the wire. Don't fail to enter fearing your class will not fill and race may be declared off. Our purses and conditions are most liberal, and by referring to our July meeting you will note that classes having but three starters in one thousand dollar purses were allowed to go. Our method is fair treatment to the horsemen in every sense of the word. It is our intention to give an early spring circuit, increasing our classes and purses at San Bernardino and Santa Ana, and just as soon as possible to establish a \$5000 stake for trotters and a \$5000 stake for pacers at our Los Angeles fall meetings. In other words, we propose building up a Southern California Circuit with a reputation for liberality in purses and conditions governing same that will attract the attention of horsemen from all parts of the country.

Our circuit at present comprises three of the safest and fastest tracks there is on the Pacific Coast and only equalled on the Grand Circuit. The San Bernardino track has just been graded, fenced and re-laid, with other improvements, at an expense of \$12,000, making it a thoroughly up-to-date plant, and my prediction is that it will prove the fastest track in the State. Santa Ana has always been considered one of the fastest tracks in California, while our Los Angeles track holds the Coast record for pacing (2:03¼), also for trotting (2:05½). Taking into consideration the fact that our circuit gives the closing meeting in the fall and the early opening meeting in the spring, say nothing about our superior winter climate to train and prepare your horses for a hard season's campaign, horsemen cannot afford to overlook this opportunity of getting a chance to earn their winter's oats in the fall and a get-away stake in the spring. Make your entries through the entire circuit and select your track to winter at, resting assured that you will be treated right.

Address your entries and communications to A. W. Bruner, secretary, 313 W. 2d street, Los Angeles, Cal.

Jackson's Napa Soda untangles the feet.

NOTES AND NEWS.

Dan Patch 1:55 1/4.

He is the greatest of them all.

And seems able to pace in 2:00 on any old track.

Angiola 2:07 3/4 has won two \$10,000 purses this year. She is a bread winner.

Dan Patch has five new standard performers to his credit. Pretty good for a starter, especially as one of them has a record of 2:08 3/4.

Achille 2:15 1/4, the New England stallion, is by Bingen 2:06 1/4, dam Starlight 2:15 3/4, by Electioneer; grandam the once-champion four-year-old Sally Benton 2:17 3/4, who also produced Serpol 2:10 and other fast ones.

The two-year-old trotter, Jack McKerron (2) 2:23 1/4 is certainly a great youngster. His mile at Elyria last week, when he trotted a half mile track that is far from being a fast track in 2:23 1/4, stamps him as a two-year-old of more than usual promise. The mile was an easy one, the first quarter being done in 38 1/2 seconds, the half was reached in 1:13 1/4 and the three-quarters in 1:48 3/4, and home in 2:23 1/4.

The geldings have shown up wonderfully well this year. There are Wentworth 2:04 1/4, George G. 2:05 1/4, Tiverton 2:05 1/4, Dr. Strong 2:06, Snyder McGregor 2:06 1/4, Norman B. 2:06 1/4, Tom Axworthy 2:07, Kid Shea 2:07 1/4, Turley 2:08, and a few more to hear from.

Everett L. Smith, known best to readers of the turf papers as "Percy," over which pen name he has written interestingly for the American Horse Breeder, New York Telegraph and other papers, has recently connected himself with the Fiss, Doer & Campbell Co., one of the leading New York horse dealing firms. Mr. Smith will have charge of the advertising department of that firm.

The 21-year-old stallion Shenango won a three in five race at Groton, Mass., one day last month in 2:39 1/4, 2:40 1/2 and 2:39 1/4. He's no Osler hoss.

But four trotting stallions have entered the 2:10 list this season. One, Mainland 2:09 1/4, is by Axtell 2:12, while another, Mainsheet 2:08 1/2, is out of an Axtell mare.

Ellemac 2:27, dam of Turley 2:08, died recently at Ellemac Stock Farm, Memphis, Tenn. Ellemac was 15 years old and was by Alvan 2:26 1/2, dam Linda, untraced, and three other foals by her are all speedy. They are by French Plate 2:26 1/2, sire of Turley.

Samana by Bingen 2:06 1/4, out of Mont Rose 2:18, by Electioneer, grandam Rosemont, by Piedmont, out of Beautiful Bells 2:29 1/2, has taken a pacing record of 2:19 1/4.

Hallna Morgan 2:14 1/4, the three-year-old filly that raced through the Colorado circuit, and has since been racing through the Great Western Circuit, was broken to harness at eight months of age and wore the hobbles from that day on whenever she was hitched up. She cannot pace a mile in three minutes without the straps.

Mr. S. Christianson of this city has purchased from Chas. F. Kapp the handsome colt Charlie Kapp, foaled 1904, by Stam B. 2:11 1/4, dam Marguerite K. by Dom Pedro. This colt is entered in the Breeders' Futurity and looks like a good prospect. Ted Hayes has him in hand at Pleasanton.

The San Francisco Driving Club will hold a meeting to-morrow over the Santa Rosa Stock Farm track.

A new standard performer for Zombro 2:11 is Jealous 2:20 1/2. Zombro's list is getting to be a most creditable one.

Dr. Frank Pierce, of Albuquerque, New Mexico, now owns the trotting gelding Master Delmar 2:16, formerly owned by W. A. Clark Jr., and finds him a very pleasant driver, being thoroughly broken, kind and possessed of 2:20 speed.

Dolly Phoebe by Hambletonian Wilkes, dam Dolly Smith (dam of 7), by Mambrino Chief Jr., which took a mark of 2:29 1/4 at New Martinsville, W. Va., last month, reduced this mark to 2:22 1/4 at Buckhannon, W. Va., on September 22d. She is owned by Riverside Stock Farm, Weston, W. Va.

The livestock show at the Lewis and Clark Exposition, which closed September 29, was the crowning feature of the Fair. It was much better attended than was the livestock show at St. Louis, and in some ways superior. The showing of Shorthorns was the best ever made in America.

If E. D. Dudley of Dixon did not own two many stallion colts he would not want to sell Der Teufel, one of the best bred Diablo's living. This colt is a two-year-old and should make a great success as a race horse and in the stud. Write to Mr. Dudley for a card containing the colt's pedigree.

The entire racing stable of James Butler's East View Farm will be sold by the Fasig-Tipton Company at the Old Glory sale in New York, Nov. 20th to Dec. 1st.

Ed Geers has won nearly \$30,000 with the string of horses he has raced through the Grand Circuit.

The entry list was so large at Lexington that several of the races have been divided, making two races.

Fred H. Chase & Co. announce for the evening of Tuesday, November 14th, a sale of thirty head of trotting bred mares and geldings from the well known Rose Dale Stock Farm, Santa Rosa. These animals are by such stallions as Washington McKinney 3:57 1/2, son of the great McKinney 2:11 1/4; Daly 2:15, sire of eight trotters in the list, and St. Whips, a son of the sire of Azote 2:04 1/4. They are out of producing mares by Steinway, Eugene Casserly, Alexander, Ansel, Silas Skinner, Daly and Digitalis. This is the first of a series of annual sales from this farm. Size, conformation, soundness and speed have been the aim in breeding these horses and the public can be certain that they will be just as represented. There will be many fine road animals in the consignment and a number that have speed enough to race and win. Catalogues will be issued soon and can be had by application to Fred H. Chase & Co., 1732 Market street, San Francisco, where the sale is to be held.

Emma T. 2:17 1/2 by Socrates, dam of Miss Adbell, winner of this year's Kentucky Futurity, is also the dam of another fast trotter. On Friday of last week her daughter, Emma Brook, took a record of 2:11 1/4, and won second money in the 2:14 class trot at Lexington. Emma Brook is by Silent Brook 2:16 1/4.

The match race between Faust and Daisy May comes off to-morrow afternoon over the Alameda track. It is for \$500 a side.

The matinee season will be opened at Los Angeles on Thanksgiving Day with an excellent program of harness racing between horses owned by members of the Los Angeles Driving Club. Mr. A. W. Bruner, who was recently elected secretary of this club, is at work on a program that will bring together the best horses owned in the club.

Mr. C. Z. Hebert of Salinas, offered \$100 as a stake to be trotted for this year by three-year-olds sired by his stallion Bruno 2:16 1/4. The race was trotted last Saturday at the Salinas track. There were but two starters, both of them fillies. Mr. S. J. Smart's filly won in straight heats over Mr. Henry Gross's entry. The best time was 3:07.

Kid Shea, the trotter by Nitrogen that has been winning on the Grand Circuit this year and has reduced his record from 2:14 1/4 to 2:07 1/4, has a lot of California blood in his veins. His dam is the California bred mare Elsinore by Chief of the Echoes, second dam by A. W. Richmond.

The Central California Fair is being held at Hanford. Kings county this week, is the best ever held at that place. The stock exhibit is large and the attendance has been good every day.

The track at Spokane must be slow. Oveta 2:15 1/2 won the 2:16 trot there Tuesday, defeating Sam Bowers and Kitty Clover in 2:25, the fastest heat in the race.

Zephyr 2:07 1/4, by Zombro 2:11, and her dam Gazelle 2:11 1/2, by Gossiper 2:14 1/4, are both consigned to the old Glory sale in November. Gazelle is also the dam of Zolock 2:05 1/4.

Mr. W. H. Lumsden's filly 2:09 1/4, the fastest three-year-old pacer of the year, comes from a developed ancestry. She is by Bonnie Direct 2:05 1/4, son of Director 2:17 and Bon Bon 2:26. Her dam is Roblet 2:12 by Robin 2:22 1/4. Bonalet is inbred to Director, as Robin, the sire of her dam, is a grandson of that horse.

Pilatus 2:09 1/4 by Onward was sold at auction at Lexington last week and brought \$1800. He was purchased by the Franklin County Breeders' Association of Tennessee and was a bargain at the price, as he is well bred.

Joe Bunker 2:18 1/4, aged thirty-one years, in his day one of the most famous trotters of the American turf, died at the Sunny Slope Farm, Springdale, Ohio, a few days ago. Joe Bunker had a record of forty-nine heats in 2:30 or better, which was at that time very fast. In 1883 the horse was the sensation of the racing season at Fairview Park, N. Y. In that year he beat the famous Director, Dick Wright and Pigeon. At the time of his death he was owned by John Sherrer of Springdale. The horse was valued at \$10,000 in 1885, and Sherrer refused that amount, which was offered by Frank Work, the New York millionaire. Joe Bunker was by Geo. Wilkes and his dam was Lady Dunn, the grandam of Guy Wilkes.

It is reported here that James Rennie, manager and superintendent of the Stanford ranch at Vina, has tendered his resignation to Charles G. Lathrop and will sever his connection with the vast estate of 60,000 acres in this county and 40,000 acres at Gridley on October 15. Rennie's resignation gives rise to the rumor that this immense tract, which is part of the Stanford University endowment, is soon to be divided into small tracts of from ten acres up and sold to Eastern agriculturists. The property in Butte county is assessed at nearly \$1,000,000.

The mare Rosa Bonheur by Antinous has reduced her record to 2:16 1/4 this year.

Harold D. 2:11 1/2 by Dexter Prince, has been sold to a Philadelphia gentleman for \$3250.

The Ukiah race meeting was a complete success and large crowds were in attendance every day.

Grace McKinney 2:22 1/2, over a half mile track, is a new performer for McKinney. She is a pacer and is owned by John Lawlor of Petaluma. This record was made in a winning race at the Ukiah Fair last Saturday.

A dispatch from San Bernardino dated October 10th says: An attempt to kill "Rosco," the promising pacer, belonging to A. S. Fox of Redlands, was discovered this morning by the stableman. The horse had been slashed across the throat, the blade being buried three inches in the animal's neck and ripping open the neck for four inches, just missing the jugular vein. There is no clew. The horse has become renowned in this section by its fine appearance in matinee races given here during the past year by the San Bernardino County Driving Club. The horse will probably recover, but will be scarred permanently. Fox refused \$5000 for the animal, and has offered \$500 for the apprehension of the miscreant.

Albata by Altivo won \$1433 at the Columbus meeting. He will return to California a winner of considerable more than his expenses and with a mark of 2:11 1/4 to his credit.

There is always a little rift of sunshine in the blackest cloud. Quite a number of the California trainers who went East have not won much money, but the railroad fare from Chicago to San Francisco has been reduced to \$33 which is some consolation.

Good prices are being paid for good trotting colts right along. Last week Henry B. Rea of Pittsburg, Pa., sold to Montgomery & Oliver of that city the brown colt Exton by Expedition 2:15 1/4, dam Lady Howth by Sternberg 2:15 1/2, grandam by Wilkes Boy 2:24 1/2, great grandam by Happy Medium. The price paid for the colt was \$11,000. Exton is in Ed Benyon's stable. He is a three-year-old and one of the hand-somest colts of his age in training. Exton was timed separately in the second heat of the Kentucky Stock Farm purse at Columbus in 2:10.

The filly Silva, that took a two-year-old pacing record of 2:28 at the Hollister meeting last month will be sent to Charles Whitehead, the well known Salinas reinsman to train for the three-year-old events next year. She is by Dictatus Medium.

A new \$60,000 sales building is being constructed at National Stock Yards, East St. Louis, Ill. It will be 400x120 feet with an eighth of a mile show ring.

Vesper Bells by Advertiser out of Beautiful Bells, sold at auction at Lexington last week for \$1000. She is nine years old, and an own sister to Adbell 2:23 as a yearling. Geo. S. Newman of Denver, Colorado, was the buyer.

Old Lord Brilliant, America's champion harness horse, who won hundreds of blue ribbons at the big horse shows, died at the home of his owner, Mrs. John Gerken, Parkville, L. I., last week, says Western Horseman. Lord Brilliant was a trotting-bred show horse, being by Johnny Mack, son of Egmont. Before being docked and turned into a fashionable hackney type, Lord Brilliant contested in many races in the West where he was foaled.

King Athby won the two-year-old race at Hanford on the opening day. He paced the second and fastest heat of the race in 2:24 1/4.

The San Francisco Driving Club will hold its meeting at Santa Rosa to-morrow afternoon. Four races will be trotted and paced. Boats leave the Tiburon ferry at the foot of Market street at 8:00 and 9:30 a. m., connecting at Tiburon with trains for Santa Rosa. Returning the train will leave Santa Rosa at 6:30 p. m.

Cherry Lass, pacing mare by Bobby McGregor, took a time record of 2:03 3/4 at Lexington on Wednesday of last week.

Stonellita, the filly by Stoneway, that took a record of 2:20 last year as a two-year-old, won the 2:20 pace at Hanford last Wednesday in straight heats and reduced her record to 2:19 in the third heat.

Read the advertisement of the sale of all the horses and other personal property of the Meek Estate which appears in this issue.

The New York Herald says: "Bird S. Coler's blue ribbon trotter Commander Baker is a Western show horse brought out by Robert Aull of St. Louis in 1902. He won nine blue ribbons in 1903 and last year carried off the championship prize of \$1000 at the Louisville Horse Show. Besides being a handsome horse he is a real trotter that can step away at a 2.13 clip and do it like a Speedway winner. It is pleasing to note that Mr. Coler is showing this noted horse under his true name instead of giving him a new one and concealing his identity, as so many poor sportsmen are doing nowadays with show horses purchased in distant parts of the country. Commander Baker is a son of Alfonzo 2:29 1/2, who won a blue ribbon at Madison Square Garden many years ago, and whose sire before him was also a winner at the National Horse Show."

LEXINGTON RACES.

Friday, October 6th, the fourth day of the Kentucky Trotting Horse Breeders Association at Lexington, saw a large crowd at the track and fine sport resulted.

The feature of the day, the Johnstone stake for 2:24-class trotters, value \$2,000, was won by Albert C., who defeated the \$5000 Emma Brook in easy fashion in three of four heats. The race would have been a gift for the gray gelding in straight heats but he broke badly in the second heat, and while he caught his stride in two or three lengths he was unable to overtake the mare. Ed Geers won his first race of the meeting in the second event, the 2:12 trot, when his Silverthorne mare Gold Dust Maid won the event in straight heats from Lady Pauline C.

The 2:18-class pace, the last event on the card, was won by Dan P., who captured three heats in clever style after losing the first heat, in which he made a poor showing. The unfinished first division of the 2:18 trot was won by A. Penn, who captured the final heat from the California mare, Miss Kinney, both of whom had two heats to their credit the previous afternoon. Summaries:

Trotting, 2:18 class, purse \$1000.

A. Penn, b. h. by William Penn (Ludwig)	1	6	4	1	1
Miss Kinney, b. m. by McKinney (Andrews)	3	1	1	2	2
Belfast, b. g. (Barrett)	4	2	2	3	3
Electric Maiden, b. m. (Dunbar)	2	3	5	6	5

Time—2:13½, 2:08, 2:09½, 2:08¾.

On Saturday, Dan Patch, king of pacers, clipped three-quarters of a second from his own world's record negotiating the mile in 1:55¼. A crowd of 10,000 was already in a high state of enthusiasm over the smashing of the world's race record for three heats, and when Dan Patch's time was given out the excitement approached frenzy. Cheering people threw hats and wraps in the air and swarmed on to the track despite the efforts of policemen, the ovation continuing several minutes.

The great son of Joe Patchen and Zeelika appeared for his trial at 4 o'clock. The track was lightning fast and there was no wind, the weather conditions being ideal. Scott Hudson was behind the pacemaker. A strip of cloth between the wheels of the forward sulky to prevent dirt from being thrown behind was the only suggestion of a wind shield. Hersey was behind Dan Patch. The books offered 4 to 5 either way on the result of the effort. There were cheers when 0:29½ was hung out for the first quarter. Dan Patch's nose was almost against Hudson's coat and the crowd began vainly yelling to Hudson to move up. Hope was stimulated when 0:57½ was posted for the half. Excitement became intense when the three-quarters was passed in 1:26¼ and the spectators began shouting encouragement to the drivers. Into the stretch came the great pacer still keeping his even seemingly effortless stride, when the runner at his sulky wheel began to crawl up. Hudson gave a little more rein, but Hersey sat a statue, not urging his charge with whip or word. Dan Patch made no final effort. He just finished the mile as he had begun it. He had scarcely broken into a sweat when led back to receive the plaudits of the crowd.

M. W. Savage, his owner, had the announcer publicly thank Hudson for his work as pacemaker. He also announced that Dan Patch on Wednesday would be sent against the record of 1:59¾ made without a dustshield.

The three fastest heats ever paced marked the 2:04 pace, and the average time for the total heats of the day was the fastest on record. In the initial heat of the 2:04 pace Hazel Patch gave the Lexington track the 1905 race record of 2:02¾ but this was smashed in the next heat won by Locanda in 2:02 flat. He, likewise covered the third heat in 2:04¾. The three finishes were pronounced the most heart-breaking seen this year. Nathan Straus, the favorite throughout the pooling though fields sold at from 60 to 50 to 50 to 30, had to be content with third money. The betting on the event was the heaviest of the meeting. The Wilson stake for 2:20 class pacers had a field of only four horses, and it was won in straight heats by Bolivar, the gelding from California.

Scott Hudson drove Nervola in the 2:04 pace, this being his first appearance on the trotting turf this season.

Pacing, 2:20 class, purse \$2000.

Bolivar, b. g. by Wayland (De Ryder)	1	1	1

Time—2:02¾, 2:02, 2:01¾.

To beat the world's record of 1:56, Dan Patch, br. h., by Joe Patchen, dam Zeelika by Wilkesberry, paced a mile in 1:55¼. First quarter, 0:29½; half, 0:57½; three-quarters, 1:26¼, and mile in 1:55¼.

Turley, Ed Geer's bay gelding by French Plate, won the feature of the card on Thursday, the Walnut Hill Farm cup, valued at \$3000 with a handsome silver trophy valued at \$500, donated by L. V. Harkness, as an added feature for the race. The second heat of this race resulted in Geers losing a claim of foul against McDonald, the judges dismissed the complaint and placed the horses as they had finished. The "Silent" reinsman was angry, and he plainly told McDonald he knew he had been guilty of a foul. Geers won this cup in 1897 with The Monk and again in 1903 with Billy Buch.

The 2:10 pace was won by the even money favorite, Citation, in straight heats, but she was hard pressed to defeat Byrle Wilkes in the last two heats. Ben F. won third money.

The final race of the day, the 2:16 trot, was called at the end of the fourth heat on account of darkness. Summaries:

Walnut Hill Farm cup, 2:15 class, value \$3000.

WATCH FEET OF THE COLTS.

To go barefoot is the natural condition for the horse, but that is no reason why farmers should let young animals ruin their feet and legs by neglecting them should the toes grow too long or should the hoofs become split. It frequently occurs that the hoofs of colts have grown too long in winter and sometimes when they are turned out to pasture without having the feet properly levelled, undesirable conditions develop before any notice has been taken of the defects. A careful watch should therefore be kept over the feet of young horses even in the pasture fields. A few minutes now and again with a rasp and hoof knife will correct any malformations of the hoof and give the horse much more comfort and ensure a longer period of usefulness.

The feet of the colt should receive even more care than those of the old horse. The colt is in the formative period; his entire form is pliable and if the feet are not kept in proper condition the foot, fetlock and leg may be permanently diverted from their normal shape and direction. On the other hand, the pliability of the young horse's bony structure and the readiness with which defects will correct themselves when the causes are removed, makes it easy to keep the colt in proper shape with very little care. A writer in the Iowa "Agriculturist" gives the following pointers on the care of the unshod feet of horses and colts:

'Normally the toe is three times and the quarters twice as long as the heel. Frequently the toe becomes entirely too long. This results in throwing too much pressure upon the heel, which in consequence is worn too thin and becomes sore. The animal will now make an effort to throw the weight upon the toe to relieve the heel; the toe becomes broken or worn very short and the heel grown out longer than it normally should so that our animal now becomes 'bear footed.'

Both of these conditions are defective and are likely to injure the horse. When the toe is too long and the heel becomes very thin and low the axis of the fetlock is broken backwards, which produces a strain upon the tendons and ligaments of that region. Injury is also done to the bones of the foot. Moreover, the animal is defective in his gait since the great length of the toe interferes with the proper lifting of the foot from the ground. Similarly in the bear foot form the axis of the foot is broken forwards and the weight of the horse does not fall upon the center of the foot; the tendons are strained and his gait is defective.

Another serious danger is the likelihood of the roof breaking and cracking. If we allow it to grow too long it becomes thin and in rapid work this long thin bone is almost certain to break. If only the surplus horn were broken off no alarm arises but frequently so much is broken off that it renders the horse lame. In the same way cracks often arise; these weaken the hoof and if they do not receive attention, develop to serious proportions.

Many horses which wear shoes for the winter months are allowed to run barefoot with the return of spring. At this point care must be taken. After removing the shoe the foot must be carefully trimmed. With an ordinary hoof knife the entire ground surface of the hoof may be trimmed moderately. The sharp outer edge of the wall must then be well rounded off with a rasp, removing it at the toe, generally as far as the white line which appears on the sole. Unless this precaution is taken before the horse has travelled any considerable distance large pieces of the wall will be broken away. The frog should be trimmed down until nearly, though not quite level with the wall. This allows an even distribution of pressure upon the frog, sole and wall.—"Nor' West Farmer."

SCHENECTADY, N. Y. ROUTE No. 1.
May 10, 1905

W. F. Young, P. D. F. Springfield Mass.
Dear Sir:—I take great pleasure in recommending to all horse owners, trainers and caretakers your many treatments, and especially Absorbine. I have used Absorbine many times and to such good results that words cannot express my appreciation of Absorbine.

At about time on Abraham Farms, Madison, N. J., I used Absorbine on a swollen knee of such long standing that J. L. Hope, farm superintendent and A. Meehan, foreman, claimed was incurable, and with less than one bottle of Absorbine I cured the affected knee all sound and strong.

At the farm of O. N. Kellogg, Cortland, N. Y., I used Absorbine on a colt that had a big leg of long standing, a d one with bog spavin and cured both cases to great satisfaction; also in many other cases that at different times have come under my care and with such good results that I am happy to know that, if not on sale at a nearby drugist, within a few hours I can order and have it delivered by express from Springfield, Mass., the home of the great reliever of suffering from the great and worthy animal, the horse. Yours very truly, JAS. A. MYERS, Trainer.

Absorbine \$2 per bottle of your drugist, or I will send direct upon receipt of price. W. F. YOUNG, P. D. F. 54 Monmouth St., Springfield, Mass.

HUNDREDS OF DOLLARS SAVED.

Mr W. W. Bird of Leadmine, Wis., writes as follows: "Endorsed and one dollar for a bottle of Quinn's Ointment. Have none on hand and would not be without it as it is the best ointment to the market. Have used it about twelve years and have saved hundreds of dollars in horse flesh. It is so good for blemishes on cattle. I can't say anything too good in regard to Quinn's Ointment. This is the general expression of all who have used Quinn's Ointment. For curbs, splints, sprains, windpuffs and all blemishes try this wonderful remedy. Price one dollar per bottle, delivered. Address W. R. F. DY & CO. Whitehall, N. Y. If you cannot obtain from drugist."

CURED A COUGH OF TWO YEARS STANDING.

MONTAGUE, Mich., Jan. 14, 1904.

Wells Medicine Co., Lafayette, Ind.
Gentlemen:—I received the bottle of Distemper and Cough Cure some time ago. I must say it does all you claim for it. I have a horse that has been coughing for at least two years, and tried everything I could read or hear of but could not get anything that did any good until I tried your cure. One-half of a 50c bottle helped him, and now he seems to be perfectly well. Yours truly, GEO. A. SUMMERS.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Sept. 15—Closed season for lobsters and crawfish.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Oct. 11, 14—Spokane Kennel Club. Spokane, Wash. A. B. Jackson, Secretary.
Oct. 17, 20—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.
Oct. 26, 28—Lawrence Kennel Club. Newcastle, Pa. W. L. McConnell, Secretary. Entries close Oct. 16.
Nov. 15, 16—New England Beagle Club's specialty show. Grafton Mass. A. D. Flake, Secretary.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 21, 23—Brockton District Kennel Club. Brockton, Mass. J. W. Sullivan, Secretary.
Nov. 30-Dec. 2—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.

1906.

Jan. 17, 20—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 13, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. N. J. Mathews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.

Field Trials.

Oct. 13—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundy, Secretary, Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill. entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 30—National Beagle Club of America: 16th annual trials. Stevenson, Md. Chas. R. Stevenson, Secretary.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Huntsville Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Rothm, Secretary, Dayton, O.
Nov. 13—New England Beagle Club. 12th annual trials. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov. —Indiana Field Trial Club, (Week following Illinois Champion Stake) C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary, Richmond, Va.
Dec. —Pointer Club of America (following the Continental trials). Harber, N. C. C. F. Lewis, Secretary, 126 Maiden Lane, New York.
Dec. 2—Continental Field Trial Club, 11th annual trials. John White, Secretary, Hempstead, Long Island.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan. —Pacific Coast Field Trials Club, 23d annual trials Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

DOINGS IN DOGDOM.

The Spokane Kennel Club show is on this week—October 11th to 14th—closing today.

The Deseret Agricultural Society above referred to, held a show at Salt Lake City, October 4th to 7th.

In a report of the American Fox Terrier Club it appears that Wandee Doris is nominated the champion for 1906. The Meersbrooke Bristles Cup is still an open question and will be put up again at Philadelphia.

The kennel club seed has evidently sprouted strongly on the Coast, and the most recent rootlet is, so it is reported, a club for Berkeley and a show, following organization, in the near future. There are enthusiastic influences in the college city to foster a strong club, for if Mr. and Mrs. J. P. Norman, Mr. and Mrs. C. R. Thorburn, and others we could mention, devote their attention to promoting a successful kennel club across the bay, it is a foregone conclusion that there will be something doing in dogdom that may set the pace for other clubs.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

A. K. C. QUARTERLY MEETING.

At the regular quarterly meeting of the American Kennel Club, held in New York, September 21st, 1905. Coast kennel organizations, among others, were represented as follows: S. C. Mastick for the Oakland Kennel Club.

Among the delegates elected to represent Coast clubs were: Clifford Drake, Stockton Kennel Club; Arthur Letts, Southwestern Kennel Club; Chas. K. Harley, Pacific Sheep Dog Club; Richard Croker Jr., Colorado Kennel Club.

Credentials were filed by the Spokane Kennel Club nominating Alexander H. Rutherford as a delegate, but were not approved for the reason that Mr. Rutherford was neither an active or honorary member of the club.

The secretary reported that subsequent to the previous quarterly meeting there had been added to the roll of active membership nine kennel clubs—five of these through the Pacific Advisory Committee, viz: Santa Cruz County Kennel Club, Pacific Sheep Dog Club, Stockton Kennel Club, Santa Clara County Kennel Club, and the Deseret Agricultural and Manufacturing Society, of Salt Lake, Utah.

With these additions the roll of active members numbers ninety-nine clubs, all in good standing, and is the high water mark since the organization of the Association. Three applications for membership are now pending, and twenty-one clubs have filed credentials, both of which will be duly reported by the Membership Committee.

Among other business transacted was the disqualification of J. McGuinness of Everett, Mass., suspended by the Lynn Kennel Club for removing his dog from the club show without authority.

Pacific Advisory Committee.—The following minutes of three meetings of the Pacific Advisory Committee, June 21, August 2 and September 6, were ordered incorporated in the minutes of the meeting of the A. K. C.:

San Francisco, June 21, 1905.

Present: De Ruyter (chairman), Carlton, Burnham and Norman. Absent: Harley.

On motion, the minutes of the previous regular meeting were accepted as published in the Gazette.

The minutes of the special meeting of May 10 were read and approved.

The Pacific Sheepdog Club having been elected by mail vote, the election was confirmed.

In re Ollard versus Portland Kennel Club: This is a claim for prize money offered to the handler bringing the largest number of dogs from Washington.

On motion, the secretary was instructed to refer the matter back to the appellant, with direction to file sworn affidavit, accompanied by the usual deposit of ten dollars and a copy of the premium list of the Portland Kennel Club showing that the association made the alleged offer of the sum involved.

The following letter from C. K. Harley was read by the secretary: "San Francisco, June 13, 1905. Mr. J. P. Norman, secretary, Pacific Advisory Committee. Dear Sir—Owing to the fact that for the next two years my residence is to be in the city of New York, I hereby tender my resignation as member of the Pacific Advisory Committee of the American Kennel Club, to take effect at once. Very truly yours, (Signed). Charles K. Harley."

It was moved and seconded, that this committee regrets in the extreme that circumstances have compelled Mr. Harley to tender his resignation, and that in view of same, this committee accepts the resignation with equal regret. Carried unanimously.

On motion, it was resolved to take up the matter of filling the vacancy on the committee.

The chair suggested that it would have the tendency to make this committee more representative of the clubs of the Coast and would bring it more in touch with them if this committee would give them the choice of selecting from a number of fanciers, personae gratiae to the committee, the one who would be most acceptable to the majority of the clubs. The candidate receiving the largest number of votes from the clubs would be the one nominated to the A. K. C. for appointment. As the result of considerable deliberation, he would ask that the names of Frederick P. Butler, Walter W. Stettheimer and Norman J. Stewart be placed in nomination for submittal to the clubs, if such course were adopted by the meeting.

It was moved, seconded and carried, that the suggestions of the chair be adopted, and the secretary be instructed to submit to the clubs the list of candidates as might be approved by the meeting.

The names of W. W. Stettheimer, Frederick P. Butler and Norman J. Stewart were then placed in nomination.

It was moved and seconded, that nominations be closed. Carried.

It was moved and seconded that the three names mentioned be submitted to the clubs for a choice. Carried.

A petition was then read from the Southwestern Kennel Club, asking that John Riplinger and others, disqualified by reason of having held a bench show at Seattle during the month of April, in contravention of the rules of the American Kennel Club, be reinstated to good standing. On motion, the consideration

of the petition was postponed to the next meeting.

There being no further business, the meeting adjourned.

Attest: J. P. NORMAN, Secretary.

San Francisco, August 2, 1905.

Present: De Ruyter (chairman), Carlton, Burnham and Norman.

The minutes of the previous meeting were read and approved.

On motion the election by mail vote of the Stockton Kennel Club, the Santa Cruz County Kennel Club and the Santa Clara County Kennel Club was confirmed.

In pursuance of the resolution passed on June 21, the secretary having requested the clubs in the jurisdiction of the committee to express their preference for one of the three gentlemen Messrs. Frederick P. Butler, Norman J. Stewart or Walter W. Stettheimer to fill the vacancy caused by the resignation of Mr. Charles K. Harley, the following replies were received:

For Frederick P. Butler: Seattle Dog Fanciers' Association, Oakland Kennel Club, San Francisco Kennel Club.

For Walter W. Stettheimer: San Mateo Kennel Club, Pacific Sheep Dog Club, Portland Kennel Club, Spokane Kennel Club, Stockton Kennel Club, Southwestern Kennel Club, Santa Cruz County Kennel Club (Mr. Stewart having withdrawn his name), Santa Clara County Kennel Club (Mr. Stewart having withdrawn his name).

There being eight votes for Mr. Stettheimer against three for Mr. Butler, it was

Moved and seconded that this committee do hereby recommend to the American Kennel Club that Mr. Walter W. Stettheimer be appointed to fill the vacancy caused by the resignation of Mr. C. K. Harley. Carried.

Tucker vs. Seattle Dog Fanciers' Association:

This is a complaint from Dr. E. F. Tucker, of Portland, dated July 24, alleging that he had deposited with the S. D. F. A. the sum of five dollars to cover a protest and that no action had been taken thereon, and that he could elicit no reply from that association. It was moved and seconded that the secretary be instructed to call on the Seattle Dog Fanciers' Association for an immediate action on Dr. Tucker's protest, or for a satisfactory reason for failing to take action thereon, the reply to be furnished within ten days from the date of the secretary's letter, failing to receive which this committee would take the necessary disciplinary steps. Carried.

Chute vs. Morris:

Under date of July 25, W. E. Chute produces a communication published in a local paper (Breeder and Sportsman, July 1, 1905.—Ed.), signed by William J. Morris, and dated Los Angeles, June 22, in which said Morris accuses complainant of endeavoring to prevent Morris's dog from competing for a special prize offered at the San Francisco Dog Show for the best Pointer owned on the Pacific Coast. The complainant denies the allegation, and petitions the committee to cause the defendant to corroborate his accusations and to substantiate them or to suffer the usual penalty for conduct prejudicial to dogs and dog shows. It was

Moved and seconded that the secretary be instructed to call on the said William J. Morris to furnish proof of his accusations within ten days from date of advice, failing to receive which this committee would resort to the usual disciplinary measures. Carried.

In the matter of the petition of the Southwestern Kennel Club for reinstatement of certain individuals, disqualified for participation in a show held in Seattle in contravention of certain rules passed by this committee. It was

Moved and seconded, that no communication having been received from the disqualified parties seeking reinstatement to good standing, this committee regrets its inability to comply with the request of the Southwestern Kennel Club. Carried.

The rules being suspended, on motion, by unanimous vote, it was moved and seconded that the by-laws of this committee be amended as follows:

That this committee hold a regular meeting on the first Wednesday of each month, the meeting place to be the office of the chairman, unless otherwise stated by notice from the secretary. Carried.

There being no further business, the meeting adjourned.

Attest: J. P. NORMAN, Secretary.

San Francisco, September 6, 1905.

Present: De Ruyter (chairman), Burnham, Stettheimer and Norman. Absent: Carlton.

Minutes of the previous meeting read and approved.

The secretary read the following communication: New York, August 15, 1905. Mr. J. P. Norman, secretary, Pacific Advisory Committee, Berkeley, Cal. Dear Sir—I have the honor to advise you that Mr. Walter W. Stettheimer has this day been duly appointed a member of your committee, to fill the vacancy caused by the resignation of Mr. C. K. Harley. The appointment is made by August Belmont, Esq., president A. K. C., by virtue of the authority given him in the constitution. I have notified Mr. Stettheimer of his appointment. Yours truly, American Kennel Club, by A. P. Vredenburg, Secretary.

Application from the Deseret Agricultural and Manufacturing Society of Salt Lake City, Utah, for membership in the A. K. C. was read. On the statement by the secretary that the society had filed an attested copy of a resolution adopted on August 7, by the Board of Directors, embodying in the constitution a clause for the holding of dog shows, and had otherwise complied with the requirements of the American Kennel Club, it was moved and seconded that the aforesaid society be and hereby is elected to membership in the A. K. C. Carried.

In the case of Chute vs. Morris: Complaint of false charges of misconduct.

The defendant, by his attorney, W. A. Alderson, seeks a further extension of thirty days, in which to file proof of the allegations. On motion, it was resolved, that such extension be granted.

Tucker vs. Seattle Dog Fanciers' Association. A protest:

It appears from the complaint that this was an appeal filed with the Bench Show Committee after the expiration of the seven days allowed for such appeal, and the protest was overruled on that ground by the executive board of the defendant club; the complainant alleged that at the dog show of the S. D. F. A., held in April, 1905, the special prize, a silver cup, offered for the best American-bred Airedale Terrier, was awarded to Colne Sandy, owned by W. F. Delabatre, of Port Los Angeles, registered in the A. K. C. S. B., No. 78510, as being bred by Joseph H. Lauris, of Montreal, Can. Reserve was awarded to Dr. George Newlands' Colne Lochiel, A. K. C. S. B., 81106, bred by the same breeder. The defendant club having refused to consider the protest, it was resolved on motion that it be instructed to return the deposit of \$5 to the plaintiff pending the decision of this committee, the said deposit to be transmitted through this committee, and it was further resolved that the secretary be and hereby is instructed to take steps for the procurement of further information in the case.

In the case of G. C. Israel: A petition for the removal of disqualification.

The petitioner sets forth under date of August 8 at Olympia, Wash., that he was disqualified with many others for having exhibited at the dog show held in April, 1905, by the Seattle Kennel Club, in contravention of the rules of the American Kennel Club as enunciated by the Pacific Advisory Committee, that he exhibited under a misapprehension and in ignorance of said rules, and that he is and always was loyal to the American Kennel Club, and for those reasons prays for reinstatement to good standing on filing with the secretary of this committee an undertaking that he will not in future exhibit at any dog show that is not held under the rules and with the sanction of the American Kennel Club.

Burnham vs. Lepman: A charge of fraud and misconduct.

This charge, brought by Dr. W. P. Burnham, of San Francisco, against Horace G. Lepman, of Chicago, that the plaintiff sent the defendant \$135 in payment of a Collie bitch, that the defendant received the money, of which proof is furnished, and that defendant has not to date delivered the bitch or returned the money, nor has he made any other acknowledgment or return. The secretary stated that he had sent defendant an attested copy of the charge, and had allowed him the customary time in which to make answer. On motion the case was laid upon the table, awaiting defendant's answer or presentation at the next regular meeting.

Butler vs. C. W. Buttes, of Kansas City: A charge of fraudulent misrepresentation.

This is a charge brought by Fred. P. Butler, of San Francisco, that defendant advertised a Setter dog for sale, nine months old, high class and well made, and that plaintiff bought the dog on those representations. On arrival the dog was found to be an exceedingly poor specimen, of which fact plaintiff adduces corroborative testimony, and accuses defendant of fraud and misrepresentation. The secretary stated that he had sent defendant an attested copy of the charge, and had allowed him the usual time in which to make answer. On motion, consideration of the case was postponed until the next regular meeting.

There being no further business, the meeting adjourned.

Attest. J. P. NORMAN, Secretary.

The A. K. C., at the above mentioned meeting, considered an important question when the status of judges—amateur and professional, was discussed from top to bottom. Lack of space this week necessitates giving that portion of the published proceedings of the meeting in our next issue.

At a meeting of the Advisory Committee held last week, we are informed, that in the Buttes case, the defendant was disqualified. So far as the penalty goes, it is a move in the right direction, for the repression of the growing practice of unscrupulous dealers in taking undue advantage of purchasers at a distance. We had an opportunity of viewing the dog shortly after Mr. Butler came into possession of it. The description of the animal that induced the purchase was so much at variance with the appearance of the animal when we saw it, that we believe, had purchaser and seller a residence in the same district, that a criminal charge for obtaining money under false pretences would be in order.

The Lepman case is similar in principle. As will be apparent here is another illustration of where the distant purchaser could be at the caprice, or dishonest indifference, of a dealer. In this matter the Board were apprised, by telegram, that letters covering, or explaining the case, were on the way. However, nothing documentary had materialized and the matter was laid over until the next meeting.

In the Chute vs. Morris episode, Mr. Morris was given further time in which to procure certain affidavits necessary to substantiate the statements in his published letter.

Charges were brought against E. F. Harris of Stockton at the last meeting of the P. A. Committee, for alleged utterances derogatory to the Stockton Kennel Club and its officers. On sifting the matter Mr. Harris was exonerated and what at one time promised to become a disagreeable mess was relegated to the waste basket. Mr. Harris' remarks and criticisms were apparently distorted, his explanation of the matter upset hearsay evidence, and the incident, happily, is now closed.

STOCKTON SHOW.

The Stockton Kennel Club is to be congratulated on the success—in every respect—of the initial show, a three pointer at that.

The attendance was good every day, the closing night being practically a swell society function.

Generally speaking everything passed off in smooth and satisfactory fashion. A little friction arose; where has there been a Coast show when the makings of a riot did not germinate? The easus belli was, however, not material in itself, but apparently magnified by irresponsible repetition. Common sense and good fellowship finally prevailed and the incident was buried.

Awards.

St. Bernards (rough coated)—Puppy dogs and bitches—1 Fargo, Miss A. Tone; 2 Prince L., Chas. Lyons. Novice dogs—1 Prince Lion, J. F. Matthews; 2 Major, M. Carroll; 3 Linda Vista Eboracum, J. M. Taft. Limit dogs—1 Major. Open dogs—Absent, Le King, W. Wallace. Winners dogs—1 Prince Lion; res Fargo. Limit bitches—1 Cuba II, M. Coleman. Open bitches—1 Golden Fairy, A. L. Hamilton. Winners bitches—1 Golden Fairy, res Cuba II.

Great Danes—Novice dogs—1 Bismark, Harry Masters; 2 Wren, Wm. Hildreth. Limit dogs—1 Nig, Frank A. Schmitz; 2 Bismark. Open dogs—1 Prince F., Frank A. Schmitz. Winners dogs—1 Prince F., res Nig.

Newfoundlands—Open dogs and bitches—1 Kerk, Geo. E. Catts; 2 Teddy, Wm. Hildreth.

Greyhounds—Puppy dogs—1 Bill Rainey, Dr. F. P. Clark; 2 Royal Butter, Miss Mamie E. Quinn; 3 Tick Cup, Miss Mamie E. Quinn. Novice dogs—1 Mr. Longers, Dr. F. P. Clark. Open dogs—1 Mr. Zignego, Dr. F. P. Clark. Winners dogs—1 Mr. Longers; res Mr. Zignego. Novice bitches—1 The Widow, Dr. F. P. Clark. Open bitches—1 Sweet Virginia, Dr. F. P. Clark. Winners bitches—1 The Widow; res Sweet Virginia.

Pointers—Puppy dogs and bitches—1 Scott's Joe, Chas. Heffernan; 2 Bingo, J. Dunn; 3 Nesbitt's King, J. A. Nesbitt; v h c Monte, Minot Terrell; c Duke, Henry L. Sellman. Limit dogs—1 Scott's Joe; 2 Bingo; 3 Tip, W. D. Grubb; absent, Dewey, J. Frank Brown. Open dogs (over 55 pounds)—1 Scott's Joe; 2 Bingo. Winners dogs—1 Scott's Joe; res Bingo. Novice bitches—1 Spot F., W. Flemen; 2 Brownie, John H. Miller; 3 Fernett, J. C. Joyce. Limit bitches—1 Stockton Belle, W. T. Keyes; 2 Spot F.; 3 Rowena, Fred Grimsley; v h c, Fernett; absent, Brownie. Open bitches (under 50 pounds)—1 Sensation Girl, Elmer F. Pope. Open bitches (over 50 pounds)—1 Brownie. Winners bitches—1 Stockton Belle; res Brownie.

English Setters—Puppy dogs—Absent, Boots, E. J. Townsend; Cato Sir Easton, W. H. M. Pratt; Cato Major, Theo. Moiles. Novice dogs—1 Major, C. J. Haas; 2 Ben Less, I. Less; 3 Sport F., Henry Feilt. Limit dogs—1 Major. Open dogs—1 Major; absent, Ch. Cato Jr., Cato's Judge, J. M. Golobock. Winners dogs—1 Major; res Ben Less. Novice bitches—1 Bessie, J. W. Matthews; 2 Luella L., Thos. Larkin; 3 Santa, Mrs. Lewis Moreing; v h c, Cecille, J. W. Matthews; v h c Gyp, I. Less. Limit bitches—1 Queen, Gus Baraco; 2 Lady Grace, Gus Baraco. Open bitches—1 Ch. Laura L., C. C. Lee; 2 Queen; 3 Santa; v h c, Lady Grace. Winners bitches—1 Ch. Laura L.; res Bessie.

Irish Setters—Novice dogs and bitches—1 Jerry, R. H. Groves; 2 Lassie Jean, C. F. Rice. Limit dogs and bitches—1 Jerry; 2 Lady Lucy, P. J. O'Niggins. Open dogs—1 Jerry. Winners dogs and bitches—1 Jerry; res Lady Lucy.

Gordon Setters—Puppy dogs and bitches—1 Deacon Turner, Dr. F. P. Clark; 2 Flora B., A. Holling; 3 Doc, A. Stuart. Winners dogs and bitches—1 Deacon Turner; res Flora B.

Irish Water Spaniels—Puppy dogs and bitches—1 Dublin, Wm. Bay. Novice dogs and bitches—1 Elsie L., W. H. Lyons. Open dogs and bitches—1 Ch. Mike B., Wm. Bay; 2 Elsie L. Winners dogs and bitches—1 Ch. Mike B.; res Dublin.

Field Spaniels—Open dogs and bitches—1 Teddy Silk, C. Leonard; 2 Judge Casey, J. R. Stuart; 3 Rastus, Mrs. J. W. Matthews; absent, Duke L. E. Tschierschky.

Cocker Spaniels (black)—Puppy dogs—1 Rocco, S. B. Huskins. Novice dogs—1 Mr. Longers, W. Parrish; 2 Rocco; 3 Judge E., Annie M. Harris; res Jett, R. Lawson, Jr. Limit dogs—1 Buzz Silk, C. Leonard; 2 Mr. Longers; 3 Judge E., res Jett; absent, Glenwood Havoc, Phil C. Meyers. Open dogs—1 Sir David, David P. Cresswell; 2 Buzz Silk; 3 Mr. Longers; res Portland Dude, Chas. Heffernan. Winners dogs—1 Sir David; res Buzz Silk. Novice bitches—1 Toots W., A. R. Williams; 2 Trilby II, Morris Walte; 3 Doty Mack, Ed Mack; v h c, Lady Daner, E. C. Rothenbush. Limit bitches—1 Trilby II; 2 Dolly Mack; 3 Trilix, J. C. Harman. Open bitches—1 Plumeria Sally, A. L. Cresswell; 2 Trilby H. Winners bitches—1 Plumeria Sally; res Toots W.

Cocker Spaniels (other than black)—Puppy dogs—1 Prince, Mrs. E. L. Casteau. Novice dogs—1 Tod, Chas. E. Owen; 2 Prince. Limit dogs (parti-colors)—Absent, Gypsey Chief, A. Wolfen. Open dogs—1 Ch. Redlight, A. Wolfen. Winners dogs—1 Ch. Redlight; res Tod. Novice bitches—1 Lady Bush, F. C. Rothenbush; 2 Daisy, Mrs. E. L. Casteau. Limit bitches (parti-colors)—1 Meggies, C. Leonard; 2 Daisy. Open bitches—1 Meggies. Winners bitches—1 Meggies; res Lady Bush.

Collies—Puppy dogs—1 Haroun Al Raschid, Miss B. M. Hartmann. Novice dogs—1 Prince Suzell, B. F. Wellington; absent, Tallac Kittle, W. W. Stettelheimer. Limit dogs—1 Valverdi Perfecto, Wm. Ellery; 2 Prince Suzell; absent, Ellwyn Chriss, O. J. Albee; Tallac Kittle. Open dogs—1 Prince Suzell; absent, Ellwyn Chriss; Chief, R. Williams. Open dogs (American bred)—1 Valverdi Perfecto. Winners dogs—1 Valverdi Perfecto; res Haroun Al Raschid. Novice bitches—1 Metzie of Nestledown, Mrs. W. L. Irven;

2 Anona, Chas. Osborne. Limit and open bitches—1 Southport Sphinx, Wm. Ellery; 2 Metzie of Nestledown; 3 Anona. Winners bitches—1 Southport Sphinx; res Metzie of Nestledown.

Poodles—Open dogs and bitches—1 The White Lady, M. Friedberger.

Dalmatians—Open dogs and bitches—1 Glenwood Adonis, Phil C. Meyer; 2 Dr. Coach Taggart, Dr. H. W. Taggart; 3 Spot, W. H. Strohmier. Winners—1 Glenwood Adonis; res Dr. Coach Taggart.

Bulldogs—Open and winners dogs—1 Endcliffe Baron, Mrs. Phil C. Meyer; absent, Ch. Ivel Damon, Mrs. Chas. K. Harley. Limit open and winners bitches—1 Girtford Goody, Fred J. Rodgers.

French Bulldogs—Limit dogs—Absent Sport, J. J. Driscoll. Open and winners bitches—1 Margot de Pantin, Clifford G. Cook.

Bull Terriers—Puppy dogs—1 Walnwright, J. W. Bird. Novice dogs—1 Edgecote Al, Dr. A. J. Welsh; 2 Walnwright; 3 Rough and Tumble, F. J. Maiden. Limit dogs—1 Rough and Tumble; 2 Jerry Bradley, F. A. Gleesa. Open dogs (under 30 pounds)—1 Walnwright. Open dogs (over 30 pounds)—1 Rough and Tumble; 2 Jerry Bradley. Winners dogs—1 Edgecote Al; res Walnwright. Puppy bitches—1 Chip, Harry Bird. Novice bitches—1 Flora M., W. H. McKay; 2 Lady Askern, W. Poplewell; 3 White Rose, Mrs. T. S. Brown; v h c Chip. Limit bitches—1 Meg Merrilies II, Mrs. Chas. Reed Thorburn; 2 Lady Askern. Open bitches (over 30 pounds)—1 Meg Merrilies II; 2 Flora M.; 3 Lady Askern; res White Rose. Winners bitches—1 Meg Merrilies II; res Flora M.

Boston Terriers—Puppy dogs—Absent Glenwood Snowflake, Phil C. Meyer. Novice dogs—1 Tip J., F. E. Lane; 2 Teddy B., A. M. Barrett, Jr.; absent, Glenwood Manley, Glenwood Crusader, Phil C. Meyer. Limit dogs—1 Endcliffe Nobby; 2 Teddy B. Winners dogs—1 Endcliffe Nobby; res Tip J. Limit bitches—Absent, Glenwood Naney, Phil C. Meyer. Open and winners bitches—1 Endcliffe Toby.

Dachshunde—Novice and winners dogs—1 Fritz, Miss Crawford. Novice, limit and open dogs—Absent Fritz, A. Kaiser.

Fox Terriers (smooth coated)—Puppy dogs—1 Tallac Chapparral, Mrs. J. P. Norman. Novice dogs—1 Forest King, W. J. Foster. Limit dogs—1 Tallac Chuck, W. W. Stettelheimer. Open dogs—1 Tallac Marksman, W. W. Stettelheimer. Winners dogs—1 Tallac Marksman; res Tallac Chapparral. Puppy bitches—Absent Tallac Cookey, W. W. Stettelheimer. Novice bitches—1 Forest Queen, W. J. Foster; 2 Tallac Lakebreeze, W. W. Stettelheimer. Limit bitches—1 Dottie Dimple, W. J. Foster; 2 Tallac Chelita, W. W. Stettelheimer. Open bitches—Tallac Chicita; Absent Vina Belle, W. W. Moore. Open bitches (American bred)—1 Tallac Lakebreeze. Winners bitches—1 Forest Queen; res Dottie Dimple.

Fox Terriers (wire haired)—Puppy and novice dogs—Absent Tallac Hemlock, W. W. Stettelheimer. Limit dogs—1 Tallac Pirate, W. W. Stettelheimer. Open and winners dogs—1 Humberstone Mearns, I. C. Ackerman; 2 Tallac Pirate. Puppy and novice bitches—Absent Tallac Emerald, W. W. Stettelheimer. Limit bitches—1 Tallac Zarina, W. W. Stettelheimer. Open bitches—1 Humberstone Worry, I. C. Ackerman. Open bitches (American bred)—1 Tallac Oanna, W. W. Stettelheimer. Winners bitches—1 Tallac Oanna; res Humberstone Worry.

Welsh Terriers—Limit dogs and bitches—Absent Selwonk Vagrant, Glenwood Gladys, Phil C. Meyer.

Yorkshire Terriers—Puppy, novice and winners dogs and bitches—1 Peggy, Mrs. F. S. Palmer.

Japanese Spaniels—Puppy dogs and bitches—1 Japan; 2 Russia, Edw. Lavin. Limit dogs and bitches—1, 2, 3, res Dody, Boobie, Girlie, McFadden, Edw. Lavin. Winners—1 Dody; res Boobie.

Skye Terriers—Open dogs—Absent Glenwood Waddles, Phil C. Meyer.

Pomeranians—Novice and limit dogs and bitches—1 Snowball, Miss Irene Breindenbaek; 2 Beauty M., P. De Marth; 3 Beauty, Mrs. A. Bonzi. Winners—1 Snowball; res Beauty M.

Italian Greyhounds—Limit dogs and bitches—1 Dude, S. A. Cummings. Open dogs and bitches—1 Ch. Duke II, S. A. Cummings. Winners—1 Duke II; res Dude.

Miscellaneous Classes—Open dogs and bitches—1 Curley (Retriever), W. R. Barber; 2 Spot (American Foxhound), Mrs. C. W. Logan.

Local Classes.

St. Bernards—1 Fargo.

Greyhounds—Puppy dogs—1 Bill Rainey; 2 Royal Butter; 3 Tick Cup. Puppy bitches—1 Lady Dunsmore. Novice dogs—1 Mr. Longers; 2 Damian, A. J. Madden; 3 Royal Butter; res Tick Cup. Novice bitches—1 The Widow; 2 Maid Marion, Mr. Wilhoit; 3 Pandora, A. Avey. Open dogs—1 Mr. Zignego; 2 Domain. Open bitches—1 Sweet Virginia; 2 Maid Marion; 3 Pandora.

Pointers—Novice and open class—1 Prince A; 2 Dan, Judge McNoble.

English Setters—Novice and open class—1 Major.

Gordon Setters—Open class—1 Deacon Turner.

Collies—Open class—1 Prince Zuzell.

Field Spaniels—Novice and open classes—1 Teddy Silk.

Bull Terriers—Novice class—1 Flora M; 2 Jerry Bradley; 3 White Rose. Open class—1 Jerry Bradley. Miscellaneous, under 15 pounds—1 Nell (Spitz), J. C. Billetter. Over 15 pounds—1 Blue (Great Dane), Mrs. H. Masters.

Cocker Spaniels—Novice class—1 Toots W. Open class—1 Teddy Silk; 2 Meggies.

Special Awards.

Best dog or bitch shown, best terrier, best owned by a lady, best Bull Terrier, Mrs. Chas. R. Thorburn's Meg Merrilies II.

Largest individual showing of one breed, W. W. Stettelheimer, Fox Terriers.

Best sporting dog, best English Setter, C. C. Lee's Ch. Laura L.

Best four of any breed, Phil C. Meyer; Boston Terriers.
 Best St. Bernard, A. L. Hamilton's Golden Fairy.
 Best Greyhound, best owned in San Joaquin county, best owned by member of Stockton Kennel Club, Dr. F. P. Clark's Mr. Longers.
 Best Greyhound puppy, Dr. Clark's Bill Rainey.
 Best Pointer dog, best novice Pointer dog, Chas. Hoffmann's Scott's Joe.
 Best Field Spaniel, C. Leonard's Teddy Silk.
 Best Cocker Spaniel, D. P. Cresswell's Sir David.
 Best Cocker Spaniel bitch, A. L. Cresswell's Plum-aria Sally.
 Best Collie, Wm. Ellery's Southport Sphinx. Best Collie dog, Wm. Ellery's Valverdi Perfecto.
 Best Gordon Setter, Dr. F. P. Clark's Deacon Turner.
 Best Bulldog, Mrs. Phil C. Meyer's Endcliffe Baron.
 Best Bulldog bitch, Fred J. Rodger's Girtford Goody.
 Best Boston Terrier, Phil C. Meyer's Endcliffe Nobby.
 Best Irish Water Spaniel, Wm. Bay's Ch Milke B.
 Best Yorkshire Terrier, Mrs. F. S. Palmer's Peggy.
 Best Fox Terrier dog (wire haired), I. C. Ackerman's Humberstone Mearns.
 Best Fox Terrier (smooth coated) dog, W. W. Stett-heimer's Tallac Marksman.
 Best Fox Terrier (wire haired) bitch, W. W. Stett-heimer's Tallac Oanna.
 Best Fox Terrier (smooth coated) bitch, W. J. Foster's Dottie Dimple.
 Best English Setter owned in San Joaquin county, C. J. Haas' Major.
 Best Great Dane, Frank A. Schmitz' Prince F.
 Best bitch owned in San Joaquin county, Dr. F. P. Cresswell's The Widow.
 Best bitch owned in San Joaquin county by a lady, Mrs. J. H. English's English Setter Santa.

The officers of the Stockton Kennel Club are: F. N. Vail, president; Wm. H. Mackay, vice-president; J. H. Haas, secretary.
 The committee consists of: Dr. F. P. Cresswell, F. W. Warren, C. Leonard and W. H. Mackay. Dr. Cresswell is the veterinary and ring steward until the following year when he was recalled to this city by his family. On Saturday, Mr. Phil C. Meyer acted as ring steward and ring steward.

The efforts of all of the above named gentlemen were material in the initial success of the club's show.

The judges were: Mr. Fred P. Butler, of San Francisco; Mr. J. F. Mahoney, of San Francisco; Mr. D. G. Anderson, of San Francisco; Mr. Chas. Lynkin, late of Toronto, Canada, all other breeds.

A noticeable feature was the cordial support of the show by San Francisco fanciers who were generous in entries, many of them for exhibition only, a precedent that can be followed in the future to the mutual benefit of the circuit of show giving clubs.

The absentees from the judging ring were more than usually noted at shows, but there were good reasons for this. John M. Golobock was in hard luck with a string of setters from Crockett—the boat failed to land at that point, consequently the dogs were not judged. Being a thorough sportsman, he was present with the dogs the following day.

Dave Sinclair was the recipient of a pleasant testimonial on Friday evening just prior to his departure. He was "called to account and roasted" for running away. Then President F. N. Vail after a brief and appropriate address eulogistic of Dave's services to the club, presented him with a fine stein upon which was engraved, "To the best DOG Superintendent of the Stockton Bench Show." Dave was non-plussed with surprise and emotion—sentiments not usual with him, and replied in a fitting manner his pleasure in accepting the valued testimonial from sportsmen and good fellows.

Whilst Mr. Meyer's recognition was, perhaps, not as substantial, it was none the less sincere, for the club gave him an unanimous vote of thanks for his voluntary and appreciated services.

The regular entries were as follows: St. Bernards 11; Great Danes 5; Newfoundlands 2; Greyhounds 7; Pointers 22; English Setters 21; Irish Setters 3; Gordon Setters 4; Irish Water Spaniels 4; Field Spaniels 4; Cocker Spaniels 34; Collies 19; Poodles 1; Dalmatians 6; Bulldogs 4; French Bulldogs 2; Bull Terriers 23; Boston Terriers 10; Dachshunds 3; Fox Terriers (smooth) 30; Fox Terriers (wires) 6; Welsh Terriers 2; Yorkshires 2; Japanese Spaniels 4; Skye Terrier 1; Pomeranians 6; Italian Greyhounds 2; Miscellaneous 2 (Retriever and American Foxhound), a total of 242.

Local classes: St. Bernards 1; Greyhounds 13; Pointers 4; English Setters 2; Gordon Setters 1; Collies 1; Field Spaniels 2; Cocker Spaniels 5; Bull Terriers 5; Miscellaneous 2 (Spitz and a Great Dane), a total of 36.

Mr. Cranfield, who judged the Greyhounds at Stockton, has the unique distinction of having awarded the ribbons for the largest entry of Greyhounds ever made at any show in America—or possibly in the world—up to the present time.

At the San Francisco Kennel Club Show in 1902 there was a showing of over 150 Greyhounds. At one time it looked as if the leashmen would ignore the show—Dog Handler Bradshaw, it was rumored, would judge the breed. The coursing men would not show under an individual who had been ruled off the coursing turf. Mr. Cranfield was selected instead and showed that he knows the breed. His judging was satisfactory to everybody save the rejected judge, who vented his dissatisfaction in language unprintable.

Manager Phillips of the Crockett Kennels states that he has more orders for broken dogs than he can supply. He left for Arbuckle, Colusa county, this week, where he has some good quail country staked out in which he will work and give the finishing touches to a string of dogs. Since the Crockett Kennels were started, a short time ago, business has been excellent and the outlook is good. Mr. Phillips is a painstaking and reliable trainer and proposes to turn out dogs that come under his care, in A No. 1 condition. Mr. Golobock, his partner, is a well known sportsman, the owner of Ch. Cato Jr. and Cato's Judge. Both of these grand English Settlers are now in the stud.

Englewood Kennels have recently been arranged, by the addition of more kennel room, for the care of some promising young Collies and Bull Terriers.

Mr. Rogers, of Dundee, Mich., was on a visit to San Jose last week. Mr. Rogers, who is one of the oldest Collie fanciers in America, it is believed will locate in Denver, after his trip through this State.

AT THE TRAPS.

Welcome the coming and speed the parting fliers in the mind's eye of the shotgun fraternity, for with to-morrow's dawn there will be a change from inanimate to animate targets, and so, vale the trap season of 1905, which has been a good one, and in relation thereto, more anon.

The Los Angeles Gun Club two day tournament last week is reported by the southern scribes as follows:

Keen of eye and steady of hand, smashing his birds into impalpable dust with the consistency characteristic of the thoroughly trained trap shot that all local saucer-splinters know him to be, Fred Mills, of Santa Ana, Saturday qualified for high average in the opening round of the Los Angeles Gun Club's nineteenth semi-annual tournament over the Sherman grounds with the magnificent average of even 92 per cent.

Given a close race all day by "Doc" Bungay who secured a tie in the event has been the talk not only of local trigger highlights, but since the Interstate Association has been at Ingleside, of gunners the Coast over as well, there was a pretty tussle for average honors, and it went a long way to relieve the disappointment caused by the small turnout that has been entertained in any semi-annual feature for a long time. Lack of advertisement owing to the short time is responsible, and hereafter the club will see that its events are programmed a month ahead at least.

With two very promising contests in the two-man team cup and Tufts-Lyon medal to feature the usual fifteen bird sweepstakes, three squads of local and visiting triggers-yankers hied themselves to Sherman early Saturday morning. Of the party were E. C. Wilson, who came down from Bakersfield; Harry Hoyt, who packed up in a hurry and left San Francisco at an hour's notice, and G. M. Kanouse, late of Indianapolis, but hereafter hailing from Los Angeles; Fred Mills, Clyde Walker and a few other outside shooters represent the advance guard of a considerable country delegation which was expected the following morning.

Favored by a bright, but cool day, tempered with the balmy of ocean breezes, it was a pity that fifty instead of fifteen were not on hand to help out the fun.

Of average events, there were programmed 150 birds, and Fred Mills with 138 breaks, carried off high honors, Bungay being only two birds behind. On the whole day he beat Mills out, but the medals and practice events did not count.

High run went to Mills with a straight run of 61 consecutive breaks—the big Santa Ana rancher could not miss. No one else was within fifteen birds of doing as well, and it was doubtful if the run would be exceeded next day—and it was not.

Interest as usual centered about the trophy events, and general applause greeted Bob Bungay's victory in the Tufts-Lyon trophy when he snuffed out 23 and 24 for a total of 47, taking the jewelry from Guy Lovelace who had held it long enough. Charlie Julian of San Diego, who was in consistent form, proved a good second with 46.

Again Bungay ran in the money when with C. D. Hagerman he cleaned up the two-man cup race with 24 each for a total of 48. Julian was as ever hot on the trail; he came through with 24, but his partner, Fred Gilbert, missed two birds and totalled the team at 47.

On Sunday, R. H. Bungay went to the front again, for he succeeded in giving "the jostle" to Mills, who has, for many years, been considered the only real hot potato of the south with the shotgun. There was a question as to whether he would retain the championship or surrender it to Bungay, and Fred had two guesses. The guess was close, as it finally turned out, for Bungay won with one bird or one-third of 1 per cent.

Eighteen men faced the traps Sunday and tried their best to better the rather poor scores of 89 2-3 and 89 1-3, made by Bungay and Mills, respectively.

One of the features of the day was the five-man team contest. The race was won by Harry Hoyt, Charlie Julian, Clyde Walker, Fred Mills and L. Walker. The score was the best ever recorded for the trophy, 114 out of a possible 125 birds. Not one man of the five shot below 22 for his possible 25.

In the individual championship shoot at 50 targets, Fred Mills evened up matters by breaking 40 targets, beating Smith and Breer by 1 bird each.

The scores for both days follow:
 Saturday, October 7th, 1905, fifteen targets each:

INSTRUCTIVE SHORT COURSES.

The agricultural department of the University of California has made unusual preparation to render this year's short courses in various branches of agriculture attractive and helpful to many classes of producers. These short courses are open without examination to men and women of all ages, who desire to spend a few weeks in an earnest effort to gain some knowledge of agricultural science and improved practice—particular emphasis being laid, of course, upon the practical side. There is no charge for instruction, the pupil merely providing for his own traveling expenses and board while in Berkeley, except in the dairy course, in which a small fee is required to cover cost of material used. This year's short courses will have a new feature in the fact that they are conducted in co-operation with various state organizations of agriculturists who are represented in both the lecture work and discussions. The subjects in which instruction will be given are the following:

- (1) Fruit Growing, including injurious insects and plant diseases; October 18th to October 31st.
- (2) General Agriculture and the Animal Industry, including Dairying, October 25th to November 21st.
- (3) Irrigation and the Reclamation Service, October 25th to October 31st.
- (4) Nutrition of both men and domestic animals, including poultry, November 16th to November 21st.
- (5) Special work in Entomology, November 2nd to November 28th.
- (6) Special course in Viticulture, January 16th to February 14th.

The pupil is permitted to concentrate his work upon special lines or to select widely, if he desires to secure a general view of California agriculture. An illustrated pamphlet giving detailed information about these courses can be had by application to E. J. Wickson, Dean of the College of Agriculture, Berkeley, California.

THE ENGLISH FARMER.

When the American farmer is inclined to feel "gravely" over the conditions of his life, he will find some consolation in the thought that farmers in other countries are worse off than he is. In England, for instance, farmers are compelled to take out more licenses to conduct their business than any other class of business men. Some idea of the enormous tax on English farming can be had from the following letter written by an English farmer to his brother in Michigan. He says:

"First of all, in January, I had to write to the excise offices for a form of exemption to keep my old sheep dog. The form came back in about a fortnight. Then I had to fill it up and return it before I got the license to keep it free of duty. Then I had to visit the postoffice to get another license, which cost me \$1.85; it is to keep a spaniel, so that I could hunt the rabbits from the hedgerows.

"Then I had to pay \$2.50 for a gun license in order to shoot the rabbits, I have again to go to the postoffice to get a \$3.76 trap license. A couple of months ago I injured my leg, and I

could not climb up into my trap, so I purchased a light-weight four-wheel. A letter from the local officer of excise pointed out to me the fact that a license of \$5 had to be taken out.

"Cider running short, I had to provide something for my farm hands to drink, so I thought that I would obtain a couple of sacks of barley malt, the barley being grown in England, and brew a few gallons of ale. To do this I had to take out another license.

"I have a traction engine, with which I do my farm work, such as threshing, etc., and between whiles a bit of hauling. This necessitates my taking out the most expensive license of all, one for \$50. On the farm there are usually a few partridges and a stray pheasant or two, reared and fed at my expense. To shoot these I have to obtain a game license, which costs me \$15.

"Now, I sell a few gallons of milk, and to do this I have to get my premises registered by the local medical officer of health. This is practically another license. Flowing right through my farm is a splendid trout stream, yet before I can attempt to entice one of the spotted beauties from beneath its surface, I have to take out another license.

"If I send my sow to a neighbor I have to go to the policeman for a license for her, which he issues on condition that she does not remain away more than four days. You may smile, but it's an official fact. If I sell my neighbor a few pigs I have to obtain a license to remove them. If I send a lot of fat baconers to town to be killed, another visit to the policeman is necessary. If I decide to have them killed at home, I must have my farm building licensed as a slaughterhouse.

"If I have only to turn my pig across

BEST SHAPE FOR SILOS.

Round silos usually are preferred because they contain more per square foot of wall surface and silage settles evenly and is better preserved when there are no corners to hold air and mould. Silage in a round silo thirty-two feet deep, if finely cut and well settled, will weigh about 40 pounds per cubic foot. A feed for a cow is from 12 to 20 pounds once or twice a day according to the supply, so it is easy to figure the size of silo necessary for any number of cows. Horses should have only one feed a day of silage, and usually from six to ten pounds is sufficient although some horses will make good use of much more. Sheep do well on silage and are very fond of it, but it should be given them sparingly in one feed per day, preferably at noon time. Silage is also relished by hogs and chickens, so there is not much danger of getting too much silage on the farm.

Large silos, however, are not advisable; it is better to have two silos twelve feet in diameter than one silo twenty feet in diameter. A silo should be at least thirty feet deep in order to get the necessary pressure.

ALASKA DAIRYING.

C. V. Piper of the Alaska Experiment Station, in his report, in the annual report of the office of experiment stations, sets forth the possibilities of dairying in Alaska as follows:

Milk cows of various breeds have long been kept at most of the coast settlements, and the common testimony is that they do exceedingly well while feeding on the green grasses. Prof. Georgeson's tests have demonstrated

THE UDDER SIDE OF THE MILK QUESTION

the road to clover, again I have to visit that policeman. As all these licenses have been necessary for my business, and not one of them is for luxury, such as male servants or armorial bearings, I really think that the farmer can justly claim that his business is the most licensed in the kingdom."—Southern Tobaccoist.

If your blacksmith knows his business your horses will be properly shod, but do not lay the foot troubles of the horse to the door of the blacksmith, for the chances are you are at the bottom of the trouble because you will not keep the floor of the stables clean and thus avoid thrush.

There is no reason why there should not be a gutter behind the horses, such as are behind the cows, and thus avoid to some extent the possibility of the horse standing in his excrement. Then, keep close watch of the hoofs and see that they are cleansed daily. An excellent way to do this is to have a few blunt sticks of hickory, a stiff brush or two and one or more coarse sponges. Go at it in this way: With the sticks dig out substances and then cleanse with the stiff brush and finally wash with the sponge, using tepid water, in which a dozen drops of a teaspoonful of carbolic acid has been mixed. Try it, keep it up and avoid thrush.

Idaho has passed a law that all butter sold, or offered for sale within the State, shall have the name of the manufacturer and the place of manufacture stamped upon the label. The pack must also have the exact number of pounds stamped on the wrapper.

Some horses cannot do good work, because their collars do not fit; and because the harness is not adjusted properly.

that they kept up an excellent milk flow on bench grass silage, and doubtless the other grasses are quite as nutritious.

For two reasons I am impelled to believe that the utilization of the Alaska grass lands will yield most profit through dairying: (1) Because of the necessarily long feeding period—five to six months—during which only dairy cows yield a compensating return, and (2) the freight to distant markets on concentrated products like butter or cheese is not a serious factor.

There are many admirable sites for dairy colonies or settlements, not only on Kodiak Island, but also other islands and on the mainland. Dairying is to be one of the chief industries in the proposed Finnish Colony on the Kenai Peninsula. With such enormous wealth of grass as southwestern Alaska possesses it is difficult to doubt that it will become a great dairy country. It is doubtful, if equally good opportunities for colonies of dairy husbandmen can be found in the United States today. Certainly there is no place left where 320-acre homesteads of magnificent grass lands can be had for the taking.

Dry-picking is always to be preferred when preparing turkeys for market. When in fine condition, nicely picked, and sent to market without having been packed in ice, a turkey is at its best, and consequently commands the highest price. As soon as the fowl is stuck and the blood is still flowing, pluck the feathers dry from its body, taking care in doing this not to break the skin or tear the flesh. Nothing detracts so much from dressed poultry as torn places upon the carcass or shank; picking must be clean and nicely done. When the fowl is plucked hang it head down in a cool place until

all animal heat is gone from the body, being careful not to hang it where it will be exposed to cold air as to be likely to freeze. Do not remove the head, feet, or entrails, but have the whole carcass, including head and feet, perfectly clean.

The Wood Live Stock Company, which operates mainly at Spencer, Idaho, is aiming to keep a flock of 100,000 breeding ewes. All the increase is sold as four or six-months lambs, no ewe lambs being saved for future breeders. They sell off each year all the toothless ewes, all the non-breeders and do not even keep those that have failed to breed for one season. The breeding flock is kept up by the purchase of strong heavy fleeced ewes, preference being given to Oregon stock that shear ten to twelve pounds. The rams used are of the best mutton breeds, thus keeping up both sides of the business—the ewe flock producing wool enough to pay the expenses while the 80 to 90 per cent lamb crop makes the profits.

At the Iowa station it was found that turnips injure the flavor of both milk and butter. This injury is due to volatile acids which can be driven off by heating the milk to 160 degrees for a short time. Beets increased the milk and butter product and caused all the cows, even Jerseys, to lay on fat quite rapidly. When the roots were discontinued butter fat decreased and the cows ceased to gain weight, and it took more pounds of feed (calculated to dry matter) to produce a pound of butter. When turned on pasture there was immediate increase of milk, butter and live weight. Feeding bran during part of the grazing period produced sufficient gain to yield a small profit.

Send for Booklet,

"THE SURE WAY TO WEALTH."

A GAME GETTER doesn't allow rust on his gun—neither does "3-in-one." Heavy oils and greases cannot prevent rust because they simply coat the surface and dry out.

3 in One sinks into the pores of the metal, forming a delicate, imperceptible overcoat that prevents rust or tarnish on the barrel, in the bore, at any and every action point. Lubricates the magazine, triggers, etc. Our booklet tells—a sample proves—both free.

Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O

POOR FEED FOR HORSES.

Sometimes it seems as if poor or damaged food may be given fowls and pigs without injury if it is skillfully mixed with the better quality, although there is a risk in this sort of feeding. The horse, on the other hand, does not seem to be able to take his share of damaged feed and the feeding of it generally results in a bad stomach or bowel trouble. These organs of the horse are much more sensitive and delicate than is generally supposed and great care should therefore be used in feeding.

Poor hay is another bad thing for horses and it is also poor policy to attempt to carry a horse very far on hay, whether good or poor, and water, feeding small quantities of grain. Beyond all doubt oats are the best of any grain for horses, but it is quite as good policy to furnish variety to the horses as to the other stock on the farm, but making sure that the animal has one feed daily of first class oats, and that oats form one of the grains in one of the mixtures of the day. Let all of the food be first class, including the hay, and the horses will thrive on it and really eat less than of the poor food.

HORSE STEAKS IN GERMANY.

Consul-General Mason at Berlin, Germany, sends a report that horse steaks are a common article of food in Germany, and that horse meat consumption is on the increase. In southern Germany, and notably in Saxony, where the percentage of working people in factories is large, the consumption of horse flesh is an important item and is rapidly increasing.

About 3,800 horses were killed in Breslau alone last year, for human food. In Berlin, the choicest cuts of horse meat sell at eight and ten cents a pound. Meat from the poor quarters or meat from any part of poor, old or inferior horses brings three and four cents. The liver is considered a delicate morsel and brings 10 cents a pound.

The inferior pieces are ground into the strongly spiced and garlicky sausages that are the favorite food of many German servants and working people. These sausages must be plainly labeled "horse flesh." Outside the city this regulation isn't in force, so that large quantities of horse sausage are sold in the country districts or are exported to neighboring countries as ordinary pork sausage.

DAIRY QUALITY INHERENT.

The early Shorthorn and Teeswater cattle possessed much dairy excellence and when first brought to America Shorthorns earned the name of the milk breed. Among old records are those of cows giving six, eight, and even nine gallons of milk a day on grass alone. Although now latent in most lines, a dairy quality seems inherent in the breed which some careful managers are able successfully to develop and propagate. Records of several dairy herds in the United States within a quarter of a century show a milking season of about 275 days and an average product of 6,500 pounds of milk. One herd of ten cows, from three to twelve years old, gave 7,750 pounds each in a year. Single cows have averaged much more, several instances being known of 10,000 to 12,000 pounds in a season. The Shorthorn milk is of good quality, rather above the average. The fat globules are of medium and fairly uniform size so that cream separates easily. It is rather pale in color. In 1824 a cow near Philadelphia made over twenty pounds of butter in a week without special feeding. Herds of forty cows have averaged 209 pounds of butter a year. The herd of ten cows mentioned averaged 325 pounds, and single cows have records of 400 pounds and over, one being 513 pounds.

It is probable that the Shetland pony is the most popular pet among all the animals. A dog may do for some things for a boy; a cat or a bird may do for a girl; but more genuine pleasure may be had from a pony for both boys and girls, than from anything with which children can play, whether it be in city or country.

State and county fairs are among our best educators. No one can see the best without being stimulated to want his to be the same or better.

Horses on exhibition Saturday, November 11th. Send for Catalogue.

FRED H. CHASE & CO., 1732 Market St. (nr. Van Ness Av.), San Francisco

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking. W. B. Eddy & Co., Whitehall, N. Y.

Good Ones For Sale.

Four Black Mares by McKloney 2:11½

McKINNEY--SIDNEY FILLY FOR SALE.

A GOOD INDIVIDUAL—FOUR YEARS OLD next spring; dark bay in color; double gaited; very ambitious; broken to drive. Was driven to cart for three months in spring of 1905, but not worked to speed. The filly shows every inclination of coming fast when given a chance. The animal is sound and has a good disposition. To be sold for the reason that owner is not prepared to keep her.

Price, \$500.

Address Box L, this office.

MERIDIAN 2:12½ FOR SALE.

MERIDIAN 2:12½ IS A STANDARD-BRED dark brown Stallion, foaled 1892. Excellent disposition; perfect conformation; sure foal getter. His oldest colts are four years old and all his get have style, good action, good size and speed. He is by Simmocolon 2:13½ (sire of Dan Q 2:07½ and 12 in 2:30 list); dam Sidane 2:23½ by Sidney 2:19½; next dam Addie S by Steinway. Started seven times in races, won four first monies and was never outside of the money. He is sound, in good condition will be sold cheap. For further particulars address

R. S. BROWN, Petaluma.

FAST PACER FOR SALE.

COAL BLACK GELDING, SEVEN YEARS old, 16 hands high, weight 1050 lbs. Guaranteed sound and gentle. Sired by Knight, dam by Ned Gifford, son of Director. With two months' training has worked a mile in 2:21, quarter miles in 33 seconds. For terms apply to W. H. WILLIAMS, San Jose Race Track, Or L. P. COOPERS, 168 S. First St., San Jose.

HAL PACING COLT FOR SALE.

ONE ROAN STALLION COLT, 18 MONTHS old, a model individual and in time fit to go to the best mares in the country. Sired by American Hal, full brother to Blue Hal 2:14½ by Tom Hal, sire of Brown Hal 2:12, sire of Star Pointer 1:59½. First dam Corman by pacing stallion New-boy 2:22½; second dam Sky Blue by Tom Hal (sire of Brown Ha 2:12, Hal Pointer 2:04½, Little Brown Jug 2:11½, etc). This blood has produced more extreme speed than any in the country.

For particulars address

A. EDSTROM, Merced, Cal.

Two Good Ones For Sale.

Nannie Derby, BAY MARE 5 YEARS old, 16 2 hands, 162 lbs. Handsome and stylish. Sired by Charles Derby 2:20, dam by Red Wilkes. A first-class racing prospect and fine roadster. After two weeks training Charles De Ryder paced her quarters in 29 seconds last spring at Pleasanton on trac. She trotted a half mile in 1:05 on the speedway and has paced halves on the speedway (driven by T. C. Cabney) in 59 seconds. Only fault—she is excitable in company, but will get over this with training. She is ready to show, and will be driven a fast half at the trotting gait for any one who contemplates buying her.

ALSO
Dopella by Charles Derby; standard and registered; bay filly 4 years old, about 15.3 hand, weight about 1000 lbs.; handsome and in every respect a first class road horse. A lady can drive her. She has speed and is not only a valuable horse for the road but a high-class brood mare.

ALSO
A few other fast roadsters for sale at reasonable prices. For particulars and to see the horses apply to DEXTER PRINCE STABLES, 1509 Grove street corner Baker street San Francisco.

FOR SALE.

R bizola 2:12 1-4 (REG. No. 33306) Sire Robin 28370; dam Myrtle 2:13½ by Anteeo. Dark bay mare, 15½ hands high; weight 1050. High-class trotting mare. Winner five times on Grand Circuit in 1903. Trotted in 2:10½ this summer. Sound, stylish and a good roadster. For further particulars address

Dr. J. W. CLARK, Santa Rosa, Cal.

FOR SALE.

HORSE INSURANCE

(PLACED AT LLOYDS, LONDON, ENGLAND)

Stallions, Brood Mares, Colts and Fillies
Horses in Training and In Transit.
Insurance by the Year or by the Month
Rates Reasonable on Good Risks.
LOSSES PROMPTLY PAID.

LIBERAL CONDITIONS OF POLICY—The policy insures the lives of horses against death from any cause and permits of racing and shipping consequent thereto. Insurance can be placed by the year, for the racing season, or for shorter periods.

CONSIGNMENTS TO SALE—For the benefit of consignors to auction sales, we have arranged for short term policies at nominal rates to cover the period of preparation, shipping risks and the dangers of loading and stabling in sales barns. Such risks can be arranged to cover up to the fall of the hammer.

PURCHASES AT SALES—By special agreement we can place insurances on animals purchased at auction sales from the moment of the fall of hammer or confirmation of purchase.

FOREIGN AND DOMESTIC TRANSPORTATION—We can place purely shipping or transportation risks to any point in America or to any foreign port or destination.

"SAVE-THE-HORSE" SPAVIN CURE

Registered U. S. Patent Office

HOWE & CO.

Real Estate, Estates Cared For,
AND BUSINESS OPPORTUNITIES,
247 Washington St., Room 2.

Dear Sirs:—I have used a bottle of "Save-the-Horse," and I consider it the best thing that as yet I have been able to obtain for what it was intended, it having entirely cured a very valuable mare which has been lame since last September with a sprained ankle. We had her blistered twice and laid up for two months, but it did no good. I was just about ready to breed her when I gave it a trial; she is now entirely sound.

Yours respectfully,
ALBERT E. BAKER.

WERE THESE TWO CASES WORTH THE
COST OF TREATMENT?

Brooklyn, N. Y.

One of my horses went lame from side or shell bones on both feet, which extended entirely around the quarter, and was laid up for about three months. I used two bottles of "Save-the-Horse," and the horse is perfectly sound. I have driven her over paved roads, and one day gave her a sixty-mile drive, and she never showed the least particle of lameness. The growths have nearly all disappeared. I have owned horses for years, used them to build railroads and in all kinds of contract work, and have used remedies, blisters firing and electricity, but never saw anything take hold and produce such results as "Save-the-Horse" in this case.

D. C. BENNETT, Bullder,
416 79th St.

Nyack, N. Y.

In August I had a mare with an ankle cocked from a bad wrench in a race. It was so bad I had concluded to shoot her, but was persuaded to breed her and turn her out. I bred her, but instead of turning her out used your "Save-the-Horse." In three weeks I was more than surprised to see the swelling disappear, and the remedy produced a complete cure. She is as good as ever. I have raced her since and drive her any distance without any sign of lameness. I cannot say too much for your remedy.

GEO. F. BEHRINGER, JR.

Write us before you fire or blister your horse and you will understand why our written guarantee is an absolute legal contract.

Positively and permanently cures BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low ringbone), CURB SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, BROKEN DOWN, SPRAINED AND RUPTURED TENDONS and all LAMENESS, without scar or blemish. Horse may work as usual.

\$5 per bottle. Written guarantee with every bottle, as binding to protect you as the best legal talent could make it. Send for copy.

At all druggists and dealers, or express paid.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Carise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

—at the—

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arie (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

Events 3, 6, 12 and 15 are open to Los Angeles, San Bernardino and Santa Ana Driving Club Matinee Horses only. Horses eligible must be owned by a member of the club thirty days prior to date of race and must be driven by owner or a member of the club they represent.

CONDITIONS:

Six to enter and four to start.
Money divided 50 25 15 and 10 per cent.
A horse distancing the field or any part thereof is entitled to first money only.
Entries close Tuesday, October 24th, when horse must be named and eligible to the class in which he is named. Records made on or after October 1st no bar.
The rules of the National Trotting Association, of which the Associations are members, shall govern unless otherwise provided.
Entrance fee, five per cent of purse, due and payable before the race starts, and five per cent additional from money winner, except in cup races no entrance fee is charged.
Positions will be drawn for by the drivers before the start of the first heat. In the succeeding heats horses will start as they finished in the previous one.
Address all communications to the Secretary.

All events are three in five, except cup races which are two in three.
Entries not declared out at 5 o'clock p. m. on the day preceding the race shall be required to start. Declarations must be made in writing and made at the office of the Secretary.
Colors must be named by 5 o'clock p. m. on the day preceding the race, and must be worn upon the track. Colors will be registered in the order in which they are received. When colors are not named or conflict, drivers will be required to wear the colors furnished by the Association.
Horses barred in Trotting events, but will be permitted in Pacing events with the exception of cup events.
Any race that may be started and unfinished on the last day of the meeting may be declared ended and money divided or cup awarded according to the rank of the horses in the summary.

A. W. BRUNER, Secretary, 313 West Second St., Los Angeles, Cal.

\$7000 Pacific Breeders Futurity No. 6 \$7000

GUARANTEED

BY THE

GUARANTEED

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1905.

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES TO CLOSE MONDAY, DEC. 4, 1905.

ONLY \$2 TO NOMINATE MARE.

\$4250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners and \$200 to Owners of Stallions. Money Divided as Follows:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate Mare on December 1, 1905, when name, color, description of Mare and Stallion bred to must be given. \$5 May 1, 1906. \$5 October 1, 1906. \$10 on Yearlings January 2, 1907. \$10 on Two-Year-Olds January 2, 1908. \$10 on Three-Year-Olds January 2, 1909.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace. \$35 to start in the Two-Year-Old Trot. \$35 to start in the Three-Year-Old Pace. \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.
Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (3 in 3) and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead foal, or twins, or if either the Mare or foal dies before January 2, 1907, her nominator may sell or transfer his nomination or substitute another Mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1905.
Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7000, the amount of the guarantee only. Horses will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more monies in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

San Francisco, Saturday, October 21, 1905.

THE MEER ESTATE will sell by order of the court all its personal property next Friday and Saturday. The attention of horsemen especially is directed to this sale. There are 150 head of horses to be sold, comprising several head of fine roadsters, brood mares and young horses with speed enough to warrant training for track purposes. There are many fine draft animals, and mules. These animals have all been in active use on the immense farm near Hayward, which has just been divided amongst the four heirs to this vast estate. There are many buggies, carts, sulkeys, harnesses, etc., as well as all the agricultural implements, and all are in good repair, as the Meer Estate has kept everything in fine order. If you want a high-class driving horse, or a pair of them, a brood mare or a young prospect to train, attend this sale. The farm is only an hour's ride from this city and busses will meet people at the trains. Read the advertisement in this issue. The sale opens next Friday and will last two days.

THE LOS ANGELES JOCKEY CLUB advertises \$300,000 worth of stakes for its winter meeting, which will open at beautiful Ascot Park November 30th. Entries to these stakes will close Wednesday, November 1st, and money is added in every instance. Los Angeles, with its summer skies and balmy air has an attraction for the horsemen of the United States as well as for tourists from all parts of the world, and the winter meetings of the Los Angeles Jockey Club have been successful from the start. This year the club will doubtless eclipse all its former efforts, however, and the highest class meeting ever held on the Coast is predicted. Horsemen should carefully peruse the stakes advertised in this issue and be ready to make their entries on the first day of next month.

ARIZONA will give her first annual territorial fair and race meeting this year, opening it on the 4th of December. The last month of the year seems to dwellers in these northern latitudes a peculiar date for a fair, but Arizona is one of the most delightful places on the American continent during that month, and Phoenix is the pick of the territory's climatic basket. One of the finest mile tracks in America has been built at Phoenix and the Arizona people are making a special effort to induce California horsemen to visit them. Low rates on the railroads have been secured and good purses offered for harness horses. Entries to stakes close November 1st, and to the purses on November 23d. Read the advertisement.

ONE OF THE BEST three-year-old trotters in the east this year is a filly that was not eligible to any of the big stakes. Her owner was offered a good price for her—\$3000—but the party making the offer stated that he would gladly have made the offer three times that amount had the filly been well staked in the big three-year-old trotting events of the year. Breeders should not fail to enter their foals in stakes and keep them paid up on if they expect to get the highest prices for them.

NEXT MONDAY is the date set for closing of entries to the many rich stakes of the New California Jockey Club for its winter meeting to be held on its three magnificent tracks at Oakland, Ingleside and Tanforan. The racing season will open November 11th and the prospects are for the greatest meeting in the history of California racing. Read the list of stakes offered and mail your entries to Secretary Percy W. Treat, 23 Kearny street, San Francisco, not later than Monday.

ZOMBRO RETURNS TO LOS ANGELES.

On Wednesday of this week Geo. T. Beckers left Portland, Oregon, for his home in Los Angeles with a carload of sixteen horses, headed by his great stallion Zombro 2:11, winner of the championship prize at the Lewis and Clark Fair for the best standard trotting stallion exhibited. In the car were three brood mares belonging to L. H. Todhunter of Sacramento, that were shipped to Oregon to be bred to Zombro. Zombowette 2:18 by Zombro was also in the consignment, as was the brood mare Beulah and her three-year-old Zombro colt The Zoo. Beulah was bred again to Zombro this year and will be bred back after she foals in the spring. The Zoo trotted a trial in 2:21 this year. This mare and colt belong to J. Reczes of Cornelius, Oregon. The Zoo will be trained by M. J. Stetson, who trained him about sixty days this summer and improved him ten seconds in that short time. Mr. Stetson will winter in Los Angeles. He also has four other Zombros, one a very handsome and fast three-year-old filly which he purchased from Dr. A. J. Hodges of Albany, Oregon, this summer. Mary Scott 2:24 was also in the car. She is being shipped by her owner, Mrs. Nelly Couvert of Vancouver, Wash., to be bred to Zombro. In the Beckers car will also be three promising colts consigned to Will Durfee, who will train them. One is by Zombro and trotted a trial mile in his two-year-old form in 2:29. These colts belong to Mr. Sam Elmore of Astoria, Oregon. E. House of Portland ships a Zombro three-year-old to be trained at Los Angeles that is a great prospect. Mr. Beckers bought while in Portland a very speedy pacer for his friend Chas. Wilson of Los Angeles. This horse will be used on the road and in matinees. He is a fine large fellow with lots of speed and will probably win one of those Los Angeles silver cups the first time he starts. Mr. Wilson has been in Portland looking after the interests of his section in the California Building at the big fair.

Mr. Beckers received from the California Commissioners, Messrs. Wiggins and Fisher, last Monday, a handsome silver cup for showing the best California bred stallion at the Lewis and Clark Exposition Zombro, whose name is on this cup, has won more first prizes, silver cups and gold medals than any other standard bred stallion on the Pacific Coast.

CHICAGO HORSE MARKET.

Receipts were again of heavy volume, arrivals aggregating 2850 against 2417 the previous week and 1850 the same week a year ago. There has been no break in the continuous gains in the receipts over the run of 1904. Full trade has been the broadest in several seasons, with no indications of any diminution in outside orders. Demand from all quarters is broader than the trade had anticipated, with prices for good offerings showing only narrow fluctuations.

Receipts for September reached a total of 10,381 against 7277 arrivals for the corresponding month last season, showing a gain for the month as compared with September, 1904, of 3104 horses. The gain shows an increase of upward of forty per cent over the corresponding month a year ago.

The same broad gain is noticeable in the receipts for nine months, which totaled 102,886 against 87,186 for the first nine months of 1904. The increase for nine months of the current year as compared with last season represents 15,700 horses, a gain that well represents the broader demand for horses incident to growth of population and unusual activity of all commercial industries. The growth of population is phenomenal from foreign sources, 100,000 immigrants landing in this country in September to increase the demand for horses. Local consumption displays wonderful expansion over the previous year totals, 14,660 since January last as contrasted with 6446 for the same period last year, the gain being equal to 120 per cent. From all sources the general demand for business offerings is of greater proportions than twelve months ago.

But few harness offerings were reported of select quality, the bulk of the sales being around \$150 to \$225 with high actors in demand at \$250 to \$500 and upward according to size and quality. Export movement of carriage horses is narrow as domestic prices are too high for the foreign trade.—Horseman.

BOARD OF REVIEW MEETING.

Secretary W. H. Gocher sends notice that a regular meeting of the Board of Review of the National Trotting Association will be held at the Murray Hill Hotel, New York, at 11 o'clock a. m., on Tuesday, December 5th, 1905, in accordance with the By-Laws.

The President authorizes the announcement, according to precedent, that either an adjourned or a special meeting of the Board will be held in New York, N. Y., in the early spring of 1906, to accommodate those whose conveniences or necessities will be served thereby.

All communications intended for the consideration of the Board at the December meeting must be forwarded to the Secretary not later than November 21, and all parties who desire that their cases should be acted on at the spring meeting should immediately notify the secretary to that effect.

The Board of Review is empowered to act in place of the full Board with the same authority and jurisdiction, and at the above meeting will consider business arising in each and all of the districts.

The American Sportsman of Cleveland says: Several members of the Gentlemen's Driving Club are on the lookout for matinee material for next year. It now looks as if nearly all the members of the club will have new horses for next season's matinee.

STARTING HORSES.

No man will ever be able to start horses absolutely perfect, and mistakes will be made by the starting judge as long as harness racing shall endure. The men who drive horses will also make mistakes, some of them innocently, others intentionally, and at times both the starter and drivers err, but with a little effort many mistakes could be avoided. As a whole the class of men who officiate as starting judge, are men of character, who make an honest effort to discharge the duties of their position with good judgment and fairness. Drivers are also men of intelligence and usually they do everything possible to assist the starter in getting the horses away.

The greatest trouble, however, with starting horses comes from the fact that there are scores of well meaning men without any particular ability along the line of starting horses, who with a desire to stand in the lime light, persist in acting in a position for which they have no capability.

By their incapacity they bring trotting racing into disrepute, tempt drivers to do wrong things, and disgust and tire the public who pay admission to see the races and are altogether a great detriment to the whole racing business.

It requires a cool head, a clear eye and a thorough knowledge of men and horses to make a good and successful starting judge, and any man who does not possess these qualities should never attempt to act in that capacity. These observations should not be taken as a stricture upon any particular gentleman who has officiated as starting judge during the season of 1905, but if any blundering, but well meaning starting judge can be made to see the error of his ways, the time spent in writing this article will not have been spent in vain.—Western Horseman.

LA SIESTA HOLSTEINS FOR FRESNO.

Mr. Frank H. Burke of this city, owner of the La Siesta Ranch at San Jose, has sold to James Sutherland, for shipment to Fresno, Cal., ten head of full blooded registered Holsteins, bred on the ranch. There are two young bulls, one by Mable Haskins III Emperor, out of Lil Pe Kol II, and another out of Frolic of La Siesta, by Gerben of La Siesta. The balance are heifers out of Dairy Queen, Hazel Dell, Josephine Mechthilde, Clover of La Siesta, Donna Ella, Hight Ulah VI, Little Rebel and Bonnie Doon of La Siesta.

These cattle will average less than six months of age, and yet Mr. Burke received word that they traveled in excellent condition and arrived safely.

In addition he has just sold to go to Central America the two-year-old bull Mechthilde Cook by Royal Knight of La Siesta, and out of Eulalie of La Siesta, and a young cow, Vesper Bells of La Siesta, out of Beautiful Bells.

RACE MEETING AT UKIAH.

One of the most successful race meetings ever held at the Ukiah half mile track opened on October 3d and continued during the balance of the week. The program was almost entirely devoted to running races, but three harness events being on the card. Two of these were at half mile heats. The attendance was excellent throughout the meeting and the harness races proved so popular that the association hopes to give a regular harness meeting in another year in connection with a county fair. The summaries of the three harness events follow:

Trot or pace, half mile heats, three in five.

Rose Thorp by Hawthorne	1	1	3	3	1
Charley Belden, b. g. by Lynwood W.	2	2	7	1	2
Gertie II, b. m. by Stone Robin	3	3	2	2	3

Time—1:08, 1:08, 1:10, 1:12½, 1:09.

Trot or pace, mile heats, three in five.

Grace McKinney (p) by McKinney	1	1	1
Charley Belden by Lynwood W.	2	2	2
Gertie II. by Stone Robin	3	3	3

Time—2:32½, 2:22, 2:22.

Trotting, half mile heats, three in five.

Robozola by Robin	1	1	1
Wilmar by Wildnut	2	2	2
R. W. P. by Lynwood W.	3	3	3

Time—1:09¼, 1:09½, 1:09.

VETERINARY DEPARTMENT.

B. J. Visalia.—Give remedy for poll evil and how to treat it.

Answer—The fistula should be laid open with a knife, the parts washed out with an antiseptic, such as peroxide of hydrogen, one part in three of water, and the necrosed or diseased parts of bone and ligament cut or scraped away. Daily washing with the above solution to remove pus from the lower parts of the cavity. It would be well to have a veterinary surgeon operate, as the location is so near the spinal cord that it may be dangerous for one who is not an expert to operate.

Hazel Patch 2:02¾ by Hard Patch, dam Nell by Andy, was sold last week by his owner, J. W. Flack of Milwaukee, to Judson Sherman of Chicago. The price is said to be over \$5000. Hazel Patch is one of the best pacing campaigners out this year. He took his record of 2:02¾ in the first heat of the 2:04 class pace at Lexington. Many horsemen are of the opinion that Hazel might have won the 2:04 pace had he been more carefully handled. He will be placed in the stud and used for matinee racing.

W. J. Kenney, 531 Valenela street, received four McMurray carts this week direct from the factory. Two are finished in white enamel—the prettiest carts seen in this city for some time.

NOTICE.—GREATEST Money Maker on earth. Legitimate, guaranteed. Surely risk postal for particulars. Address A. W. COURCHAINE, Agent, Port Clinton, Ohio.

JOTTINGS.

SOME BROOD MARES are born great and others achieve greatness, while very few have greatness thrust upon them, because in the horse business thrusting greatness is a pretty hard as well as a very expensive job. Up at the pretty little town of Santa Rosa on Thursday of last week, two trotting fillies, own sisters, took standard records and made a great brood mare of their dam that at the time was complacently munching grass in the pasture of her owner, Mr. S. B. Wright, two or three miles distant, all unconscious of the fact that she had achieved a place in the Great Table by the performances of her two handsome daughters. The mare referred to is the trotting mare Maud Fowler, whose record of 2:21½ was made at Petaluma twelve years ago, in the fifth heat of a hard fought race wherein she beat Patty P. and Logan. Maud Fowler was bred by the late Isaac de Turk of Santa Rosa. Her sire was Anteo 2:16¼, one of Electioneer's best sons, and her dam that great brood mare Eveline by Nutwood 600, greatest of brood mare sires. So Maud Fowler was born great, as it were, and is now achieving greatness in the stud. At the Breeders' meeting at Santa Rosa in August this year Maud Fowler's five-year-old son Dumont S. 36,675, owned by Thos. Charlton of Ukiah, trotted to a record of 2:20, and became the first standard performer for his dam. On Thursday of last week at the meeting of the Sonoma County Driving Club, the two mares, Sonoma Queen and Sonoma Maid, own sisters to Dumont S., took trotting records of 2:26 and 2:29¼ respectively, making Maud Fowler the dam of three standard trotters, all by the same horse—Lynwood W. 2:20, son of Guy Wilkes. Another member of this notable family of full brothers and sisters is the famous green mare Sonoma Girl, owned by Mr. J. D. Springer, formerly of Pleasanton, but now of Los Angeles. As all our readers know Sonoma Girl is a phenomenal trotter and but for a lameness which afflicted her last winter and from which she has never fully recovered, would doubtless now have a record below 2:10 as she showed herself capable of a mile at that speed and could trot a quarter in 30 seconds as easily as any trotter ever worked at Pleasanton. Frank Turner of the Santa Rosa Stock Farm owns a son of Maud Fowler in Major Dillon. This youngster, as his name implies, is by Sidney Dillon, sire of the world's champion trotter, and is a very promising two-year-old member of this all trotting family. Mr. Wright owns a yearling and a weanling by Sidney Dillon out of Maud Fowler, both line lookers and both showing well at the trot in the pasture. Every sign points to Maud Fowler being one of the greatest of brood mares, and it is Mr. Wright's aim to have all her produce take records at the diagonal gait. Her dam Eveline, also owned by Mr. Wright, is one of the noted mares of the State, her produce so far that have taken records being Ole 2:10½, Roblet 2:12 (dam of Bonalet (3) 2:09¼), Tietum 2:19, Nick Russell (trial) 2:18, and Maud Fowler 2:21½, dam of three standard trotters all by the same horse and all having records acquired the same year. I think this is a record.

I see by the dispatches that Alta McDonald is out with a challenge to trot any other trotter in the world, barring none, for \$5000 a side. Of course such a deft as this immediately brings to the mind Lou Dillon and Major Delmar, but as everybody knows Mr. Billings does not race his horses for money, a match with either of them for money is outside the question. Lou Dillon is not herself, as everyone knows, and will not be raced any further this year, so this leaves Major Delmar as the horse McDonald is probably shooting at, as he says he would like to send Sweet Marie against the Major for charity. The readers of this department doubtless know what faith I have always placed in Sweet Marie as a race mare, but if she should meet the unsexed son of Delmar, and both were in shape, it looks to me as if tickets on the gelding would be the best investment. He has shown his ability to beat two minutes and he has eight or ten heats to his credit that are below Sweet Marie's record of 2:04¼, and five or six below 2:02. That he is a race horse none deny. On his performances I cannot see how our California queen is going to beat him in any kind of a race. I know that Alta McDonald is a level-headed trainer and realize the fact that he has trained and driven both horses and knows their capabilities as well or better than anyone else, but I cannot dismiss from my mind the idea that, like many other enthusiastic trainers, he has permitted his enthusiasm to get a little the better of his judgment in making this challenge. No one would feel like throwing his hat higher than I would if Sweet Marie should beat Major Delmar if they met, but I will admit that it would be a surprise to me if the mare should show herself superior.

One of the best young trotting prospects there is in California at the present time is a three-year old gelding by Nutwood Wilkes out of a Gen. McClellan mare that is owned by the veteran road driver, Capt. W. Ford Thomas of this city. This youngster is a trotter, one of the squarest and best gaited ones ever seen, needs no boots, and wears his shoes as evenly as any horse that ever wore them. He has shown a quarter in 36 seconds without regular trainer, has less and feet that are hard as nails and perfect in form, and is a high headed, fine acting young horse. He is a fast and cheerful walker and to the writer looks like a 2:10 trotter with training. The writer has seen any number of green three-year-olds this year, but this youngster is the most promising of them all. 7 pt. Thomas has more young horses than he can

afford to keep. He has three-year-olds, two-year-olds, yearlings, weanlings, and mares in foal. He says he is a little too old to drive three-year-olds and consequently must sell. We advise any man who wants a good young prospect to make a date with Hans Frelson, whose stables are on 24th avenue near the Casino, and take a ride behind this three-year-old. He is worth buying and developing for a race horse.

A novel scheme has been devised by the horsemen and business men of Hollister to purchase from the bank which owns the property, the Hollister fair grounds and race track. The proposition is to have one hundred residents of San Benito county agree to buy the property at a price that is already agreed upon, and pay one dollar per week on each share subscribed until the property is paid for. It will take a little over a year to pay for the property at this rate. Up to Tuesday of this week 85 of the 100 subscribers had been obtained and the full quota will have signed up before the end of next week. There are fifty-four acres in the track, well improved with a grandstand and stalls, and an excellent mile track. The land is worth every dollar of the price asked for it, without taking into consideration the improvements.

Don't ever imagine that Prompter blood is not of the race horse kind. It has been in front very often in hard fought races where the time is fast. One of the fastest pacers out this year is Gratt 2:05½, a son of Grattan 2:13 out of Molly Hicks by Prompter, second dam Lady Bishop by Iowa Chief. Gratt has been a good winner this year and it is said is in good shape to pace to a faster mark next season.

John Caldwell 2:09 trotted a splendid race in the Transylvania. While he won but fourth money he was a bang-up third to Ethel's Pride and Turley in the fastest heat of the race, which was trotted in 2:06¾. In this heat Ethel's Pride, the winner was but a neck in front of Turley and John Caldwell's nose was at Turley's hips. It was a great finish and brought the immense crowd in the grand stand to its feet. John Caldwell was just getting good as the circuit ended.

SONOMA COUNTY DRIVING CLUB.

The report of the second meeting of the Sonoma County Driving Club held at the Santa Rosa Stock Farm track on Thursday, October 12th, reached us too late for publication in our issue of last week. The meeting was a very successful one and several horses took new records during the day.

Andrew J. Compton officiated as starter and Dr. J. W. Clark of Santa Rosa, and A. Hoffman of San Francisco were the judges and timers. Secretary Henry Carlton was clerk of the course.

The fastest heat during the afternoon was made by Welladay, a six-year-old sister to Chas. Derby 2:20. Klatawah 2:05½ and other celebrities, being by Steinway out of Katie G. by Electioneer. Welladay is owned by Mr. James Coffin of San Francisco and is trained and driven by Jos. Cuicello. She won the second heat of her race in 2:14, giving the famous Steinway-Katie G. family another representative in its already numerous 2:15 lists.

Four time records were made during the day. Two were made by Sonoma Queen and Sonoma Maid, own sisters to Dumont S. 2:20 and the great green trotter Sonoma Girl, being by Lynwood W. 2:20 out of Maud Fowler 2:21½. Sonoma Queen trotted to a record of 2:25, and Sonoma Maid took a mark of 2:29¼. The former is owned by Mr. S. B. Wright, who owns her dam, and the latter is the property of Mr. William H. Morris.

Frank Turner, proprietor of the Santa Rosa Stock Farm, put a couple of Sidney Dillons in "the list" just to have them represented. Carbocita a three-year-old is out of Carlotta Wilkes. Her mile was in 2:24¼ and she can and has beaten this record. Carrie Dillon is a two-year-old out of Biscari by Director. Her mile was in 2:24½.

Four regular events were contested during the day. In the race for roadsters every heat was a race and the winner of a heat was sent to the stable. There were four heats and all were in the same time. The third heat was a dead heat between the two horses remaining in the race and they had to go another heat to decide which was entitled to third money.

Carrie B., a mare by Alex Button out of an own sister to Chas. Derby 2:20, Klatawah 2:05½, etc., took a record of 2:18 at the pacing gait. She is owned by R. Mead. The summaries of the races follow:

Trot or pace, 2:12 class, mile heats, two in three.
Welladay, b. m. by Derby-Katie G. (Cuicello) 1 1
King V. (O'Kane) 2 2
King Rose (Lieginger) 3 3
Time—2:21, 2:14.

Road race, every heat a race.

L. W. Russell Jr. by L. W. Russell-Niba (Ables) 1
Denulss (Quinn) 3 1
Socks (Miller) 4 3 0 1
Zet (Garrison) 2 2 0 2
Time—2:33½, 2:33½, 2:33½, 2:33½.

Pacing, 2:17 class, mile heats, two in three.
Carrie B., b. m. by Alexander Button-Carrie Malone (Cuicello) 2 1 1
Ed Red, b. g. by Chas. Derby (O'Kane) 1 2 3
Senator Hearst, b. g. (Lieginger) 3 1 3
Cash (Ober) 1 3 4
Time—2:25½, 2:18, 2:22½.

Trot or pace, 2:25 class, mile heats, two in three.
Lillian Sidmore, b. m. by Sidmore (Quinn) 1 1
Gertie H. (McGregor) 2 3
Charles Belden (Cuicello) 3 2
Sky Pointer Jr. (Ables) 4 4
Time—2:24½, 2:25.

WINNERS AT PORTLAND.

At the live stock exhibition at the Lewis & Clark Exposition, the following won prizes in the classes of Standard Trotters:

Stallion, four years or over—First, Zombro, George Beckers, Los Angeles; second, Lord Kitchener, T. D. Condon, Portland; third, Noeturno, G. A. Westgate, Albany, Ore.; fourth, Malbrino, W. W. Smith, Lafayette, Ore.; fifth, Oliver J., O. J. Groce, Portland.

Three years old and under four—First, Lancero, G. J. Rohse, Fulton, Ore.; second, Palmont J., Frank Woodcock, Portland; third, Collwings, J. T. & J. H. Wilkinson, Chilliwick, B. C.

Two years and under three—First, Vernon Jones, exhibited by Jno. Pender, Portland; second, Padishah, exhibited by Henry N. Tillman, Portland.

One year and under two—First, Chehalem, exhibited by J. A. Jones, Springbrook; second, Oregon Patch, exhibited by Aug. Erickson, Portland; third, Admiral Togo, exhibited by J. A. Jones, Springbrook; fourth, B. C. Pride, (Nylie), exhibited by J. T. & J. H. Wilkinson, Chilliwick, B. C.

Under one year—First, Marillo, exhibited by G. A. Westgate, Albany; second, La Creole, exhibited by J. A. Jones, Springbrook.

Junior Champion—Vernon Jones, exhibited by John Pender, Portland.

Reserve Junior Champion—Chehalem, exhibited by J. A. Jones, Springbrook, Ore.

Grand Champion—Zombro, exhibited by George Beckers, Los Angeles.

Mares, four years old or over—First, Alama, exhibited by C. X. Larrabee, Portland; second, Red Lea, J. H. & J. T. Wilkinson, Chilliwick, B. C.; third, Zombowetta, L. H. Todhunter, Sacramento; fourth, Altacora, August Erickson, Portland; fifth, Daisy Q. Hill, J. A. Jones, Springbrook, Ore.

Three years and under four—First, Red Colleen, J. T. & J. H. Wilkinson.

Two years and under three—First, Willamette D., W. A. DeLashmutt, Portland; second, Ziballine, George N. Crofield, Wasco.

One year and under two—First, Cora Patchen, August Erickson; second, Chehalem Maid, J. A. Jones.

Under one year—First, Moonlight Belle, G. A. Westgate, Albany, Ore.

Senior champion—Alama, exhibited by C. X. Larrabee, Portland.

Reserve senior champion—Red Colleen, exhibited by J. T. & J. H. Wilkinson, Chilliwick, B. C.

Junior champion—Moonlight Belle, exhibited by G. A. Westgate, Albany, Ore.

Reserve Junior Champion—Willamette D., exhibited by W. A. DeLashmutt, Portland.

Grand champion—Alama, exhibited by C. X. Larrabee, Portland.

Produce of one mare—Two animals of either sex, any age, produce of one mare: First, J. A. Jones, Springbrook, Ore.; second, J. T. & J. H. Wilkinson, Chilliwick, B. C.; third, C. X. Larrabee, Portland.

Get of one sire—C. X. Larrabee first on get of Alfonso; C. X. Larrabee second on get of Alcone; J. A. Jones third on get of Capt. Jones; J. T. & J. H. Wilkinson fourth on get of Colloquy.

WALLA WALLA RACES.

[September 25 to 30.]

Trotting, 2:25 class, two in three, purse \$400.
Sam Bowers by Joe Simpson-Sadie Thayer (Lance) 1 1
J. H. M. by Mambrino Patchen (Swartout) 2 4
Kitty Clover by Pricemont (Ferguson) 4 2
Packline by Pactolus (Barr) 3 3
Ringman by Tecong (Cagle) 5 6
Black Diamond by Del Norte (Gholson) 6 5
Time—2:26, 2:25½.

Pacing, 2:25 class, two in three, purse \$400.
Robert H. by Couer d'Alene-unknown (Reilley) 1 1
Bonnie M. by Mohegan (Hogoboom) 2 2
Esther B. by Alexis (Prior) 3 3
Lady Julia by son of Chehalis (Cox) 4 4
Vinnie Mann by Alexis (Lindsey) d
Horse Heaven Maid by Monwood (Ritchie) d
Time—2:23, 2:23¾.

Trotting, 2:20 class.
Sam Bowers by Joe Simpson-Sadie Thayer (Lance) 2 1 1 1
Kitty Clover by Pricemont (Ferguson) 4 2
Packline by Pactolus (Barr) 3 2 2 3
J. H. M. by Mambrino Patchen (Swartout) 4 4 4 4
Black Diamond by Del Norte (Gholson) d
No time reported.

Pacing, free-for-all, purse \$500.
Edgar Boy (Prior) 3 1 1
Le Roi (Lindsey) 1 2 2
Hassalo (Erwin) 2 3 3
Time—2:14½, 2:15, 2:17.

Pacing, 2:20 class, three in five, purse \$1000.
Vinnie Mann by Alexis-Miss Mann (Lindsey) 1 1 1
Robert H. by Couer d'Alene (Reilley) 2 2 4
Teddy A. by Diablo (Hogoboom) 7 3 2
Bonnie M. by Mohegan (Schell) 3 4 3
Bessie R. by Francisco (Erwin) 4 5 d
Esther B. by Alexis (Prior) 5 6 d
Lady Julia by son of Chehalis (Cox) d d
Time—2:13¼, 2:15, 2:18.

ANSWER TO CORRESPONDENTS.

FRANK M. PLYMALL, Medford, Ore.—A thoroughbred horse is a running bred horse that is eligible to registration under the rules governing the registration of thoroughbreds. A standard bred horse can be either a trotter or a pacer, but must be eligible to registration under the rules of the American Trotting Register Association.

READER, Pinole, Cal.—Teddy the Roan is a roan gelding, foaled 1893, and his record is 2:17½, made at Chico in 1897. He was bred by I. M. Proctor of Placerville, and is by Sidmore out of Vesper Bellis by Dawn 6407, second dam by Nameless, a running bred horse.

OTHER PEOPLE'S OPINIONS

Volunteer in Horse Review: It was my good fortune to witness Dan's two marvelous miles at Lexington last week—the one in 1:56 on Thursday, and the one in 1:55½ on Saturday. The first was a glorious failure. The second was a glorious success.

Stop and think what it is to ask a horse to beat 1:56. It is piling Ossa on Pelion and asking that they both be lifted at once—a task to overpower a titan. To presume success in such a stupendous undertaking demands not only a Dan Patch, to begin with, it also demands that every attendant circumstance be the most absolutely favorable. On last Thursday everything was so, but one—and that little "rift within the lute" cost Dan the record the and there.

A more perfect day could not be conceived. The October air was like wine flooded with sunshine. There was so little wind that "Old Glory" hung limp upon the flagstaff in the infield, with scarce a quiver in its folds. The track was as fast as tracks ever are. The horse was ready and equal to what was required of him—and missed it merely because of a mistake; a mistake for which no one was really responsible.

It was arranged that there should be three pace-makers. Charley Dean was to drive the important one in front; "Doc" Tanner the one at the side; and Ren Nash a third, which was to fall in just behind through the home stretch. Tanner was to rate the pace. While he has had much experience in doing this, he had never attempted it over the Lexington track before, and the angles at which the quarter and half-mile poles are set there deceived him. He judged them as he had been in the habit of doing when timing from the stand, and this proved to be an error. In this manner he got a quarter in 28¾ second and the half in 57¾, which was almost exactly where he had expected to go; but really they were made in 29¾ and 58¾ seconds, respectively. Dan came home in 57¼ seconds from the half, but even that could not enable him to more than tie the mark. Another handicap was due to the fact that the front runner sulked on Dean in the first eighth, and Dan almost paced over him.

A canvas strip was fastened beneath the seat of the cart in front. This was hung too low, and instead of fulfilling its office of dirt-screen properly, it raised a cloud of dust that was blinding. When the three horses struck the lower turn, all that was visible was a momentary glint of Hersey's white satin jacket. Hersey himself said afterward that at one time he could hardly see the horse that he was driving. In conversation with Tanner he expressed wonder to him how Dan Patch could race through the dust without choking up. "There is no other horse in the world that could or would," he said. Tanner advised that about six inches be cut off from the bottom of the canvas before the second attempt. This was done, and was a visible improvement.

In his mile in 1:56¼ at Memphis two years ago, and in his mile in 1:56 there last year, Dan's front pacemaker was driven by Scott Hudson, who is considered without an equal in this work. No one expected him to show up in Lexington, but he drifted in the back end of the week and was secured to perform his old office for the Saturday mile, doing it with his accustomed success. I also saw the 1:56¼ mile at Memphis in 1903. On that occasion there were scarce more than two feet between Dan Patch's head and Hudson's back at any spot of the mile. Last Saturday, while Dan went away and finished in this manner, there were times, through the middle half, when he was nearly an open length back. This was especially true of the second quarter, up the back stretch, which was the fastest of the mile—28 seconds flat.

It "goes without saying" that for a horse to pace in 1:55½ he must be in faultless physical condition and perfectly trained. I first saw Dan this season at the Chicago half-mile track, which he paced in 2:01½ on September 30. I then wrote that never in his life had he looked so well, and that after the mile he scarce took a long breath. I heard it remarked repeatedly at Lexington, by the most critical horse-men, "Dan Patch looks better to me than ever before"—and this before he had started. After his 1:55½ mile I was one of the crowd that swarmed out upon the stretch when Hersey drove back to weigh out. Hundreds of men and boys mobbed the horse in their efforts to touch him, or even his blanket or sulky. I worked my way to Dan's side with difficulty and also laid my hand upon him, but it was for a different purpose. I wished to discover whether the tremendous effort had exhausted him. I found him with his nostrils no more distended than after a 2:10 workout mile; there was no convulsive heaving of his flanks, he lifted his head in the air, and his eye was bright as a star.

When it is known and considered that Dan made a season to fifty mares last spring in Minnesota, his vitality and constitutional vigor appears perhaps even more marvelous than his speed. And the skill with which he has been prepared speaks eloquently of the ability of Harry Hersey as a trainer. This reminds me of a remark I heard passed by a veteran

"Do you remember," said he, "how like a demon McHenry drove Dan at Memphis when he went in 1:56¼ year before last? He made one of those eye-clone finishes that he used to when he was dragging off a heat with old Phoebe Wilkes by an eyelash. Now did you notice Hersey? He didn't make any fuss at all. You could see he was driving Dan; but he sat almost as still as Geer drives." I thought that a very nice compliment.

Palmer Clark: Sitting in the grand stand at Lexington during the meeting now in progress I counted horesmen from no less than thirty-one states and Canada, and the question came to me, Why is it that the Kentucky Trotting Horse Breeders' Association succeeds year after year in drawing such great crowds from all over the country to witness its races? And the answer came to me simultaneously as the query arose in my mind.

The stranger who pays the first visit to this great carnival of harness horse racing is struck first of all with the tasty appearance of the approaches to the grounds, the broad macadamized roadways, with spreading lawns, bedecked with flowers and shade trees; the well arranged barns and appointments, including the bright whitewashed fences, all with that symmetry and adaptability that pleases the eye and rests the mind. The well arranged transportation system lands you right at the gate and you enter the grounds to note first of all that Secretary Horace Wilson's elaborate system of organization is working like clockwork from the uniformed harrow driver on the track to the affable president of the association, who is busy receiving and entertaining the distinguished guests, of which there are many.

There are many well managed tracks, but the manager of any racing association in the country would certainly learn something to his advantage in studying Secretary Wilson's careful attention to even the smallest details. As astute a manager as Andy Welch remarked, "Every bit of banting, to the magnificent flag that floated from the pole in the center field, was correctly hung and scrupulously clean."

Six teams in constant use kept the track in perfect order, and a half mile track in the center field approached by a subway under the mile track being used for jogging, leaves the main track clear for the use of racers only.

Breeders' Gazette. It rarely happens in horse show affairs that any one man is of sufficient importance to make his presence an absolute necessity to the giving of a horse show, but it seems that such is the case with E. H. Harriman with the Goshen show. Several years ago Mr. Harriman began to take an interest in horse affairs at Goshen and surrounding country and through his enterprise the old half-mile track at Goshen was greatly improved. New buildings were constructed and the famous racing plant of fifty years ago was remodeled with a more artistic finish than it had ever before known. Race meetings were held and it was understood that if there was not sufficient receipts to pay the purses and expenses that the check of Mr. Harriman was drawn to cover the deficiency. It was Mr. Harriman also who inaugurated the horse shows at Goshen, and here again the same generous policy of meeting deficiencies with his individual check was a part of the programme and these shows came to be recognized as among the best of the smaller Eastern exhibitions. The Harriman family is made up of horse show enthusiasts and the entries from Mr. Harriman's Arden Farms far outnumbered those of any other exhibitor. Some two months ago Mr. Harriman and his family sailed for the Orient and are now in Japan. The officials of the Goshen show do not seem to have the courage to give an exhibition without the presence of Mr. Harriman and his check book, and for the first time since these shows were established the one this year has been abandoned and it is probable also that the absence of the Harriman family has caused the Tuxedo association to forego the pleasure of an entertainment of this character the present season.

PONY RACING AT SAN MATEO.

The first day's meeting of the fall programme of the California Polo and Pony Racing Association at Charlie Clarke's track at San Mateo last Saturday brought out some keen racing.

The races this fall took on more of a social function than ever before in the history of the Association. Most of the summer residents of Burlingame came over for the sport. The pavilion presented a most pleasing picture of color, the girls and matrons having attended in costumes that reminded one more of a garden party.

Those in the pavilion were keen on the sport and the interest displayed in the different events as they came up did a great deal toward keying the gentlemen riders to extra efforts.

Charlie Dunphy carried off the honors of the day, being in the money more than any of the others.

Frank Skinner, who is considered the premier at the game, drew a lot of poor mounts and did not have a chance to do himself justice.

Slow time was made in all the events except the last, which was a full round of the three-quarter track.

Bas Blancs cut out the pace and it looked as if the bay mare would take the event as on the last turn she was about five lengths ahead of Ethel G. and about ten lengths ahead of Carlolly.

As they straightened out for home Bas Blancs blew up, stopping badly, while Ethel G. and Carlolly came on strong. Dunphy on Ethel G. saw that Bas Blancs was quitting and commenced to urge his mount.

After heading Bas Blancs he let up on Ethel G. and was holding the daughter of Bliss Rucker nicely when he chanced to look back on the other side and found Skinner on Carlolly coming up like a whirlwind. He had to pick his mount up and let her down again for the final rush. It was a close call, for he had to break the Association record for the distance of 1:21 4-5 by 7-10 of a second to keep Ethel G. in front of Carlolly at the wire. Another 1-16 and it would have been brackets for Carlolly.

The main interest of the day was the fourth race at a half mile. It was programmed for a three horse

race, but Ethel G. was scratched and it left only Uletma and Midlove to fight it out.

Midlove's work last spring brought many supporters to the copper colored jacket, but the youth of Uletma was not overlooked and fully as many got down on the Salvador-Lighting mare. It was noised around just before they left the paddock that Midlove had only been lightly "preped" and there was a rush to cover. This swung the results around in the betting so that \$5 only brought home \$2.35.

Up to the fourth race Skinner had only secured a second, while Dunphy had captured two firsts and a second. Skinner felt that his reputation was at stake and it was easily seen when he went to the post that he meant to win. Dunphy, flushed by victory, was equally determined to carry off the honors.

As Uletma and Midlove left the paddock they commenced to dance to the post. In fact at times fears were entertained that one or the other might hurt itself backing up the bank.

On the second break the flag was dropped. Dunphy was right on edge and got away with half a length the best of it. Skinner had his mount moving, however, and kept up to Midlove's saddle.

Around the lower turn they came in the same position and as they passed the quarter it was seen that they had covered the distance in 24 4-5 seconds, fast time for the weights. Something had to give way at this pace. As they straightened out Skinner was seen to let Uletma down for a final effort. The Salvador-Lighting lady answered the call and shoved her nose to the front.

Dunphy had been riding carefully and when Uletma commenced to take control of the situation he made a last call on the daughter of Midlothian for a final struggle. For a second she answered the spurs and was neck and neck with Uletma, but it was only for a second as Uletma had the speed and held steady while Midlove slackened. Both mounts were satisfied when they passed the wire and it did not take much of an effort to bring them back to the stand.

The talent was dumped in the first race. Mr. Spreckels' gray pony Boastful and Charlie Clark's Chanate were the favorites. It was a six-horse race and of the lot J. A. Lynch's Leah, on looks, was a rank outsider. Few, however, knew that the Elkins-Lizzie mare had been spending the summer racing in the "bushes" and in the final pinch she outgamed W. E. Pedley's Carlotta.

Dunphy on the winner got the best of the break, taking the rail. Boastful acted green getting away as slow as an ice wagon. Walter on McKittrick's Warwick spoiled the chances of his mount by giving a splendid exhibition of how you should not break at the drop of the flag.

J. O. Tobin on Carlotta put up a smashing finish. He beat Mackay out for the place by the cleverest kind of horsemanship.

The second race of three-eighths of a mile was a cracking battle between Bas Blancs and Althomer. At the drop of the flag Skinner took Althomer out in front along the rail. Bas Blancs was second and Ethel G. third. Coming down the stretch Dunphy placed Bas Blancs nicely in front by half a length and won the event by that distance under wraps.

The third race was another victory for J. A. Lynch's Leah in easy fashion. Charlie Clark's Alvernie was second and Boastful last, a poor third.

Quarter mile.

J. A. Lynch's b. m. Leah.....(C. Dunphy) Won
W. E. Pedley's b. m. Carlotta.....(J. O. Tobin) 2
C. W. Clark's blk. g. Chanate.....(R. Mackay) 3
Boastful, Warwick and Pegus also ran.
Winner by Elkins out of Lizzie.
\$22.50 paid for \$5.

Time—:26 1-5.

Three-eighths mile.

C. W. Clark's b. m. Bas Blancs.....(C. Dunphy) Won
Rudolph Spreckels' ch. m.....(F. Skinner) 2
C. W. Clark's ch. m. Althomer.....(H. Marsh) 3
Scratched—Hopeful.
Winner by Bliss Rucker out of Walf.
\$8.50 paid for \$5.

Time—:12¼, :24¼, :37¾.

Quarter mile.

J. A. Lynch's b. m. Leah.....(H. Marsh) Won
C. W. Clark's ch. m. Alvernie.....(C. Dunphy) 2
Rudolph Spreckels' g. pony.....(R. Mackay) 3
Scratches—Queen Rucker, Don.
Winner by Elkins out of Lizzie.
\$13.50 paid for \$5.

Time—:25 1-5.

Half mile.

Rudolph Spreckels' b. m. Uletma....(F. Skinner) Won
C. W. Clark's ch. m. Midlove.....(C. Dunphy) 2
Scratched—Ethel G.
Winner by Salvador out of Lightning.
\$7.35 paid for \$5.

Time—:24 4-5, :52.

Three-quarters of a mile.

C. W. Clark's ch. m. Ethel G.....(H. Marsh) Won
Rudolph Spreckels' ch. m. Carlolly.....(F. Skinner) 2
C. W. Clark's b. m. Bas Blancs.....(C. Dunphy) 3
Scratched—Chanate.
Winner by Beaconsfield out of Queen of Diamonds.
\$6.10 paid for \$5.

Time—:21¼, :51¼, 1:20 4-5.

The average of the sale of trotting bred horses which took place during the Lexington meeting was \$257.50. As the sale continued all week, and nearly \$100,000 was the total amount of the sale, the average is a most excellent one, and proves the market for harness horses is in excellent shape.

World's records for three-year-old pacers are held by the following: Fastest stallion Klatawah 2:05½ by Steinway; fastest gelding Agitato 2:09¼ by Steinway; for fastest filly Little Squaw 2:09¼ by Kawanee Boy; and Bonalet 2:09¼ by Bonnie Direct, are tied for the record. Klatawah, Agitato and Bonalet were all bred in California.

Jackson's Napa Soda untangles the feet.

NOTES AND NEWS.

The match race between Daisy May and Faust which was set for last Sunday at the Alameda race track was postponed for two weeks by agreement between the principals.

Another 2:15 performer for McKinney is the pacing mare Grace McKinney, that took a record of 2:14½ at Santa Rosa last Sunday at the San Francisco Driving Club races.

El Milagro 2:11¼ won a good five-heat-race at Brockton, Mass., October 5th. He won the second, third and fifth heats. The fastest heat was the fifth in 2:16¼, good time for a half mile track.

An advertiser wants to purchase a well matched pair of horses that are thoroughly broken. Horses about 15.3 and sound, are wanted. See advertisement in this issue.

The four-year-old registered filly Dopella is offered for sale. She is by Chas. Derby and is a first class roadster. A lady can drive her. Can be seen at Dexter Prince Stables, Grove street, corner of Baker, San Francisco.

Morone 2:13¼, the four-year-old by Clerone owned by W. A. Clark Jr., made a fine showing this year in his races. He was just beaten in 2:09¼ the third heat by Boreazelle at Lexington, and in fact was but a few inches behind the winner in the second and third heats of this race.

S. M. Mack, formerly of Gilroy, is negotiating for a lease of the Hollister race track, and if he secures it will locate at that point. He now has a string of colts working at the Hollister track. The old veteran, Chauncey Kane, is assisting him with their training.

Col. J. C. Kirkpatrick of this city has the distinction of being one of the official timers for the fastest mile ever made by a harness horse. He, with Mr. A. G. Leonard (Hawley of the Kentucky Stock Farm) and Mr. Leonard's brother, were the official timers at Lexington when Dan Patch paced to his new record of 1:55¼.

Geers takes his horses from Lexington to Macon, Ga., and may possibly winter there.

The Oak Park Driving Club, of Sacramento, will probably hold a matinee on Thanksgiving Day at the new Agricultural Park track, in conjunction with the Sacramento Driving Club. A fine afternoon's sport is expected.

It is said Gil Curry will train a public stable next season and may bring a few horses over and winter them in California.

It is said that Swift B. 2:11¼ by Stam B. will be used on the snow path this winter in Boston by his owner Ralph Williams.

A careless hunter recently shot and killed the valuable brood mare Minmont, owned by Mr. J. A. Jones of Springbrook, Oregon. Minmont was by Altamont, dam Minnie M. (dam of Trumont 2:21¼, Satin Royal 2:19¼), by Rockwood. Second dam Sally M. (dam of Alto 2:09¼, Pathmont 2:09¼), by Pathfinder.

Vinnie Mann by Alexs took a record of 2:13¼ at the Washington State Fair recently. Her dam, Miss Mann by Pricemont, is also the dam of Bill Frazier 2:14.

Alama 2:27½, grand champion mare at the Lewis and Clark Fair, in standard bred class, was bred and exhibited by C. X. Larrabee, of Brook-Nook Ranch, Montana. She is sired by Alfonso, out of Lavina 2:28 by Woodford Wilkes.

Biscarl by Director, the famous brood mare owned by Santa Rosa Stock Farm, is now the dam of six standard performers, three trotters and three pacers. Carrie Dillon 2:24½ is the latest addition to her list.

The green four-year-old filly Centereye, by On Stanley 2:17½, dam Silver Eye, dam of two in the list by Abbottsford, owned by John O'Keefe of San Francisco, paced a mile in 2:21 on the Pleasanton track last Sunday, driven by her owner. This filly is not in regular training, and is only driven for speed on Sundays by Mr. O'Keefe who makes a trip to Pleasanton for the especial pleasure of driving her. During the week she is exercised by a friend who owns a farm near Pleasanton. Centereye is considered one of the best prospects for next year there is among the green ones in California. The fact that the last half of her mile at Pleasanton last Sunday was in 1:08, with the last quarter in 32¼ seconds, shows that she has plenty of speed, and it is the opinion of many of the Pleasanton trainers that a mile in 2:15 is within her reach right now.

The Breeder and Sportsman would like very much to get in communication with a former resident of San Francisco whose name is Spoor, but whose given name or initials has been forgotten. Mr. Spoor was connected with the Black Hawk Stables on Valencia street about 1884 or 1885. was afterward with Prof. Tapp, the horse trainer, and then with Richard Gird at the latter's Chino ranch. If any of our readers know the present address of Mr. Spoor they will confer a great favor by sending the same to this office.

The time in the 2:04 pace at Lexington on Saturday last does not constitute a world's record for three heats as has been reported. The time was 2:02¾, 2:02, 2:04¾, an average of 2:03 1-6. At Providence in 1903 Dan R. won the first heat of the free-for-all pace in 2:01¾, and Prince Alert the next two in 2:03¾, and 2:03½, an average of 2:02 5-6.

Maud Keswick 2:03¾ is now the fastest new 2:10 pacer of the year. It is quite a step in life to come from the humble occupation of drawing a cheese wagon one year ago and being the queen of the pacing brigade. Then she was bought for \$400; now it would take \$10,000 to buy her.

At an auction sale of draft horses in Chicago last week the Pabst Brewing Company paid \$1,300 for a pair of Percheron geldings that weighed 3,800 pounds.

Dan Patch's career in thirty-three days from his first start in 1905 is thus summarized: First mile, 1:59¼; second mile, 1:57½; third mile, 2:00½ (unpaced); fourth mile, 2:01 (half mile track); fifth mile, 2:05 (half mile track to wagon); sixth mile, 2:01½ (half mile track); seventh mile, 1:56; eighth mile, 1:55¼. The attendance at his exhibitions has been 255,000; he broke three world records, and earned \$21,000 in twenty-six days in September.

There is always a time to sell a horse. Last week at the Lexington autumn sales, Pilatus, by Onward, was sold for \$1,800. A few years ago \$10,000 was refused for him.

Major McKinley 2:05½ races without hobbles, boots or anything but a harness and is said to be the fastest pacer that does so.

On the same day that Nancy Hanks' son Admiral Dewey took a trotting record of 2:04¾ at Lexington, another son of hers, Lord Roberts, won a race at Readville and took a trotting record of 2:12¼.

The Rural Spirit says: C. X. Larrabee, of Brook-Nook Ranch, Montana, made the largest exhibit of standard bred horses and won every first prize competed for at the Lewis and Clark Exposition. His horses were principally drivers, and were greatly admired by the throngs of people who watched the judging. It will be seen by the summaries that Mr. Larrabee's winnings brings great credit to his efforts as a breeder of light harness horses, and stamps Brook-Nook Ranch a producer of high class horses. Not only did Mr. Larrabee's entries win, but many of the horses he sold here last spring were prize winners entered by other people. It would be hard for any one breeder to met with greater success in the ring than did Mr. Larrabee at this show.

J. B. Stetson has shipped a string of horses from Portland, Oregon, to Los Angeles. He will enter three of them in the Southern California Circuit, one in the 2:12 pace, one in the 2:24 pace and one in the 2:24 trot.

In the free-for-all pace at the Hanford fair Daedalion broke the track record by pacing the second heat in 2:12. This is good time for a half mile track. In this race Jonesa Basler finished in front in the last heat, but was disqualified for a foul. The decision of the judges was protested and the money is tied up.

The two-year-old pacing filly at Indianapolis whose owners offer to match her against anything of her age, has paced a mile in 2:11¼, with the last half in 1:04½, and is said to be faultlessly gaited. She was sired by the pacing champion Dan Patch 1:56, out of Wynn G. 2:19¼, by Coleridge 2:05¼.

"Raymond" says: "It is reported that suit has been brought at Lexington, Ky., by Isaac Eckert, of Reading, Pa., against Gus Macey, to recover damages for alleged misrepresentations made at the time of the sale of Country Jay 2:10½, to Eckert by Macey, last spring. John I. Allen, a member of the Kentucky Trotting Horse Breeders' Association and a well known lawyer, is acting for Mr. Eckert. It is alleged that evidence can be adduced to prove that Country Jay, though sold as sound, was lame all last season, but was concealed in his work and exhibition miles. The price paid for Country Jay last spring by Mr. Eckert was reported to be a very large one, and when the horse went lame soon after the sale, horsemen generally were suspicious that he had never really gotten over the lameness that kept him off the track for two or three years."

The beautiful mare Delight won three premiums at the Kentucky State Fair, including a sweepstakes for the best mare, gelding or stallion, and also the best four-year-old and over to harness. Delight is by Allerton 2:09¼, and is not only an exceedingly handsome mare, but has trotted miles in 2:10 and better in her work, while doing quarters and halves at a much higher rate of speed. She is a mare of great style and finish. There should be more Allerton blood in California. We are short on this great strain.

This is how the Western Horseman very pertinently and properly puts a case: "Salina, Kansas, thought it was possible to hold a fair and race meeting without letting the outside world know anything about it. The meeting came off, all right, with twelve harness horses on the ground, one-third of that number local animals. The first day it is asserted that all of seven persons occupied the grand stand. There is no use paying for advertising space when such a meeting can be held without the use of printer's ink."

Sadle Mac won \$12,700, and Angiola and Bon Voyage are the only other trotters that won \$10,000 or more in the Grand Circuit.

"How some of these trainers take horses to feed, care for and train for \$20 a month is hard to understand," said a San Francisco horseman the other day. "It costs more than that amount to feed and care for a horse properly, and I can't see how these \$20 a month trainers live. Perhaps they are like the old Hebrew who was asked to put in a bid for keeping a horse by the month. His bid was eight dollars and the owner of the horse, who wanted the very lowest price he could get, asked what reduction the Hebrew would make if he was permitted to sell all the manure. Putting his finger alongside his nose the son of Abraham replied: "My friend, ven I takes horses to keep at eight tollars a month, there is no manure."

Judge Thos. H. Brents of Walla Walla must be added to the list of Pacific Coast breeders who have bred a 2:10 trotter. Helen Norte 2:09¼ by his pacing stallion Del Norte 2:08 was bred by Judge Brents, who still owns her. Her dam is Laurella by his neighbor Will Hogaboom's Electioneer stallion Caution.

Those who enjoy good clean sport should attend the pony racing today at the Clark track at San Mateo. This racing is given by the California Polo and Pony Racing Association. The public are invited.

The talk about matching Audubon Boy and Dan Patch has ceased. While Audubon Boy is a great pacer he has not yet shown that he is in the class with the champion.

Miss Kate L. Wilkes bought the yearling trotter by Todd out of Paronella by Parkville at Lexington last week.

Ethel's Pride, 2:06¾, winner of the Transylvania, will be retired to the matinee ranks at the close of the season by her owner, John Shepard of Boston.

The attendance on Transylvania day at Lexington was the largest ever inside the grounds of the Kentucky Trotting Horse Breeders' Association.

John F. Barrett, one of the best known horsemen of Maine, died at his residence in Portland, September 28, from blood poisoning. Mr. Barrett established the Rigby track outside of Portland a dozen years ago, this course being one of the finest ever built in the East.

ARIZONA FAIR AND RACES.

The first annual fair of Arizona will be held at Phoenix, December 4th to 9th, this year. A letter received from Mr. W. N. Tiffany, Superintendent of Speed, says:

"We appreciate that we must depend on California to furnish us the bulk of our entries, and we want to do everything we can to show horsemen there that it will be to their interests to come over and attend our meeting. I cannot see why practically every horse that is in racing condition at the close of the Southern California circuit should not come to our meeting. There will be no place else for them to go except into winter quarters, and the program we are offering should convince them they cannot afford to stay away. I have carefully arranged the program so that a horse eligible to any class slower than the free-for-alls can get at least two starts during the week with one or more days between. The railroads have agreed to make us cheap freight rates from Los Angeles, and to bring the horses through on passenger schedule, if we can get enough horses to warrant it. This would mean it would cost but a trifle to make the trip (probably something like \$20 per horse for the round trip), and the ship would not consume over about eighteen hours.

"Everything is getting into fine shape at our grounds. Our tracks are already far better than the average, notwithstanding the fact that it is barely two weeks since we finished grading. There are about fifty horses now at the track, and every trainer who has been on the track says they will be as fast as any in the country before our meeting opens. Mr. George Klotzbach, who recently arrived from New York with Mr. W. C. Greene's string of speedway and matinee horses, says our mile track is now as fast and as good as he ever saw the Empire City track this summer; and he agrees that in less than thirty days more it will be the equal, if not the superior, of any other track in the entire country. Mr. Klotzbach's string includes Boralma's Brother, Florence Wilton, Paul D. Kelley (1) 2:20, Billings, the great three-year-old who paced our track last week in 2:11½ and will be specially prepared and started at our meeting to beat the world's three-year-old record of 2:05½ now held by Klatawah; Cobre Grande, the Arizona pacer who cleaned up about all the pacers on the New York Speedway this summer, and several others, eight head in all.

"Mr. J. K. Wheat also returned from Libertyville, Ill., last week with the horses of Mr. J. C. Adams that have been racing so well through the Eastern States this summer, including Sally Pointer 2:11, Bystander 2:13½ (by Zolock), Billy A. 2:14¼, and Custer, the good four-year-old son of Sidney Dillon, that made such a good showing in some of the big stakes of the Great Western circuit. Mr. Adams has also now got at the track several very promising yearlings and two-year-olds by McKinney, Mendocino, L. W. Russell, Oh So, and Boydello, that are being prepared for our colt stakes."

Attention is called to the advertisement of this fair in this issue, and we hope as many California horsemen as can possibly afford it will enter their horses at this meeting.

LEXINGTON RACES.

After two days of rain, racing was begun again at the Lexington track on Thursday of last week. A large crowd was present and the greatest number of harness races ever decided in one day on the Lexington track were finished. Seven events were on the program and three of them were stakes.

The feature of the card was the McDowell stake, with a value of \$3000, followed by the Lexington, a practical renewal of two-year-old futurity, and the West for 2:29 trotters. The former event was won by Angiola, who won three out of four heats. The two-year-old stake was captured by Silko, driven by Charles Marvin, the old Palo Alto driver, while the West was won in straight heats by the New York gelding, Albert C., with the California horse, Danube, second. The track was slow:

Trotting, 2:16 class, purse \$1000.

The President, b. h. by Gambetta Wilkes (Caturie)	3	5	1	1	1
Forenzelle, br. h. by Boreal (Demarest)	2	1	2	4	2

Time—2:11, 2:10, 2:10¾.

Friday, the ninth and last day of the fall meeting of the Lexington Trotting Horse Breeders' Association, drew another large crowd to witness the attempt of Dan Patch to lower the world's pacing record of 1:59¼ made by Star Pointer in 1897 without the aid of a wind shield or dirt shield.

The racing marvel did not lower the mark, but he succeeded in tying it in the face of a strong wind, which blew in a gale down the stretch.

The performance was pronounced by horsemen as being the most wonderful mile ever paced by a horse, and it easily demonstrated the fact that the great son of Joe Patchen is able to beat the mark with even chances.

Paced by a runner at his side and one behind, the horse went to quarter in :030, half in 0:59, three-quarters in 1:28½, and negotiated the mile in 1:59¼.

The main event on the card to-day, the Kentucky stake for three-year-olds, was won in straight heats by Susie N., who was backed for a good thing in the Futurity last week. The race to-day, which was practically a repetition of the Futurity, was devoid of much interest on account of the absence of Miss Adbell, winner of the classic event on the first day of the meeting. Bon Voyage, W. A. Clark's great colt, trotted an excellent race and was a good third in both heats.

Lady Mowry won third money in the 2:20 class trot which went to the sensational trotter Main Sheet. Lady Mowry was second in the fastest heat of this race.

Oregon Maid, driven by Charlie Dean, won the 2:08 class pace which required five heats to decide. Ben F. won the first heat of this race in 2:07¾ and was awarded third money. The summaries:

Trotting, Kentucky stake for three-year-olds, value \$2000.

Susie N., br. f. by Moko (Murphy)	1	1			
Wigwam, blk. c. (Thomas)	2	2			
Bon Voyage, b. c. (Garrity)	3	3			
Katherine J., b. f. (Stinson)	5	4			
The Phantom, blk. c. (De Ryder)	4	d			

Time—2:11½, 2:14¼.

Trotting, 2:20 class, purse \$1000.

Sunny Slope, b. m. (Shire)	3	3	4	4	4
Joe Interest, b. h. (McCall)	d				
Cambria Maid, b. m. (Benyon)	d				

Time—2:07¾, 2:10¾, 2:09, 2:08½.

Dan Patch to beat 1:59¼. Time—1:59¼.

HANFORD RACES.

The Central California Fair, which was held at Hanford, Kings county, during the week of October 9th to 14th, was marked by a big attendance. It was the most successful fair ever given by the Kings County Agricultural Association, and the attendance—19,000 admissions during the week—broke the record for this fair. The half mile track, on which the racing was held, was in fair condition, and a number of excellent contests resulted. The summaries of the harness events follow:

Trot or pace, two-year-olds, purse \$150.

King Athby, b. g. (p) by Athby	1	1			
Redstone, b. c. by Strathstone	2	2			
Mamie S., blk. f. by Keystone	3	dr			

Time—2:29, 2:24½.

Pacing, 2:12 class, purse \$300.

Rhoda Fay, b. m. by Gen. Logan	3	4	4	3	

Time—2:17½, 2:13½, 2:16½, 2:15.

Gent's driving race, purse \$100.

Joe Athby, br. s. by Athby	1	1			
Sweetheart, gr. m. by Baywood	2	2			
Billy H., b. g. by Knight	3	3			

Time—2:30, 2:32.

Trot or pace, 2:20 class, purse \$300.

Stonelita, br. m. by Stoneway	1	1	1		
Hank, b. g. by Vasto	2	2	3		
Lacy Woodruff, br. m. by Robt. Basler	3	3	2		

Time—2:20¼, 2:19.

Trotting, 2:40 class, purse \$200.

Billy H., b. g. by Knight	1	1	1		
Milton Gear, s. g. by Harry Gear	2	2	2		
Miss Gordon, blk. m. by McKinney	3	3	3		

Time—2:37, 2:41½, 2:45.

Pacing, 2:30 class, purse \$200.

Rhoda Fay, b. m. by Gen. Logan	1	1	1		
Sweetheart, gr. m. by Baywood	2	3	2		
Fearnot, b. s. by Lynmont	3	2	d		

Time—2:22, 2:19½, 2:22.

Buggy race, purse \$75.

Joe Athby, br. s. by Athby	1	1			
Lacy Woodruff, br. m. by Robt. Basler	2	2			
Milton Gear, s. g. by Harry Gear	3	3			

Time—2:15, 2:16.

Free-for-all, trot or pace, purse \$300.

Daedalion, b. s. by Diablo	0	1	1	1	
Jonesa Basler, br. s. by Robt. Basler	0	2	2	2	
Lady R., br. m. by Col. K. R.	3	3	3	3	

Time—2:15, 2:12, 2:13½, 2:17.

Trot or pace, yearlings, half mile heats, purse \$100.

Radium, blk. c.	1	2	1		
Little George, br. g.	2	1	3		
Andy Direct	3	3	2		
Nan Patterson	1	4	4		

Time—1:16, 1:15, 1:17½.

Trot or pace, 2:24 class, purse \$100.

King Athby, b. g. by Athby	1	1			
Miss Gordon, blk. m. by McKinney	3	2			
Graceful George, s. g. by Alcona Jr.	2	4			
Billy H., b. g. by Knight	4	3			

Time—2:31, 2:32.

RACES AT BAKER CITY, OREGON.

The Baker Co., Or., Agricultural Society held a successful and well attended meeting from September 20th to the 24th. The judges of the race were Lynn Foster, Marvin Chandler and M. S. Bond. The starting of the harness events was in the hands of Mr. Geo. Chandler. The summaries:

Trot or pace, 3:00 class, district bred horses, three in five, purse \$250.

Fordell (Preston)	4	1	2	1	1
Lucile (Smith)	1	2	1	2	2
Mont Gregor (Lindsey)	2	4	3	d	
Askar Ben (Healy)	3	2	d		

Time—2:42, 2:42, 2:46, 2:40, 2:43¼.

Merchants' purse, trot or pace, 2:20 class, purse \$500.

Vinnie Mann by Alexis-Miss Mann Rockford (Lindsey)	1	1	1		
Bessie R. by Francisco (Hogboom)	2	2	4		
Lady Julia by Son of Chelalis-Vinmont (Cox)	4	4	7		
Robert H. by Coner d'Alene (Cohen)	3	3	3		
Rockford by Caution (White)	d				
Brilliant (White)	d				

Time—2:16¼, 2:21, 2:29¼.

Trot or pace, 2:40 class, mile heats, three in five, purse \$250.

Brilliant by Gregmont-Winnie (White)	2	1	1	1	
Rockford by Caution (W. Hogboom)	1	3	2	2	
General Hurts by Alexis (H. Hogboom)	4	6	5	3	
Fillmore Chief by Wilkie Russell-Florino (Lindsey)	5	4	1	4	
Brice by Challenger (Smith)	3	2	3	d	
Judith by Wm. Harold (Smith)	6	d			

Time—2:31, 2:27½, 2:28, 2:27½.

Named race, non-money winners, mile heats, two in three, purse \$150.

Robert H. by Couer d'Alene (Reiley)	1	1			
Lady Julia by son of Chelalis-Vinmont (Cox)	2				
Fillmore Chief by Wilkie Russell-Florino (Lindsey)	3				
Rockford by Caution (Cohen)	d				

Time—2:28¼, 2:31.

Al Thomas received an offer of \$7,000 for Main-sheet 2:08½ at Lexington, but refused, holding the horse at \$10,000. New York parties made the offer.

SAN FRANCISCO DRIVING CLUB AT SANTA ROSA.

Over 300 excursionists went to Santa Rosa last Sunday to attend the meeting of the San Francisco Driving Club at the famous Santa Rosa Stock Farm track. They found the track faster and in much better shape than any track the club horses had previously raced over, and fast time was made in several of the events. Four races were on the card, but owing to accidents and other delays but two of them were finished. The unfinished races will be concluded at the same track tomorrow afternoon when another excursion will be run from this city.

In the first race won by N. L. B., a son of Diablo, Grace McKinney took the second heat in 2:14½, the fastest of the race, but owing to a collision in the third heat fell and was distanced, as was Cash, driven by Worth Ober. Mr. Ober was pretty badly bruised.

The 2:40 class was won by Dan Liegier with the horse Senator Hearst, his winning heats being in 2:20¾ and 2:21¾. The Chas. Derby horse Ed Rea won the first heat of this race in 2:25.

In the free-for-all, which was first advertised to be finished at the end of five heats, the conditions were changed and it was raced according to the best three in five heats. Five heats were decided and then the race had to be postponed until next Sunday. Clara L. won the first two in 2:14¾ and 2:15, Gertie A. by Diablo took the next two in 2:12½ and 2:19¼, and Kittie D. by Dictatus the fifth in 2:17.

In the 2:25 class Mixer by Nutwood Wilkes took the first heat in 2:22¾ and Welladay by Steinway got the second in 2:19. The finish of the race was then postponed until the following Sunday.

W. J. Kenney, the well known bike builder, made his debut as a starter at this meeting and got the horses off well and promptly, never scoring them more than three times. W. Murray, A. Benson and J. Bonney were the judges. F. Jensen was assistant starter and B. Smith marshal. W. Todd, J. Coon and J. Deschler were timers. T. J. Douglass is the secretary and J. W. McTigue president of the club.

The track was in splendid shape and very fast and the club members highly complimented Manager Frank Turner on its condition and his hospitality. The totalisator was used for betting and was voted "the only" system. It was not only absolutely fair, but it left the money with the public unlike the skin-dicate book. The summaries:

First race, 2:30 class, two in three.

N. L. B. by Diablo	1	2	1		
Headlight	5	4	2		
Billy F.	4	5	3		
Grace McKinney by McKinney	2	1	f		
Cash	3	3	f		

Time—2:17¼, 2:14½, 2:30.

Second race, free-for-all, three in five.

Clara L.	1	1	3	4	2
Gertie A. by Diablo	5	4	1	1	5
Kittie D. by Dictatus	2	3	2	2	1
Flora G.	3	2	4	3	3
Charley	4	5	3	5	4

Unfinished.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Oct. 11, 14—Spokane Keonel Club Spokane, Wash. A. B. Jackson, Secretary.
Oct. 17, 20—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.
Oct. 26, 28—Lawrence Keonel Club. Newcastle, Pa. W. L. McConell, Secretary. Entries close Oct. 16.
Nov. 15, 16—New England Beagle Club's specialty show. Grafton Mass. A. D. Fiske, Secretary.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 21, 22—Brockton District Kennel Club Brockton, Mass. J. W. Sullivan, Secretary.
Nov. 30-Dec. 2—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.

1906.

Jan. 17, 20—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club Boston. Wm. B. Emery, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Keonel Club. Pittsburg, Pa. F. S. Steadman, Secretary.
March 14, 17—Pasadena County Field and Game Protective Association. Pasadena, N. J. N. J. Mathews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
June 9—Wissahickon Keonel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.

Field Trials.

Oct. 12—Pacific Northwest Field Trial Club. La Conner Flats, Wash. Chas. L. Lundv, Secretary, Seattle, Wash.
Oct. 23—Ohio Field Trial Association. Washington Court House, O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904 whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 30—National Beagle Club of America: 16th annual trials. Stevenson, Md. Chas. R. Stevenson, Secretary.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Huntsville, Ill. S. H. Soewell, Secretary, Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Roehm, Secretary, Dayton, O.
Nov. 13—New England Beagle Club. 12th annual trials. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov. —Indiana Field Trial Club. (Week following Illinois Champion Stake) C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary, Richmond, Va.
Dec. —Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 126 Malden Lane, New York.
Dec. 2—Continental Field Trial Club, 11th annual trials. John White, Secretary, Hempstead, Long Island.
Dec. 13, 14—Southwestern Keonel Club's bench show at Pasadena. Entries close.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.

WHEN THE DOG SMILES.

(By John Lemmer.)

The dog's a funny animal—
Domesticated kind
The while he wears his teeth before—
He wears his grin behind.
This seems quite paradoxical,
Quite waggish—You won't fail
To note betimes, a canine's smile
Is just a wagging tail.

I used to know a little pup
Who smiled on me each night.
When I returned from my day's work—
His tail wagged with delight.
He was a joyous, happy dog—
I chronicle with pain
The fact, he lost his tail one day—
He never smiled again.

Oh! fellers all, be good to dogs—
And to my warning bark;
Don't twist their tails nor drown their purrs—
'Tis wrong to wreck a bark.
Never look a big dog in the eye,
Your courage well might fail—
To know if well he thinks of you,
Rubber at his bloomin' tail.

PAID JUDGES.

At the recent quarterly meeting of the American Kennel Club this important question was thoroughly threshed out. While it is a matter of greater importance in the East it is one of growing interest on the Coast.

The status of the amateur—whose cloak has covered a multitude of vexations when settlement time came—is now defined. Outside of transportation expenses, the "amateur" judge should be one who can afford to follow the bent of his fancy and stand his legitimate expenses, just as an exhibitor does when he takes in a show at another town.

The Secretary: I have a resolution here, offered by the Membership Committee. It is as follows:

Whereas, It is the opinion of the Membership Committee that the status of a paid judge at dog shows and field trials should be determined. Be it

Resolved, That a paid judge shall be defined as any one who shall have received or agrees to receive any monetary compensation for services as a judge at any dog show or field trial. Any judge receiving money for expenses shall be considered a paid judge unless the amount simply covers his necessary and legitimate expenses, which shall consist solely of transportation fares from and to his home, and hotel charges during his stay at the show or trial. Be it further

Resolved, That all judges, except paid judges, be and hereby are required to file with the secretary of the American Kennel Club, within thirty days after the show or trials, an itemized bill of his expenses, provided the club at which he judged has or agrees to reimburse him for said expenses, and said reimbursement accepted by said judge, and any judge who fails to file an itemized bill of expenses as above provided shall be considered a paid judge.

Mr. Moore: I move that the resolution be referred to the Rules Committee for consideration.

Motion seconded.

Mr. Muss-Arnoldt: I move the resolution be adopted.

Mr. Viti: I second the motion.

Mr. Emery: The idea of the Membership Committee in forming that resolution was simply to get instruction. We wanted to know how we should define a paid judge, because in these credentials we ask that question, whether or not they are paid judges.

The Secretary: As a member of the Rules Committee, it does not appear to me that that is a proper subject for that committee's consideration. If it was a change in the rules in any way, shape or form, then there is no question that it should be committed to the Rules Committee, considered by it and published in the Gazette before it could be finally acted upon at this meeting, but here is a definition only; it is not a rule; it is simply a definition for the assistance of the Membership Committee in the prosecution of its duties, so that it may know exactly where it stands. It asks this association to define who is and what is a paid judge. It does not seem to me, as a member of the Rules Committee, that that matter should come before it.

Mr. Dale: A professional or paid judge is not eligible, as I understand it, or a Secretary, to represent a club.

The Secretary: Further than that, a man to represent a club must think enough of the club to become an active member of it, or the club must think enough of a man to make him an honorary member.

Mr. Foster: Suppose one of us goes up to Canada and judges, and we do not choose to charge up any expense at all, every man who does that under this resolution would have to send word to the Secretary of the American Kennel Club that he was not charging his expenses or be considered a paid judge.

The Chair: The judge will have to send in word that he has not accepted any money.

Mr. Smith: This idea of sending in word to the American Kennel Club within thirty days would only occur where man had received his expenses. Many of us go all around the country and judge, and do not charge any expenses, but the object of this is simply to make a fine distinction between the one and the other.

Mr. Muss-Arnoldt: I think the matter would be much simpler if there was included in the resolution a provision compelling the show's Secretary, when he sends in the catalogue, to send in the list marked "amateur judge" or "paid judge." If the show's Secretary is compelled to note whether or not a judge is paid, it will simplify the matter considerably.

Mr. Smith: That is the idea of that resolution, to determine what an amateur judge is. There are amateur judges that will go from here to Honolulu, for instance, and judge at a show and who will send in an itemized account of their expenses amounting to \$50 or \$75. He is an amateur judge, but how his expenses can amount to as much as that is a puzzle to several of the show secretaries. Mr. Muss-Arnoldt's idea of having the show secretary send in a catalogue, marking the judge paid or unpaid, would still give the judge who was supposed to be an amateur the same privilege.

Mr. Viti: It seems to me that this wording answers the objection of Mr. Foster, "Provided the club at which he judged has or agrees to reimburse him." Where you pay your own expenses, and do not ask to be reimbursed, you do not have to file any statement.

Mr. Foster: I happen to think of an instance. The people up in Toronto asked me to come up there and

judge Bull Terriers, and they told me to let them know what my expenses would be and they would reimburse me. I told them I was not a professional judge, and was going to their show anyhow, and that I would not charge for any expenses. Those people would probably tell you they had agreed to pay my expenses, while I would say I had not charged them any expenses.

Mr. McGuire: The American Kennel Club will have to determine whether the charges are excessive or not.

Mr. Muss-Arnoldt: That should be left to the show secretary to determine; he is the man that ought to know.

Mr. Moore: I agree with the suggestion that the secretary of the show should be compelled to send in a list of his paid and unpaid judges, but I fail to see any necessity for the rule at all.

Mr. McGuire: This matter has been threshed out in the Amateur Athletic Union. A man is either an amateur or professional, and this very resolution that you are discussing now has raised a lot of questions. You cannot draw the line as to what one man's expenses would be. I remember, five years ago, among baseball teams it was customary for the members of the teams to play ball at certain summer resorts, and a great many of them received their railroad expenses, which amounted to \$400 or \$500, but they were still amateurs. This is the same question, nothing different.

Mr. Smith: For the very reason that the gentleman gives, I think that it has become the duty of the American Kennel Club, or the delegates, or some committee to determine what an amateur judge is, inasmuch as it has been a very much disabused privilege by several people, who pose as amateur judges, going around to different shows and saying they would act as judges provided their expenses were paid, and when the shows comes to settle the bill for their expenses, they are found to be greatly in excess of what they should be. I am saying this for the benefit of several of the delegates here who seem to be in favor of adopting this resolution.

The Secretary: I can tell you of two instances, and both men are gentlemen amateur judges, who would not under any consideration accept remuneration for judging. One of them went from New York to Philadelphia. We all know that the excursion rate is \$4, and a dollar for a drawing-room seat there and back makes \$6. He stayed there four days, which he had a right to do, because he has a right to stay until the close of the show, for the reason that he is a judge until the close of the show. He paid about the highest rate for hotel expenses, \$7 a day, which was \$28, plus \$6 for railroad transportation, making \$34 altogether. Every dollar that he received in excess of \$34 was paid for his services to that club. He put in a bill for expenses \$75, and he claims he is strictly an amateur judge. In another case, in Pittsburg, the receipted bill showed \$75 charged, and yet \$30 was more than a generous allowance, for the man lived only a little way from Pittsburg.

Mr. Dale: I claim there are enough gentlemen in the dog world who will go around and judge without any remuneration at all. It is one or the other.

Mr. Middlebrooke: I am in favor of passing the resolution if you will change it to read that the secretary of the club or the superintendent will make the return. I move, as an amendment, that the return be made by the secretary of the club holding the show or superintendent.

Mr. McGuire: I move an amendment to that amendment, making it obligatory upon the secretary of the show to file with the secretary of the American Kennel Club a statement of all moneys paid to judges at shows. Any man who is paid in excess of his railroad transportation expenses will be considered by the American Kennel Club a professional judge.

Mr. Middlebrooke: I should be willing to pay a reasonable hotel bill.

Mr. McGuire: A man who has no objection to accepting his hotel expenses, should have no objection to becoming a professional.

Mr. Smith: That question was brought up by one of the members of the committee when we framed this resolution, who assumed the case of a man being sent from here to Denver to judge, and the man could not afford to pay his railroad expenses, and unless he were allowed to receive that amount of compensation, he could not judge at that show, and, therefore, his being an amateur would prevent him going.

Mr. McGuire: That applies to the amateur in every line of sport. If a man wants to remain an amateur, he must, necessarily, be in a position to afford to remain such. If he is not and does not care to become a professional, let him refrain from judging. You have got to draw the line and you have got to draw it very close.

Mr. McGuire's proposed amendment was put to a vote and lost.

Mr. Moore: I move that the resolution be referred to the Rules Committee.

Motion seconded and lost.

Mr. Middlebrooke's proposed amendment was also put and lost.

Mr. McGuire: I move that the resolution be laid on the table.

Motion seconded and carried.

Mr. Emery offered the following resolution:

Be it Resolved, That a paid judge shall be defined as any one who shall have received or agrees to receive any monetary compensation for services as a judge at any dog show or field trial. Any judge receiving money for expenses shall be considered a paid judge. And, be it further

Resolved, That the secretary or superintendent of all show-giving clubs shall, within ten days after the close of its show, forward to the secretary of the American Kennel Club a list of all judges who have or are to receive any monetary consideration for expenses or otherwise.

Resolution seconded and carried.

GUTS, LEADERS AND LINES.

A description of the Spanish and American gut-worm, how gut is prepared and the processes of leader-making; lines of hair, silk and hemp and the dressing of lines is treated in an interesting manner by Mr. John Harrington Keene in the Sporting Goods Dealer. We take the liberty of giving it this week on the principle that when you come across a good thing pass it along.

The Moorish and Spanish silkworm is the larvae of the bombyx mori moth and differs little from the Japanese silkworm in growth and habit. The product of the Spanish worm is that which is used generally by the angler and is of various lengths and thicknesses according to the size and health of the silk sacs in the worm. The process of raising the worm from the egg of the moth and the feeding of the caterpillar on the mulberry leaf is very simple and easy and has been again and again described. The peasant people of the little Moorish town of Murcia seem to monopolize the trade of gut production, and to entirely retain it, though it has been tried in this country with success so far back as 1853 in the silk center of Paterson, N. J.

It may be interesting to state to what extent it has been attempted to supplement the Spanish industry at Paterson. More than half a century ago a Mr. John Ryle, who had spent his life in the silk industry in Paterson, introduced this industry and the "multicaulis craze," as it was termed, was widely prevalent about this time when people raised mulberry trees everywhere and especially at Paterson, where many old trees of this kind still exist. The craze, however, finally died out when it was found that the Americans could not compete with the pauper labor of Italy, Spain, Murcia and China in reeling from the cocoons and in feeding the worm, both of which are very tedious and poorly paid operations. It was, however, found on experiment that the Italian and Spanish silkworm produced even better silk on American mulberry leaves than on the leaves of its native soil, and it was without question possible to rear and use the silkworm here to perfection. The cost of doing so being the only objection and this seems to be insuperable.

The silkworm gut which is used for fishing is almost entirely of Italian and Spanish production and its length seldom exceeds two feet and the thickness of the best salmon gut is always limited by the length, being less as its length is increased. A strand of gut is seldom strong and durable if over 23 inches long and of course when made into leaders the knots are the weak points in every leader made.

This much is true of the gut of commerce, but I have in my possession a supply of Japanese gut which was sent me in 1894 by Professor K. Misukui of Tokio University (a Yale graduate), and of which many strands are 10 and some 14 feet long, of fine texture and stronger than any Spanish gut of equal thickness. Most of these strands are finer than the finest drawn gut of Murcia manufacture and are the natural product of the silk glands of the calijula jaxomica. This gut can be obtained from an old and reliable firm whose address is Rikichi Nakamura, Ginza Ichome Tokio, Japan. I have never seen more beautiful strands of silk than these are and when it is borne in mind that the longest leaders for fine trout fishing can thus be provided by Japan without a single knot or weak junction of the strand, the desirability of this gut is evident and in the future will certainly be recognized by the dealers of England and this country. It is used extensively in Japan for all sorts of fishing and especially for the capture of a species of the salmonidae plecoglossus aetivels, Japanese name Argu. This fish ascends all the rivers of Japan proper, and is only from two to three inches at first, but grows to a foot or more when fully grown. It is noted for its delicate flavor. The famous comorant fishing on the Nijara river in Gifu (Central Japan), is for catching this game fish. Artificial insects (of which I have samples,—dressed on hooks without barb), are used for catching these fish and are tied on in the American and English way to the leader three and sometimes four on a leader 14 feet long, which leader is without a knot.

The Japanese silkworm unquestionably produces the finest and largest white gut, but the American silkworm attacus cecropia from which I have drawn and have in my possession two fibres or strands of 11 and 13 feet long, of strong gut and fairly thick and of a faint coffee color is the most promising worm for the production of native gut that I know of. This is the largest silkworm known in existence and often grows to five inches in length, feeding on the plum, apple, "button ball" bush (cephalanthus occidentalis) and many other deciduous trees. Its habitat is coextensive with the United States and wherever there is soil that will grow shrubs and trees the cecropia finds its home and makes her cocoon. The silk thread that can be drawn is even stronger than the Spanish gut, size per size, and it is thicker when desired than any salmon gut ever drawn.

There are three other American silkworms from which white strands can be drawn of very good quality, but not always reliable strength as with the Spanish and cecropia. These are scientifically termed Attacus prometheus, Attacus luna and Attacus polyphemus. Each one of these is well worth experiment and the time is approaching when this source of American gut will be largely drawn upon and preferred to the product of Spain and Italy. This is a bold prophecy, but worth consideration.

The method of "drawing" gut is practically the same with all the worms used for that purpose. One description is sufficient for all the species of silkworm which have been enumerated and is as follows: The grub or full grown larvae when it ceases to feed and shows tiny strip of exuding silk from the mouth is

taken and thrown into diluted acetic acid or vinegar for a few hours until the natural moisture of the viscera is as if it were pickled and absorbed by the acid. The worm is then taken out and the head snipped or pulled off and the silk sacs, which are two in most of the silkworms, can be drawn out intact and laid on a sheet of glass for further manipulation. The sacs can now be taken between finger and thumb of both hands and stretched out slowly till the desired length and thickness is arrived at. Two pins should be fixed on a board by an assistant at this point and the ends of the gut should be wound round each pin and held for a few minutes for all the coils to harden and so retain the strand taut for drying.

This needs exposure in dry, warm air for a period of at least 24 hours of the Spanish worm and in the case of all the American worms at least three days. The longer the cecropia strand is kept before using the stronger it becomes, and the same fact obtains with the other native worms. The silk of the bombyx mori, however, ripens and hardens almost instantly in the sunny atmosphere of Murcia and is soon ready for the next process which is necessary before it is fit for the market.

The gut as it now is has the envelope of the silk remaining on it, and this has to be removed by boiling in a bleaching fluid which consists of a mild lye of soap which softens and whitens the yellowish thread of the stretched sac and its contents. When this is done the Murcian operator—mostly women—draw the thread through the teeth and the process is very often attended by laceration of the lips producing a painful appearance of bleeding which the sufferer does not seem to mind much, though the uninitiated onlooker will find it sickening to behold. This seems to be a process which is found indispensable, for some years ago Mr. Samuel Allcock, the largest English importer, tried the experiment of sending for gut that had not been bleached and boiled and still had the skin on it with the idea of taking off the skin and preparing the gut himself at his Red-ditch factory. Here is his account of the result, published in the English Fishing Gazette of that date, May 11, 1892:

"After the correspondence which took place in your paper about three years ago on the manufacture of gut, we wrote out to Murcia, asking our manager there to send 1 cwt. of gut, instructing him neither to have it boiled nor bleached. We received it, but in the process of removing the orange skin the workers made it all flat by using their fingernails in peeling the outer skin off. There was scarcely a round piece of gut in a thousand. We could not sell it. We therefore wrote to our manager about it, who said if we would return it he thought he could put it all right. This I doubted very much, as I could not see how he was going to make it round. Nor was I wrong; for, after having bleached it, he returned it to us again—but as flat as ever. This experiment was a loss to us of £50. We have still a small quantity of that gut left; but no dealer will buy it.

"If any tackle-maker will order a few thousand of gut in the natural state, we will import it to them and will order a few thousand to be sent out of this season's crop to be unbleached, but boiled, so that the workers can peel off the orange skin easily without flattening it. As soon as we get it, I will send you some. I am, etc., S. ALLCOCK."

One point is probably important in the drawing of gut which is seldom mentioned in the descriptions of the process, viz., that the Murcian holds the sac in the vinegar with one hand while he draws the other end with the other—the right. I have, however, not found it necessary to do this with our native worms. When their sac is stretched in air it seems to harden at once and there is no skin to be removed from the cecropia's gut, at least. Of this cecropia gut I have a leader in my possession tied by a Long Island trout fisherman 30 years ago, or thereabouts, of strands of this gut not less than 20 inches each in length and many larger, and the whole leader is 60 feet long. The maker of this leader made it during one year, and used it as he needed it, cutting it in six-foot lengths. How long it originally was I cannot say, but I have yet the length stated wound on a wooden lath and as good as ever and capable of lifting any brook trout I have lately seen. Certainly a five-pound trout would not break it by any fair means.

Spanish gut is usually imported whole, but the finest gut is what is known as "drawn" through steel plates pierced with holes of the required diameter. The Japanese gut in my possession does not need this, but the Spanish does, and the English dry-fly angler needs the very finest gossamer leader in his business. This "drawn" gut is not much used in the United States where the more rapidly flowing waters for the most part preclude the "dry" or "floating-fly" form of fishing.

Gut is often tinted or stained to render it less visible in the water. Its natural white brilliancy is too apparent on a sunny day. In order to disguise this there are several excellent recipes known to the expert leader-maker and fly-tier and I give the following as the most perfect and innocuous of their kind:

(1) Mist color: Handful logwood chips, quart soft boiling water, copperas size of small nut. Immerse for 10 minutes and dry slowly in open air. This rather strengthens than weakens the gut. (2) Light brown may be dyed without injury to the gut by steeping in strong coffee infusion about 25 minutes. This dye is very useful for gut to be used on streams having a brownish tint from much pine branch coloration. (3) A blue tint is obtained from the infusion of a few grains of gum logwood and a few grains of sulphate of iron, watching the depth of color and when blue enough immerse the gut in clear water. (4) Another fine sky color is obtained by infusing a teaspoonful of ground logwood, a pinch of carbonate of soda and piece of copperas the size of a coffee bean. This is the recipe of the

famous David Foster of Dovedale, England, Derbyshire, whose skill was Waltonian, amongst the trout of the Dove river.

The strengthening and preservation of gut is easily accomplished and should be done when the gut is sufficiently valuable to warrant the process as in the case of salmon leaders of long and thick gut. The following recipe has been used by an accomplished and scientific angler for this purpose: One ounce of one part chromic acid and five parts of water to five ounces of pure glycerine. Steep the gut for 10 days and then submerge in one part of carbolic acid and five parts glycerine, preserving it in this solution until required for use. Gut can be kept from one season to another in this way without change of color and with added strength, whereas if it were laid aside in a dry place or exposed to the dust and air, in a few months it would become brittle and useless.

The selection of the right gut and the right tying of the strands constitutes an art in which there are very few experts. Yet the modus-operandi is simple and only requires the proper temperament for success. In the first place, a fine quality of gut is indispensable for both trout and salmon leaders and the magnifying glass must be used to determine and reject any flawed strands or flat or irregular appearing ones, no matter how insignificant the blemish may seem to be.

Having selected the proper material it should be softened in soft water (filtered rain water for choice) and allowed to remain over night. A damp flannel should be spread before the tier so that no wet strands may dry in the process of tying. It is essential that the gut should be flexible and easily bent. The next process is the knot and this is a difficult task to teach in writing, but if the reader carefully follows directions he will not fail to get the correct idea. To begin the leader a loop of the ordinary kind is tied in one end of the first strand. There is no complication in this knot. It is a simple loop passed round and pulled through and drawn tight. The other end of the strand is formed into two half-hitches and held between the finger and thumb of the left hand. With the right finger and thumb the end of another strand is passed through the two half-hitches and two half-hitches are to be taken round the straight strand above the other two hitches. The four hitches are then drawn tight by means of the two straight lengths of gut, so that they lie together superimposed. This knot is the strongest knot possible for gut, as it does not permit slipping and is susceptible of being cut close, so that it is neat and secure at all times. Another joining knot is made by taking the two ends of two gut strands and laying them side by side, turning them round into a circular loop and passing the free two ends through the loop, pulling the two strands tight and snipping off the short ends. I prefer, however, the double-hitch knot to every other one that is used. Of course, snells are looped in the same way as the leader, and when reinforced so as to be double near the shank of the snelled hook, it is only necessary to tie a long loop and cut through the end of this loop, tying in the two ends on the shank with waxed thread.

(Concluded next week.)

"THEM BORSABONE DORGS."

The following reminiscence by Captain Thos. L. Merry will be interesting to the lover of a good rod and reliable duck dog. Charles Murphy, of Newark, conceived the idea of making a split bamboo rod after seeing the "made masts" of a California clipper ship. Incidentally we might mention that Murphy was probably the introducer and maker of the trunk rod or "Sabbath breaker," but, however, that is another story and we will let the captain tell the present one:

"I was born in New York in 1834 and lived there till 1843 when, my father being four years dead, my mother and I went to live with my uncle who lived on Staten Island. My mother re-married in 1846 and we lived in New York till May, 1849, when we took up our residence in Newark, N. J. Before leaving New York I was in very poor health and my mother took me to Dr. Edward Delafield, one of the most eminent physicians in the metropolis. He gave me three separate examinations and then said: 'Take this boy out in the country and give him a shotgun and a fishing rod. Let him get out of it all the fun there is in life for he will never live to see twenty-two years.'

I thought of this at fifty, again at sixty and, you may rest assured when I reached the patriarch's age of three score and ten. This may explain to some of my less intimate friends why I grew up an unclassed man, having no profession above that of swift-water steamboat pilot.

On reaching Newark I went to school one year, my Gamelle being a sturdy little Irishman named Bernard Kearny, who was a good teacher of penmanship but not much of an instructor at anything else. One of my schoolmates was the late Michael Corrigan, Archbishop of New York. Even that year of school was too much for my restless spirit. In those days there were no silk manufacturers on the Passaic River and the water was clear as crystal from Belleville up to Paterson, and there it was I caught my first striped bass, while Daniel Webster and Henry W. Herbert (Frank Forrester) sat in a boat not forty yards away and watched me land the first glorious six-pounder, caught with a bait of "shedder" crab.

Down on the brackish meadows, overflowed ever since the bursting of the Maple Island dam, was a patch called the "Scalded Meadows" where no grass ever grew, but it was sprinkled all over with little hassocks; and among these in the spring and fall seasons, you were good for a dozen "English" snipe, almost any day of overcast weather. In August and September these meadows afforded food and shelter

for all sorts of wading birds, such as yellow legs, dowitchers (called robin snipe there) willets, marlins and the other straight-billed phalarope known on Long Island as the "piote" and in New Jersey as the "Virginia woodcock." I built a blind not far from the site of the old ruined dam, with Henry M. Coxe (now over forty years dead) as a collaborator; and there I set out five decoys every day. One day I walked down there to find six decoys set ahead of me. On reaching the blind I found a man there who introduced himself as Charles Murphy. We soon became fast friends and had several bass-fishing excursions to the upper Passaic, in waters where there has not been a bass caught since 1870. One day I started to go down to New York and at Center-street station, Charley Murphy got aboard. On reaching the city he asked where I was going and I told him I was going down aboard the new ship Simon Morton, of which my cousin (William L. Merry, now United States minister to Nicaragua) was second officer. The ship was loading for San Francisco, under the command of Capt. Hepburn. While looking about the docks Murphy's eye was taken with the masts which were made in five pieces and securely bound with heavy hoops of iron. Murphy was a journeyman carpenter and could do better work with a jack-knife than most men could do with a saw and plane. He was neat in everything.

"I hev got an idee, Tom," he said slowly. "Take it on to Washington and give it to the United States Senate. They need it," I growled.

"Never you mind," replied Charley, "I can take some lancewood and cut into fine strips like that mast and make a pole that will hold a twenty-pound bass easier than that pole of yours will hold one weighing five."

The split bamboo rod soon followed the original lancewood rod made by Charley, which he presented to Henry Coxe. Murphy had tested materials with weights and found that bamboo had greater tensile strength than greenheart which proved itself superior to lancewood. He was the real inventor of the present fly-rod, though he never turned out as good work as Fowler, Devine or Nichols, of Boston, they being just as far ahead of Orvis, Conroy and a dozen other rodmakers. But, the reader will ask, what has all this piscatorial pronouncement to do with the caption of this article?

Summer had come and gone, for the year was in its sheaf. The "flicker" tapped steadily away at his winter mast of acorns that he had driven into the trunk of some old dead oak. The squirrel barked merrily on the limb of the hickory tree that was furnishing him with his fodder for the next six months. And, in the language of that most gifted of Pennsylvania's most gifted sons:

'Alone, from out the stubble, piped the quail
And croaked the crow, thro' all the dreary gloom
Alone the pheasant, drumming in the vale,
Made distant echo to the cottage loom."

Long streaming files of ducks came in triangular phalanxes from the frozen fens of Labrador, as with mighty but weary pinions, they fanned the thin and frosty air aloft. I had shot marlins, willets, dowitchers and yellowlegs by the dozen but I had yet to kill my first wild duck. Meeting Murphy on the street one night, he told me to come up to his house and see what a nice lot of "stools" he was making for the approaching duck season. He had finished two of them and had just begun to paint them as I entered his little workshop. Now as I stood admiring them a low growl came from under the workbench and Murphy called out

"Be quiet, Wayne, go back and lay down."

"No, bring him out and let me look at him. Is he a Setter or a Pointer."

"He's neither one and yet a little of both," replied Charley. "He's a Borsabone dorg."

"A wh-a-a-at?" I gasped.

"He's jist as I tell ye. He's a Borsabone dorg, raised by Mr. Borsabone, an old Frenchman that lives up as ye go from Morristown to Madison. They're mongrels but the finest duck dogs that ever ye saw," replied Charley.

"Wayne" now came out and Charley made him walk up and "shake hands" with me. He was a chocolate colored dog and very curly in his coat. Murphy had given \$10 for him as a pup and named him after old "Mad Anthony." He became fast friends with me after a few minutes. After two days' shooting over him I got so in love with "Wayne" that I resolved to buy one of those dogs for myself. So one day I borrowed Henry Coxe's buggy and went in search of the breeder, whom I found to be a highly cultivated French gentleman named Bois-Aubin. From him I purchased a puppy that grew up to be a splendid retriever. Mons. Bois-Aubin was a man of noble birth who had been driven out of Haiti by the revolution which placed a fat negro on the throne of that island. He explained to me how he came to breed this mongrel but useful lot of dogs. He got a large and powerfully built Newfoundland bitch and mated her with a liver-colored pointer. The bitches of that cross he mated with a black Water Spaniel; and their daughters he bred to a red Irish Setter called "Phil," owned by Hon. Philo T. Ruggles, of New York. These dogs he found ready sale for as they were very hardy and did not flinch at the thin ice that a dog encounters when retrieving the ducks in the earlier part of the winter. My dog looked very much like a Chesapeake Bay dog, save that he had a fine flag instead of the rat-tails the Chesapeake dogs generally have. This dog I called "Ethan Allen," and "Al" for short. When I left Newark in 1852 I sold him to a man in New York for \$25. In 1857 I returned East and while there made a trip out to Madison and bought another of these dogs for \$20, he being six months old. He stood the hot journey to Colon all right and it cost me \$20 to get him across the Isthmus on the

Panama railroad. On the third day at sea on this side, I noticed symptoms of sickness and the ship's doctor could do nothing for poor "Laddie." He was thrown overboard just after dark and I have never since owned a sporting dog.

I am getting old, fat and lazy. I hunt very little and when anybody says "hunt," I say, "Let's go a-fishing?" I never joined the order of quail-hogs or duck-swine, but I am already a pastmaster in the Noble Army of Trout Liars. I am poor, also, and cannot afford now what I used to spend money for about six years ago. I am not as rich as John D. Rockefeller, although I am nearly as bald. But if I had his money I would buy me a hammerless 14-gauge gun and one of "them Borsabone Dorgs."

HIDALGO.

THE HUNTING SEASON IS OF GOOD PROMISE.

The salt marsh districts last Sunday morning early echoed and re-echoed with a popping of the duck hunters' guns that rapidly developed into a general fusillade that was not unlike the lively skirmishes that are the prelude of a great battle. On every shooting ground in the bay counties marsh sections the hunters were never more numerous on the opening day of the hunting season. So closely bunched were the shooters in some sections of the Alameda marshes that hunters had posted themselves along the banks of sloughs not more than 100 yards apart. In that district alone it is estimated that there was at least 1500 men and boys out with their guns.

Nor were they less numerous in the Sonoma and Petaluma marshes. The down train to this city on Sunday night on the Sonoma branch of the California Northwestern road consisted of ten cars filled with returning duck and quail hunters. So was it with all incoming trains that connected with ferry boats for this city; each train and boat had its quota of returning huntsmen.

Results generally were good, bad or indifferent according to localities. Weather conditions were excellent, particularly so on the Suisun marsh hunting ground. A fairly strong westerly wind Saturday night developed into a just strong enough northwest wind on Sunday morning. This with a suspicious flavoring of a lower temperature in the atmosphere in the morning made practically an ideal California duck shooting morning—or duck hunting morning as you like. The majority of the gunmen in that section were stationed in blinds over baited ponds and did not hunt or "work" the marsh for birds. However, working a tule marsh in the Suisun is almost an impossibility and pond shooting is the only practical way of getting results in one of the finest duck shooting sections—that is contiguous to a metropolis—in the world. Members of the Field and Tule, Ibis, Teal, Cordelia and Family Gun Clubs, at Herman Oelrichs' shooting box, and other well known shooting resorts got many limit bags.

On Joyce Island, further north, good shooting was the order of the day. In the Collinsville section the sportsmen had excellent shooting. Many of the gun club members who shot north of Collinsville staid over until Monday evening, the sport being of an alluring character.

On the Sonoma and Petaluma marshes a lack of water in the ponds cut the shooting down correspondingly.

At the "bridges" near Alviso many limit bags were made by shooters from this city and San Jose. At Mt. Eden, Alvarado and other places on the East side good bags were too numerous to allow of individual enumeration.

The Empire Gun Club members were at the Elkhorn slough preserves in force and had a splendid opening day shoot.

A noticeable feature among the returning shooters was the number of Japanese gunners who had been out in marsh and field. The 6:10 boat that connected with the narrow gauge train from the east side brought over about forty "John Keeners." Many of them were rigged out in the latest styles of khaki hunting suits. It was evident from the game they brought in that everything with feathers on was fair game. One pudgy little brown man proudly carried a seagull up Market street, others had rail, "spaterias," mudhens, shore birds and a miscellaneous assortment of other birds.

Quail hunters had but fair sport, few limit bags being reported. Weather conditions for a week previous were too warm for good sport, the ground was dry and dusty, making it hard tramping for the hunter and arduous work for the dogs.

The outlook for the season, for both duck and quail hunting, is, on the whole, better than for many seasons past.

San Antone Creek—Notwithstanding the poor luck of a number of good fishermen at this striped bass water recently, the fact that the fish are there is patent. Mr. Bliss landed an 18 pounder about two weeks ago. A. M. Cumming and Mr. Church landed thirteen fish last Friday and Saturday, some with the trolling spoon and some with clam baits. Mr. Church hooked the largest fish, one that weighed 13½ pounds. Last Sunday quite a number of anglers were on the slough, but with the exception of several resultless strike, the day's sport was barren.

Last Saturday a 15 pound bass and the Sunday previous an 18 pound bass were caught by Mr. Hucks, who fished in Shell slough, on the Napa marsh side.

Striped Bass at Eckley—Recent reports from Eckley Station, Contra Costa county, are to the effect that the striped bass are still plentiful in the straits and good catches of fish from three to fifteen pounds weight have been made.

Eckley Station is about a mile east of Crockett on the S. P. road.

AS TO AMERICAN BRED DOGS.

The Editor Breeder and Sportsman, San Francisco. Dear Sir—In a recent issue of the Breeder and Sportsman you mention the case of Mr. Lett's Collies. Since your article appeared I asked for a ruling on the question of American bred dogs and have just been informed that these Collies are not American bred. The letter says: "The question has been definitely decided by the A. K. C. An official ruling has been promulgated by the Rules Committee."

We may assume that such an important thing as a ruling by the Rules Committee would be given publicity in the Gazette, yet I have been unable to find anyone who knows anything about any such ruling being mentioned in the Gazette.

Presumably the rules of the A. K. C. are published in dog show premium lists for the information of exhibitors, yet in no place in the rules does it specify what an American bred dog is.

Rule 8 tells us that a bitch sent abroad to be bred and returned to this country to whelp shall have her progeny "considered" as American bred. That is a ruling on a certain specific case and does not cover the question of American bred. If this is so, then no other dog can be American bred, which is absurd, as what then is the nationality of the thousands of dogs whelped yearly in this country?

An exhibitor cannot guess at the meaning attached to a rule by the Rules Committee. Rules should be sufficiently plain so that even the utmost novice in dogdom can understand them.

That something is radically wrong in this rule or in the method of recording wins at 22 Liberty street is also shown by this case.

The Collie "Clinker of Holmby" won first novice at Los Angeles and was given credit by the A. K. C. for such win in the records. The dog is now decided not to be American bred and therefore his win at Los Angeles should not have become a matter of record but should have been cancelled by the secretary of the A. K. C. just as any other win made by a dog not eligible to the class.

Apparently while we are told that the A. K. C. had decided this question of American bred dogs, it had never before found it necessary to make a new rule so that its secretary might know the nationality of a dog from the entry.

The following is a notice sent out to clubs this week: "Kindly note for future use that entries in the novice class must give the breeder, sire and dam, which details are necessary to show that the entries are American-bred and entitled to compete in that class." Now how's that for a rule? Just read it over carefully again and then tell me how such a rule can help the secretary of the A. K. C. or anyone else to tell the nationality of the entry. Just imagine the following entry:

Collies—Novice dogs—John Thompson, Scotch Mist. Id. April 1st, 1904. Breeder, John Buchanan. By Highland—Nectar—black and white.

Now is that dog American or not? No wonder Rule 8 is vague and indistinct in its meaning when such a rule as the above is sent out in sober earnest by the same committee.

If the Rules Committee will only re-write Rule 8 so that exhibitors will know what an American bred dog is and then make it obligatory on an exhibitor to state on the entry blank whether his dog is American bred or not, the committee will save not only the secretary of the A. K. C. from guess work and exhibitors from annoyance, but also will save over-worked club officials much toil when the judging of special prizes commences.

For the convenience of your readers I publish the following, which is the only information given out by the A. K. C. on American bred dogs:

1. American-bred dogs. NONE.
2. "Considered" American-bred dogs—The following: A bitch sent to Europe to be bred, bred there and returned to whelp in this country. Bitch to be property of American citizen. The progeny of such a bitch to be "considered" American-bred.

3. NOT American-bred dogs—The following: A bitch, sister to bitch in No. 2, is bought in Europe by an American citizen. After he becomes the owner he causes her to be bred to the same dog as was her sister in No. 2. The bitch is then sent to America, whelps here, and the resulting puppies are not even "considered" American-bred.

The difference, therefore, between an American bred and a foreign bred dog is according to the present rules of the A. K. C. a journey across the Atlantic and back.

Now, Mr. Editor, "bred" means begot, and as both litters of puppies are begot in Europe, they are European bred and only American born. Won't you ask the Rules Committee for we poor exhibitors to give us a straight American bred dog, without any "consider" in its make up. Just a plain American bred and a foreign bred, with a definition of each which even an old exhibitor can understand?

Yours obediently, NORMAN J. STEWART.
San Jose, October 18th, 1905

The American Kennel Club, of course, is the governing body for American dogdom, notwithstanding the ruling on the case above referred to, we are still inclined to believe that, as so far as the spirit of the rule concerned, the Collies should be accepted as American bred, for they were so to all intents and purposes.

In the event that the A. K. C. does not feel inclined to be specific in details in this respect, we make the further suggestion that the status be defined, of dogs imported in utero.

FREE SAMPLE.

A generous sample of "3 in One" will be sent free to any run owner by addressing G. W. Cole Company, 141 Broadway, New York City. A generous quantity of samples will be furnished to gun clubs for the use of members, upon application. Mention this paper.

LOS ANGELES JOCKEY CLUB

ASCOT PARK

\$300,000 IN STAKES AND PURSES

NO PURSE LESS THAN \$400

STAKES TO CLOSE WEDNESDAY, NOV. 1, 1905,

For the Winter Meeting of 1905-1906, beginning Thursday, November 30, 1905.

The BROOKS COURSE is 73 Yards short of a Mile and a Quarter on the Main Track.

The Jonathan Club Handicap—\$1250 Added. A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1250 added, of which \$250 to second and \$150 to third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the announcement of weights, to carry 5 lbs. extra. To be run the Opening Day, Thursday, November 30th.

The California Club Handicap—\$1250 Added. A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1250 added, of which \$250 to second and \$150 to third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the announcement of weights, to carry 5 lbs. extra. To be run Saturday, December 16th.

The Hollywood Handicap—\$1250 Added. A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1250 added, of which \$250 to second and \$150 to third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the announcement of weights, to carry 5 lbs. extra. To be run Monday, December 25th.

The Rose Selling Stakes—\$2000 Added. A Selling Sweepstakes for three-year-olds and upward at the time of closing. Mr. George Rose donates \$1000 of the added money. Entrance \$10, \$40 additional to start; \$2000 added, of which \$100 to second and \$200 to third. The winner to be sold at auction. Those entered to be sold for \$1000 to carry weight for age; if for less 3 lbs. for each \$100 to \$2000, then 1 lb. for each \$100 to \$800. Starters, with selling prices, to be named through the entry box at the usual hour of closing, the day before the race, and those so named to be liable for the starting fee. To be run Monday, January 1st.

The Ascot Handicap—\$2500 Added. A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$50 additional to start; \$2500 added, of which \$500 to second and \$300 to third. Weights to be announced five days prior to the day of the race. Winners of a sweepstakes or of two races of any value after announcement of the weights, to carry 5 lbs. extra.

The Ascot Derby—\$2000 Added. A Sweepstakes for three-year-olds of 1906 (now two-year-olds). Entrance \$10, \$50 additional to start; \$2000 added, of which \$500 to second and \$250 to third. Winners of a sweepstakes of the value of \$1500 in 1906, 3 lbs.; of two of 900 or one of \$2000, 5 lbs. extra. Non-winners of a sweepstakes in 1905 and 1906 allowed 5 lbs.; maidens 14 lbs. Allowances not accumulative.

The Ascot Cup—\$1500 Added. A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$40 additional to start. A silver cup and \$1500 added, of which \$300 to the second and \$200 to the third, the fourth horse to save starting fee. Weights to be announced five days prior to the day of the race.

The Ascot Oaks—\$1250 Added. A Sweepstakes for three-year-old Fillies of 1906 (now two-year-olds). Entrance \$10, \$40 additional to start; \$1250 added, of which \$250 to second and \$150 to third. Weight 115 lbs. Winners of sweepstakes, or three races other than selling purses after January 1, 1906, to carry 5 lbs. extra; non-winners of a race of \$500 in value at any time, allowed 5 lbs.; maidens, 10 lbs.

The Pasadena Handicap—\$1250 Added. A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1250 added, of which \$250 to second and \$150 to third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the weights are posted, to carry 5 lbs. extra.

NO STAKES FOR STEEPLECHASE OR HURDLE HORSES. We find that overnight races produce much better racing, and will offer two races each week for this class of horse.

Added Money to Stakes. No Purse Less Than \$400. Overnight Handicaps and Special Races with \$500 to \$1000 Added. Commencing January 1, 1906, will be given two or three races each week for Two-Year-Olds.

All Communications should be addressed to

RACE COURSE:
Saratoga Springs, N. Y.

THE SARATOGA ASSOCIATION

For the Improvement of the Breed of Horses.

STAKES OF 1907 AND 1908

Entries Close Monday, Nov. 6, 1905

TO BE RUN FOR IN 1907 THE HOPEFUL FOR 1908

THE SPINAWAY OF \$10,000

FOR FILLIES TWO YEARS OLD. FOALS of 1905—By subscription of \$100 each, or \$5 if declared by November 1, 1906, or \$50 if declared by June 1, 1907. Starters to pay \$150 additional. The Saratoga Association to guarantee the gross value of the race to be \$10,000, of which the second horse shall receive \$1000 and the third horse \$500. The Nominator of the Winner to receive \$500 out of the stakes. Winners of a race of the value of \$5000 to carry 3 lbs. extra; of two of \$3000 or one of \$7500 6 lbs. extra. Non-winners of \$1000 allowed 7 lbs. By filing with the Saratoga Association on or before November 1, 1906, an accepted transfer of the engagement in this stake, the Nominator will be released from further liability.

Five and a Half Furlongs.

By subscription of \$10 each, for the produce of mares covered in 1905, the only forfeit if struck out by November 1, 1907. If left in after November 1, 1907, a further subscription of \$50 each, and if left in after May 1, 1908, a further subscription of \$100 each. Starters to pay \$250 additional. The Saratoga Association to add \$5000. The second horse to receive \$3500, the third horse \$2000, and the owner at time of entry of the mare producing the winner \$2000 out of the stakes. Colts, 122 lbs.; fillies and geldings 119 lbs. Winners of two races of \$2500, or one of \$4500 to carry 3 lbs. extra; of four of \$2500, or two of \$1500, or one of \$9000, 8 lbs. extra. Horses not having won \$1000 allowed 7 lbs. If a mare in this stake drop her foal before the 1st of January, 1906, or if she have a dead or more than one foal, or is barren, the entry of such mare is void. By filing with the Saratoga Association prior to November 1, 1907, an accepted transfer of the produce, with its engagement in this stake, the original Nominator will be released from further liability as to the engagement of the produce.

Six Furlongs.

THE RULES OF RACING, adopted by the Jockey Club, govern all races run under the auspices of the Saratoga Association.

Entries to either or all of the races advertised will be received only with the understanding, and on the agreement of the subscriber, that the provisions of Racing Rules 42 and 43 (hereto appended) form a part of and govern the contract.

Rule 42. Every person subscribing to a sweepstakes, or entering a horse in a race to be run under these rules, accepts the decision of the Stewards on any question relating to a race, or to racing.

Rule 43. At the discretion of the Stewards of The Jockey Club, or of the Stewards, and without notice, the entries of any person, or the transfer of any entry, may be refused.

ENTRIES TO STAKES CLOSE NOVEMBER 1st. Records made on and after November 9th no bar.

ENTRIES TO PURSES CLOSE NOVEMBER 23rd. Records made on and after November 9th no bar.

No race longer than five heats. American Trotting Association Rules to govern, except that hoppers will be allowed. Six to enter and four to start. Entrance fee to harness races, five per cent and five per cent from money winners.

Two horses may be entered in one class and be held but for entry fee on horse that starts; but if neither starts, one entry fee will be required. A horse may be entered in two races and be held only for entry fee in the race in which he starts; but if no start is made, entry fee will be required in one class, and if entered in a stake and a purse race entry fee will be charged on the larger amount.

ENTRIES TO RUNNING RACES close at 6 o'clock the evening before the race. Entry fee in running races five per cent. No additional fee from money winners. Western Jockey Club Rules to govern running races, as far as applicable. Outlaw horses barred.

The management reserves the right to change the order of the program without notice.

Our meeting follows close of Southern California Circuit, which offers \$17,200 for harness races.

Remember we have a new \$50,000 plant, first-class mile and half-mile tracks, and the grandest winter climate in the world.

Horses unloaded at the grounds without change over either Santa Fe or Southern Pacific railways.

W. N. TIFFANY, Supt. of Speed, Phoenix, Arizona.

Team Wanted.

MUST BE SOUND, KIND AND GENTLE, and thoroughly broken. Not afraid of cars and automobiles. Stand about 15-3 hands and well matched. Address R. G. H., care BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

Roadster Wanted.

Black Mare or Gelding; must be sound, handsome and gentle, between 4 and 8 years old, about 15 3 hands and be able to show a 3 minute gait. Address F. W. KELLEY, Breeder and Sportsman Office.

CEMENT FLOORS FOR STABLES.

A cement floor is made in the same way cement sidewalks are laid. A great many farmers who have been writing the writer seem to think that in preparing to lay cement feeding or barn floors they should dig below frost point and fill with broken rock, gravel, or cinders to make a firm foundation upon which the floor should rest.

This is a needless waste of time and labor. Simply level the ground, or if you desire to have the surface of the floor level with the surrounding ground you should dig four or five inches deep. Hoard's Dairyman gives the plan for preparing the cement as follows:

Use any standard brand of cement, and to one part of cement add seven parts of gravel, made up of good, coarse, sharp sand and pebbles up to two inches in diameter. Spread the gravel on a platform to an even depth of a few inches, and upon this spread the cement evenly with shovels. Then work the cement thoroughly into the gravel by turning the two together several times, until the whole is a uniform color. To this mixture add enough water to make it easily handled and so it will quake under the tamper and the water flush to the surface when tamping is complete.

Do not wet the mixture until ready to use it, and the suggestion is made to have it in place and tamped in one hour after wetting. The mixture must be turned several times after the water is added to make it evenly wet.

The concrete is put in place in sections, five inches deep and six feet wide, crossways of the stable floor. Commencing at one end, place a board five inches high, six feet from the end, and fill the sections to the full depth as you go along. When one section is filled and thoroughly tamped until it quakes, move your board ahead six feet and fill in the fresh space. Sections may be less than six feet wide, but should not be more.

When the concrete is in place and is still green you are ready to put on the skim coat. This is made up of sand and cement in the proportion of two sand to one cement, mixed to a good, even mortar, spread on with plasterer's trowel to the depth of one inch and finish smooth like a cement sidewalk. Make no effort to give the concrete a smooth finish, for the cement coat gets a much better bond on a rough surface.

A good way to roughen the surface for the skim coat is to walk around on your heels while the concrete is being tamped into place, but on no account disturb it after setting has begun, or you will spoil it by preventing further setting. In putting on skim coat use a one inch strip and apply mortar as thick as the strip.

After the skim coat is on and smoothed down it must be roughened to prevent stock from slipping. This is done as follows:

To a piece of six inch planed board, one foot long, fasten with small finishing nails triangular shaped strips as long as the width of the board, one-fourth of an inch deep, and one-fourth of an inch wide at the base, spacing them about two inches apart. At one edge of the board the strips are beveled off at a good angle so they will not catch the cement when the corruga-

tions are made.

When the "corrugator" is made and drawn across the freshly-troweled surface coat the strips will cut ditches one-fourth of an inch deep and one-fourth of an inch wide at the top, which will make a surface sufficiently rough to prevent the floor from being at all slippery.

SUCCESSFUL WOOL SALE.

The first wool sale held in the town of Wheatland was a complete success, and practically all the wool offered was disposed of at fair figures for fall clip, says the "Four Corners."

The sale was conducted at the C. K. Dam warehouse, and to Mr. Dam's efforts is largely due the complete success of the first Wheatland wool sale. His experience heretofore stood him in good stead and matters were so arranged that it was a simple task for buyer and seller to reach an understanding quickly. In this manner the sale was conducted without a hitch, and was satisfactory to all concerned.

In all 350 bales were represented and we give below the transactions:

Eight bales, C. K. Dam, sold for 16 cents to Rosenberg.

Fifteen and a half bales, D. P. Durst, sold for 17½ cents to Marysville Woolen Mills.

One hundred and twenty-six bales, Price Blackford; bid rejected; afterward sold private to Green.

Three bales, Chas. Greifman, sold for 14½ cents to Marysville Woolen Mills.

Fifteen bales, Butler & Bergman, sold for 15½ cents to Green.

Thirteen bales, Wm. Carter, sold for 16½ cents to Rosenberg.

Six bales, H. Jasper, sold for 15 cents to Pindley.

Nine bales, T. W. Peckham, bid rejected; afterwards sold private to Green.

Ten bales, Jeff Thomas, sold for 15 cents to Green.

Seventeen bales, A. Robinson, sold for 16½ cents to Rosenberg.

One bale, E. E. Jasper, bucks, sold for 13½ cents to Dickens & Kerns.

Two bales, B. Church, sample of 27 bales bid rejected; afterward sold private.

Two bales, Wm. Erwin, sample of 35 bales, bid rejected.

One bale, F. W. Anderson, sold for 16½ cents to Marysville Woolen Mills.

Seventeen bales, George Ahart, sold for 15 cents to Dickens & Kerns.

Three bales, James Tucker, sold for 15½ cents to Green.

One bale, Frank Dixon, sold for 13 cents, Dickens & Kerns.

One bale, M. Olsen, sold for 17½ cents to Marysville Woolen Mills.

One bale, George Oakley, sold for 15 cents to Green.

Twenty-six bales, Dan Click, by sample, to Green.

A SHORT CUT IN BUTTER MAKING

While in Ontario last winter in attendance at the dairy conventions, Professor H. H. Dean announced a "short cut" in butter making which promised much in economy of time and labor, and indicated better results and finer flavor; but time was wanted to test out the market side of the new experiment. It was in brief, to take the sweet cream from the separator at about 3 per cent fat, cool it down to about 50 degrees immediately, put it into the churn, then add the starter, and churn at once. John Gould, in Ohio Farmer, says there is no difficulty in churning sweet cream, if it is about 32 per cent fat, and the temperature is down to about 52 degrees, and the granulation is about perfect, and its churning is quite as exhaustive, as with very ripe cream. It has been market taste that has pronounced against sweet cream butter. Now about eight months' market verdict has been given to the new plan, and it is very pronounced in its favor, so much so that the Montreal market is paying a premium of ¼ cent over market price for it. For six months the scores for sweet cream butter were considerably higher than the ripened cream butter. In storage the sweet cream butter lost 3.3 points, and the ripened cream butter 7.8 points.

When the butter is taken from the churn, it has the sweet cream flavor, but in 48 hours afterwards it has taken on the fine, delicate aroma that is desired; and time proves that it retains it much longer. Under conditions similar to the ripened cream butter it scores readily 97½ and 98 points.

It is fair to state that the yield of the sweet cream butter is slightly more than the other, but this may be due to

slightly higher moisture content. It was also found that the high quality of this butter was better maintained at a high score by pasteurizing the milk, which was as applicable to the ripened cream butter. In this there was a great gain. The labor and attention to holding vats of cream and maintaining temperature for 24 hours or longer and care of the tanks, were wholly dispensed with, and the liability of the culture going wrong in the time does not enter. It was also noticed that butter made early in May was taken out of storage early in June with its score up one point, a thing never known in ripe cream butter; in fact the experts scored the latter as having an indicated fishy flavor.

This is a matter worth the attention of the creamery owners on this side of the Canadian line, and if it is a fact, save the labor and the watching of the cream vats at least. The particular thing in this new method is in knowing that the cultures are true and kept pure and ascertain to a certainty the amount to use. Of course this new plan does not apply to creamery establishments that use gathered cream from a thousand or so patrons, for this cream is as a rule actively ripe when received and often wants a neutralizer instead of a starter, a matter indicated by the mixed qualities of general market butter, even if Elgin is stenciled on the tub head.—Rural World.

SHEEP KING OF THE WORLD.

Ruler over a territory of 1200 square miles, with a frontage of 270 miles of windswept sea coast, G. L. Waldron, the sheep king of the world, now in this country from Patagonia to study the meat packing industry, has arrived in Los Angeles.

Mr. Waldron, in addition to supervising his little kingdom, portions of which he does not see oftener than once in three years, also has two packing houses, employing 500 men and having an annual capacity of 70,000 sheep, the size of each year's slaughter.

The great ranch is situated on the tapering point of the Southern Continent, runs along the coast of Argentina to face the Atlantic, borders the Straits of Magellan and on the Pacific includes a portion of Chile.

In addition, most of the island of Tierra del Fuego, with 40,000 acres of the Falkland Islands, is under the control of this man. He is manager and largest owner in the Patagonia Sheep Raising Co., upon whose preserves three-quarters of a million sheep feed, and whose output of wool is 1,500,000 pounds annually.

In all the wide stretch of territory there is not a city, but seven stations mark the places where once in three months the herders congregate.

During the Boer war this company supplied the English army with its fresh meats. At the present time the cold storage method of preserving meats has been done away with and the company is now putting up its mutton in tins, to be sold in all parts of the civilized world.

Mr. Waldron is on a tour of the world, having already visited England, Africa, India and Japan.

From Los Angeles he goes to the Grand Canyon and from there to Chicago to study the methods of the great packing houses.

IMPROVING OLEO WITH COW HAIRS.

Concerning the mixing of cow hairs in oleomargarine for the purpose of deluding customers, John St. John, an Omaha creameryman, is ready to swear that this unholy deception has been practiced before his very eyes. "I have long regarded the old butter

story as a joke," he said, "until I visited an oleo factory recently. In some states manufacturers take particular pride in making the deception complete. There was a large amount of oleo, colored a rich yellow, ready to make into prints. The man operating the print machine went to a bench and brought over a small box with a sliding cover. When he began to make the prints, he opened the box and took from it and placed in every piece of butter before it was pressed into shape two or three white hairs. They were fine and white, and I stepped over and looked at them. There was a whole box of the hairs, laid in as straight as if they were toothpicks. They resembled cow hair although I do not know whether even they were genuine or not. They looked too white and long and straight, but the oleo maker was putting hair into his product to deceive the people and make them think it had been near a cow."

If possible, select your brood sows when the pigs are five or six months old.

Tuttle's Elixir

Well nigh infallible cure for colic, curb, splint, spavin and other common horse ailments. Our long-time standing offer of

\$100 Reward

for failure, where we say it will cure, has never been claimed. All druggists sell it. Tuttle's Family Elixir, the great household remedy. Tuttle's American Worm Powder cures. American Condition Powders, White Star and Hoof Ointment. 100 page book, "Veterinary Experience," free. Be your own horse doctor. Makes plain the symptoms, gives treatment. Send for copy.

TUTTLE'S ELIXIR CO., 52 Beverly St., Boston, Mass. Mack & Co., San Francisco and F. W. Braun, Los Angeles, California Agents.

A GAME GETTER
doesn't allow rust on his gun—neither does "3-in-one." Heavy oils and greases cannot prevent rust because they simply coat the surface and dry out.

3-in-One
seeps into the pores of the metal, forming a delicate, imperceptible overcoat that prevents rust or tarnish on the barrel, in the bore, at any and every action point. Lubricates the magazine, triggers, etc. Our booklet tells—a sample proves—both free.

G. W. COLE CO.
Washington Life Bldg., New York

MERIDIAN 2:12 FOR SALE.

MERIDIAN 2:12 IS A STANDARD-BRED dark brown Stallion, foaled 1892. Excellent disposition; perfect conformation; sure foal getter. His oldest colts are four years old and all his get have style, good action, good size and need not be. He is by Simcoe n 2:13 (sire of Dan Q 2:07½ and 12 in 2:31½); dam S June 2:23½ by Sidney 2:16½; next dam Addie S by Steinway. Started seven times in races, won four first monies and was never outside of the money. He is sound, in good condition will be sold cheap. For further particulars address

R. S. BROWN, Petaluma.

FOR SALE.

Robizola 2:12 1-4 (REG. No. 33306) Sire Robin 2:37½; dam Myrtle 2:13½ by Aniero. Dark bay mare, 15½ hands high; weight 1050. High-class trotting mare. Winner five times on Grand Circuit in 1913. Trotted in 2:10½ this summer. Sound, stylish and a good roadster. For further particulars address

Dr. J. W. CLARK, Santa Rosa, Cal.

FOR SALE.

THE HANDSOMEST TWO-YEAR-OLD DAPPLE colt in California. First dam, Babe by Dawnlight 2:1484 he a son of Dawn and h-dam Alida (dam of Directa 2:28) by Admiral. Babe is a half sister to the good colt McFadyen being out of Bee. Faced a mile in June in 2:27 and is paid up in the Breeders Fairly. For particulars address

E. D. DUDLEY, Dixon, Cal.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbones and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O.

Three-Legged Horses

Are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Though it may duty for the benefit of horses to recommend Quinn's Ointment, I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, winduffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc.

W. B. Eddy & Co., Whitehall, N. Y.

ESSENTIALS IN HOME DAIRYING.

J. M. Vance, the Texas dairy expert, thus replies to a correspondent who asks information about starting a farm dairy:

This subject is a big one and the important points can scarcely be mentioned in a short article. The first thing to be considered is the man himself; he must have a love for the dairy business or he is not likely to succeed. Next in importance are the cows. The right ones must be selected, the breed to which they belong does not matter, but they must be economical producers. They must produce at least 200 pounds of butter fat per year; 250 would be a great deal better and 300 still more desirable, but it is not likely that our correspondent can purchase a great many that will produce more than 200 pounds per year. He will have to depend upon himself to breed better ones.

If our correspondent expects to make butter he will need a room in which to store and ripen his cream and pack his butter. The dairy room must also be well ventilated. It should be light as there is nothing of greater importance in a place like this kind than pure and unadulterated sunlight. Direct sunlight is the best and most economical germ destroyer and purifier that we have, and too much sunlight cannot be gotten into a dairy room. Arrangements for an abundance of hot water must be made. It is equally important to have an abundance of cold water. For this purpose ice may be needed. If so, our correspondent should provide an ice house in which to store ice enough to last him throughout the summer months. Have plenty of it.

The right kind of salt is necessary. Too little attention is often paid to the kind of salt used for salting butter. Select the best dairy salt on the market. Remember that a salt which absorbs moisture from the atmosphere is never a good salt, because it is not pure. A salt that absorbs moisture contains more or less magnesium chloride and this substance is really the one that absorbs the moisture. Pure salt will remain perfectly dry regardless of the amount of moisture in the atmosphere. The salt granules should not be too large, but rather of medium size. Many dairymen make the mistake of separating their cream too thin.

Where cream is shipped freight is saved if the cream carries from 30 to 35 per cent of fat rather than 20 to 25 per cent, and more skim milk will also be kept on the farm. This argument does, of course, not obtain with a man who makes his own butter. Nevertheless, it is of importance for him to separate about 30 per cent cream, because the richer the cream the lower the temperature at which it can be churned, and the lower the temperature at which it is churned, other things equal, the better the quality of the butter.

There are a number of different makes of churns on the market, but perhaps the most convenient churn for dairies are those of the harrel type. A butter worker will be needed and those of the lever type are very satisfactory. In regard to power, the small gasoline engines now on the market are very satisfactory, and in many instances more economical than any other kind. A small engine of that kind may be regulated so as to run all the dairy machinery and many other things besides. One feature of the dairy business to which our correspondent should give special attention is the necessity of regularity in everything that is done. The cows should be fed and milked at regular periods and the customers must be supplied with products that are uniform in appearance. Have special days each week for each customer and then see to it that the products are delivered on those days regardless of the condition of the weather. As soon as the customer finds that he can rely upon such service, and if a good article is supplied, there will be no opportunity for competitors to take away established trade.

It isn't a bad idea to put up some sort of shelter sheds in the pasture field for swine. Often during the winter there are cold nights and chilling rains which hogs are subjected for the lack of suitable shelter. This greatly retards their growth and often the time of their development is so far removed that their profit is a question.

"SAVE-THE-HORSE"
Registered U. S. Patent Office
SPAVIN CURE

Real Estate, Estates Cared For,
AND BUSINESS OPPORTUNITIES,
247 Washington St., Room 2.

Boston, Mass., Jan. 21.
Dear Sirs:—I have used a bottle of "Save-the-
Horse," and I consider it the best thing that as
yet I have been able to obtain for what it was
intended, it having entirely cured a very valuable
mare which has been lame since last September
with a sprained ankle. We had her blistered
twice and laid up for two months, but it did no
good. I was just about ready to breed her when I
gave it a trial; she is now entirely sound.
Yours respectfully,

ALBERT E. BAKER.

WERE THESE TWO CASES WORTH THE
COST OF TREATMENT?

Brooklyn, N. Y.

One of my horses went lame from side or shell
bones on both feet, which extended entirely
around the quarter, and was laid up for about
three months. I used two bottles of "Save-the-
Horse," and the horse is perfectly sound. I have
driven her over paved roads, and one day gave
her a sixty-mile drive and she never showed the
least particle of lameness. The growths have
nearly all disappeared. I have owned horses for
years, used them to build railroads and in all
kinds of contract work, and have used remedies,
blisters, firing and electricity, but never saw
anything take hold and produce such results as
"Save-the-Horse" in this case.

D. C. BENNETT, Builder,
416 79th St.

Nyack, N. Y.

In August I had a mare with an ankle cooked
from a bad wrench in a race. It was so bad I had
concluded to shoot her, but was persuaded to
breed her and turn her out. I bred her, but in-
stead of turning her out used your "Save-the-
Horse." In three weeks I was more than sur-
prised to see the swelling disappear, and the
remedy produced a complete cure. She is as
good as ever. I have raced her since and drive
her any distance without any sign of lameness.
I cannot say too much for your remedy.
GEO. F. BEIRINGER, JR.

DAN PATCH 1:55 1-4

A PHOTOGRAPH OF DAN PATCH 1:55 1-4

This Photo-Engraving was made from a Photograph of Dan Patch, was taken on our "International Stock Food Farm" and we consider it the best picture ever taken of Dan when he was not hitched.

DO YOU WANT MORE SPEED?

Dan Patch Made Eight World Records After Eating "INTERNATIONAL STOCK FOOD" Six Months. It Always Gives Better Digestion and Assimilation, A Good Appetite, Pure Blood, Extra Strength, Endurance, Courage And Nerve Force Which Is Sure To Give Your Horse More Speed.

DAN PATCH 1:55 1-4 EATS**"INTERNATIONAL STOCK FOOD"****3 FEEDS FOR ONE CENT**

EVERY DAY OF HIS LIFE.

Dan Patch was not taken out of a large stud service until June 15th. On Sept. 4th, he made his first fast mile of the season and paced the Hamline Track at the Minnesota State Fair before 60,000 people in 1:59½. On the following Saturday, Sept. 9th, he gave the state fair another fast mile in 1:57½ with the last quarter in :27½. The track on Monday was slow on account of a ten hours steady rain the Saturday night previous. Dan was immediately shipped to the Indiana State Fair and on Sept. 13th, before 50,000 people he paced a mile in 2:00½ without the pace maker and in a strong breeze. He was then shipped to Allentown, Penn., and broke two World's records in the afternoon of Sept. 21st, before 82,000 people. At this time he

reduced the World's half-mile track record from 2:03 to 2:01 and within forty minutes reduced the half-mile track wagon record from 2:11 to 2:05. It will be admitted by all horsemen that Dan's mile on a half-mile track in 2:01 was fully equal to his mile track record of 1:56. Within 17 days from his start Dan paced 5 remarkable miles and was shipped over 1200 miles. If "International Stock Food" will help a horse make such wonderful records it certainly will give paying results when fed to your horses. If you have fed it you know this to be true and if you have not it will surely pay you to test it at once. We will supply you direct if you can't buy it of your dealer.

*** Dan Patch never paced a mile with a wind shield and ALL INTELLIGENT horsemen know this to be true because a wind shield record is not allowed. Statements to the contrary are from people who are IGNORANT or MALICIOUS.***

OVER TWO MILLION HORSE OWNERS ENDORSE IT

Mr. M. W. SAVAGE, Manager and Proprietor, International Stock Food Co., Minneapolis, Minn.

My Dear Mr. Savage—Some time since I had the pleasure of receiving the pictures of Dan Patch and the rest of your horses which I requested you to kindly send me. I appreciate the promptness with which you complied. In this connection I desire to assure you that I am and have been for some time a regular feeder of your "International Stock Food" and find it gives excellent results. I purchase the large sized pails and keep it constantly on hand. "International Stock Food" is used very extensively at the stables here, especially on the track. My Stallion, Edgar Boy 2:08¼ gets his daily allowance. He is now in training on the track, preparing to lower his mark. We confidently expect him to reduce it to about 2:05 or better this season. He is strong and full of nerve force and a great feeder, not a little of his good condition being attributable to his daily allowance of "International Stock Food." He is the kind that goes without the straps, toe-weights, or leg wear of any kind, a perfectly gaited frictionless going horse. Yes, there is hardly a good training stable here but what feeds your Stock Food. W. HADMAN, Walla Walla, Wash.

San Francisco, Saturday, October 28, 1905.

SUNDAY RACE MEETINGS have never been considered the proper things for either of the parent trotting associations or the organizations that control running racing to foster or encourage. It is not likely that those who have had to do with the framing of the written and unwritten laws governing racing ever saw anything actually sinful or criminal in racing horses on Sunday, but being persons of perspicacity and good judgment as well as liberal minded and respectful of the opinions and feelings of others, they recognized the fact that a very large proportion of the citizens of the United States hold Sunday in reverence as a day to be devoted to worship, and have considered it no more than right that racing associations should not hold their meetings on that day, out of respect to the feelings of religious people. There are six days in the week during which racing can be held, and it shows respect for the opinions of others and tolerance as well as charity on the part of the members of the leading racing associations that they refuse to hold meetings where purses are awarded, admission fees charged and betting conducted on the first day of the week. We are led to these remarks by the recent action of a San Francisco club in visiting a neighboring town and holding a meeting on Sunday. There are many excellent men who are among the best patrons of this journal in membership with that club. That they have intended or done anything wrong we do not believe, but we are convinced that it will be better for the harness horse breeding industry as well as for the grand sport of harness racing if these Sunday meetings be cut out in the future. Speedway driving and road brushing on Sunday is as legitimate as on any other day, and is enjoyable and to be encouraged when conducted in the proper manner. But a regular race meeting is an entirely different thing. One is the action of individuals while the other is that of an organization asking for the patronage of the public. Horsemen should do nothing as a body that will incur the ill will of the general public. Race meetings on Sunday are held to be in bad taste by hundreds and thousands of citizens who would be pleased to attend them on other days. Harness horsemen should try to cultivate these people instead of antagonizing them. If the running tracks were open on Sundays it would not be long until laws would be passed to close them entirely. The association managers know this and keep their gates closed, although there is no doubt but large crowds would attend and Sunday racing be very profitable to them. We suggest to the different driving clubs in California that they indulge in no more Sunday race meetings. Go on the speedways or the training tracks where entrance is free and no purses are offered, and speed your horses, but do not advertise regular Sunday racing. The sentiment of a very large part of the respectable element of the country is against it, and by respecting that sentiment harness horsemen will in turn command the respect of the communities wherein they reside.

A NEW CONDITION will govern all renewals of the Occident and Stanford Stakes that close after this date. This condition, which was made into a resolution and passed by the Board of Directors of the California State Agricultural Society at a meeting held in Sacramento last Saturday, provides that all horses not winning a heat in three shall be sent to the stable, but shall retain their positions in the summary which they had at the close of the third heat. This rule or condition has governed all harness races held at the State Fair for several years past, with the exception of the stake races, and

has given general satisfaction. The fact that the Occident stakes of 1904 and 1905 were drawn out to seven and six heats respectively doubtless led the board to make the new condition govern all future stakes advertised, entries for which are not yet closed. Of course those stakes already closed must be governed by the conditions under which they were originally advertised, so the Occidental and Stanford Stakes for foals of 1904, which closed last January and June will be trotted under the old rule of best three heats in five. Anyone who saw the Occident Stake trotted at Sacramento this year will have to admit that the best and fastest colt won, even though there were six heats. Under the condition sending non-heat winners to the stable at the end of three heats, would have put this colt (North Star 2:13½, the best three year old that has appeared in California in years) back to third position when the money was awarded. Princess Louise won the first heat and Bellemont the next two, North Star finishing in second position each heat after making disastrous breaks. He won the next three heats, however, and clearly established his title to the fastest and the gamest three year old trotter racing on the Pacific Coast this year. What influenced the directors of the society more than anything else to make this new condition, was their opinion that three year olds should not be asked to go such long drawn out contests as the Occident Stake has resulted in for the past two years. The rule has worked well with class races for aged horses, and they saw no reason why it should not be applied to the three year olds as well. Their action is in accordance with the trend of harness racing reform all over the country, which seems to demand shorter racing than the old three-in-five plan furnishes, and which has resulted in many new plans and innovations being tried at many of the leading meetings. The next renewal of the Occident to be advertised will be for foals of 1904, to trot in 1907, and will close for entries on the first of January next. It will be governed by this new condition.

BROTHER WESTGATE, editor of the Albany, Oregon, Herald, writes us as follows: "Noting your recent reference to the great New York show horse, Commander Baker by Alfonso 9700, it may be of interest that Commander Baker's dam is Antonia 2:36 by Electioneer, dam the great brood mare Columbine, Antonia being a full sister to Anteeo 2:16½, Antevolo 2:19½, J. C. Simpson 2:18½, etc. Antonia was bred at Palo Alto and foaled in 1894. She was purchased by C. X. Larrabee of Brook Nook Ranch and is still among the Brook Nook matrons, having this year foaled a filly colt to The King Red 2:20½. Alondra, foaled at Brook Nook, was a full brother of Commander Baker and has now, I believe, a record of 2:20. Antonia foaled two other Alfonso colts, which, unfortunately, died. The blood combination of Electioneer, Baron Wilkes, Alma Mater, Columbine, etc., surely ought to be richly productive, and it is interesting to note how it has been so in this case." And we will add that breeders who aim to produce standard trotters of the show horse type are in our opinion on the right track to command the high prices of the future if they are successful. Brother Westgate's stallion Nocturno 2:26 will be a factor in producing this type if he is fortunate in getting the right class of mares. The fact that his get won first in their classes at the great Lewis and Clark show proves this, as he is a young horse and there are but very few of his progeny, none being over two years old. He is by Alfonso, and on his dam's side has several crosses to standard families renowned for their handsome conformation.

A TABLE of the winners on the Grand Circuit has been compiled by the Chicago Horseman, and is most interesting reading. It shows that 224 trotters started in the circuit from Detroit to Lexington, and only 140 won some part of the purse; in fact no less than 26 winning only \$100 or less. Five won \$10,000 or over, 13 won \$5000 or over, 17 won \$3000 or over, 60 won \$1000 or over, and 83 won \$500 or over, while 84 won no money. Of the pacers 203 started, and while 129 won money, no pacer won over \$5000. Four won \$4000 or over, 21 won \$2000 or over, 42 won \$1000 or over, 54 won \$500 or over, and 74 did not win a penny. The totals show that 427 horses competed in the Grand Circuit races and 158 won no money.

SEE THAT YOUR STALLION is represented in as many futurities as possible. Induce the men who breed to your horse to nominate their mares. The sires of futurity winners are always well patronized. The Breeders' \$7000 Futurity for foals of mares bred this year will close December 1st.

LEXINGTON BREAKS HER RECORD. (Horse Review, Oct. 17.)

What may be termed the "regular" harness racing season closed at Lexington last Saturday when the thirty-third annual fall meeting of the Kentucky Trotting Horse Breeders' Association came to an end. The season could not well have been more fittingly finished; for the meeting was not alone the best ever held at Lexington—it was the best held this year at any track; and, taken "by and large," the best ever held anywhere, any year. There can be no dissent from this verdict when its results are surveyed and are compared with those of last year's meeting, which we then denominated the most successful ever held.

A complete statistical resume of the meeting will be found in another column. This discloses that it comprised 34 races, in which 119 heats were trotted and paced in the average time of 2:09 313-476. Last year there was one more race—35—but four less heats—115. Still, the average time was not then so fast. For the 115 heats of 1904 it was but 2:10 55-115, or three-quarters of a second slower. When it is considered that there were two days of bad weather last week, during which there could be no racing, the track also being rendered slow for the first day on which the program was resumed, this average is indeed most remarkable. The amount of purse money distributed was \$69,400, which was slightly less than last year's total of \$70,825. This was divided among 96 different horses, 55 trotters and 41 pacers. Last year the money-winning horses numbered 91, of which 55 were trotters and 36 pacers. Last year the trotters won \$52,100, this year they won \$50,700. Last year the pacers won \$18,725, this year they won \$18,700. The total of starters last year was 251, of which 162 were trotters and 89 pacers. This year there were 242 starters, of which 137 were trotters and 105 pacers.

The fastest heat raced this year by the trotters was in 2:05½, which was three-quarters of a second slower than last year's record of 2:04½. But this is offset by the gain of two and one-quarter seconds made by the pacers, their best heat this year being 2:02, as against 2:04½ last. The product of new 2:10 performers this year was no less than 10—ten trotters and four pacers. This is a gain of four from last year, when there were four trotters and two pacers.

In respect of the racing, it may be said that there was no trotting contest that equaled last year's extraordinary Transylvania duel between Sweet Marie and Tiverton. However, this was nearly counterbalanced by this year's 2:06 trot in which the world's record for a four-heat race was not only beaten, but completely eclipsed. The old record was made at Columbus in 1903 in a race won by Dan T., in which the time of the heats was 2:06¾, 2:07¼, 2:08¾, 2:07¼. The new record, made week before last at Lexington in the wonderful race won by Norman B., is 2:05¾, 2:05¾, 2:06¾, 2:07½—the average time being over a second faster. This year's three-year-old Kentucky Futurity was neither quite so sensational nor quite so fast as 1904's; but it is altogether likely that the two contenders in it, Miss Adbell 2:09¾, and Susie N. 2:09¾, are a greater pair of fillies than were last year's rivals, Grace Bond 2:09¾ and Alta Axworthy 2:10¾. While the two-year-old Futurity record was not equaled, Lightsome's heat in 2:14½ fell short of it by but a half second, while it lowered the season's record for the gait and age by two and one-quarter seconds. The race for the Walnut Hall Cup was by far the best ever trotted for that coveted trophy. The record for the event, 2:07¾, made by Caspian in 1903, was equaled by the winner, Turley, in the first heat, and reduced to 2:07¼ by Glenwood M. in the second heat. The latter mile also established a new race record for the season for trotting stallions.

Among last year's pacing events there was nothing to compare with the magnificent race won by Locanda week before last, in which two heats were paced below 2:03, while the average for the three was 2:03 1-6. Locanda's second heat in 2:02 is also a pacing record for the year. In the Tennessee, the most valuable of the "fixed events" for pacers at Lexington, Maud Keswick, the winner, paced the second heat in 2:03¾, which lowered the previous record for the event a half second—a notable performance when it is recalled that among former Tennessee winners have been such horses as Star Pointer 1:59¾, Dan Patch 1:55¾, Searchlight 2:03¾, and John M. 2:02¾. In the pacing Futurity Bonalet also lowered the record for the event and equaled the world's record for three-year-old fillies, 2:09¾.

The great, the truly historic performances of the meeting, however, were the phenomenal exhibitions of Dan Patch, the pacing champion, who first equaled his world's light-harness record of 1:56 and then reduced it to 1:55¾; in addition to which he also equaled the world's unpaced record of 1:59¾. Another splendid effort against time was that of Admiral Dewey, whose mile in 2:04¾ established a new trotting stallion record for the year and placed him third to Cresceus 2:02¾ and John A. McKerron 2:04½ on the list of entire horses.

From this brief enumeration of the most salient features only, the surpassing brilliance of the meeting, from a sporting standpoint, will be readily appreciated. Its success in other particulars was as great. The attendance record was broken. The pecuniary profits will, it is stated, be the largest in the association's history; and this despite the bad weather of the second week. Never before were there so many non-resident visitors to "Kentucky's great trots." Practically every state in the Union was represented, and many of them by large delegations. The assemblage of the celebrated and notable men of the trotting world was one perhaps never before equaled at a race-meeting; and royally were they entertained, not merely by the royal sport provided them, but by that royal hospitality in whose dispensation the Kentucky breeders stand alone.

JOTTINGS.

THE BEST BRED STALLION living is undoubtedly owned in nearly every locality where horses are bred. Some months ago the turf papers devoted to harness horses were filled with articles containing tabulated pedigrees and arguments accompanying the same, to prove that the particular colts or stallions mentioned were the best bred animals in the entire country, and in every article that we remember reading the author clearly proved to his own satisfaction that the colt of his choice was the best bred one that ever saw the light of day. To say that any horse is the best bred is of course only a matter of individual opinion and each writer should, to keep peace in the family of horse breeders, prefix any statement as to the best bred horse with "In my opinion." I am led to these conclusions by the receipt of a letter from far away New Zealand, in which the writer Mr. R. McMillan desires to know just why it was stated in these columns that the stallion Peralta, son of Nutwood Wilkes and the mare Rose McKinney by McKinney was the best bred stallion that had been sent from America to New Zealand. Mr. McMillan himself took from America to that place a few months ago the stallions Mauritius 36,257 and Harold Dillon 39610. Mauritius is by Bingen 2:06½ out of Roxana, dam of two in the list by King Wilkes, second dam Wavelet dam of four, by Belmont 64, third dam Waterwitch, dam of six, by Pilot, Jr. That's mighty rich breeding beyond a doubt, and we know lots of people who would select him as a better bred horse than Peralta. Mr. McMillan's other stallion, Harold Dillon, is a son of Sidney Dillon, sire of the world's champion trotter and out of Guyara by Guy Wilkes, next dam the mare Biscari, dam of six in the list by Director, third dam Bicari dam of six standard performers, by Harold, fourth dam Belle, dam of one in the list, by Mambrino Chief. This will also be called royal breeding and many would select him as a better bred one than Peralta, while an endless debate could be started as to which of the two, Mauritius or Harold Dillon was the better bred. As I said before this "best bred" proposition is a matter of opinion. Now in my humble opinion there is not a better bred stallion than Nutwood Wilkes, and I never saw one of his get that could not go some. Nutwood Wilkes is by one of the best bred sons of George Wilkes and one that sired money winning race winners. Nutwood Wilkes himself has sired the fastest stallion of the whole Wilkes tribe—John A. McKerron 2:04½, and has had three three year old stake winners to trot below 2:14. So much for Peralta's sire. His dam is by the great McKinney 2:11¼, sire of more 2:15 trotters and 2:10 trotters than any stallion that ever lived, second dam by Forest Clay, third dam by Almont Lightning and fourth dam by imported Yorkshire, thoroughbred. Now in my statement of best bred I did not take into consideration the second, third and fourth dams except to know that they were of good breeding and by sires that got speed, stamina and good looks. My opinion as to Peralta being the best bred stallion exported to New Zealand was because he is a representative of the Nutwood Wilkes-McKinney cross, which in my humble judgment is just about the acme of breeding, although some would prefer the McKinney cross on top. The cross has been tried both ways and invariably produces speed of a high rate. Miss Georgie 2:10¼ pacing, and Lady Mowry 2:12¼ trotting both records made this year are representations of the McKinney-Nutwood Wilkes cross, and Tidal Wave 2:09, record made this year is a representative of the reverse cross and there are a number of green ones I have seen who all show that the blending of the blood of Nutwood Wilkes and McKinney is a great success—in fact such a success, that it has led me to the belief that it is the best breeding for the production of a very high rate of speed in the future. No doubt Mr. McMillan thinks both his stallions better bred than Peralta and he can find lots of people here in California to agree with him. It is a question that would be impossible to settle by argument as the disputants could never agree on the premise. All three of these stallions should produce speed of a high order, and as they will doubtless be well patronized in New Zealand, we shall have to wait for time to tell which is the best bred of the three.

Although this is the dull season of the year with trainers of trotting horses in this part of the State, the famous track at Pleasanton is a busy place. Nearly if not quite thirty trainers have strings of horses there, and the track, which is kept in superb condition by superintendent Geo. A. Kelly, presents a lively appearance every day in the week. About 150 trotters and pacers are stabled there. Fast miles are not the rule at this season, the majority of the aged horses being asked to do nothing faster than jog work, but there are a number of youngsters receiving their first lessons and every once in a while a "baby" will trot or pace a quarter at a gait that makes the spectator's eyes open. Last Saturday Fred Chadbourne stepped a little two year old trotting filly a quarter in 34¾ seconds, and the little miss did it so easily that every man holding a watch immediately compared it with that of his neighbor, thinking perhaps he had not caught the quarter just right. They all agreed, however, that the time of the quarter was not slower than 35 seconds, while some said that 34¾ was nearer the correct figure. This filly is one of the products of Nutwood Stock Farm, owned by Mr. Martin Carter, and that gentleman was present to see her trot. She is by the young stallion

T. C. 2:30, and is I believe, one of his first to be trained. T. C. is a son of Nutwood Wilkes, first dam Zeta Carter by Director 2:17 and second dam Lida W. 2:18¼, the dam of Nutwood Wilkes, by Nutwood. The dam of this filly is Ingar, dam of John A. McKerron 2:04½, by Director, consequently she has two crosses of Director blood and two of Lida W. Mr. Carter tells an interesting story about this filly. When he had ten or a dozen two year olds put in training last spring, the trainer reported the T. C. filly had no trot in her. She had a short mincing gait that she would not or could not extend to anything worth while. Mr. Carter said that a filly bred like this one would have to "show him" she could not trot before he would believe it, and he concluded to train her himself. After driving her a few days and getting her balanced a little better, she struck out like a trotter one morning when another colt came up alongside her, and right then and there he concluded she was worth giving a chance. He sent her to Fred Chadbourne at Pleasanton just four weeks ago and on Saturday last went up to see how she was doing. Fred drove her one quarter in 35½ seconds and another in 34¾ and she trotted like one that had been at it for years. She never lifted her head, but went at it as though it was a matter of business that must be attended to right then and there. I never saw one that trotted more naturally or with more ease. She has a business head on her and as one would expect from her breeding, a race horse way of going. Mr. Carter called my attention to her head, which is fine, clean cut and very handsome. "When I concluded to mate Ingar with T. C.," said he, "I was satisfied the cross would be a good one in everyway except the head. T. C. has a strong heavy head, and Ingar's head is also pretty large and not fine. I feared the foal resulting from mating these two would have a coarse and heavy head, but to my surprise when this filly arrived, she had one of the finest and most blood like heads of anything foaled on the farm that year." She is the first of the get of T. C. to be trained and will make him a place in the Great Table whenever she is asked. There were two of his get older than this filly, one of which died, and the other was put to breeding last year.

Lou Crellin's two-year-old filly by Owyhee 2:11 dam Bertha by Alcantara is also in Fred Chadbourne's string and the railbirds have a hard time telling which of these two fillies Fred is driving. Mr. Carter's filly and Mr. Crellin's filly are so much alike in appearance that they look like twins. A star in the forehead of the T. C. filly is about the only distinguishing mark that differentiates her from the one by Owyhee. The picture of the latter on the front page of this issue gives some idea of the classy look of these fillies, and will answer for both.

The Limit is the apt name given to Bertha's yearling by Searchlight 2:03¾. The dam of Diablo invariably produces a good-looking, strong foal, but The Limit is probably the largest and strongest any have ever been at the age. He is not as fine as the two year old filly by Owyhee, but he is a colt and looks like a high class young stud. He should be very popular as a stallion when he gets his growth. Any colt sired by a race horse like Searchlight 2:03¾ and out of a mare like Bertha, that has produced no less than three 2:10 performers, ought to receive the patronage of some of the best mares in the land. The Limit is now a good square trotter with speed for a yearling, but it will not surprise anyone if he shifts to the pace and beats 2:10 as a three year old.

Henry Helman who went East with Mack Mack and Oregon Maid, returned this week and left Thursday for his home in Portland, Oregon. Mack Mack was shipped to Pleasanton with the DeRyder string and Helman will return in a few weeks and do his winter training at Pleasanton track. Mack Mack has fully recovered from his sprained ankle and is as good as ever. He would have beaten 2:10 this year but for his accident which put the son of McKinney out of business for five weeks during which all of his best engagements lapsed. Oregon Maid that took a record of 2:08½ in a winning race at Lexington is to be consigned to the Old Glory sale by her owner Mr. Richardson of Denver. While in Kentucky Mr. Helman bought a yearling stallion for Mr. Bowles the owner of Mack Mack. The colt is a trotter, a fine looking bay and bred in the purple. He is by Baron Wilkes, Jr., 2:23¼ one of the very best bred sons of the great Baron Wilkes. Baron Wilkes, Jr., is out of a great brood mare by Director, second dam a great brood mare by Princeps 536, third dam another great brood mare by Volunteer 55, fourth dam by Hambletonian 10, and fifth dam the Welling mare by Shark, thoroughbred. The dam of Mr. Bowles colt is Susie May 2:18¼ by Dignus, a son of Dictator. Helman has the reputation of being able to pick out a good one and from the breeding of this fellow it is more than likely he has secured for Mr. Bowles a young stallion that will be one of the future great sires of this coast. Baron Wilkes blood is very scarce on this Coast and this colt will be watched by progressive breeders.

Mr. Chas. A. Durfee is advertising every horse, mare, colt and filly that he owns for sale. The advertisement he placed in the Breeder and Sportsman the other day is not of a culled lot, but includes the whole hunch. Galindo, the three-year-old stallion by McKinney out of Palo Alto's great brood mare Elsie by Gen. Benton is among them. A colt by Lecco 2:09¾ and another by Iran Alto 2:12¼, both out of the dam of Almaden (2) 2:22¼, are also offered. Four black mares by McKinney 2:11¼ are

included in this closing out sale. "How about Almaden son of Direct and Rose McKinney?" I hear some one say. Well, Mr. Durfee never did own him. Almaden was foaled the property of Mrs. C. A. Durfee and the former owner of McKinney is not taking any chances offering him for sale. But the others are all his and he wants to sell them. He says he wants to get out of the business for a while. For once in his life, since he started in the horse business, he would like to sell every horse he owns. I came near forgetting one horse, "Shorty" as he calls him, or Cutate 2:17½ by McKinney out of Miss Jennie 2:13¾ by Gossiper, as he is recorded in the book. This little gelding is the greatest trotter of his inches in California. He is a 2:12 horse to a certainty, and it would not surprise me if 2:10 would be his mark in another year. He has a mark that will permit him to race where he can win next year. If Mr. Durfee sells all these horses he won't know what to do with himself. He will probably go down to Los Angeles for a visit to his son, W. G., and naturally will get up behind a few and jog them a little, and by the time entries close next year will be anxious to own a few trotters once more. He says he will not, but the Durfee flesh is a little weak when a good trotting prospect is in sight. But he wants to sell them all right now and this is the time to get the best ones he owns. It's a two-to-one bet that if he keeps "Shorty" and those colts over until next May he will double the price on them. The McKinney colt Galindo is one of those offered, and the price Mr. Durfee asks for him is less than he is worth. Galindo, it must be remembered, is out of Elsie, dam of five in the list, by Gen. Benton, second dam Elaine, champion of her day, and dam of four with standard records; third dam the celebrated Green Mountain Maid, dam of Electioneer and eight with records below 2:30. He is one of the best prospects in the State.

The catalogue of Mr. J. C. McKinney's Terrace Farm stock that has been consigned to the Old Glory sale at New York this winter came to my desk a few days ago, and on looking through it I saw a filly described that comes pretty near my ideal in breeding for a great brood mare. She is now a two-year-old, having been foaled September 8th, 1903. Her name is Zelma, and her sire is Beauseant 2:06½. Beauseant was by Bow Bells (son of Electioneer and Beautiful Bells, greatest of brood mares) Beauseant's dam, Rosy Morn by Alcantara, is in the great brood mare table, his next dam Noontide 2:20½ by Harold also has a place there; his third dam is that great mare Midnight by Pilot Jr., and his fourth dam by Lexington. So much for Beauseant's pedigree, although columns might be written about the blood lines of this handsome young horse. The dam of the two-year-old filly Zelma is Zephyr 2:07½, one of the greatest trotters on the Grand Circuit this year, by Zombro 2:11, the greatest three-year-old ever produced in California, and as all know, by McKinney 2:11¼. Zephyr's dam is Gazelle 2:11½ by Gossiper 2:14¾, and she is also the dam of the great Zolock 2:05¼, and of the trotter Abe Miller that has been timed better than 2:15 in a race. The next dam is Gipse, dam of three with records of 2:15 or better, by Gen. Booth 2:30½, son of Geo. M. Patchen 30, and the next dam Echo Belle by Echo 462, son of Hambletonian 10. The owner of Echo Belle always claimed she was by Lummo, the running horse, out of a Gray Eagle mare. If this is true, and there is no reason to doubt it, the sire and dam of Zelma both trace to a thoroughbred dam on their dam's side, and that's the stuff for a brood mare. The tabulation of Zelma's pedigree would make about as fine a collection of up-to-date producing sires and great brood mares as one could find. Some progressive breeder should buy Zelma. The blood of Gipse and Gazelle should be continued through a daughter, and when it comes through such a one as Zephyr 2:07½ it is choice goods to a certainty.

LEXINGTON MEETING.

During the meeting of the Kentucky Trotting Horse Breeders' Association held this year ninety-six horses earned part of the \$69,350 distributed by the association, and out of this number twenty-one earned \$1,000 or over. Twenty-four drivers won races during the meeting, while Ed F. Geers heads the list with three wins to his credit and A. Thomas, Dickerson, Padgett, A. McDonald, Murphy and Spencer won two each. What is perhaps a record was made during the meeting, as thirty-three heats were trotted in 2:10 or better and thirty-one heats paced in 2:10 or better. The following are the summaries of the last three races of the meeting:

Pacing, 2:20 class, purse \$1000.				
Dan P., b. g. by Slumber..... (Padgett)	1	1	1	
Edith Brook, b. m. (Freeman)	2	2	2	
Tommy Burns, b. g. (McCarthy)	3	3	3	
Jimmie O., b. g. (McPherson)	4	4	5	
Reproachless and Emil D. also started.				
Time—2:11¼, 2:10¼, 2:13¾.				
Trotting, 2:10 class, Stoll Stake, for four-year-olds, purse \$2000.				
Glenwood M., br. h. by Bobby Burns..... (McDonald)	2	1	1	1
Leonardo, ro. g. (Dickerson)	1	2	2	2
Pat T., b. g. (Patterson)	3	4	3	3
Clarita W., ch. m. (Geers)	4	3	4	4
Time—2:08¼, 2:15¾, 2:09, 2:08¼.				
Trotting, 2:25 class, purse \$1000.				
Emma Brook, b. m. by Silent Brook..... (Higdon)	1	2	1	2
Frank A., b. g. (Walker)	4	4	3	1
Belfast, b. g. (Barrett)	3	1	2	3
Electric Maiden, b. m. (Garity)	2	3	4	4
Time—2:10½, 2:10¼, 2:09¾, 2:11½, 2:12¼.				

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

THE PACER.

De pat'idge is in de cohn-field, his courtin' days am pas'
He am waitin' fur de hunter wid his gun and whisky flas',
De squirl's in de hielornut, de shell am droppin' 'roun',
But de pacer's still de racer, and
de record's
gwine down!

De coon am up de white oak, an' de price er powder's riz,
He am layin' up de coon-grease dat am good fur rheumatiz.
De 'possum's way up yonder whar de wild grape's turnin' brown,
But de pacer holds de market, and
he keeps
dat record
down!

Oh, ebervy thing am risin' an' hog-meat's in de sky,
E'en de chickens got de panic, an' hev gone to roost-in' high!
De onliest thing dat's fallin'—an' it makes de trotter frown—
Am de pacin' race-horse record, and
dat keeps
on
gwine down!

—John Trotwood Moore, in Ky. Stock Farm.

PONY RACES AT SAN MATEO.

The second day's meeting of the California Polo and Pony Racing Association on Mr. Clark's track at San Mateo last Saturday was the most successful this year.

The attendance was much larger than a week previous and the sport was much keener.

W. E. Pedley's Carlotta carried off the honors by taking two of the races. The rest of the victories went to C. W. Clark and Rudolph Spreckels.

Frank St. D. Skinner carried off the honors among the riders by taking two firsts and two seconds.

Among those present were: Mr. and Mrs. Rudolph Spreckels, Mr. and Mrs. Peter Martin, Mr. and Mrs. Cunningham, Mr. and Mrs. George Howard, Mr. and Mrs. Willis Polk, Mr. and Mrs. J. H. P. Howard, Mr. and Mrs. Edward Schmidell, Mr. and Mrs. Walter Martin, Mr. and Mrs. Thomas A. Driscoll, Mr. and Mrs. C. W. Clark, Mr. and Mrs. Walter Hobart, Mr. and Mrs. Joseph S. Tobin, Mrs. H. T. Scott, Mrs. Howard, Miss Anita Harvey, Miss Mary Ayre, Miss Beatrice Splivalo, Miss Ellen Page, Miss Virginia Joliffe, Miss Whittell, Miss Agnes Tobin, Miss Frances Joliffe, George Whittell, John Lawson, Danfer Murphy, Harry Simpkins, Neal Powers, William O'Connor, Clem Tobin, Charlie Dunphy, J. O. Tobin, Major Rathbone, Cyril Tobin, Colonel Dan Burns, E. J. Tobin and C. T. Boots.

Following are the results of the races:

One-quarter mile handicap.
W. E. Pedley's b. m. Carlotta.....(Mackay) 1
J. A. Lynch's b. m. Leah.....(C. Dunphy) 2
Captain McKittrick's g. m. Helen Warwick.....(Marsh) 3
Don Ramona and Alvemie also ran; \$24.40 paid for \$5.
Time—12 1-5, :25 1-5.

Three-eighths of a mile.
C. W. Clark's ch. m. Midlove.....(C. Dunphy) 1
Rudolph Spreckels' ch. m. Honoma.....(Skinner) 2
J. Chauncey Hayes' b. m. Ramona.....(Hayes) 3
\$8.70 paid for \$5.
Time—12 4-5, :24 2-5, :37 4-5.

Four and one-half furlongs.
Rudolph Spreckels' b. m. Uctma.....(Skinner) 1
C. W. Clark's b. m. Bas Blancs.....(Mackay) 2
\$7.40 paid for \$5.
Time—:24, :51 2-5, :57 2-5.

Three and one-half furlongs, handicap.
Rudolph Spreckels' ch. m. Althomer.....(Skinner) 1
W. E. Pedley's b. m. Carlotta.....(Marsh) 2
Captain McKittrick's g. m.(Marsh) 3
Bas Blancs and Hopeful also ran; \$15.05 paid for \$5.
Time—:45.

Six and one-half furlongs.
C. W. Clark's ch. m. Ethel G.(Mackay) 1
Rudolph Spreckels' ch. m. Carlolly.....(Skinner) 2
C. W. Clark's blk. g. Chanate.....(Marsh) 3
Molly Murphy also ran.
Time—:25, :52 2-5, 1:20 2-5, 1:28 1-5.

SPOKANE RACES.

(Rural Spirit.)

The race meeting at the half mile track in connection with the Spokane Inter-State fair consisted principally of running events, only one harness race being given a day to four running. The weather was good the opening day, but the track was wet and sloppy, which accounts for the slow time made in the pacing race. C. D. Jeffries was presiding judge with H. G. Stimmet and Ed Sanders associates, and their work throughout the meeting was very satisfactory, not a complaint was filed against their decisions. H. E. Wood of Norwood, Mo., did the starting, and got the fields off in good shape and did his work without fear or favor. Summaries;

Pacing, 2:25 class, purse \$500.
Bonnie M. by Mohegan.....(Erwin) 1 1 1
Klamath Maid.....(Baskins) 2 2 2
Vinnie Mann.....(Lindsey) d
Time—2:41, 2:48, 2:49.

Trotting, 2:16 class, purse \$1000.

Oveta, b. m. by Caution.....(Dye) 1 1 1
Sam Bowers by Joe Simpson.....(Lance) 2 3 2
Ritchie Baron.....(Bryant) 3 4 3
Kittie Clover by Pricemont.....(Lynch) 4 2 4
Judith by Wm. Harold.....(Smith) 5 5 5
Time—2:26, 2:27, 2:25.

Pacing, 2:15 class, purse \$500.

Sherlock Holmes, ch. h. by Suono.....(Childs) 1 2 1 1
Hassalo, b. g. by Westfield.....(Erwin) 2 1 2 2
Hellenes, b. h. by Helicon.....(Baskins) 3 3 3 3
Gold Bug.....(Clark) 4 d
Time—2:26, 2:28, 2:22, 2:25.

Pacing, 2:25 class, purse \$300.

Lady Smith by Del Norte..... 1 1
Gold Rose by Del Norte..... 2 2
Carlyle..... 3 3
Idylwise by Del Norte..... 4 4
Klamath Maid by Del Norte..... 5 5
No time given.

Gentlemen's driving race, silver cup.

F. Schoar's Bonnie Riley..... 1 1
E. L. Hilderbrandt's Almota..... 2 2

Pacing, 2:14 class, purse \$1000.

Vinnie Mann by Alexis-Miss Mann.....(Lindsey) 1 1 1
Hellenes by Helicon.....(Baskins) 2 2 2
Bonnie M. by Mohegan.....(Erwin) 3 3 3
King Altamont by Altamont.....(Childs) 3 5 4
Bessie R. by Francisco.....(Clark) 5 4 5
Time—2:23, 2:22, 2:22.

Trotting, 2:30 class, purse \$500.

Sam Bowers by Joe Simpson.....(Lance) 1 1 1
Kittie Clover by Pricemont.....(Erwin) 2 2 2
Time—2:36, 2:35, 2:35.

NORTH YAKIMA SUMMARIES.

Pacing, 2:30 class, purse \$300.

Vinnie Mann, b. m. by Alexis.....(Lindsey) 1 1 1
Lady Pearl by Vanquish.....(Williams) 2 2 2
Horse Heaven Maid by Monwood.....(Ritchie) 3 3 3
Time—2:23, 2:29 1/2, 2:17.

Trotting, 2:25 class, purse \$400.

Sam Bowers, ch. g. by Joe Simpson..... 2 1 1 1
.....(Lance) 2 1 1 1
Kittie Clover by Pricemont.....(Lynch) 1 2 2 2
Mark Hanibus by Planter.....(Brooker) 3 3 3 3
Black Diamond by Del Norte.....(Barrows) 4 d
Time—2:29, 2:28, 2:32.

Special pace, purse \$150.

La Comer Maid.....(Ball) 4 1 1
Horse Heaven Maid.....(Ritchie) 1 2 4
Idyl Weis.....(Riley) 3 3 2
Gold Rose.....(Barrows) 2 4 3
Time—2:22, 2:21, 2:22.

Pacing, free-for-all, purse \$500.

Bonnie M. by Mohegan.....(Prior) 1 1 1
Daniel J. by Chelalis.....(Williams) 2 2 3
Hassalo by Westfield.....(Erwin) 3 3 2
Le Roi by Altamont.....(Lindsey) 4 4 4
Time—2:24, 2:27, 2:26 1/2.

Special pace, purse \$400.

Vinnie Mann by Alexis.....(Lindsey) 1 1
Bessie R. by Francisco.....(Hogoboom) 2 2
Daniel J. by Chelalis.....(Williams) 3 2
Bonnie M. by Mohegan.....(Lynch) 4 4
Time—2:17 1/2, 2:19.

Special pace, purse \$150.

Robert H. by Couer d'Alene.....(Reiley) 1 1
Lady Smith.....(Barrows) 2 2
Carl.....(Hogoboom) 3 3
Rose Rial.....(Evans) 4 1
Time—2:25 1/4, 2:26.

Trotting, free-for-all, purse \$500.

The Commonwealth by Shadeland-Onward..... 3 1 1
.....(Lindsey) 3 1 1
Sam Bowers by Simpson.....(Lance) 1 2 3
Oneda.....(Dye) 1 3 2
Kittie Clover by Pricemont.....(Lynch) 2 4 4
Time—2:24 1/2, 2:21 1/2, 2:24 1/2.

Pacing, special, purse \$150.

Lady Smith.....(Barrows) 1 1
Budd W.(Williams) 2 2
Carl.....(Hogoboom) 3 3
Horse Heaven Maid.....(Ritchie) d
Idyl Weis.....(Riley) d
Time—2:26, 2:29.

HELENA, MONTANA, RACES.

Pacing, special, purse \$300.

Nona Wilkes..... 4 1 1 1
Carlstad..... 1 2 2 1
Prince Vail..... 2 3 4 2
Bob Ayers..... 3 4 3 3
Time—2:21, 2:24, 2:21, 2:22.

Merchants' stake, 2:14 pace, purse \$1000.

Modicum..... 1 1 1
Sherlock Holmes..... 2 2 2
Rita Huber..... 3 3 3
Kittie Lomond..... 4 4 4
Inferno..... 5 5 d
Time—2:11, 2:14, 2:13.

Trotting, 2:30 class, purse \$1000.

Richard Baron..... 1 1 1
Vocodo..... 2 2 2
Robbie..... 3 3 3
Kellogg O..... d
Time—2:20, 2:17, 2:19 1/2.

State Fair stake, 2:35 pace, purse \$1000.

Sherlock Holmes..... 1 1 1
Floy Direct..... 3 3 2
Kittie Lomond..... 4 2 3
Storm Queen..... 2 4 d
Bob Ayers..... 5 d
Time—2:18, 2:19 1/4, 2:16 1/4.

Special pace, purse \$200.

Carlstad..... 1 1
Nona Wilkes..... 2 2
May W..... 3 3
Prince Vail..... 4 4
Time—2:23, 2:20 1/2.

Secretary W. H. Knight of the American Trotting Association has sent out notices to the effect that the next regular meeting of the Board of Appeals of the Association will be held at the Auditorium Hotel, Chicago, Tuesday, December 5th, 1905, at 10 o'clock a. m., for the transaction of such business as may properly be presented to the Board for its consideration. All new applications and written evidence must be received at the office not later than November 18, 1905.

NEWS FROM THE NORTH.

(Portland Rural Spirit.)

Quite a number of the horsemen in the Northwest are figuring on going to California to winter.

Hellenes went a good race over a heavy track when he finished second to Vinnie Mann at Spokane.

A. C. Ruby of Pendleton, Ore., left for the East this week, where he goes to bring out 14 head of imported Percheron, Shire and Belgian stallions to his sale barn in Pendleton.

Ed Dyer's pacer, Sherlock Holmes 2:22, seemed to be in a class by himself at the Spokane meeting. We heard it rumored that Mr. Dyer would send the horse to California this winter with Charley Jeffries.

The Commonwealth 2:13 3/4 trotting, and Vinnie Mann 2:13 3/4 packing, will be taken to California from the Lewiston meeting in charge of L. B. and Sim Lindsey, where they will be raced on the Southern Circuit this fall.

Secretary Randell and President Cosgrove of the Minnesota state fair spent a few days in Spokane last week taking in the fair. Mr. Cosgrove is father of Robt. H. Cosgrove, the successful secretary of the Spokane fair.

D. O. Woodsworth of Albany has purchased from Geo. Gill of Salem a handsome and promising two-year-old stallion colt, of good substance and a well-gaited trotter. The colt is sired by Gerome, dam Melo by Boxwood.

J. W. Bailey sold his mare Dora, by Malcolm, dam Harrison Chief, that he purchased at the Larrabee sale last spring to Prof. J. A. Craig of Texas during the live stock show here. The mare was bred to Zombro before leaving for her new home.

Chas. D. Jeffries of Spokane will take the green pacer mare Ruby H. to California this winter to prepare her for the Grand Circuit next year. This mare is by W. G. Eaton's horse Malcolm, and is said to be one of the fastest pacers in the Northwest. She can pace a half in a minute now, and when thoroughly conditioned ought to go the route as she is bred in the purple top and bottom. Mr. Jeffries thinks he has a sure 2:05 performer.

Edgar Boy 2:08 1/4 pacing died at North Yakima last week from inflammation of the bowels. Edgar Boy was owned by Walter Cadman of Walla Walla and took sick en route to North Yakima from the Walla Walla meeting. He was a bay stallion seven years old, sired by Edgar Wilkes 8426, dam Clara by Gambado 14268. Second dam Hattie by Prince Hal. He took his record of 2:08 1/4 at Readville, Mass., last year.

RACES AT WENATCHEE, WASH.

Trot or pace, 3:00 class, purse \$150.

Teddy R..... 1 1 1
Nancy K..... 2 2 2
Pearl Lockhart..... 4 3 3
Joe..... 3 d
Time—2:38, 2:36, 2:35.

Special trot or pace, purse \$150.

Hellenes..... 1 1 2
Klamath Maid..... 2 2 2
Lou Swigert..... 3 3 2
Time—2:29, 2:28, 2:26.

Teddy R..... 1 1 1
Nancy K..... 2 2 2
Pearl Lockhart..... 3 3 3
Time—2:32, 2:30, 2:35.

Free-for-all, trot or pace, purse \$250.

Teddy R..... 1 1 1
Hellenes..... 3 2 2
Klamath Maid..... 2 4 4
Lou Swigert..... 4 3 3
Time—2:25, 2:26, 2:25.

RACES AT ALBANY, OREGON.

October 14—2:40 trot or pace. Del Wilkes 1-1, Dan Patch 2-2, Kanont 2-d; Time 2:48, 3:05.

Exhibition mile—Won by Ben Bolt, May Tilden second; time 2:26.

Dash, five furlongs—Brookwood won, Willamette second, Nellie Nye third; time 1:09.

Dash, half mile—Brookwood won, Kittle Condon second; time :50 1/2.

W. A. Clark, Jr., of Butte, Montana, has bought the famous brood mare Bon Mot, dam of Bon Voyage 2:12 1/4 and Endow 2:14 1/2. The purchase was made from J. H. Thayer, of Lexington. Bon Mot is in foal to The Bondsman and will be left in the hands of Mr. Thayer and next year sent to the court of The Bondsman. The price is private, but it is known to be a high one for Bon Mot has the distinction of being the only mare in the world that has foaled two futurity winners. She is by Erin 4372, (son of Belmont 64 and Eventide by Woodford Mambrino), dam Farce by Princeps, grandam Roma by Goldust 150.

The black pacing stallion Hazel Patch 2:02 3/4 by Hard Patch, dam Nell by Andy, has been sold to Judson Sherman of Chicago for more than \$5,000. Hazel Patch is one of the best pacing campaigners out this year. He took his record of 2:02 3/4 in the first heat of the 2:04 pace at Lexington. He will be placed in the stud and used for matinee racing.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

NOTES AND NEWS.

Star Pointer 1:59½ is at Pleasanton.

Cheery Lass 2:03¾ is in foal to the great McKinney.

There was a slim crowd at the Santa Rosa races last Sunday.

Southern California circuit entries closed this week. The full list will be printed in our next issue.

Susie N. 2:09¾ had an attack of acute indigestion a couple of days before she started in the Kentucky Futurity.

The mare Zephyr 2:07½ by Zombro stands well up among the best winners on the Grand Circuit this year with \$8,059 to her credit.

A black mare or gelding, sound and gentle, not over seven years old and able to trot in three minutes, is wanted. See ad in this issue.

Twenty-five or more trainers are working horses at Pleasanton track. At least 150 horses are stalled there. The track is in excellent shape.

The \$500 match between Faust and Daisy May will come off over the Alameda track tomorrow, Sunday. On the same afternoon there will be a match race between the pacers Cash and Billy F. for \$200 a side.

W. A. Richardson of Denver, former owner of Swift B. has recently purchased in the East the two year old filly Tinkling Bells by Adbell, dam May Day 2:18½ by Abdallah Mambrino.

The Yuba and Sutter Driving Club are holding a three days' meeting at the Marysville track this week. It opened Thursday, and will close today. Six \$100 purses were advertised to close on Monday last.

It looks now as though the daughters of Nutwood 2:18¾ may eventually be credited with 300 standard performers. Not less than 258 produced by them have already taken standard records, and many of his daughters are still in the brood-mare ranks.

Angiola 2:07¾ is the leading money winning trotter of the year. She won \$12,939. on the Grand Circuit alone. Angiola is by Gregory the Great (son of Wilkes Boy and Wilksie G. by Robert McGregor) dam Arline by Artillery, second dam by Dictator.

Adrian Wilkes, son of George Wilkes, is another sire to be represented by two new 2:10 performers this season, his two being Lillian, pacer, 2:08½, and Miss Adrian, trotter, 2:09½. The last named is an inbred Wilkes, her dam being May Alcott 2:12¼, by Albion, son of Wilkes Boy.

Over in Butte, Mont., on the 15th instant, the old gray gelding Addison 2:11¼, owned by Mr. Peter Breen, won a match race against John Lockheart's Eleanor Ann. The day was very cold and the track bad. The time was slow—2:31 and 2:29. The race was for \$200 a side.

Lucy Vincent, a full sister to St. Edward 2:19¾, and Perry Vincent 2:20¾ by St. Vincent 2:13½, has foaled a very handsome colt by Zombro 2:11. It is a horse colt, good size and a natural trotter. The mare and colt is owned by J. S. Johnson, Pulaski, Pa., who owns the stallions St. Edward 2:19¾ and Allerton Vincent.

Some years ago a table was prepared showing the number of mares which had produced at various ages. At twenty years, 216 were still producing; at twenty-one years, 175; at twenty-two years, 141; at twenty-three years, 83; at twenty-four years, 49; at twenty-five years, 22; at twenty-six years, 8; at twenty-seven years, 2; at twenty-eight years, 2; at twenty-nine years, 1. All cases of mares having bred when past twenty-seven years are phenomena.

It is reported that while the McKinney mare Lady Mowry 2:12¼, owned by Mr. J. C. Mowry of Irvington, Cal., was racing in the East, Ed Geers offered \$8,000 for her, which offer was refused. She is out of Electress Wilkes by Nutwood Wilkes.

Thirty-four new 2:10 trotters have entered that exclusive list this year.

Miss Kinney 2:10¾ by McKinney is just outside the dress circle, but she will be occupying a seat there next year.

Mr. J. C. Adams of Phoenix, Arizona, has engaged the services of Ed Hall, a well known Illinois trainer. Mr. Adams will put the two-year-old brother to Sweet Marie in Hall's hands.

Sonoma May, the sister to Sonoma Girl, that took a record of 2:29¼ at the meeting of the Sonoma County Driving Club two weeks ago, trotted a nice mill in 2:19¾ this week over the Santa Rosa track, driven by Jos. Cuicello. She is one of the great prospects for next year.

Ben F. 2:07¾ has not been first every time, but he was up where there is little dust in most of his races this year.

Bon Voyage, owned by W. S. Clark, Jr., won \$11,050 on the Grand Circuit.

At the Lexington meeting there were seven trotters to enter the 2:10 list for the first time, and seven more that reduced their records although already in that list.

W. J. Kenney, the well-known sulky wheel builder and coast agent for the McMurray sulkies, left for his old home at Zanesville, Ohio, this week, on a sad mission. He had received word by telegraph that his sister was very ill and not expected to live, and in company with his two brothers left on the first train. It is Mr. Kenney's intention to visit the McMurray factory before returning to San Francisco.

Just after King Direct 2:05¾ rounded into form and won a brilliant race at Hartford, he fell lame and had to be declared out of all his late engagements.

Joe Cuicello is working a four-year-old at Santa Rosa that is owned by Thos. Murphy, the well known California trainer who has been a resident of St. Petersburg for many years where he is in the employ of the Czar of all the Russias. This gelding is by McKinney out of a mare by Guy Wilkes and is a big, fine trotter. He trotted a mile in 2:21½ last Wednesday. Mr. Murphy may return to California for a visit this winter.

Chas. De Ryder, the well known trainer who for the past two years has been in the employ of James Butler of New York as head trainer and driver on the Grand Circuit, reached Pleasanton on Wednesday of this week with a carload of horses, headed by the old champion Star Pointer 1:59¼, who landed in fine shape and was admired by all the horsemen who saw him. Mr. De Ryder, who will be in business for himself from now on, has leased Star Pointer for two years and will place him in the stud at Pleasanton in the spring. In his car Mr. De Ryder brought back Mack Mack 2:12 for Henry Helman, also a yearling colt by Baron Wilkes Jr., which Mr. Helman purchased in Kentucky for Mr. Bowles, the owner of Mack Mack. De Ryder also brought three fine Kentucky saddle horses which he selected in Lexington for Mr. H. W. Meek of Haywards. The De Ryder car was delayed several days, having to stop off at Ogden on account of a sick horse. Mr. De Ryder will open a public training stable at Pleasanton, assisted by his brother, and will prepare trotters and pacers for the Eastern or California circuits.

If anyone imagines Pleasanton track is not a busy place he should visit the horse center. Among those who are training horses there now are Dan Sulzer, Barney Simpson, George Ramage, Harry Brown, Ted Hayes, S. K. Trefry, C. F. Bunch, Al McDonald, Walker & Smith, R. Niles, Dr. Boucher, J. R. Albertson, Dan Misner, M. Henry, C. and W. De Ryder, John Green, Jos. Corey, Ted Bunch, Ed Parker, James Thompson, Jos. Cook, Geo. A. Kelly, Russ Davidson, Chadbourne & Sutherland, J. M. Alviso and several others.

Mart Rollins worked his trotter Charley Belden a mile in 2:13½ last Wednesday at Santa Rosa. This gelding is one of the nicest trotters that ever hit a track. He is by Lynwood W. out of a mare by Silas Skinner.

The horses are moving fast at the Santa Rosa track these days. Frank Turner worked his three-year-old pacing filly Carlotta a mile in 2:15 last Wednesday, the last quarter in 30¾ seconds. She is by Sidney Dillon out of Carlotta Wilkes. On the same day he stepped the two-year-old pacer Carrie Dillon by Sidney Dillon out of Biscarl by Director a mile in 2:16½. This youngster is one of the coming crackajacks of the coast.

Charlie T. 2:13½ by Zombro, is at Pleasanton in Al McDonald's charge and looks as good as peaches and cream. He will go into Zombro's list of 2:10 performers next season.

Dan Misner, C. F. Bunch, and John Green sent their horses from Pleasanton to race on the Southern California circuit.

George Ramage is working a big trotter by Falrose that is showing a lot of improvement. George stepped him a mile in 2:39 four weeks after receiving him, and thinks he will be trotting in standard time before Christmas.

Ed Mills is expected back in Pleasanton within a few days from his Eastern trip. Searchlight will do a big business in Kentucky next spring, many mares being already booked.

Three or four green horses by Sidmore have made their appearance at Pleasanton during the past month and they are all showing speed. Fred Chadbourne has one and Al McDonald another that are beating 2:20 and going easy.

The California Jockey Club will open its winter meeting at Emeryville November 11th, and after racing there one month the scene will be shifted to Ingleside track, where they will open December 11th. Both the Christmas and New Year programs will be run at Ingleside.

Second payment of \$5 each will be due and payable November 1st on foals of 1904, entered in the Stanford Stake of 1907. Don't allow your colt to drop out of this rich stake. Send the \$5 to Secretary Albert Lindley, Sacramento, on or before next Wednesday, November 1st.

Budd Doble, W. J. Andrews and W. O. Foote have each won the Transylvania twice. Andrews is the only one of the three to also win second money in the third race.

There are 15 trotters and pacers that have records from 1:55¼ to 2:02, and five of them, or one-third, trace to the two full brothers, Alcyone 2:27 and Alcantara 2:23. Nine of them trace one or more times to George Wilkes 2:22.

Every one knows that the trotting record with pacemaker in front is 1:58½, made by Lou Dillon, but there is some uncertainty as to the record made with runner alongside, says the American Horse Breeder. Several persons have asked us what this record was, and thinking there may be others who seem uncertain as to this style of going, we would say that it is 2:01, also made by Lou Dillon. This was last year at Memphis. Major Delmar, also at Memphis, trotted in 2:01¼, which was the record when made, and which is now the best for a gelding, while the mile in 2:02¼, by Cresceus, is the stallion record.

R. Ashton Lawrence, founder of the Boston Work Horse Parade Association, is dead. Under the auspices of this association monster parades of the well kept draught and delivery horses of Boston and vicinity are held each year, and prizes are awarded to the drivers whose horses show the best care and condition. The parades have worked a great improvement in the treatment of work horses in Boston.

Dan Patch eats International Stock Food every day of his life. He is the world's undisputed and unequalled harness champion and if International Stock Food is good for him it should be good for other horses. If you want a fine large colored lithograph of Dan Patch, with others of Arion, Directum, Roy Wilkes and one of Dan Patch breaking a record, send to the International Stock Food Company for them at once. They are free. For address and full particulars see the full page advertisement in this issue.

SAN FRANCISCO DRIVING CLUB.

The two unfinished races, postponed from Sunday, October 14th, were concluded at the Santa Rosa track last Sunday under the auspices of the San Francisco Driving Club. The free for all pace was won by Kattie D. by Dictator, and she took a record of 2:13¾ in the sixth heat. Welladay won the 2:25 class, which was also unfinished from the previous Sunday. Joe Cuicello drove both winners.

A special race was arranged for Senator Hearst, Billy F. and Velmer, and was won by the first named, driven by Dan Lerginger.

THE BREEDERS' FUTURITY for foals of mares bred in 1905 does not close until December 1st, so you will have a month to think over the question whether you want some of that \$7000 which is guaranteed. It only costs \$2 to nominate a mare in this stake. The conditions will be found in the advertisement.

AFTER MANY YEARS USE.

MALLORY COMMISSION CO.,
Office of the Manager,
CHICAGO, 8-22-05.

Wells Medicine Co., Lafayette Ind.
Gentlemen:—It is a great pleasure to give a testimonial of such a valuable remedy as your Craft's Distemper Cure has proven itself to be. We have used it for many years with entirely satisfactory results for the cure and prevention of distemper and coughs in horses, sheep and dogs. Cordially yours,
MORTIMER LEVERING, Vice Pres. and Manager.

GOSSIP FOR SPORTSMEN.

Continued from Page 10

very effective and should be encouraged by all true sportsmen.

Few gun clubs in the state have better hunting preserves than those in the possession of the Pajaro clubs.

About 1500 ducks and 500 quail was the combined bag that marked the opening of the season in the vicinity of Pajaro.

Members of the Watsonville Rod and Gun Club visited their hunting preserves on Elkhorn slough, where nearly every hunter got the limit of ducks and had some excellent sport. It only required a few hours to get all the ducks that the law permits in one day.

Nearly a score of the members of the Pajaro Valley Gun Club went to the club's hunting preserves on McCusker slough and bagged upward of 400 ducks.

Some good bags of ducks were also killed along the slough at the mouth of the river, near Camp Goodall, and hunters had a great day in that vicinity. Other bodies of water were visited during the day by individual hunters and none returned empty-handed.

While teal and sprig led in point of numbers, widgeon, spoonbill and a few mallards were also killed. **Vallejo Game Preserve.**

The city of Vallejo has the proud distinction of being, possibly, the only city in the United States having a game preserve of its own—the reservation in Green Valley belongs to Vallejo, and is a section noted among other things for good duck shooting.

Vallejo people who hunt or fish in that section must obtain permits from the Vallejo City Trustees or Board of Works to do so, and permits are given only to responsible parties and those whose reputation is such that it is not likely that they will leave camp fires burning that might cause untold loss or destroy or trespass on the water works.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

We have had some "classy" winter race meetings in California since 1892, but the coming ones at Oakland, Ingleside and Tanforan will totally eclipse those of the past as did Eclipse the race horses of his era. Verily, looking at the array of speedy turf performers entered in the \$10,000 Burns Handicap, which brings out all that is good in the racing line in this part of the world, one could easily imagine the racing was going on at one of the metropolitan tracks of the far East. The list of owners new to "the land of gold" is unparalleled in our racing annals, too, and some notable names are to be found thereon—names that stand for much that is grand and noble in "the sport of kings." First I will give our readers an idea of the treat that is in store for them during the coming session. Of the flyers of undoubted stake class I will mention Proper, winner of several of the big handicaps this season at the far East in the colors of Walter Jennings; Graziallo, purchased by the latter gentleman for something like \$6,500 to race out this way; Dr. Leggo, the double Derby winner, and one of the very best three year olds ever raced in California, say most excellent judges; Claude, idol of our race goers and in magnificent form, too; Garnett Ferguson's Bear Catcher, the best three year old colt of 1904 and just rounding to after going through the firing process; Lonis Ezell's W. R. Condon, the gallant winner of this year's Burns Handicap and reported to be in grand fettle after his long rest; Military Man, a very fast, game and consistent performer; Al Dobson's Epicure, a proved performer that is thought to have returned to the form that made him famous two years ago; Honiton, "Packy" Ryan's mare, not "out of the money" in seventeen starts here last season, also his San Nicolas, who ran a mile in 1:39½ at Kansas City; Horatius, a Derby and Cup winner; Watercure, holder for a time of the world's record at a mile and a furlong; Haviland, winner of some forty-seven races and a record breaker himself; Ishlana, a stake mare East and West; Celeres, a good second to Dr. Leggo on the three year old colt list last spring; Memories (purchased lately by Dr. J. Grant Lyman for \$10,000 especially to win the Burns handicap); Gregor K., who headed the list of three year old race winners in 1903; Reservation, a big stake-winner in 1903 and 1904 and a victor over Claude in a Derby; Good Cheer, a clever horse this season and last; Wexford, a fast and frequent winner around the Middle West this season; Brancas, Brewer Gerst's splendid winner at Louisville and Latonia recently and the top-weight horse in handicaps at those places; Collonade, which ran a mile better than 1:40 as a three year old and was second choice for the American Derby for a time; Bill Curtis, winner of the Los Angeles Derby of 1904; Downpatrick, a fast and game colt trained by Tom Ryan, who also has the Kansas City Derby winner True Wing; Soufriere, a splendid "stayer" with a world of speed; Red Leaf, a splendid two year old and a consistent three year old now owned by J. O. Keene; Rightful, of Capt. R. R. Rice's string, always a good 'un; Jim Curl's old horse Bragg, a winner from Rhode Island to California in good company and victorious on metropolitan courses quite recently; The McLaughlin's Sea Air, when right a rare good one; Bombardier, a California Derby winner; Elie, a nearly world-beater in the longest races run these days; Sir Wilfred (undoubtedly the best two year old in California last season); Ed Sheridan, Dr. Gardner and Tom McGrath, three stake youngsters from Barney Schreiber's farm; San Remo, a steady victor at Latonia last summer; Cruzados, the speediest horse bred in California in recent years; W. Cahill's Andrew Mack, a good horse here last spring, but recently out of form; the same owner's Voladay, purchased this week for the California campaign and a very shifty preformer in any

kind of mud or a slow track; Beau Ormonde, which has run his mile in 1:38; Geranium, a mare that in the Clay colors this season around New York ran six furlongs better than 1:14, a mile and a sixteenth better than 1:46 and a furlong in 1:52½ with from 108 to 110 pounds in the saddle always; Lady Savoy, one of the best two and three year olds in the Middle West in 1904 and 1905; Dalvay, a horse good for a mile in close to 1:39 when right; "Boots" Durnell's John W. Gates; Israelite, a speed marvel from the far East that can run over any sort of course, and his stable companion, New Mown Hay, a fleet mare; Oarsman, a horse trained by Frank Regan well known in this section and which this year ran seven furlongs in 1:26 1-5 with 120 pounds up, winning easily, besides running a mile and a sixteenth in 1:47 1-5 easily and a mile and three-sixteenths in 2:01 2-5 with 120 pounds on; then there is Humo trained by Charley Patterson and bred by Burns & Waterhouse, that is considered a three year old of stake class around New York, and which ran a mile in 1:39½ and a mile and a furlong in 1:53½ easily with 102 pounds up against an all-aged field; High Chancellor, always a stake horse when "on edge" and dangerous anywhere; A. B. Cook, a speed marvel, which after a long retirement has rounded to and is expected to show his old time form, and Confederate, a two year old colt with which Jennings thinks he will win the California Derby next spring. Then there might be mentioned Agnolo, Gateway, Bonnie Reg, Corn Blossom, Magrane, Cigar Lighter, Charlatan, Scotch Thistle, A. Muskoday and Nigrette, horses of some class that might prove to be of stake caliber after all.

Charles T. Henshall, after a long illness in New York, has returned to "the game" and will bring to Emeryville a French-bred mare named Ginette, Mas-sada, Pronta and his horses well known out this way, Head Dance, Sir Brillar and Martinmas. Pronta is likely to prove a mare hard to beat, for the daughter of Ealsetto can either sprint or stay and can negotiate any kind of course. At Union Park, St. Louis, in 1904, Pronta was the best performer on the list.

Prominent turfmen new to the Coast sending out strings this year are James Arthur, Dr. J. Grant Lyman, Frank Healy, Capt. R. R. Rice, Walter Gum and William Gerst, while there will be a return of most of the "old guard," Bob Smith being the lone exception I can call to mind. A surprise is the splitting of his big string by "Boots" Durnell, one division racing in Los Angeles, the other here. H. T. Griffin and Frank Regan will do likewise, as will Barney Schreiber. Billy Oliver returns with Lord Badge and other bread-winners, as do L. A. Bonsack, C. M. Patterson, George Webb, George Dodge, James Curl, W. E. Cotton, Dayton & Co., Lamasney Bros., J. D. Millin, M. D. Miller, L. H. Ezell, P. Ryan, T. H. Ryan, W. Cahill, John Schorr, F. Doss, C. C. McCafferty, F. E. Baird, Mike Daly, H. Robinson and P. Knebelkamp. There will be no dearth of riding talent this season. We will have "Big Bill" Knapp (second to no rider at the far East this season), L. Fountain, Johnny Daly, W. Daly, Eddie Walsh, A. Minder, Schade (Schreiber's jockey), Aubuchon, Loague, Frank Otis, T. Clark, Wright E. Robinson and last, not least, Radtke, who has taken the lead in races won in this, the very season he has ridden race horses. Late in the season we are likely to see Lucien Lyne, Tommy Burns and Jay Ransch taking a few stake mounts. Altogether, as said before, it will be the most interesting season of winter racing ever known on the Coast, viewed from any standpoint you like.

In keeping with the class of horses competing here, the New California Jockey Club has made a decided increase in the purses, having a \$500 or \$600 purse every day and \$1,000 purses on Wednesdays and Saturdays, when stake races are not down for decision. This means a decided increase in the size of the purses.

Realizing the many shortcomings of the scale of weights now in vogue in California, I have compiled one that remedies the existing evils, especially among the two year olds in the last three months of the year and the horses going long journeys.

PROPOSED SCALE OF WEIGHT FOR AGE.

Distance	Age	Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Half Mile	2 years	83	86	89	92	95	97	99	101	103	105	107	109
	3 years	110	111	112	113	114	115	116	117	118	119	120	121
	4 years	122	123	124	125	126	126	126	126	126	126	126	126
	5 years and upward	126	126	126	126	126	126	126	126	126	126	126	126
Three-Quarters Mile	2 years	80	83	86	89	92	94	96	98	100	102	104	106
	3 years	108	110	112	113	114	115	116	117	118	119	120	121
	4 years	122	123	124	125	126	126	126	126	126	126	126	126
	5 years and upward	126	126	126	126	126	126	126	126	126	126	126	126
One Mile	2 years	78	81	84	87	90	92	94	96	98	100	102	104
	3 years	106	108	110	112	114	115	116	117	118	119	120	121
	4 years	122	123	124	125	126	126	126	126	126	126	126	126
	5 years and upward	126	126	126	126	126	126	126	126	126	126	126	126
One Mile and a Half	2 years	102	104	106	108	110	112	114	116	117	118	119	120
	3 years	121	122	123	124	125	126	126	126	126	126	126	126
	4 years	126	126	126	126	126	126	126	126	126	126	126	126
	5 years and upward	126	126	126	126	126	126	126	126	126	126	126	126
Two Miles	2 years	100	102	104	106	108	110	112	114	116	117	118	119
	3 years	120	121	122	123	124	125	126	126	126	126	126	126
	4 years	124	124	124	124	124	124	124	124	124	124	124	124
	5 years and upward	124	124	124	124	124	124	124	124	124	124	124	124
Two Miles and a Half	3 years	98	100	102	104	106	108	110	112	113	114	115	116
	4 years	117	119	121	123	124	125	126	126	126	126	126	126
	5 years and upward	121	124	124	124	124	124	124	124	124	124	124	124
	5 years and upward	121	124	124	124	124	124	124	124	124	124	124	124
Three Miles and Upward	3 years	96	98	100	102	104	106	108	110	112	113	114	115
	4 years	117	119	120	121	122	122	122	122	122	122	122	122
	5 years and upward	122	122	122	122	122	122	122	122	122	122	122	122
	5 years and upward	122	122	122	122	122	122	122	122	122	122	122	122

In races of intermediate distances the weights for the shorter distance are to be carried.
In all races exclusively for two-year-olds the weights shall be 118 lbs. for colts, 115 for geldings and fillies.
In all races exclusively for three-year-olds the weights shall be 123 lbs.; geldings, to be allowed 3 lbs. at all times, fillies 3 lbs. from January to September and 5 lbs. from September 1st to the end of the year.
In races for horses of all ages, geldings are to be allowed 3 lbs., mares 3 lbs. from January to September and 5 lbs. from September 1st to the end of the year.

The above scale is based on the belief that veterinarians are correct when they say a horse is fully matured in every respect at the age of fifty months. Previously the scale for two year olds in October, November and December was the same. In these days, when winter racing is in vogue, the use of the ancient scale would give two year olds running in the months of November and December a decided advantage over older horses, and this has been taken into account in making the new scale and the matter remedied. After a horse has matured, why should he not, from that time forth, carry his full weight at all times—not more in October than in May, if he is fifty months old in May? In the old scales, too, the weight increased with the distance, when in my opinion just the reverse should be the case. The longer the journey the heavier the load felt to the carrier. Taking this view, it will be noted that there has been a cut made of four pounds in the weight carried by a five year old between a race of a mile and a half and one of three miles. It will be noted that I make four year old in the month of May carry as much as at any time in his after career. I am assuming that a majority of the foals come into the world by March 1st, and by making May 1st (four years and two months later) the time when it shall carry the maximum weight, this would be approximately correct.

STATE AGRICULTURAL SOCIETY MEETING.

(Sacramento Union, Oct. 22.)

The directors of the State Agricultural Society met yesterday at the Pavilion for the purpose of passing the financial statement of the recent fair. After transacting the necessary business the directors visited Governor Pardee at the Capitol and laid the statement before him. There were present Directors Burke, Fox, Howard, Johnston, Kingsbury, Land, Paine, Rose, Wilson, Whitaker and President Rush, with Albert Lindley, Secretary.

The balance sheet is as follows:

On hand in State Treasury	\$ 2,250.00
Receipts from all sources	40,504.21
	\$43,054.21
Expenditure	\$41,205.62

Actual balance in Treasury after all

bills are paid \$ 1,848.59

Action was taken and committees appointed to revise and reconstruct the premium list, both in relation to the livestock department and the agricultural, horticultural and other departments where the exhibits are displayed in the Agricultural Pavilion.

A committee of three was appointed to confer with the committee from the Pacific Coast Trotting Horse Breeders' Association and representatives from Fresno, Los Angeles, San Jose, Woodland, Stockton and other breeding centers, with a view of arranging a continuous circuit of fairs to finally conclude with the State Fair.

An effort will be made to get Mr. McLaren, superintendent of the Golden Gate Park, and Professor G. W. Shaw of the agricultural department of the State University, to visit the Agricultural Park and determine what grasses and trees would be best adapted to the soil and most suitable for the fair grounds.

A resolution was adopted which changes the conditions of all future Occident and Stanford stakes so that horses not winning a heat in three will be sent to the stable but retain their standing in the summary.

The secretary was instructed to correspond with the various amateur athletic associations with a view to conducting athletic tournaments during the fair, where different counties will be represented in an inter-county contest, such as baseball, gun clubs and the like.

Resolutions were adopted to revise the rules relating to running races and arrange for stake races for thoroughbreds.

The directors visited the governor's office in a body to report to him their financial condition and to get him, if possible, to give to them such portion of the \$60,000 appropriation made by the last Legislature, of which the board had only used the sum of \$28,500, as would be necessary to cover the deficit that was incurred in making improvements upon the new fair grounds, and a further sum sufficient to provide for the expenses of planting grasses, trees and painting, protecting and roofing all buildings that have already been constructed. The governor expressed himself as being pleased with the manner of conducting the affairs of the society this year, and with the State Fair itself. He signified that there were some things that he might have done a little differently himself, but as a whole he thought it was a very creditable show and reflected credit upon the board, and he thought it was a long step toward placing the affairs of the Agricultural Society of California on a basis where they would rank with the affairs of other states in the East.

ANSWERS TO CORRESPONDENTS.

B. S. Pleasanton.—Boydell is by Electioneer 125, dam Sontag Dixie, dam of five in the list by Toronto Sontag, second dam Dixie by Billy Townes, third dam by Sir Charles. Boydell is own brother to Del Mar 2:16½, sire of Major Delmar 1:59¾. Prairie Bird 2:28½ was by Plaztall 8:132, dam Fashion by John Baptist, second dam Fanny Fern by Irwins' Tuckahoe, third dam a daughter of Leffler's Consul. Prairie Bird is the dam of Flight 2:29 and also dam of the stallion Prompter.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.
April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Nov. 1—Trout season open.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.
July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Oct. 26, 28—Lawrence Kennel Club. Newcastle, Pa. W. L. McConnell, Secretary. Entries close Oct. 16.
Nov. 15, 16—New England Beagle Club's specialty show. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 21, 22—Brockton District Kennel Club. Brockton, Mass. J. W. Sullivan, Secretary.
Nov. 30-Dec. 2—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.
Dec. 13, 14—Southwestern Kennel Club's bench show at Pasadena. Entries close—
1906.
Jan. 17, 20—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburgh, Pa. F. S. Steadman, Secretary.
March 14, 17—Passaic County F.I.-h and Game Protective Association. Paterson, N. J. N. J. Mathews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
June 9—Wisconsin Kennel Club. Wisconsin, Pa. J. Sergeant Price, Secretary.

Field Trials.

Oct. 23—Ohio Field Trial Association. Washington Court House. O. C. T. Phillips, Secretary, Columbus, O.
Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill. Entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 30—National Beagle Club of America: 16th annual trials. Stevenson, Md. Chas. R. Stevenson, Secretary.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapla, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Huntsville, Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Roehm, Secretary. Dayton, O.
Nov. 13—New England Beagle Club. 12th annual trials. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov. —Indiana Field Trial Club, (Week following Illinois Champion Stake). C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary, Richmond, Va.

AMERICAN BRED DOGS.

Editor Breeder and Sportsman, San Francisco:

Dear Sir—My attention has been called to the fact that contributors to the columns of your valuable periodical have called on you for a definition as to what constitutes an "American-bred dog." In order to remove all doubt on the subject, I would feel obliged if you would allow me to use your space for the purpose of publishing the official definition of the American Kennel Club, and thereby removing the existing uncertainty.

An "American-bred" dog is the progeny of a bitch owned in this country, which progeny is whelped therein. If a bitch is owned in the United States and is sent to a foreign country to be bred and is returned to this country to whelp, the progeny is American-bred. But if a bitch is bought in a foreign country and is bred there before being brought to this country, the progeny is not "American-bred," although it is "American-born."

It goes without saying, that a bitch owned in the United States and bred here must necessarily have "American-bred" progeny. That part of the proposition should be so obvious as to need no stating.

Apologizing for this trespass on your space, and thanking you for the courtesy of your columns, I am, dear sir, yours truly,

J. P. NORMAN,
Secretary Pacific Advisory Committee A. K. C.

Jackson's Napa Soda does not tangle the feet.

GUTS, LEADERS AND LINES.

(Concluded from Last Week.)

The history of the fish line is buried in the forgotten past, but mention is found in the sacred writings of "hooks," and there are evidences of the "fisher" in Isaiah, Chap. 19, v. 18, "And the fisher shall mourn and lament and those that cast the hook into the river." Necessarily the hook was attached to the line, or how could it be cast into the river for fish if it were not? The earliest mention in English literature for the "lyne" is in the "Fysshing With an Angle," by the Prioress of St. Albans. Dame Juliana Barnes or Berners, whose book was one of the earliest printed in Britain in 1496, by Wynkyn de Worde. She also used colored lines. She says, "After that ye have made thus your rodde, ye must lerne to colour your lynes of here (hair) in this wyse. Fyrste ye must take of a whyte horse taylor the longest (longest) haire and fayrest (fairest) ye can fynde. Ever the rounder the better it is. De-part (separate) in five parts, and every parte ye shall colour by hymself in dyvers colours, as yellowe, browne, tawney, russett and duske, and to make a good colour to your heere (hair) ye shall do it thus." The good dame here proceeds to give recipes in which "small ale" and alum, and "cope-rose" (coppers) and verdigris are ingredients. Her recipe for staining the hair line is as follows: "Take small ale a potell (two quarts) and stampe three handfulls of walnut leaves, and put togidre, and put in your heir (hair) till it be as depe as ye wolle have it."

For a russet color she recommends "stronge lye—a pynt, halfe a pound of sote (soot) and a leetle juice of walnut leaves and a quart of alum, and put all togyder and boyle theym welle."

What kind of results she obtained after this operation of "boylling" can be surmised. There are five other prescriptions equally extraordinary, and all intended for horsehair lines of different colors for different seasons of the year.

It is a fact that until quite recently the fly-lines of many of the best English trout fishermen had hair woven in them with the silk, and the buoyancy of these lines in the water and the ease with which they could be cast I can testify to from actual experience. To this day a Scotchman in Montreal makes hair leaders twisted for bass fishing, and his best customers will take nothing else because of the elasticity of the hair of the "white stallion's" tail. In the south of England many trout fishermen use the hair from a brown stallion's tail, just as the modern angler uses drawn gut.

The good dame of St. Albans gives a rough wood cut of a machine for making the lines she talks of. I have seen the original copy in the British Museum of this "Trentysse" and the machine looks like an old Indian bow rather than a weaving or braiding machine. The modern braider is of course a very ingenious arrangement of spindles which converge to a center and carry the thread of silk or flax from which the line is made. Some of the Nottingham silk lines are very fine and of exquisite make, and many of the line-makers, such as the Natchaug Company of America, are unexcelled in their manufacture. A good silk braided line is facile princeps, and not to be beat. It is superfluous to name the many makes on the market. Every angler knows where to get a good line at a moderate price.

At intervals there have been inventions of original lines put on the market, both in England and America. The Foster Bros. produced what was termed the Acme line some 25 years ago and I have fished with this line with much satisfaction. It was made of the finest braided silk on the outside and inside was a core of copper wire. This device rendered the line somewhat stiffer and less liable to kink and heavier for the size than the ordinary line and easier to cast in a wind. One could also cast farther with the same amount of force extended with the "Acme" than with the braided silk line. Quite recently there has been patented a braided copper line with a core of silk thread, which is the exact opposite of the "Acme" line. This line is stiff and heavy and designed for deep water trolling, no sinker being needed. I have tried it in a deep New England lake near Winsted and find it works very well and takes the bait down satisfactorily. Whether it will be popular or not I am not in a position to say. It fills a want in deep water trolling for lake trout which certainly exists and probably will have a ready sale to those who do not care for the hard work of the heavy sinker.

The dressing of a silk line, especially what is termed enameling, is a fine art and there are many methods too numerous to describe. One of the simplest is boiled oil (linseed) and though it takes a long time to dry it certainly is a preservative of the first class. A rough-and-ready one is paraffine wax with the addition of 10 per cent of white resin. This is heated to melting point and the line allowed to simmer for a short time in it. It is then run rapidly through a clean linen rag and in a few minutes the line is ready for use and acts very satisfactorily for quite a period of use, after which the treatment can be repeated without detriment to the line, providing the heat of the solution be not too great, when the line is immersed. Mr. Henry P. Wells, in his "Fly-

rods and Fly-tackle," gives the following dressing for lines: "Heat two ounces of linseed oil until it will singe a feather dipped in it. Melt in and mix thoroughly with it a piece of camphor the size of a hazelnut; stir in an equal proportion of good copal varnish. Soak the line in the mixture while the latter is warm, until thoroughly saturated. Then draw the line through the fold of a double leather (chamois) and pressed closely upon it to squeeze out all the dressing you can. Stretch in a garret or similar place to dry. This will take several days according to weather. When dry, warm your mixture and soak again. Squeeze with the leather as before. When this is dry rub on a third coat with a rag and wipe the line afterwards. When the coat is thoroughly dry, rub well with piece of paraffine from one end to the other and then polish the line briskly with a woolen rag." This process takes quite a long time, but it is worth while. No second coat must be applied until its predecessor is thoroughly dry.

A first-class dressing is given by Thad Norris in one of his books quoting mainly from an old English authority. Here is the recipe: "To a quarter of a pint of double-boiled cold drawn linseed oil add one ounce of good size. Gently warm and mix well, being careful to have the line quite dry. Soak it in this mixture till it is thoroughly saturated, say for 24 hours. Then pass it through a piece of flannel, pressing it sufficiently to take off the superficial coat which enables that which is in the interior to dry well and in time to get stiff. The line must be hung up in the air, wind and sun, out of the reach of moisture for a fortnight till quite dry or nearly so, when it must be redipped to give an outer coat for which less soaking is necessary. After this wipe it again, but lightly. Wind on a towel horse before a hot fire for two or three hours, which will cause the mixture on it to "flow" (as the Japanese term it) and give an even gloss to the whole line. It must then be left to dry and harden as before and the length of the final exposure depends on the weather and place, but should be of sufficient length of time."

A process to which I have resorted (and it is entirely my own idea) is the placing of the mixture, whatever it may be, under the receiver of an air pump, so that the vacuum may draw out all the air in the line and mixture and compel the complete penetration of the dressing. The time for this is determined by the thickness of the line, but the process should not be hurried and should be repeated after each coating till at least four coatings have been given and dried and treated in the usual way.

Although I have given the process I have found most useful in line dressing, I frankly confess that I prefer buying an enameled line at ten cents a yard to going to the trouble of dressing it myself.

Texture in the line is the next consideration, and though last it is not the least. It is all-important when one is by the waterside, and begins to be particular about his fishing gear. The slightest flaw is then a great one, and though the line may seem perfect in the tackle shop where it was bought yet when it comes to be used it discloses its real nature without fail. It seems finical to be so exact, but a good line is a possession which needs to be much valued when once acquired. It must, in the first place, be not too light or too thick. The strength should be compatible with the thickness. This is a matter of judgment of course, and depends on the weight of the rod and leader, and the fish one expects to angle for. The old horsehair line was thought the best at one time on account of its elasticity and buoyancy in the air and on the water. Suddenly, however, after being in use for all the centuries since the fifteenth, it struck the fishermen that it was wrong and inefficient. Prickly ends of horsehair stuck out all over it, and it had a way of fraying which was, to say the least of it, annoying. What was to be done? It could not be dressed or varnished. That would make it too heavy, so some other material was sought. Hemp was tried. It fell on the water as a fly line with sufficient lightness, but it would not last long. It soon perished and was finally discarded. Then appeared the silk line woven in the hair and an attempt at dressing the resulting combination was made. It did not work and the line makers made further experiments. They soon found that the lightness so sought for from long time ago was not really what was wanted. So a silk line was braided and dressed with boiled oil, and it was less liable to tangle in the air, and besides its extra weight made it very much easier to propel through the air, a fact that did not seem to dawn on the ancient angler. It took hundreds of years to bring about this evolution. Why it did not occur before is due to the fact, perhaps, that there did not seem to be any necessity for change in the accepted order of things. The silk line as it seems to be the best possible, especially when we take weeks and even months to enamel it. But is it? It is only because we cannot see what may be going on in the years to come that we think everything is the best now. At least, there is no wrong in questioning whether or not we have the perfect line. Some have sworn by the hollow line, but the literary experts who write on fishing have pronounced for the solid line, saying, "the objection to the hollow line is this that should a flaw or bruise assail it, the water instantly finds its way into the tube and it is not long before the line is rotten, notwithstanding every care taken to dry it. The thin and solid line is the one that cuts through the air, and if it be vacuum dressed in boiled oil it will certainly satisfy the most fastidious. But another question arises which is not easy to answer. Whether it is best to have a tapered line or not. The tapered hard silk line is certainly a better line to cast than the line which is the same thickness from end to end. Moreover, the leader being thinner than the line tapers the end of the line, and there is no reason why the line should not also be tapered. That is also a mere

extension of the principle. It certainly is better to cast, but only when the wind is with it, and here is the flaw in the theory. Practice shows that with the wind it is easy to cast a long line tapered. But the solid and even line from end to end will go with the wind and against it, without much difficulty. Again, a tapered line spoils the action of the finest rod. A rod that will cast the solid line will seldom perform as well with the tapered line. Salmon fishermen sometimes use them for down-stream winds, but I recommend at all times the solid, even gauge line for ordinary angling.

To preserve a fine line from decay so that it shall not break unreasonably soon, it is well to dry it on each return from fishing, taking it from the reel with care and unfolding it on a chair in a dry, warm room. It is astonishing how different lines are in their durability. Those of the best silk will last for a decade and those that have any admixture of flax will last even longer. Indeed, the most lasting line for both salt and fresh water is unquestionably a flax or linen line little braided or twisted as the case may be. When the line shows the least fraying or breaking of the enamel it should not be used again until it has been redressed. This can be done with white paraffine wax melted and a little resin of the whitest dropped into the wax when well melted. On the whole and to sum up the whole line question the only wise thing to do is—buy a thoroughly good line of not more than 300 feet and see that you get pure silk and that the dressing is pliable and not stiff. Unless enameled by the vacuum process it is likely to be so.

Duck Shooting on the Susquehanna.

Duck hunting conditions in the East are not such as would be much relished by members of any of the gun clubs having preserves on the Suisun or other good duck shooting marshes. The following account of the sport in a famous hunting district is given by a Philadelphia paper, from which it will be seen that Coast sportsmen have, for the present, much the best of the duck situation:

No outdoor sport with a gun exceeds in exhilaration the shooting of ducks on the famous flats of the Susquehanna river. The season of this pastime of the man of wealth and occupation of the professional market gunner is fast approaching, and on November 1st the little town of Havre de Grace, on the banks of the Susquehanna, midway between Baltimore and Wilmington, will be the mecca of hundreds of sportsmen in search of ducks. The prospects for a season's shooting were never better and despite the recent warm weather myriads of ducks have been seen hovering over the river flats.

The season prescribed by law extends from November 1st to March 31st, the shooting days being Monday, Wednesday and Friday until January 1st, when Saturday will be added. The shooting of ducks on the Susquehanna flats has developed into a great industry and while the number of daily gunners average about 600 there seems to be no end to the feathery tribe and unless the sportsman fails to get a good bag it is for the reason that he does not know how to go about his business.

There are four ways of getting ducks on the Susquehanna flats. The most approved method is shooting from a sink box. This is a coffin shaped boat with extending platforms, that sinks into the water until the platforms rest on the surface. The hunter sits in the receptacle until the birds fly within range, when he rises to a standing or a kneeling position and fires.

A second method is by sneak or bushwhacking boats. These are row boats, generally covered with either canvas or bushes, behind which the hunter sits and glides down on a flock of feeding birds. The same idea is carried out by blind shooting along the shores.

The difference between the hunting of the professional and of the amateur is very marked. The latter, with a party of friends, has reached Havre de Grace, say, the night before the opening of the season. He goes aboard his private yacht and during the night the craft glides down the Susquehanna river and on toward the flats.

The gunner is rolled up in blankets below deck dreaming of myriads of slaughtered ducks. There is a terrible racket all around him early in the morning and as he springs out of his bunk, the thought dawns upon him that the season is on and that he was not on hand to fire the first shot.

In a jiffy he is dressed, and with his friends sits down to a breakfast of buckwheat cakes and sausage. It is queer, but every duck hunter eats buckwheat cakes and sausage for breakfast. Meanwhile the captain has anchored a sink-box and strung out a couple of hundred of decoy ducks. The gunner places himself in the sink-box and awaits his game.

The duck makes the gunner wait for him. If, perchance, he should get within shooting distance, he must be mighty quick with the gun or the chances are that he will lose six cents worth of powder and shot, not to speak of the bird. It happens that in many instances the amateur sits in his box and waits, and after waiting a long time, takes a drink. This he does several times, and after firing his gun a half dozen times at a flock of birds fifty yards out of range he gets disgusted and, signalling his yacht, is taken aboard. The day's sport may have cost him \$50.

This picture is not overdrawn. On the opening day of the season on the Susquehanna last year two amateurs who occupied a sink-box shot during the day shot only three pairs of blackheads and two pairs of redheads. Another man, disgusted and bound for home, carrying one little "mudhen" or crow duck, the most despised of the duck family, was seen at the railroad station at Havre de Grace. He said the bird he carried had cost him \$100.

THE QUAILS OF THE UNITED STATES.

Bulletin No. 26 of the Bureau of Biological Survey, United States Department of Agriculture by Sylvester D. Judd, assistant, Biological Survey.

Introduction.—The quails of the United States, because of their interesting habits and marvelous diversity of form and color, are a notably attractive group. All are handsome birds, but the most striking and beautiful species live in the Southwest and on the Pacific Coast. Seven species occur within our borders, but only one in the Eastern States. The others are widely distributed from Texas to California and Oregon. Their range was, and still is, continuous along the entire southern border of the country from the Atlantic to the Pacific; but there is an irregular belt along the northern border and a large area in the interior, comprising the Great Plains, the northern three-fourths of the Great Basin, and the Rocky Mountains, in which they appear to have been originally wanting.

With few exceptions our quails welcome the extension of agriculture, and the added food supply in farmed areas results in an increase of their numbers. This is equally true of the bobwhite of the East, and of some of the desert species of the West. So fully does the bobwhite appreciate the advantages of the farm that its range has increased with the extension of the cultivated area, especially west of the Mississippi.

The quails, because of their cheerful habits, their beauty, and their value as food, are usually welcome on the farm; but their real value to agriculture is not yet generally understood. The investigations of the Biological Survey show that these birds, with rare exceptions, are not only harmless, but that usually they are very useful to agriculture. This is particularly true of the bobwhite, which constantly feeds on injurious weed seeds and insects, and thus renders valuable service to the farmer. In return for this good service it is but fair that these birds should be treated with friendly care and interest.

The well-known bobwhite is the only quail indigenous to the Eastern United States, where it ranges from southern New England to Florida and Texas; but owing to climatic influences the birds of Florida and of Texas differ enough to be distinguished as geographic races. Wherever it occurs, however, the bobwhite has the same call, and varies but little in habits. A closely related bird, the masked bobwhite, inhabited southern Arizona until within a few years. Owing to dry seasons and the overstocking of its home with cattle, this bird is now supposed to be extinct within our borders; but some probably exist in parts of Sonora, Mexico.

Although bobwhites are handsome birds, yet they are the plainest quail in the United States except "cotton top" or scaled quail of the desert of southern Texas and Arizona. The latter is slaty bluish on the upper parts, which are ornamented with large scale-like markings, and has a whitish crest.

The most bizarre and curious of all is the Mearns quail of the high, broken plains and mountain slopes of southwestern Texas, southern New Mexico and Arizona. It is short and round bodied, like a little guinea hen, and this superficial likeness is increased by brilliant, round, white spots ornamenting the dark sides. It is the gentlest of all the quails and is so unsuspicious that when a person encounters one it often walk unconcernedly about or stands looking curiously at the newcomer, when it is not infrequently killed with a stick or stone, a characteristic which, among the people where it lives, has earned for it the name of "Fool Quail."

The Gambel quail is a habitant of the southwestern desert region, where it ranges the brushy foothills and the valleys along water courses. It is a beautiful bird, the head handsomely marked and adorned with a jet-black recurving crest, and the flanks bright chestnut, brilliantly streaked with white. This quail, one of the most conspicuous and pleasing forms of desert life, is numerous wherever it can find sufficient food and water. For ages it has claimed many a remote watering place as its own, but it welcomes the settler and finds additional shelter and food in his irrigated fields. Under the new conditions its numbers increase and it repays the favors received by becoming semi-domesticated. Its presence adds a touch of bright color and animation to the dreary surroundings of many a lonely desert ranch.

The California valley quail belongs entirely to the Pacific coast, and probably is the most beautiful of the smaller gallinaceous birds of the world. It resembles the Gambel quail in its recurving black crest and general appearance, but exceeds that bird in the richness of its colors and markings. It is abundant in most parts of California.

The California mountain quail, the largest and one of the handsomest of this group, inhabits the wooded mountains of the Pacific coast, and bears a superficial resemblance to the red-legged partridge of Europe. Like the Mearns quail, its haunts are usually more remote from cultivated lands than are those of the other species.

The services to agriculture of the western quails, while in most cases appreciable, are far less valuable than those of bobwhite, mainly because the birds are much less insectivorous. Moreover, the California valley quail sometimes damages the grape crop.

The value of a single game bird is of course small, and it is from this narrow point of view that its relation to the community is usually considered. When, however, the value of any important species is worked out the result is surprising. It has been conclusively demonstrated that in Virginia and North Carolina alone the common quail annually destroys many tons of noxious insects and weed seeds. The great value of this service must be apparent to all who appreciate the never-ending warfare between

the farmer and his hydra-headed enemies, the insects and weeds. The food value also of the quail is great, and the health and pleasure derived from their pursuit has resulted in the investment of millions of dollars. When it is generally understood that by judicious effort the numbers of these useful birds may be greatly increased, with a proportionate benefit to all concerned, it is hoped that efforts to this end will not be long delayed.

The Bobwhite.—(*Colinus virginianus*). The name is used here in its broad sense to cover the typical bird of the Eastern States (*C. virginianus*), and the two sub-species, the Florida bobwhite (*C. v. floridanus*) and the Texas bobwhite (*C. v. texanus*).

The bobwhite is one of the most widely distributed and popular game birds of the United States, but in many places it is suffering ruthless extermination. Sportsmen, farmers, legislators, and ornithologists, as well as the friends of birds in general, should interest themselves in the problem of its preservation. In the Northern, Western, and Middle States, it is commonly known as "quail," in the Southern States as "partridge." This tends to confusion, since in New England and northern New York the name "partridge" is commonly applied to the ruffed grouse. Both names were brought to America by English colonists from their Old World homes, where they are applied to species not originally inhabiting this continent. The name "bobwhite" is from the familiar call note of the bird.

In some of its characteristics bobwhite differs strikingly from other members of the family. For example, the crest—a well-developed adornment of several closely related American quails—in bobwhite is invisible except when the bird is excited.

The common bobwhite ranges more or less generally over the eastern half of the United States and southern Ontario, except in the colder, mountainous parts, from southern Maine to northern Florida, and west to South Dakota, Nebraska, Kansas and Texas. In addition, colonies have been introduced and found to thrive in various localities in Colorado, New Mexico, Utah, Idaho, California, Oregon, Washington and the island of Jamaica. South of the home of the typical bird, just outlined, bobwhites have a wider range, occupying Florida, western and southern Texas, Cuba, and a large part of Mexico, and extending even beyond the border of Guatemala. Owing chiefly to climatic influences the southern birds differ more or less from the northern ones. The masked bobwhite (*Colinus ridgwayi*), a closely related but separated species, once lived in extreme southern Arizona and the adjoining part of Sonora, but now it is probably extinct within our borders. With this exception all of the bobwhites from Canada to Guatemala and Cuba, according to E. W. Nelson, belong to a single species modified by environment into a considerable number of forms, some of which are strikingly different from the birds of the United States. The Florida bobwhite, which is peculiar to the peninsula of Florida, is smaller and darker than the northern bird. The Texas bobwhite of western Texas and northeastern Mexico is about the same size as the northern one, but is paler and has a light rufous collar below the black band and bordering the white throat patch. The Salvin bobwhite from the southern border of Mexico is very unlike the common bird of the United States, most of the head, neck and breast being plain black and the rest of the underparts plain rufous.

The present account is limited to the bobwhites of the United States, including the Texas and Florida forms.

In the field the nuptial call note of the cockbird is an infallible guide to its identity. This familiar challenge, sounding to the sportsman like "bob white," "bob-bob white," and to the farmer like "more wet" or "no more wet," is by no means the only note of the species during the breeding season. It was the good fortune of the writer during the last week of June, 1902, to hear the nesting note and other calls. Again and again the cock left his distant perch, where he had been whistling "bob white," and, still calling, approached the nest on the bank of a little sluggish briery run between open fields. When within fifty yards of his mate he uttered the rally note, so thrilling to the sportsman in the fall, "ka-loi-kee," which the hen often answered with a single clear whistle. Then followed a series of queer responsive "cater-waulings," more unbirdlike than those of the yellow-breasted chat, suggesting now the call of a cat to its kittens, now scolding of a caged gray squirrel, now the alarming notes of a mother grouse blended with the strident cry of the guinea hen. As a finale sometimes came a loud rasping noise, not unlike the effort of a broken-voiced whip-poor-will. The favorite calling stations were rail fences at a height from 5 to 10 feet, and the limbs of trees along fence rows. One bird whistled in a tulip tree at least 35 feet from the ground. After the breeding season the bird discontinues this characteristic call.

The notes of the bobwhite in fall and winter have been described by many writers. On one occasion the writer watched a bobwhite whistling from a fence rail 10 feet away. At such close range the whistle lost all its melody and became a nasal shriek which was almost painful to the ear. It was repeated on an average five or six times a minute and consisted of either two or three notes, of which the first was so low as to be inaudible a hundred yards away, and the last was strikingly louder. The mode of delivery was peculiar, sitting in a normal, erect position, the bird emitted the first note, then depressing the tip of the bill almost to touch its breast, with a motion as though hiccupping, it gave the second, then throwing back its head and pointing its bill skyward it uttered the explosive, far-reaching third note.

The nesting time of bobwhite in each section of the bird's range is usually limited to a fairly well de-

finer period, but varies considerably in the time of beginning, the difference being partly seasonal and partly regional.

The newly hatched young have chocolate-streaked heads, and resemble small black and red bantam chicks. Whenever these newly-hatched chicks remain motionless their protective coloration renders them invisible unless one makes a most careful search.

From information at hand it appears that the main breeding season for bobwhite in the northern States is during May, June and the first half of July. Florida birds begin to breed regularly the first of April (though some are much earlier), and continue nesting until well into June. Texas birds nest mainly in April and May, but some nest as late as September. Throughout its range some of the birds breed earlier, and others later than the main body of the species, and the occurrence of second or third broods may lengthen the season. A clutch of freshly deposited eggs were found in southern Illinois in October and another set in Missouri in January, the parent bird being afterwards found frozen on the nest. Authentic records, from various parts of its range, show that bobwhite has been known to breed, at least occasionally, somewhere in its range, every month of the year except December. This seems to prove that under certain circumstances bobwhite, like the domestic hen, will lay a clutch of eggs at any time of the year.

The occasional presence with the female, of young of two or three sizes appears to show that at least two broods are sometimes raised in a season, but we lack definite information on this subject. Major Bendire gives twenty-four days as the period of incubation. The male is reported as sometimes assisting in this duty.

(To be concluded.)

DOINGS IN DOGDOM.

Eastern Washington Field Trials.

A. F. Wieseman, of Spokane, the owner of J. W. C. Rodfield winner of the British Columbia Derby and second in the Pacific Northwest trials recently, has developed into an enthusiastic field trial devotee. He proposes to run within a week or two a field trial for Eastern Washington Pointers and Setters.

Mr. Wieseman says in a communication:

"I am trying to get up a field trial here for Eastern Washington dogs that have never had any experience in such trials. I have already four entries promised, and will hold the meet with eight entries. If the trial is held it will be within the next three weeks.

It would be a good chance for owners of dogs to find out if their dogs are as good as they think they are. Every man thinks that he has the best dog in the world until he sees it work against a good dog.

I will get S. Hansen of Seattle, who has been handling my bitch, to come over here to judge the meet. He has had five years' experience in field trials, and is a good man in the saddle. I will gladly give all the information I have about running field trials to anyone who wants to enter a dog in the proposed trial.

This is the first year for my bitch at field trials. She was whelped in Spokane in January, 1904. The Vancouver, B. C., Derby was run on Chinese pheasants and Roddy had only six weeks' work with them, but she defeated 20 of the best dogs of California, Washington and British Columbia. From there she was taken to Whidby Island and given only two weeks' work on bob white quail, and ran against 12 new dogs that had a whole season's work on these birds. These field trials proved that she is a great little dog. I expect her home in a short time, as the season is now over."

Bench Show at Pasadena.

The Southwestern Kennel Club has been granted dates for a bench show at Pasadena—Wednesday and Thursday, December 13th and 14th.

The time selected and the location, it strikes us, are most apropos. The last show in Los Angeles was a big social function and there is no reason why the two day show at Pasadena—barring exceedingly inclement weather, which is a remote probability—should not be a successful affair with a large entry of dogs.

Pacific Coast Field Trials.

W. J. Baughn of Ridgeville, Ind., has accepted the invitation of the Pacific Coast Field Trials Club, to judge at the club's coming trials next January. Mr. Baughn is well known on the Eastern circuit as an able and painstaking judge. He has also been for years past a breeder of high class and winning English Setters. Mr. Baughn had declined all invitations from Eastern clubs for this year, and the coast club is to be congratulated upon acquiring his services.

The second forfeit, \$5, for the Derby, will be due and payable on November 1st. Indications point to a large percentage of the entries made qualifying with the second payment.

The trials will be run this year on the same grounds that were the scene of the club's twenty-second annual trials last January.

Birds are plentiful and the grounds have been patrolled for several months past, prospects on the whole are most promising for a successful meeting.

Secretary Albert Betz, 201 Parrott building, this city, will be pleased to furnish full and complete information to sportsmen desirous of keeping posted on the progress of events in regard to the coming trials.

Pacific Northwest Field Trials.

The winning dogs in the three stakes of the Pacific Northwest Field Trials Club's sixth annual trials held at La Conner Flats, near Seattle, Wash., October 12, 13 and 14, were as follows.

The Derby—First, John W. Considine's English Setter dog Uncle Dudley (Count Whitestone-Sports May Belle); second, A. F. Wieseman's English Setter bitch, J. W. C. Rodfield (Count Blackie-Lundy's Belle); equal third, Captain A. E. Swift's English Setter bitch Lady May (Roderick III-Lady Bird), and J. W. Riplinger's English Setter dog Ptolemy (Ch. Stylish Sergeant-Premier Belle).

All-Age Stake—First, English Setter dog Uncle Jim (Count Whitestone-Sports May Belle); second, J. W. Considine's English Setter bitch Policy Girl (Dave Earl-Top's Queen); equal third, The Pointer dog Diamond Spot (Kitsap Jingo-Lolo), and the Deacon, English Setter dog (Sousa-Policy Girl).

Membership Stake—First, John W. Riplinger's English Setter bitch Ch. Pera (Bolero-Nellie Blade).

A number of the dogs in the California entries were withdrawn and not run at La Conner. The California handlers seemed to be dissatisfied with Judge Taylor's decisions at Ladnor and would not run their dogs under him again at La Conner Flats.

For a Collie Show.

There has been, for several years past, a strong predilection on the part of many fanciers and exhibitors in favor of specialty shows. This project has been advocated often, but has never gone any further locally than the rumor that one or other of the specialty clubs intended to hold a show.

The situation among the followers of kenneldom at present is far more propitious for a successful specialty show than ever before and one little show will do more good now than five years' more talking; in fact the time is at hand where it is almost imperative for one or the other of the specialty clubs to lead the way. A specialty one day show will, among other things, induce the organization of other specialty clubs if not more kennel clubs. It is not absolutely necessary that a show of this kind be a big affair—not that we would not like to see a big entry—the main thing is to start the ball rolling.

The following views of a well known and popular Collie fancier are applicable and worthy the serious consideration of the fancy. The writer says:

"You will have to pardon another lengthy document from this part of dogdom for I have so little time to discuss schemes and I want your opinion at least before I give them up.

"As you know, we have a spring show and a summer show, all within four months. The other eight months we feel hard over past defeats and are eager for another chance. There ought to be this other chance, a loosening up about January, to my way of thinking.

"I have no particular interest in January, except that by the middle of the month the holiday season is over and the Collies should be in good coat and the long stretch of 'nothing doing' would be broken. My idea is that the Collie Club should see its way clear to a specialty show.

"We all raise puppies to show, but the opportunities to show them are limited. There are one or two shows; we must go to them whether we like the judge or not—or else stay at home and miss a whole year. We may go, the decision is close, we loose, but there is no chance to try again and we feel sort of disgruntled for quite a while.

"It seems to me that doggy affairs would run more smoothly and a more enthusiastic feeling would result if there were more shows and more judges.

"A yearly Collie show would become a feature to be looked forward to. It does not matter if the show should be a very modest affair. Better a small show with a future than a big, unproductive splurge.

"So my suggestion is for an afternoon and evening show in San Francisco—perhaps in one of the annexes to the Mechanics' Pavilion, with no benching, each exhibitor to handle his own dogs, with ribbons for prizes and a few modest speclals.

"Now of course, the expense account is to be reckoned on a proposition like this. From our experience we base the minimum costs at about \$95, and the maximum at \$145.

"There were 59 Collies entered at San Mateo. A show in San Francisco should draw considerably more. We figure on a basis of 60 entries a net return of, at least, \$122.50 (in various items not necessary to enumerate here). Now I really cannot see why such a show could not pay for itself, if the management tried to keep down every needless expense.

"There is just one snag that I can see, and that is the judge. Still we must make the break sometime and I, for one, should not object to seeing an amateur do the judging. It would be, no doubt, as satisfactory as some professional judging we have had.

"In the East, in certain breeds, some fanciers, and several of them who have not been in the breed for such a long time, have blossomed forth as judges. And why not here in Collies?

"If we had enough shows, we could try out promising material. In fact, this strikes me as being rather in the nature of our only salvation. We must be a bit independent or things will lose their lustre.

"I heard recently of the sojourn in California of Mr. Rogers of Dupdee, Mich., one of the oldest Collie breeders in America. He is to remain here for some time, I believe. I should think it would not be a difficult matter to have him judge a Collie show. In that case, or should an amateur judge, the item of expense for judging would be cut out.

"I'm sure there must be a half dozen good Collie men who could put this thing on. Make the break and next year have some one else to do the work.

"There could be the usual classes, with veteran, etc., and a competition for tri-colors only, added to induce entries. Inexpensive specials enough to make it interesting would be forthcoming from fanciers, in a spirit of encouragement, I'm sure. The American Fox Terrier Club members will compete for \$2.00 cups; why can we not?"

GOSSIP FOR SPORTSMEN.

Duck Hunting Excellent.

Since the 15th Inst the duck hunters have had splendid shooting in almost all sections of this state. Local shooters who have hunted in the bay counties marshes have brought excellent bags of birds to the city on their return. Canvasbacks are also in evidence to quite an extent, a rather unusual feature thus early in the season. The season thus far is one of the best, for ducks, in years.

Weather conditions have worked against the quail hunters, the country being dry and dusty. A good rain, however, will bring a change in favor of the upland shooter.

Quail Plentiful in Placer County.

The foothills east of Lincoln fairly swarmed with quail hunters on the opening day of the season, and several big bags of the swift flying denizens of the chaparral were brought in by the more expert sportsmen. Last year the quail were extremely scarce in this region; indeed, a hunter was considered exceedingly fortunate if he could start up one bevy in a day's travel. A number of reasons were assigned for this scarcity, but it is more than likely that the indiscriminate hunting during the close season had more to do with the absence of these birds than anything else. During the last close season, however, there has been little complaint, and there has been practically no hunting of any kind in the foothills adjacent to and surrounding Lincoln. As a result quail are much more plentiful this season, and if the festive nimrod can find a locality not placarded with the numerous "no shooting" signs, an abundance of sport is assured. These favored localities are scarce, however, as the owners of foothill lands have suffered so in the past from careless hunters that few places are open to the public for hunting. For this reason the hunting will necessarily be confined to a comparatively small area, and in a short time the quail will be driven away or killed.

Sacramentans Get Many Ducks.

According to Sacramento sportsmen who were in the marshes at sunrise at the opening of the duck season, and who spent the Sabbath on the club preserves, the birds were never more plentiful than they are this year, and it is estimated that in the immediate vicinity of Sacramento thousands fell during the first few hours of the opening day.

In the Big Lake country alone, L. S. Upson claims that 2000 is a conservative estimate of the number of ducks killed, and fourteen hunters who shot on the Glide ranch bagged 507 birds, two of the number getting the limit, 50, and the others anywhere from a dozen to 48.

Those who bagged the limit were Judge Clauson of Dixon and C. C. Carter of Sacramento, and J. R. Hughes was but two shy the 50. Lieutenant-Governor Anderson came next with 45, Frank Newbert shot 40, and Charles Matthews and R. Flint each got thirty-six.

Scores of hunters invaded the Bloom Lakes country near Franklin, and Frank Johnson reports that not a man got less than 25 birds, and from that number up to 40 or more.

Members of the Del Paso Club report the shooting was the best in years, and many of the members came close to the limit in the number of ducks killed. Judge J. W. Hughes and father, J. R. Hughes of Missouri, bagged 63 between them, and County Assessor T. H. Berkey had exceptional luck.

Dr. F. L. Atkinson of the Canvasback Club succeeded in bringing down 46 as well, while all enjoyed excellent shooting.

L. S. Upson and Bert Krull spent the opening day in the Big Lake country, and between them they got 92 birds.

"We shot from the time the sun rose until about 9 o'clock," states Mr. Upson, "and all those in our vicinity stopped shooting before noon. That is the only thing to do. With the bombardment that takes place the birds become thoroughly frightened, and every true sportsman will cease shooting early in order to give them time to recover from their fright and return.

"I have been hunting a good many seasons in that vicinity and never have I seen the shooting so good. The number of hunters out the opening day was unusual. There were scores in the Big Lake country alone, and I will venture to say that 2000 is a conservative estimate of the number of birds killed."

"From what I hear, quail shooting is also better than usual, and those who were out yesterday report the best of luck. One thing against the sport at present is the dry ground, on which the dogs cannot work to the best advantage. After a good rain the sportsmen will begin to make records."

In regard to quail, the ranchers and farmers say that never were there so many birds in that section of the country.

Pajaro Valley Hunting Notes.

While a great many hunters went in quest of ducks, which are plentiful and fat, others turned their attention to quail and visited the hills and wooded lands near Pajaro, where they were well repaid for their trouble. Several hunters killed the limit by 9 or 10 o'clock in the morning and returned to town.

There are sufficient game birds in this vicinity this season to furnish hunters with lively sport. Many of those who did not get out the first day went the following morning and made a splendid showing. From now on the birds will not be so tame and the bags will be correspondingly lighter.

The stringent game laws and the care taken by gun clubs to entice water fowl to visit that section each season, through a system of feeding, have proved

Continued on Page 6, column 3

THE SHEEP OUTLOOK.

The general outlook for the sheep business is so flattering at the present time as to almost amount to excitement in sheep raising and sheep trading circles, says Twentieth Century Farmer. The effort to acquire flocks for future demands, which seems to impress alike both the novice and experienced flock master, is a feature that promises an expansion in prices.

Increased demand for wool invariably creates excitement, and increased prices for sheep is sure to follow. In addition to the demand and higher prices for wool there is a steadily growing demand in our markets for mutton. This demand is of a character that exerts an influence on the local grain markets and general feed supply. The sheep feeding business has developed into an industry in the grain and hay districts, that is a recognized factor in trade, and to an appreciable degree directs and controls the production of crops in those districts.

It has been clearly demonstrated during the last few months that the mutton demand in our home markets has passed the state of prejudice and that people now regard lamb and mutton among the choice food products. These prices have been such as to stimulate the trade in choice mutton, and this is first noticed and appreciated by the professional sheep feeder, and his demands for choice lambs and sheep for the feed yard soon reach the sheep raiser, who discovers his inability to supply this demand. This latter condition has been brought about by the demand from among the new recruits in flock enterprise who are making heavy draughts upon the established flocks for foundation stock to start on.

It is also reported from the market centers that the demand for mutton is so strong as to take a quality of lambs and sheep that formerly found their way to the feeder division. This absorption of the feeder classes of sheep for immediate mutton supply means a shortening of finished mutton in the later feeding season, and when the feed yards are called upon to turn over their products.

The sheep outlook in all its varied phases of breeding flock, feeder supply and finished mutton has not presented a more encouraging aspect for the owner and handler of the flock than now.

POULTRY POINTERS.

Poultry for market should be well fed on finely ground corn meal and mixed grains for two weeks before being killed.

It is claimed that cooked food is best for fattening poultry though some feeders claim the difference is too slight to pay for the extra trouble.

Kerosene oil applied to roosts, nests and cracks or crevices of poultry house walls which are infested with red mites will rid the premises of them. If they have been allowed the right of way until thoroughly established the buildings will need to be gone over thoroughly and several gallons of oil used. A sprayer such as is used for potato bugs is the best to apply the

oil with. Prevention is better than cure.

Poultry in being fattened for market should not be confined to the fattening crates more than two weeks else they will suffer from the confinement and the feeder's object will be defeated. Skim milk mixed with ground grains is a good fattening ration. Yellow corn meal will have a tendency to produce the rich yellow skin that is so popular in our markets.

Geese can be raised comparatively easy when they have a good grass pasture to range over, and when fed rather sparingly there will be very little danger of losses. They do not require much care nor expensive houses. Their sleeping quarters should be kept clean and dry. Protect them from storms and cold winds.

Market ducks are usually confined to yards and fed liberally a variety of foods. They are great eaters, but they make a very rapid growth and are usually ready for market at from nine to twelve weeks of age, depending on the season. The early ones are usually sold as soon as possible to capture the high prices.

While no fowls excel the duckling in ability to wet himself from head to foot with a minute quantity of liquid, on the other hand, no fowl is more sensitive to dampness or is more quickly injured by it.

AN INTERESTING CONTEST.

Professor Olin of the Colorado agricultural college has made arrangements to distribute \$2500 in gold among the boys and girls on the farms in that state during the next two years through one of the most novel and interesting contests ever inaugurated in this country, says an exchange. It is to be known as "The Patterson Seed Competition," having been named after Senator T. M. Patterson, who has agreed to provide the money for the prizes. The competition is open to every boy and girl in Colorado under 18 years of age, and continues for three years, with an annual award of prizes, and a general award at the end of three years. The contest is to see who can produce the best wheat, oats, and barley by seed selections and improvement during the three years' trial, and each contestant is required to grow each year an acre of grain from which is selected 100 heads, to be judged in competition by experts at the college. There will be ten prizes of from \$2 to \$25 each awarded annually for each grain—fall wheat, spring wheat, oats and barley, forty prizes in all each year, and an additional forty prizes for the general competition at the end of the third year.

FARMER SWINE NOTES.

You can't keep pigs from squealing with an empty trough before them.

Keep the pigs growing every minute if you expect them to be profitable.

Young sows selected for breeding purposes should be put on good pasture—apart from those intended for slaughter.

Great care and attention should be given to the boar. He should have a pen for himself some distance from the sows, and sufficiently strong to keep him in. Half an acre of good clover fenced off adjoining his pen would be ideal provided it is at a sufficient distance from the sow pasture.

The practice of cooking grain for hogs has long since been discouraged as of doubtful economical value. The raw grain will give as good results without this expense. With vegetables, as pumpkins, squashes and potatoes it is quite different, for the feeding value as well as their palatability is improved by cooking.

After ducks are nearly grown, only the most preferable ones should be kept for breeding purposes, and not more than half a dozen females mated to one drake. These should be fed lightly until about the first of November, for to force their growth before mating tends to destroy the vitality of the birds, and that in turn the fertility the eggs. A good ration for them consists of one part clover, three parts bran and two parts cornmeal. Subsequently beef scraps may be added to this. Some time in February is when laying should begin, and it is not so important to get a large number of eggs, as to obtain good ones. Under the most favorable conditions, however, the first few eggs are likely to be infertile. Accordingly old ducks should be fed about a third clover and sometimes plain hay and the rest bran and

meal, before beginning to force them for eggs. The point is to fill them up with something bulky, and then when they begin to lay, add 5 per cent of beef scraps, and thus gradually work up, until in a week or two they are receiving 10 or 20 per cent. In order to have them do well water should be kept before ducks all the time.

"SAVE-THE-HORSE" SPAVIN CURE

Registered U. S. Patent Office

HOWE & CO.

Real Estate, Estates Cared For,
AND BUSINESS OPPORTUNITIES,
247 Washington St., Room 2.

Boston, Mass., Jan. 21.

Dear Sirs:—I have used a bottle of "Save-the-Horse," and I consider it the best thing that as yet I have been able to obtain for what it was intended, it having entirely cured a very valuable mare which has been lame since last September with a sprained ankle. We had her blistered twice and laid up for two months, but it did no good. I was just about ready to breed her when I gave it a trial; she is now entirely sound.

Yours respectfully,

ALBERT E. BAKER.

WERE THESE TWO CASES WORTH THE COST OF TREATMENT?

Brooklyn, N. Y.

One of my horses went lame from side or shell bones on both feet, which extended entirely around the quarter, and was laid up for about three months. I used two bottles of "Save-the-Horse," and the horse is perfectly sound. I have driven her over paved roads, and one day gave her a sixty-mile drive and she never showed the least particle of lameness. The growths have nearly all disappeared. I have owned horses for years, used them to build railroads and in all kinds of contract work, and have used remedies, blisters, firing and electricity, but never saw anything take hold and produce such results as "Save-the-Horse" in this case.

D. C. BENNETT, Bullder,
416 79th st.

Nyack, N. Y.

In August I had a mare with an ankle cocked from a bad wrench in a race. It was so bad I had concluded to shoot her, but was persuaded to breed her and turn her out. I bred her, but instead of turning her out used your "Save-the-Horse." In three weeks I was more than surprised to see the swelling disappear, and the remedy produced a complete cure. She is as good as ever. I have raced her since and drive her any distance without any sign of lameness. I cannot say too much for your remedy.

GEO. F. BEHRINGER, JR.

Write us before you fire or blister your horse and you will understand why our written guarantee is an absolute legal contract.

Positively and permanently cures BONE and JOG SPAIN, THOROUGHPIN, RINGBONE (except low ringbone), CURB, SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, BROKEN DOWN, SPRAINED, and RUPTURED TENDONS, and all LAMENESS, without scar or blemish. Horse may work as usual.

\$5 per bottle. Written guarantee with every bottle, as blinding to protect you as the best legal talent could make it. Send for copy.

At all druggists and dealers, or express paid.

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1905.

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES TO CLOSE MONDAY, DEC. 4, 1905.

ONLY \$2 TO NOMINATE MARE.

\$4250 for Trotting Foals. \$1750 for Pacing Foals. \$800 to Nominators of Dams of Winners and \$200 to Owners of Stallions. Money Divided as Follows:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate Mare on December 1, 1905, when name, color, description of Mare and Stallion bred to must be given. \$5 May 1, 1906. \$5 October 1, 1906. \$10 on Yearlings January 2, 1907. \$10 on Two-Year-Olds January 2, 1908. \$10 on Three-Year-Olds January 2, 1909.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace. \$35 to start in the Two-Year-Old Trot. \$35 to start in the Three-Year-Old Pace. \$50 to start in the Three Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.

Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3) and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before January 2, 1907, her nominator may sell or transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1905.

Entries must be accompanied by the entrance fee.

E. P. HEALD, President.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7000, the amount of the guarantee only. Hoppies will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more monies in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and
will save him from the cheap hawker and trader. It is the
standard cure for Spavins, Curbs, Splints, Windpuffs and all
the various lumps and bunches of like kind. Keep it always on
hand and you will be prepared when trouble comes. Leading
horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of
Quinn's Ointment purchased from you about two years ago
removed a curb and thoroughpin and did it for good. My
horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail.
Write for circulars, testimonials, etc.

LOS ANGELES JOCKEY CLUB

ASCOT PARK

STAKES TO CLOSE WEDNESDAY, NOV. 1, 1905,

For the Winter Meeting of 1905-1906, beginning Thursday, November 30, 1905.

The BROOKS COURSE is 73 Yards short of a Mile and a Quarter on the Main Track.

The Jonathan Club Handicap—\$1250 Added.

A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1250 added, of which \$250 to second and \$150 to the third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the announcement of weights, to carry 5 lbs. extra. To be run the Opening Day, Thursday, November 30th.

The Santa Catalina Selling Stakes—\$1000 Added.

A Selling Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1000 added, of which \$250 to second and \$150 to the third. The winner to be sold at auction. Those entered to be sold for \$3000 to carry weight for age; if for less, 1 lb. for each \$200 to \$3000; then 1 lb. for each \$100 to \$500. Winners of a race of the value of \$300, or two races other than selling purses, after the closing of this stake, not to be entered for less than \$1200. Starters, with selling prices, to be named through the entry box at the usual hour of closing the day before the race, and those so named to be liable for the starting fee. To be run Saturday, December 2d.

The Riverside Handicap—\$1000 Added.

A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1000 added, of which \$250 to second and \$150 to the third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the weights are posted, to carry 5 lbs. extra. To be run Saturday, December 9th.

The California Club Handicap—\$1250 Added.

A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1250 added, of which \$250 to second and \$150 to the third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the weights are posted, to carry 5 lbs. extra. To be run Saturday, December 16th.

The Coronado Beach Selling Stakes—\$1250 Added.

A Selling Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1250 added, of which \$250 to second and \$150 to the third. The winner to be sold at auction. Those entered to be sold for \$3000 to carry weight for age; if for less, 3 lbs. allowed for each \$500 to \$2000, then 1 lb. for each \$100 to \$500. Starters, with selling prices, to be named through the entry box at the usual hour of closing the day before the race, and those so named to be liable for the starting fee. To be run Saturday, December 23d.

The Hollywood Handicap—\$1250 Added.

A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1250 added, of which \$250 to second and \$150 to the third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the announcement of the weights, to carry 5 lbs. extra. To be run Monday, December 25th.

The Mount Lowe Handicap—\$1000 Added.

A High Weight Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1000 added, of which \$250 to second and \$150 to the third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the weights are posted, to carry 5 lbs. extra. To be run Saturday, December 30th.

The Rose Selling Stakes—\$2000 Added.

A Selling Sweepstakes for three-year-olds and upward at the time of closing. Mr. George Rose donates \$1000 of the added money. Entrance \$10, \$40 additional to start; \$2000 added, of which \$300 to the second and \$200 to the third. The winner to be sold at auction. Those entered to be sold for \$4000 to carry weight for age; if for less, 3 lbs. for each \$500 to \$2000, then 1 lb. for each \$100 to \$800. Starters, with selling prices, to be named through the entry box at the usual hour of closing the day before the race, and those so named to be liable for the starting fee. To be run Monday, January 1st.

The Pasadena Handicap—\$1250 Added.

A Handicap Sweepstakes for two-year-olds and upward at the time of closing. Entrance \$10, \$30 additional to start; \$1250 added, of which \$250 to second and \$150 to the third. Weights to be announced three days prior to the day of the race. Winners of other than a selling purse, after the weights are posted, to carry 5 lbs. extra. To be run Saturday, January 6th.

NO STAKES FOR STEEPLECHASE OR HURDLE HORSES. We find that overnight races produce much better racing, and will offer two races each week for this class of horses. Added Money to Stakes. No Purse Less Than \$400. Overnight Handicaps and Special Races with \$500 to \$1000 Added. Commencing January 1, 1906, will be given two or three races each week for Two-Year-Olds.

EPES RANDOLPH, President.

RACE COURSE:
Saratoga Springs, N. Y.

THE SARATOGA ASSOCIATION

For the Improvement of the Breed of Horses.

STAKES OF 1907 AND 1908

Entries Close Monday, Nov. 6, 1905

TO BE RUN FOR IN 1907 THE HOPEFUL FOR 1908

THE SPINAWAY

OF \$10,000

FOR FILLIES TWO YEARS OLD, FOALS of 1905—By subscription of \$100 each, or \$5 if declared by November 1, 1906, or \$50 if declared by June 1, 1907. Starters to pay \$150 additional. The Saratoga Association to guarantee the gross value of the race to be \$10,000, of which the second horse shall receive \$1000 and the third horse \$500. The Nominator of the Winner to receive \$500 out of the Stakes. Winners of a race of the value of \$5000 to carry 3 lbs. extra; of two of \$5000 or one of \$7500, 6 lbs. extra. Non-winners of \$1000 allowed 7 lbs. By filing with the Saratoga Association on or before November 1, 1906, an accepted transfer of the engagement in this Stake, the Nominator will be released from further liability.

Five and a Half Furlongs.

By subscription of \$10 each, for the produce of mares covered in 1905, the only forfeit if struck out by November 1, 1907. If left in after November 1, 1907, a further subscription of \$50 each, and if left in after May 1, 1908, a further subscription of \$100 each. Starters to pay \$250 additional. The Saratoga Association to add \$5000. The second horse to receive \$3500, the third horse \$2000, and the owner at time of entry of the mare producing the winner \$2000 out of the Stakes. Colts, 122 lbs.; fillies and geldings 119 lbs. Winners of two races of \$2500, or one of \$4500, to carry 3 lbs. extra; of four of \$2500, or two of \$4500, or one of \$9000, 8 lbs. extra. Horses not having won \$1000 allowed 7 lbs. If a mare in this Stake drop her foal before the 1st of January, 1906, or if she have a dead or more than one foal, or is barren, the entry of such mare is void. By filing with The Saratoga Association prior to November 1, 1907, an accepted transfer of the produce, with its engagement in this Stake, the original Nominator will be released from further liability as to the engagement of the produce.

Six Furlongs.

THE RULES OF RACING, adopted by the Jockey Club, govern all races run under the auspices of the Saratoga Association.

Entries to either or all of the races advertised will be received only with the understanding, and on the agreement of the subscriber, that the provisions of Racing Rules 42 and 43 (hereto appended) form a part of and govern the contract.

"Rule 42. Every person subscribing to a sweepstakes, or entering a horse in a race to be run under these rules, accepts the decision of the Stewards on any question relating to a race, or to racing.

"Rule 43. At the discretion of the Stewards of The Jockey Club, or of the Stewards, and without notice, the entries of any person, or the transfer of any entry, may be refused."

ENTRIES TO STAKES CLOSE NOVEMBER 1st. Records made after entry no bar.

ENTRIES TO PURSES CLOSE NOVEMBER 23rd. Records made on and after November 9th no bar.

No race longer than five heats. American Trotting Association Rules to govern, except that hoppers will be allowed. Six to enter and four to start. Entrance fee to harness races, five per cent and five per cent from money winners.

Two horses may be entered in one class and be held but for entry fee on horse that starts; but if neither starts, one entry fee will be required. A horse may be entered in two races and be held only for entry fee in race in which he starts; but if no start is made, entry fee will be required in one class, and if entered in a stake and a purse race entry fee will be charged on the larger amount.

ENTRIES TO RUNNING RACES CLOSE at 6 o'clock the evening before the race. Entry fee to govern running races, as far as applicable. Western Jockey Club Rules to govern running races.

The management reserves the right to change the order of the program without notice.

Our meeting follows close of Southern California Circuit, which offers \$17,200 for harness races.

Remember we have a new \$50,000 plant, first-class mile and half-mile tracks, and the grandest winter climate in the world.

Horses unloaded at the grounds without change over either Santa Fe or Southern Pacific railways.

W. N. TIFFANY, Supt. of Speed, Phoenix, Arizona.

SANTA MARIA, CAL.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

—at the—

GRAND AMERICAN

Held at Indianapolis, June 27-30, 1905. was [won by Mr. Jas. T. Atkinson of Newcastle, Pa., score 99 out of 100 from the 18-yard mark, using

PETERS FACTORY LOADED SHELLS

This was the Only Event During the Entire Grand American which was won from Behind the 16-yard Line. Many other Notable Scores were made with Peters Shells, among them the following:

1st on Practice Day, F. M. See (tie), 99 out of 100. 1st on First Day, L. H. Reid (tie), 99 out of 100. 2d in Preliminary, Wm. Veach (tie), 97 out of 100. 3d in Grand American, M. Arle (tie), 97 out of 100. In the Consolation Handicap, 2 scores of 98, 5 of 97, 4 of 96 and 25 others above 90 were made with Peters Shells.

All of which merely goes to prove that Peters Shells are WINNERS.

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1905.

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES TO CLOSE MONDAY, DEC. 4, 1905.

ONLY \$2 TO NOMINATE MARE.

\$4250 for Trotting Foals. \$1750 for Pacing Foals. 8 00 to Nominators of Dams of Winners
and \$200 to Owners of Stallions. Money Divided as Follows:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner
of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner
of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot
when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner
of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner
of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace
when Mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate Mare on December 1, 1905, when name, color, description of Mare and Stallion bred to must be given. \$5 May 1, 1906. \$5 October 1, 1906. \$10 on Yearlings January 2, 1907. \$10 on Two-Year-Olds January 2, 1908. \$10 on Three-Year-Olds January 2, 1909.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace. \$35 to start in the Two-Year-Old Trot. \$35 to start in the Three-Year-Old Pace. \$50 to start in the Three Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.
Colts that Start at Two Years Old are Not Barred from Startlug Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3) and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before January 2, 1907, her nominator may sell or transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1905.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7000, the amount of the guarantee only. Hopples will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more monies in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

San Francisco, Saturday, November 4, 1905.

AT FAMOUS DEL MONTE, the principal show place and tourist's resort on the Pacific Slope, where flowers bloom and sun shines from one year's end to another, there was built some years ago a mile track, supplied with stables, grand stand and all the appurtenances necessary to hold a race meeting. On many occasions since, pony racing, trotting and pacing contests and polo games have been held there during the season when society folk and tourists were sojourning there in greatest number, and many spirited scenes have been witnessed on this beautiful race course by the sea. When first built the track was not laid out to the very best advantage, and a year or so ago the Pacific Improvement Company, which owns this magnificent property, secured the services of the well known track building expert, Mr. A. M. Allen, and expended over \$3,000 in making it an up to date race course under his supervision. The track was widened and drained, the turns thrown up to the regulation grade and in dry summer weather it is now one of the fastest race courses on the Pacific Slope. The soil with which this track is covered is unfortunately adobe, the only thing available close at hand, and in the winter or rainy months cannot be used for training or driving over until several days after a rainy spell. The fact that a \$20,000 plant is thus idle a greater part of the time has led the management of the P. I. Company to consider plans for making it a winter track, realizing that were the stalls filled with horses in training, and the track in daily use, the great hostelry would have an attraction that would be greatly appreciated by the thousands of tourists who visit it from all parts of the world each year. Del Monte has many attractions of which no other great resort can boast, but a place where handsome and speedy trotters and pacers could be seen every day taking their work and where quarter and half miles at close to two minute speed could be witnessed, would be a source of delight to hundreds and give Del Monte another distinctive feature in addition to the many it now enjoys. It will require the expenditure of a large sum of money to make this track fit for winter training, but the management would not hesitate to go to this expense were it reasonably assured that horsemen would take their animals there to train. Mr. Allen gives it as his opinion that the adobe should be scraped from the track, and a coating of sediment soil put in its place. He estimates that it will require five thousand cubic yards of this soil to cover the track and that the cost for completing the work would be in the neighborhood of \$5000. This done, however, the track could be used within an hour or two after the heaviest rain, as the drainage is as perfect as can be made. There are now ninety-six of the best of box stalls, all floored and located on a high sandy knoll free from mud in the wettest season. The boarding house for the men is a well constructed and comfortable building, and the spot where the track is located is the warmest and the driest of any on the extensive property owned by the P. I. Company on Monterey Bay. Should this company decide to make the suggested improvements on the track it will also build a hundred or more additional stalls, all constructed in the most up-to-date manner, and Del Monte training track will assume a place among the best winter tracks in America. There would be no better place to bring a high class horse to the attention of people who will pay the price for such an animal, and there is little doubt but many of the leading trainers of the Coast would immediately recognize the many advantages of Del Monte as a training centre and apply for stalls there as soon as the proposed improvements were made. The opening of a high class train-

ing track for harness horses at Del Monte would mean much for this interest and the Breeder and Sportsman will hail such an announcement with much pleasure. It would be an excellent place to hold a trotting meeting during the summer months, as within a radius of ten miles at least ten thousand people are sojourning every week from the first of July until the latter part of September each year. The roads about Del Monte are the most perfect and the best kept to be found in California and as a place for jogging horses during the winter months they are unsurpassed as they are as clean as paved streets. Every owner of harness horses on the Coast will unite with us in hoping that the suggested improvements of the Del Monte track will be made and that it will become one of the leading training grounds in California.

THE SAN BERNARDINO ENTRIES which will be found in full on the following page, furnish plenty of evidence that the meeting to open on this new track next Thursday will be not only high class but one of the best ever seen in the southern part of California, and will make an auspicious opening for the new circuit recently organized in that section with Mr. A. W. Bruner as secretary. The fact that a number of trotters and pacers that have been racing on the Grand Circuit will start at this meeting shows that the energetic secretary has been at work to secure attractions that will draw the horse loving people to see the contests. The 2:09 class trot in which John Caldwell, Morone, Adam G., Jupiter B. and Helen Norte are entered will prove a most interesting race. We know how John Caldwell, Morone and Helen Norte raced and won heats against some of the best Eastern trotters this year, and will have a chance to see how such horses as Adam G. 2:11½, the fastest of the trotters on the California circuit this year, will compare with them. The great feature of the meeting, however, is a match race between the Eastern pacer Hazel Patch 2:02¾ and the California champion Zolock 2:05¼. A gentleman who spent several weeks on the Grand Circuit this year and saw Hazel Patch race several times expressed the opinion in the office of this paper this week that Hazel Patch was a faster horse than any pacer racing this year, excepting Dan Patch and Audubon Boy, and they were not really racing. He believes him capable of pacing heats below 2:02. Granting all this there are many California horsemen who will look to see Zolock compel Hazel Patch to lower his record or be defeated when they meet at San Bernardino if both are in shape and other conditions favorable. The San Bernardino track has lately had nearly \$7000 expended on making it as fast and safe as possible and it will be in record breaking shape when the meeting opens next Thursday.

AMONG THE ARRIVALS on the last steamer from Australia was Mr. C. W. Wright, a well known horseman who has been engaged during the past two years exporting standard bred horses from the United States to Australia. Mr. Wright, who is well acquainted with the demand for harness horses in the colonies and who enjoys the confidence of the best buyers there, has shipped horses on order and met with success. He has heretofore shipped by way of the Cape of Good Hope, but is now contemplating sending future shipments by way of the Oceanic line from this city. He has favored us with a handsome photograph of the champion trotting stallion of Australia, which we reproduce on the front page of the Breeder and Sportsman this week. Emulator, the horse in question, is a square trotter, has a two-year-old record of 2:59, a four-year-old record of 2:24½ and an aged record of 2:18¾. His two-mile record is 4:57. Emulator is by the Australian sire Osterley. He is a bold, free-going trotter, and Mr. Wright states that when seeing him trot a mile in 2:20 on a grass track with flat turns, he came to the opinion that under American conditions of tracks and training he would be a 2:05 trotter. The picture shows him to be a handsome horse of much substance as well as plenty of quality. He is owned by Mr. J. B. Zander, of 245 King street, Melbourne.

THE FIRST ANNUAL SALE of cattle from the Humoldt Herd of Shorthorns owned by Rush & Pierce, took place at Suisun, October 19th. The sale was handled by Fred H. Chase & Co. of San Francisco and was quite a success. Buyers were present from all over the State. The average for the 55 head sold was \$89.10. The bulls averaged \$127.30. Mr. A. J. Molero was quite a heavy purchaser, bidding in 19 head. He intends to go quite extensively into the breeding of shorthorns on his fine ranch in

Monterey county. Judge Carroll Cook of San Francisco was also quite a heavy buyer, and will place the cattle on his farm at Glen Ellen, Sonoma county.

A MONTANA TROTTER.

Richie Baron 2:16½, owned by J. V. Collins of Butte, the horse who started on the Montana circuit this fall, a green trotter, has made one of the best records ever made by a Montana horse on the state circuit, and is entitled to the state championship. The best judges of horse flesh are predicting that next season the horse will prove himself to be one of the best trotters in the West. The judges and other horsemen at the Montana fairs, who watched Richie Baron's work on the state tracks this fall, are predicting that he will be good for three heats in 2:06 next year. They say he would easily have made 2:10 this season on the fast Eastern tracks.

Richie Baron is by Baron Wilkes out of Winnell, by Wilkes Boy. He was bred by Marcus Daly and was purchased by Mr. Collins, the well known Butte man, four years ago, at a sale of the Daly horses. Since that time he has been driven by Mr. Collins as a roadster until the present season, when he was put on the state circuit. He is seven years old.

Richie Baron raced on the Livingston, Bozeman, Anaconda, Missoula and Helena tracks this season. He was started eight times and wasn't out of the money in any race. He won three starts out of the eight, was second twice and third three times, and won in purses something over \$3,000. He made his mark of 2:16½ when he won the Bankers' stake, worth \$1,000, at Helena. In this he won the first heat, lost the second and third and then won the fourth and fifth. He also captured the Breeders' Stake at Helena, trotting the second race with only one day intervening. The race was three heats out of five. Richie won the first three heats straight, equaling his old mark. In all his races this fall he was never put to a drive, a whip was never used on him and he was never pushed to his best speed.

Mr. Collins' horse was also the only one on the state circuit which was able at any time this fall to come under the wire ahead of Dr. Frasse 2:12½. Richie Baron beat Dr. Frasse one heat in a free-for-all trot at Livingston, and was second to Dr. Frasse in the race.

Patsie Rice of Helena, who trained Button last year, had Richie Baron on the state circuit this fall. He is still training Mr. Collins' horse and both he and Mr. Collins expect to see the horse make a mark of at least 2:06 next year.—Butte Evening News.

ANSWERS TO CORRESPONDENTS.

William Mead, Santa Maria.—The Year Book does not credit either of the horses mentioned in your letter of inquiry as having a standard record—that is 2:30 or better trotting, or 2:25 or better pacing.

The Suisun Republican says: M. J. Reams has leased Mrs. Field's ranch of 1200 acres on the Denver road two miles east of Suisun, and has taken up his residence there with his family. A large portion of the ranch will be devoted to farming and stockraising. It is Mr. Ream's intention to build a half-mile track on the place for training speed horses. He has a number of young horses of his own, the speed of which he desires to develop. He has not yet decided whether or not he will handle outside horses, but he probably will. Mr. Reams lost a fine three year old stallion by death a few days ago. The horse was by Demonio, dam by Oro Wilkes. He purchased the stallion from Rush & Haile at two years old, paying \$500 for the animal. The horse showed every indication of high speed, and Mr. Reams had expected to realize quite handsomely from him.

About two thousand people turned out to see the \$500 match race at Alameda track last Sunday between the gelding Faust by Aptos Wilkes and the mare Daisy May. The first and second heats were won by Faust in 2:27 and 2:28. When scoring for the third heat, the veteran driver Hines, mistaking the yells of the unruly spectators for the word, drove Daisy May the full mile, thinking it was a go. The judges allowed him twenty minutes to cool out the mare, and awarded her the third heat owing to Faust swerving from his position in the stretch. This heat was in 2:30. The fourth heat was won by Faust in 2:28¾. This afternoon a return match at two mile heats will be trotted at the same track by the same horses. The match for \$200 a side between Cash and Billy F. will also be decided this afternoon.

A dispatch from Vienna, Austria, dated October 8, states that a two-mile trotting race open to the world was won there on that day by Kirkwood Jr. 2:10, time, 4:26½. This is three-fourths of a second faster than the best previous two-mile trotting race record, which was 4:27¾, and was held by Caid 2:07¼. The time of the fastest two-mile heat ever won in a race in this country is 4:45, and stands to the credit of Monette, a daughter of Monon by Nutwood 2:18¾. The fastest two-mile heat ever trotted against time was in 4:17, and was won by Cresceus 2:02¾. The net fastest is 4:28¾, made by the stallion Onward Silver 2:05¼.

The business of the late Peter C. Kellogg will be carried on by a stock company known as The Peter C. Kellogg Company, which was recently incorporated with Charles Snow Kellogg as president, Frederick Snow Kellogg as treasurer, and W. F. Williams as vice president and secretary. The first two gentlemen are sons of Peter C. Kellogg.

Babe ... (Church)	3	dr	

Time, 2:59, 3:01, 3:01.

Bascomb was officiating as starting judge at a meeting in the Tall Corn Circuit, says Western Horseman, and one of the drivers in the 2:22 pace acted very much as though determined to lay up a heat, coming down fifty to sixty feet behind the bunch. Calling the party over to the stand Bascomb said: "Mr. Blank, if you care to lay up this heat, please wait until I give you the word." The "feller" came down the next time in his place, and stepping his horse like they paid off at the first turn.

SALT LAKE HAS A SPEEDWAY.

Salt Lake, Oct. 28, 1905.

If a California horseman should drop into Salt Lake City, the metropolis of the State of Utah, some fine summer's day and chance to drive out to Higgins Boulevard, he would doubtless rub his eyes and wonder if he had not been dreaming of home, as he saw well known California trotters and pacers speeded over this beautiful turnpike. Higgins Boulevard is a stretch of road, a full mile in length, and although within the city limits, is watered and cared for by the Salt Lake Driving Club, who are permitted to use it as a speedway, an ordinance passed by the authorities prohibiting any heavy teams from traversing it. The Salt Lake Driving Club is composed of all the enthusiastic road drivers in the city by the saline sea, and on every day of the week except Sunday, when the weather is favorable, they repair to this speedway and enjoy the royal sport of road racing. Quarters in 30 seconds are not uncommon, and the horse that can win a blue ribbon any afternoon must have two-minute speed for a short distance at least.

Mr. Ezra Thompson, formerly mayor of the city, is often seen behind the California bred pacer Robert L. 2:08¾ by Hambletonian Wilkes. This horse has all his old time speed and as he has been entered at the meetings to take place this month on the Southern California circuit, he will probably demonstrate this fact to your people. Mr. Thompson also drives a very fine black mare that is called Jennie A. that he has entered in the 2:20 pacing events on the same circuit.

All California lovers of a game race horse will remember the black gelding Dr. Frasse 2:12½ by Iran Alto. He is owned here by Mr. J. T. Richards and there are few horses, pacers or trotters, who have any business tackling him for a brush of a mile or less. Mr. Richards also owns the pacing mare Alpha W. 2:08 that has won money all over the Middle West and the Colorado circuit.

Nutwood Wilkes has a representative in these road brushes in old Claudius 2:13½, and despite his years and many hard campaigns can hold his own with the best trotters owned in Utah. He is owned by Mr. W. S. McCormick, who takes as much pleasure in heading a rival in a brush as most men do in winning a stake.

Mr. Thos. McCoy is another resident of Salt Lake who drives a good one from California. The brown pacer Cavalier 2:11¼ by Welcome, is his property and he can often be seen speeding him at a two-minute gait. He has another horse called Kangaroo that looks and acts like a great prospect, and a horse called Ringtail that will be faster than either of the others in the opinion of many.

Mr. J. S. Bransford, who has purchased quite a number of horses in California for his Salt Lake friends, bought Tom Carneal 2:08½ by Diablo on a trip to Los Angeles last spring, and is greatly pleased with him. He also owns the pacer Dewey that is fast enough for a race horse.

Mr. C. H. Thompson has one of the fastest of the road pacers in Osmond 2:14¼, a son of Altamont that was bred and raised by Under Sheriff James Daly of Napa, California. Mr. Thompson also owns Amarea and Joe McGregor, and drives them on the road.

The fast mare Laura Spurr 2:09¼, and a good green one called Fleet are driven by Mr. W. S. Jones. Laura can show enough speed to warrant the belief that she could reduce her record if prepared for a shy at the mark.

One of the sweetest and handsomest little mares that goes down the Higgins road is Jessie Tilden, owned by Mr. Geo. W. Putnam, one of Salt Lake's enterprising business men. She has some speed, but Mr. Putnam has ideas of breeding her to a developed stallion and raising a two-minute colt on the Casper Redfield plan, and every person who knows him hopes he will succeed.

Mr. C. J. Crabtree is another enthusiastic road rider. His horse Crabapple is one of the fast ones of the road brigade and has taken his turn racing with more or less success. He has another however that the boys call Bay Beauty, which the drivers of the fastest ones are beginning to cast a jealous eye on as she is showing a rate of speed that is not to be despised.

Cold Storage is the peculiar name which Mr. J. C. Tuttle has selected for a very handsome pacer he is driving that is considered a rare good one by those who have seen him step.

Henry Newell owns a well-bred one in Willets by Silkwood 2:07, dam Gypsie the dam of Dallah 2:14¼ and grandam of Zolock 2:05¼, by Gen. Booth.

H. W. Brown, owner of that fast stallion Altoka 2:10½ by Allerton, won first prize at the recent Utah State Fair with a pair of bay fillies by this horse that are perfectly matched and can pole in 2:40 or better. They are three and four-year-olds, own sisters and make everybody do a little rubbering as they go by.

There are many other good horses driven over the speedway here, but in the short time your correspondent has been here he has not become acquainted with the names of all of them.

The racing at the recent State Fair here was very poor and the daily papers were not backward in criticizing it. Some idea of it may be obtained from the fact that none of the best horses owned in Salt Lake took part in the races, which were made up with small purses for the cheap horses. If the directors would only take a few lessons from such fairs as are held at Hamline, and other places, where big stakes bring out the best horses in the country and pay for themselves by the large list of entries they receive.

I understand the directors say their policy is to offer prizes and purses only for horses bred in the State. This is very shortsighted, as it is only by the introduction of better horses than are owned here that their stock can be improved. Most State fairs

offer prizes for the best horses no matter where they are bred or who owns them. California has secured by this means some of the best stallions in the world of all breeds, and stands today as one of the leading horse breeding States in the Union.

This is a very thriving city, and the people seem to be prosperous. I thought their State Fair, outside the horse racing, was a very fine show, and I do not see how they could expect to attract good horses and have good racing for the small purses hung up. I will leave here next week for Los Angeles. I understand several of these Salt Lake horses will race there.

TRAVELER.

NEW COLORADO STOCK FARM.

A little ways outside of Denver, Colo., is being established a stock farm which is liable, in the future, to be noted among the breeding establishments of the West because of the care in which the foundation stock is being selected, says an exchange. There are larger farms and more pretentious ones than the Mac Rose Stock Farm, recently established by George L. Newman of Denver, but it is doubtful if any were ever laid out on better lines and with as much care used. In the future as in the past the progress cannot fail to be satisfactory.

The farm has been named after a two-year-old colt by McKinney, which was one of Mr. Newman's first purchases. The dam of this colt is Sweet Rose by Electioneer, dam Rosemont by Piedmont, and Sweet Rose had a yearling record at the trot of 2:30. Mac Rose is a big husky youngster, weighing 1140 pounds, and when thirteen months old showed an eighth at a 2.24 clip. He has been worked some, but very carefully, as he is a big, growthy fellow and Mr. Newman had rather take plenty of time in his development than risk any chance of injury by forcing him. The first brood mares purchased by Mr. Newman included Rosalind 2:21¼ by Stam B.; Queen J. by Hemlock, son of Belmont, Countess by Counselor 2:12¼ by Onward, and Ami Wood by Saxwood, son of Shadelan Onward.

At the recent dispersal sale of the Haggin farm at Lexington Mr. Newman was a purchaser of some of the very best of the brood mares. Among these were Vesper Bells, sister to the yearling champion Adbell by Advertiser, dam Beautiful Bells; Quarter Bell by Quartermaster, dam Miss Bell by Albert W.; Loma by Cupid, dam Lady Fay by Cresco, son of Strathmore; Poco by Dexter Prince, dam Menota by Steinway; Jessiana, sister to Kuffa 2:19¼; Harbor 2:19¼; Falfa 2:20; Imerino 2:20; Gustine 2:29½ by Allerton, dam Cyprus by Strathmore, and Phallete by Wilkesward, dam Phaletta by Phallamont. Competition on some of these was decidedly brisk, but Mr. Newman had looked them over at the farm in company with Dr. Dunlevy of Denver, and was determined to have them at any price. These, with what he had previously, will make an ideal foundation for his breeding farm.

The Mac Rose Stock Farm is eleven miles outside of Denver and work on a half-mile track, stables and a country residence have already commenced.

NEWS FROM THE NORTH.

(Portland Rural Spirit, Oct. 27.)

W. F. Watson, the well-known restaurant man, is getting together two carloads of roadsters, drivers and speed prospects to ship to Los Angeles, where he intends to spend the winter and enjoy a little outdoor life in the sunny South. Mr. Watson has acquired the habit of being a busy man and does not think he could enjoy himself any length of time without something to occupy his mind, so he is taking along a few choice horses that he will place on the market there. Mr. Sam Casto, the well-known driver of the horses, will take along a few youngsters that he has been handling this summer.

L. C. McCormick has sold his stable on Sixth street to J. Crouch & Son of Lafayette, Ind., who have established a branch of their draft horses here. Lou has gone on the road for Crouch & Son.

John Sawyer is located at Irvington track with a stable of trotters and pacers, including Knick-Knack 2:25 and a splendid lot of youngsters. He has some young Zombros that can step some right now that he expects to enter in all the big stakes on the North Pacific Circuit next year.

W. F. Watson has sold his fine roadster Red Rock by Alfonso, dam by Alcone, to J. W. Bailey of this city. Red Rock was one of the pair that won second prize in carriage team at the Lewis and Clark, and is the making of quite a good trotter, having worked miles in 2:32½ with but little training.

J. A. Jones is wintering quite a number of his horses at Irvington Park, including his McKinney stallion Captain Jones and his first prize yearling Chehalis by Captain Jones, out of Daisy Q Hill, the dam of Bellemont 2:17¼. This is one of the handsomest colts in the State and was only beaten a short head for juvenile championship at the Lewis and Clark fair by Vernon Jones, a two year old by Capt. Jones, that the judge pronounced one of the best colts ever led into the show ring.

Peter Duryea, president and general manager of the Patchen Wilkes Stock Farm, Lexington, on November 1 will sever his connection with that highly successful breeding establishment and will be succeeded by William M. Wright of New York. Mr. Duryea says that his reason for resigning is that he is to engage in the breeding of trotters for himself. He has purchased from George Starr at a reported price of \$12,000 the stallion The Director General by Director, dam Winnifred by William L., and will establish a big breeding farm near Lexington. Mr. Duryea has been at the head of the Patchen Wilkes farm for nine years.

Jackson's Napa Soda untangles the feet.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

These are busy days at the Emeryville race track, and it is no exaggeration to say that one can see any of these pleasant mornings fully 100 railbirds twittering away over the workouts they have "caught." There are many strings of flyers ready to race even at this moment. The talk of the track is Callahan of the Nealon stable, Sir Wilfred of the Cameron string and Rey Carlo, owned by the M. Fox estate. The Rice string looks very fit, and I was much taken with the appearance of the chestnut horse Rightful. The ancient W. B. Gates does not look as if he had gone through the grueling necessary to win ninety-nine races, and I doubt not that before this iron son of Prince Royal retires his score of victories will considerably overtop the 100 of Logan or the 102 of Belisarius. T. Cromwell's old mare Kenora looks like a pretty blonde just ready for the ball-room. The Curl brothers are from New York, and the old bay horse Bragg shapes up like a two-year-old. If I am not mistaken, the Curl string will cut a considerable figure here before the season is ended. Warte Nicht, the little Wilkerson horse, is moving in a manner pleasing to his handler these days, and does not pull up as stiff and sore as of yore.

Starter Jake Holtman is back from the far East and Latonia, and brings news of an interesting character. Among other things he said: "I have been coming to California for several years, but there are more new bookmakers, owners, trainers and jockeys bound for the land of sunshine, gold and flowers this season than ever before. All the big stables that intend to campaign out here purpose racing horses at both tracks, and there will be constant shipments from Los Angeles to Oakland and Ingleside. Griffin, Angarola, Durnell, Schreiber, Williams, Holland and others will operate a stable at both tracks, shipping back and forth for stake engagements. The best jockeys will not all be here for the opening week, but Knapp, Shaw, W. Davis, Hicks, Smith, Bullman and Miller will all be here at the close of Aqueduct. Swain, who rode three winners at Latonia on Monday, will be seen here on the opening day, and possibly Allen, who is under engagement to ride for Alderman Kunz of Chicago. The latter has a band of coming two-years-olds at the Belmeade stock farm in Tennessee, which will be shipped to California in the near future. Trainer Joyner told me that Davis would leave for Oakland during the Aqueduct meeting. Griffin has not yet secured a jockey. Miller will do the riding for the Angarola stable and Wiley for "Boots" Durnell. Marcus Cartwright informed me that Pesch and McCall would be out here to book for him during the entire season. There is also a chance that Fred Cook will be out here. I think he has made a stake entry or two. He has had a rather disastrous season, otherwise he would have sent out a big stable."

Mr. Holtman also brings the information that there will be 150 days' racing next summer under the jurisdiction of The Jockey Club at Buffalo, Providence, Salem (N. H.), Syracuse, Albany and Baltimore. Holtman did the starting at Providence, and says that the attendance was gratifyingly large, and that the association made \$20,000, instead of losing \$25,000, as reported.

The Rancho del Paso sale which begins in New York City December 4th under the auspices of the Fasig-Tipton Co., at 130-132 East Thirtieth street, will be the most important one in the breeding annals of America. Rancho del Paso was the most extensive establishment for the breeding of race horses in the world and this sale will comprise about thirty-five stallions, native and imported, and fully 525 brood mares will be disposed of, many of them purchased in England at heavy cost. The sale will be absolute, and the terms are: Purchases of \$500 or less will be cash; those exceeding that amount will be given credit of twelve months, with interest and approved endorsement. Among the celebrated horses to go under the hammer are imported Canopus (by Sheen-Charmlan), Del Paso (by Darebin-Bavaria), Fitz James (by Kyrle Daly-Electra), imported Gerolstein (by St. Serf-Geraldina by Barcaldine), Glenheim (brother to Handsome and half-brother to Hastings, champion sire of 1902, being by Hanover-imp. Cinderella), imp. Golden Garter (son of Bender and Sanda, dam of the Derby winner Sainfoin, sire of Rock Sand), imp. Goldfinch (sire of Trading Cunard, Chelndry, etc., son of the undefeated Ormonde and Thistle, latter dam of Throble and Common, winners of the St. Leger and the \$2000, Derby and St. Lege respectively), Gold Spinner (by Miss Goldfinch-imp. Red Spinner), Indio (sire of Hurstbourne, Tramotor, Sandhurst, etc., and by imp. Maxim-imp. Ira by Doncaster), Maxio (by imp. Maxim-Preciosa), Milesio (by imp. Order-imp. Lady Cardigan), Rousseau (by Eolus-Tillie Russell, therefore brother to Russell), imp. Royal Flush (by Faro-Flush by Discount), Sombrero (by imp. Star Ruby-La Toquera by Sir Modred), imp. Star Ruby (winner of the Thornton Stakes, four miles, son of Hampton and Ormonde, latter sister to Ormonde and dam of the famous Sceptre), The Greek (imp. Maxim-Parthenia by Alarm), imp. Toddington (an excellent race horse by Melton, Derby and St. Leger winner and sire of Sysonhy, Best Man, Armington, etc., out of Minerva, by Galopin, winner of the Derby and sire of St. Simon), imp. Watercress (a very high-class race horse and sire by Springfield-Wharfedale by Hermit) and Wax (a good winner by imp. Candelmas-Miss

Ransom by imp. Rayon d'Or). Of these sires Canopus, Glenheim, Goldfinch, Maxio, Royal Flush, imp. Star Ruby, imp. Toddington and imp. Watercress will undoubtedly bring forth bids running into the thousands. Star Ruby will perhaps fetch the top price of the stallions, and deserves to, though there will be some lively bidding for Canopus, Goldfinch, Toddington and Watercress. Among the famous mares on the place that will elicit lively bidding are Arnette, Andrisa, Aura (by imp. Maxim-Aurelia), Barbary Maid (sister to Aurelia and Torso), Bellane, Braw Lass, Breeze, Brillar, Canta, Cloister, imp. Colonial (by Trenton), Danella, Darina, Electricity, Erratum, Fleurette (sister to Firenze and dam of eight winners), Flora Hurst, Harmony II, Inquisitive, Kissing Ring, L'Amazone, La Primera, L'ane, Margerique (dam of Nasturtium), Pearl V. (by Salvatore-Firenzi), imp. Queen Bess (dam of Old England, Kenilworth and three other winners), Rehan, Salverine, Salutaris, Santuzza, Sister Jeanie, Sweet (by Hanover), Suspicion, Sycophant, Tessa, The Shrew, Vanish, Vernet, Vineyard, Wi-ne-ma and Witchery. These would be my pick of the younger mares, and the very old ones, even with big stud reputations, I should not think would be taken across the continent. I would pick imp. Star Ruby for a stallion for many reasons, the first being that he was a first-class "stayer" and bred just to suit me—having an uninterrupted chain of success clear to Eclipse on the sire's side, as follows: Hampton, Lord Giffen, Newminster, Touchstone, Camel, Whalebone, Waxy, Pot-8-os, Eclipse—while on the dam's side there is Ormonde (dam of the great Sceptre), Lily Agnes (dam of the unbeaten Ormonde), Polly Agnes, Miss Agnes, Agnes, Annette, The Potentate's dam and Moll in the Wad—eight famous producers, or, on both sides, seventeen generations of success. Of the mares, Annette, Fleurette, Inquisitive and Pearl V. would work out best on the lines spoken of above, and clearly "figure" to prove great producers.

Jack Atkin is back from Latonia after having a most successful season booking at Louisville and Latonia for Barney Schreiber. He is something like \$40,000 winner—this in a few weeks. He will cut in at Emeryville and afterward probably confine his operations to Ascot Park, Los Angeles.

W. O'B. Macdonough, ever successful as a breeder, has been unusually so this season, no less than four cracking good two-year-olds having come from his farm, viz: Ormondale, George C. Bennett, Sir Wilfred and Roman Gold. All have the Ormonde blood in their veins, Ormondale being by "the horse of the century" himself, George C. Bennett by Orsini (son of Ormonde), Sir Wilfred by Ossary (another son of the celebrity), and Roman Gold's dam by Ormonde. Mr. Macdonough is to sell ten head of yearlings at Chase's salesyard on the night of November 28th, and eight of the ten have the blood that is "on top" in France to-day and close to it in America—Ormonde or Bend Or. The "fad" in England these days is the St. Simon-Bend Or cross, and many of the most celebrated horses of the land of John Bull in recent years were bred with a view to making this "happy nick." A number of these Macdonough youngsters are by St. Avonius and out of Ormonde mares. Previous to this the craze was for the St. Simon-Musket cross, Memoir and La Fleche being the best exponents of this "fad." The probabilities are that any of these would prove successful, provided the animals mated were themselves great "stayers"—in short, splendid "individuals" with large hearts and lungs and sound limbs—not those ruined by racing while the horse was in the "vealy stage." I do not believe that just because a horse happens to be by St. Simon or one of his sons and out of a Musket, Bend Or or Ormonde mare he is almost certain to prove a high class racer or sire. His sire and dam must have the "individuality"—the conformation and the race horse qualities of a high order—before one can look for the most pleasing results. If you have the good looks, the soundness and the heart and lung development necessary for racing at the longer distances in both sire and dam, along with the breeding, then you are not likely to make any mistake in your stock operations.

Trainer Thomas Cook arrived at Emeryville last Tuesday night with eighteen of the E. J. Baldwin (Santa Anita) horses, including Americano and Cruzados. This reminds me that "Lucky" has great need of a couple of good stallions, if he is to continue in the breeding game, and I would be delighted if he would buy Star Ruby and Maxio or imp. Watercress to take the place of the revered Grinstead and Ruthersford. When they were alive Santa Anita was first in California among the stock farms, but of late nothing very good has been bred on the famous rancho, though he has many a good mare on the place.

T. T. Rector, reported as dying at Hot Springs last winter in all the "horse-papers" of the Middle West, is very much alive and well. I grasped the ghost's hand at Emeryville track last Tuesday, and he returned the grip very unlike a graveyard sojourner.

A STABLE NECESSITY.

Craft's Distemper and Cough Cure, made by the Wells Medicine Co., Lafayette, Ind., has become a stable necessity all over the world. Many years use of this famous remedy has demonstrated that it is all and even more than is claimed for it. It is endorsed by thousands of horsemen in all parts of the world, who have thoroughly tested its merits. It is easily administered and sure in its results. Let no horseman be without a bottle of it on hand at all times in case of emergencies. It has no equal as a treatment for the various forms of distemper, coughs, pinkeye, catarrhal fever, epizootic and all throat and lung diseases. It is also a never failing preventive when used in time. It is absolutely safe under all conditions. Its results are guaranteed or your money will be refunded. Can any horseman ask for a fairer offer or more honest proposition? We ask all our readers to write to the Wells Medicine Co., 13 Third St., Lafayette, Ind., for their new free book, "Veterinary Pointers." It gives valuable veterinary information, not to be had elsewhere.

WOODWARD-THOMPSON NUPTIALS.

The many friends of James Thompson, of Pleasanton, will read the following from the last issue of the American Sportsman with great interest.

"The wedding bells rang their own sweet song when James Thompson, the well known and popular California horseman led to the marriage altar Florence—the beautiful and accomplished daughter of Mr. and Mrs. J. C. Woodward, at their residence, 224 Wellesley street, East Cleveland, Tuesday afternoon, October 24. It was a quiet wedding—so quiet indeed that Mr. Thompson's more intimate friends did not know of his intention to enter the matrimonial race. The bride is one of the most popular young ladies of East Cleveland, while the groom is known to horsemen everywhere, among whom he is justly popular. The marriage is understood to be the happy culmination of a summer's courtship, and was entirely a love affair. Mr. and Mrs. Thompson left Tuesday night for Pleasanton, Cal., where they will spend the winter. It would have been the delight of Mr. Thompson's Cleveland friends to have given him and his wife a reception in keeping with what the occasion demanded, but the quiet way in which they were married and their early departure for the West prevented this. His many friends hereby extend their best wishes and congratulations."

The Breeder and Sportsman extends to Mr. Thompson and his bride best wishes for a long life of conjugal bliss.

LEWISTON, IDAHO, SUMMARIES.

(October 16 to 21.)

Special pace or trot:
Hassalo(Erwin) 1 1
The Commonwealth(Lindsey) 2 2
Lady Smith(Barrows) 3 4
Judas(Smith) 4 3
Time, 2:19, 2:18.

2:11 pace, purse \$500:
Vinnie Mann(Lindsey) 1 1 1
Bonnie M.(Erwin) 2 2 2
Bessie R.(Clark) 3 3 3
Time, 2:18½, 2:22¼, 2:20.

2:16 trot, purse \$500.
Oveta(Dye) 1 1 2 1
Sam Bowers(Lance) 3 2 1 2
Kitty Clover(Erwin) 2 3 3 3
Time, 2:20½, 2:18¾, 2:19½, 2:21½.

2:25 pace, purse \$500:
Vinnie Mann(Lindsey) 1 1 1
Bonnie M.(Erwin) 3 2 2
Lady Smith(Barrows) 2 3 3
Time, 2:25, 2:22, 2:18½.

2:30 trot, purse \$500:
Sam Bowers(Lance) 1 1 1
Kitty Clover(Lynch) 2 2 2
Black Diamond(Barrows) 3 3 3
J. H. M.(dis)
Time, 2:25, 2:24, 2:22.

A NEW CHAMPION YEARLING.

The yearling pacing record of 2:20¾, made by Belle Acton thirteen years ago and equalled by the colt Paul D. Kelly last year, was beaten at Peoria, Ill., on Saturday, the 14th of October, by Manager II., who paced a heat in 2:20 flat. Manager H. was bred by Mr. A. G. F. Stice, who is well known to Californians, as he resided a year or two in Los Angeles and campaigned several horses on our circuit here in 1900. Mr. Stice returned to Illinois the following year and purchased the pacing stallion Manager 2:06¾. Nutwood's fastest performer, to head a stock farm which he has established at Bookfield, Mo. Manager M. is by Manager out of Nelly M. 2:10¼, by Butler's Bashaw 2:28¼, consequently is bred for a fast one. Manager was himself a champion, having lowered the world's record to 2:16½ as a two year old and to 2:11½ as a three year old, both records being made to a high-wheel sulky. The many friends of Mr. Stice in California will read with pleasure the news that he has bred a champion, and will hope that he will breed many more.

Every one knows that the trotting record with pace-maker in front is 1:58½, made by Lou Dillon, but there is some uncertainty as to the record made with runner alongside. Several persons have asked what this record was, says an exchange, and thinking there may be others who seem uncertain as to this style of going, we would say that it is 2:01, also made by Lou Dillon. This was last year at Memphis. Major Delmar, also at Memphis, trotted in 2:01¼, which was the record when made, and which is now the best for a gelding, while the mile in 2:04¼, by Cresceus, is the stallion record.

A correspondent of Western Horseman who recently visited Bonnieview Farm, Indiana, saw the two-year-old filly by McKinney out of Our Lady by Nearest 2:22, own brother to John A. McKerron 2:04½, and thus describes her: "She is one of the highest types of a trotting filly, and one of the handsomest daughters of her great sire, and as to her soundness, style and general conformation, I never saw her equal."

Senator John J. McCarty of New York, proprietor of Parkway Farm and owner of Joe Patchen, died recently at his home at Parkway. He was sixty-two years of age. His death came suddenly and was the result of an attack of pneumonia. He left a fortune estimated at \$3,000,000.

Prodigal 2:16 has fourteen new standard performers this year, eleven of which are trotters.

Five sons of Robert McGregor have each sired a 2:10 trotter.

NOTES AND NEWS.

Southern California Circuit opens next Thursday.

San Bernardino has received a fine list of entries and the racing should be high class.

The pacers Albuta 2:11½, Miss Georgia 2:10½ and Robert I. 2:08¾ are back in California and will start at San Bernardino during the meeting which opens next Thursday.

The 2:09 pace at San Bernardino should furnish a hot race. The entries are Virginia 2:09½, Daedalion 2:09¼, Vision 2:09¼, Robert I. 2:08¾, Miss Georgia 2:10½, Ira 2:10½, Tidal Wave 2:09 and Kelly Briggs 2:09¼. There should be some pool selling on this event.

Mr. J. F. Oglesby of Carpinteria writes us that there is talk of a training track being built at that point in the near future and if it is done, there will be more than a dozen young horses by his stallion Almada put in training as soon as the track is finished.

Bob Sparks is training several horses belonging to Mr. Lewis Pierce at the Pleasanton track. He shipped them there from Suisun week before last. Among them is a three year old pacer by Sidney Dillon that is an excellent prospect.

Drop in at Fred H. Chase & Co.'s salesyard, 1732 Market street, on next Saturday, Sunday or Monday and look over those fine young geldings and fillies by Washington McKinney, St. Whips and Daly that are to be sold on Tuesday evening, November 14th. The horses will be in the barn Saturday afternoon, the 11th inst. These are all well bred and good individuals and some great prospects are among them.

Mr. George Westfall of Oakland has purchased the bay mare Edna DeBeck 2:24¼ from Mr. Lewis Palmer of Walnut Creek, former owner of Ben F. 2:07¼. Consideration \$450. She is a high-class animal and is proving a very hard nut to crack among the matinee drivers of Oakland. She was sired by a standard bred two year old son of Hambletonian Wilkes, dam by Echo. She was bred at the late A. G. Gurnett's Sulphur Spring Farm. The deal was made by the well known horseman, A. G. Andrews.

There will be trotted over the Alameda track November 5th a five horse race, mile heats, three in five, minus thirty feet to each mile. The money, which is claimed to be \$200 for each horse, or \$1000 in all, is to be divided into two moneys—\$600 and \$400. The entries are A. L. Hind's bay mare Twilight 2:18½ by Noonday, Frank Prettie's bay gelding Old Folks by Lynmont, Geo. Algeo's bay gelding Bob Ingersol 2:14½ by Nutwood Wilkes, Geo. Westfall's bay mare Edna DeBeck 2:24½ by son of Hambletonian Wilkes, and R. A. Place's chestnut gelding Capt. Benton by St. Nicholas. On the same day and place the return match for \$500 a side will take place between Daisy May by son of Oro Wilkes, and Faust by Aptos Wilkes, two mile heats, best two in three.

The 2:09 trot at San Bernardino next Tuesday should be a race worth seeing. The entries are J. C. Kirkpatrick's John Caldwell 2:09 by Strathway, W. A. Clark's Morone 2:13¼ by Cicerone, Willard Zibbell's Adam G. 2:11¼ by McKinney, W. G. Durfee's Jupiter B. 2:12 by Gen. Beverly, and Judge Thos. Brent's Helen Norte 2:09¼ by Del Norte. All the heats should be close around 2:10 if the track is in good shape and the weather favorable.

If you want a good roadster, attend the sale of horses from Rosedale Stock Farm in this city one week from Tuesday evening.

Bert Logan 2:16½, Dr. A. W. Boucher's good little pacing stallion by Colbert 2:07½ out of Miss Logan 2:06½, was brought back to Pleasanton in Chas. DeRyder's car. He made a season in Ohio last spring.

Trainer Brown sold his good double-gaited horse Golden Gate before returning to Pleasanton. Golden Gate earned quite a sum of money for Mr. Brown this year and he sold him for a good figure.

It is stated that the Futurity winner Bon Voyage 2:12¼ will be in the stud at Pleasanton during the season of 1906. Bon Voyage, besides being a great trotting colt and a fine individual, is a representative of the great Electioneer family, being by Expedition 2:15*, son of Electioneer. The dam of Bon Voyage is Bon Mot, dam of Endow 2:14¼. She is by Erin 2:37, out of Farce 2:29¼ by Principles. Mr. W. A. Clark Jr., who owns Bon Voyage, also owns Bon Mot, having purchased her a few weeks ago.

Bob Christie of Sacramento has sold the two-year-old stallion Our Bells by Monbells, dam by Electioneer, to Mr. Ray Dittus, an enterprising young business man of that city. Our Bells will be trained by Walter Masten for the Stanford Stake of 1906 in which he is engaged.

A match race between the pacer King Alexis and the trotter Mark Hannabus was trotted over the North Yakima, Washington, track, October 24th. The race, which was for \$500 a side, was won by King Alexis. The fastest heat was 2:20½, a new record for this son of Alexis.

M. W. Savage has purchased from E. M. Blessing, Danville, Ill., the fast pacing stallion Ed Patch 2:08¼ by Dan Patch 1:55¼. He will be raced by H. C. Hersey.

The pacer Sam Bowers 2:11 was shifted to the trotting gait and took a record of 2:19½ at Lewiston, Idaho, two weeks ago.

John Green gave Lady Jones by Capt. Jones a record of 2:16 in a winning race at Tulare. This mare is headed for the list of 2:10 trotters and should reach it next season. She is owned by J. A. Jones of Springbrook, Oregon, who also owns her sire, a grandly bred stallion by McKinney out of Midday Belle by Gossiper, second dam Briar Belle, dam of McBriar 2:14 by Don Wilkes.

The winner of the Kentucky Futurity, Miss Adbell 2:09¾, the second horse, Susie N. 2:09¼, and the third horse, Marechal 2:18¾, will all be sold at the Old Glory Sale. Will they finish in the same order in the race for the bidders' coin as they did when they raced for the stake money?

Tennessee is the home of the pacer, but Turley 2:07¾, trained by Ed Geers, is said to be the first 2:10 trotter ever bred in that State.

Fred H. Chase & Co., 1732 Market street, have issued catalogues for the sale of horses from the Rosedale Stock Farm, Santa Rosa, to take place Tuesday evening, November 14th, at 1732 Market street, San Francisco. Thirty head are catalogued and not an inferior one in the lot.

Charles Marvin has to his credit four victories in the Lexington stake for two-year-old trotters. In 1882 he won it with Hinda Rose; in 1899 he had Endow; Hilgar was his candidate in 1902 and this year it was Shiko.

Lon McDonald thinks Miss Adbell faster than Sadie Mac, and he drove both of them to victory in the Futurity.

Charles DeRyder recently bought of R. S. Stradler of Lexington a handsome saddle mare by Montgomery Chief, dam by Highland Denmark. Price \$500. The mare was shipped to California.

Electric Maiden 2:13¼ has been purchased by W. A. Clark, Jr., and shipped west with the rest of the Clark horses which will be wintered at Los Angeles, Cal., in charge of Red Garrity.

Walker & Smith are handling a very promising young pacer by Sidmoor 2:17¾ by Sidney at the Pleasanton track. Experiment is the name of this colt, which is a two-year-old, and he has worked a quarter in 34 seconds and a half in 1:13. He is out of Ethel C. 2:20, consequently is an inbred Sidney, and Ethel C. was by that horse, and is owned by Major W. P. Earhus and Mr. Frank Cummings of Pacheco, who, we understand, have refused an offer of \$2000 for the colt.

Geo. A. Davis of Pleasanton has concluded to sell off all his horses at auction and has selected December 12th as the date. The sale will be handled by Fred H. Chase & Co., the well known live stock auctioneers at 1732 Market street, San Francisco. Mr. Davis has some high class young horses by Rey Direct 2:10 and other sires, as well as some fine roadsters and finely bred brood mares. Further particulars will be published later.

Ed Mills will turn the sensational four-year-old filly, Easter Direct by Direct 2:05½, dam by Yosemite over to Ed Geers, who will handle her during the winter. She is owned by E. A. Gammon of Sacramento, and is credited with a trial mile in 2:03¾ at Cleveland this summer.

A. R. Tewksbury, of Temora, New South Wales, Australia, has purchased from Maple Lawn Farm, Illinois, the bay colt Colonial Parole, by Parole, out of Meadow Queen (full sister of Great Heart, 2:12½), by Mambrino Russell 2008; second dam Willie Wilkes, 2:28 (dam of Rachel 2:08¼ and six in 2:20), by Geo. Wilkes, 2:22; third and fourth dams famous producers.

The Napanoch pocket knife tool kit is the latest thing in a set of tools which can be carried in the pocket. See advertisement.

It is said one owner booked 25 mares to Admiral Dewey 2:04¾.

It is rumored that Gil Curry will drive the Butler horses next year, and that Monroe Salisbury will make another trip to Klondike this winter.

Eddie Mitchell, one of the American drivers of Europe, has been suspended for a year because of a bad drive behind Wig-Wag.

Gambetta Wilkes is the sire of fourteen 2:10 performers, but only two are trotters.

Persons desiring horses clipped should call up phone Park 573, and their horses will be called for, clipped in first-class style and delivered. Mr. T. C. Cabney has opened a new boarding and training stable at 1408 Fulton street, near corner of Devisadero, and besides attending to clipping horses, as above stated, will board and train for road or track a limited number of horses. Terms very reasonable. See advertisement.

Seventy-five pacers starting in the Grand Circuit this season were outside the money. The trotters had worse luck, as eighty-four trotters failed to win any part of the purses.

The stallion Acolyte, once owned by J. S. Coxey, commander of the Coxey army, that invaded Washington, D. C., several years ago, is credited with six new performers for this year.

Lon McDonald drove Miss Adbell, the Kentucky futurity winner, an eighth in 14 seconds before shipping her from Lexington.

Among the stories going around is one to the effect that Sadie Fogg, the three-year-old daughter of The Director General, that was sold to L. R. Peck, of Providence, during the recent Lexington meeting for \$12,500, was on the market last spring for "\$25 and an old wagon."

Woodland Stock Farm, Alex Brown proprietor, will consign twenty head of standard bred horses by Nushagak, Prince Ansel and other high class stallions, to a sale to be held by Fred H. Chase & Co. at 1732 Market street, this city, on the 21st instant. Catalogues are not yet issued, but some choice goods should come from Woodland Stock Farm, and buyers should make a note of this sale, which will be further noted next week in this journal.

At the Point Breeze track, Philadelphia, on Nov. 8th, Frank Yoakum 2:04¾ and The Friend 2:05¼ will pace a match race for \$500 a side.

Charley Whitehead, who is now the lessee of the Salinas track, has concluded to put his good pacers Topsy 2:10 by Delphi, and The Mrs. by Derby Ash, in training for the circuit next year. Topsy is a game race horse and should be a money winner in his class. The Mrs. has no record, but has been second in many heats that were paced faster than 2:15 and has a trial of 2:11.

At the Santa Rosa Stock Farm's Track last week Driver John Quinn stepped Sampson B. Wright's Sonoma Queen a half mile in 1:07¾. Joe Culcetto drove W. H. Morris' Sonoma May, a four-year-old, a mile in 2:19¾. Both are trotters and by Lynwood W. out of Maid Fowler 2:21½. Frank S. Turner drove his Carrie Dillon, a two-year-old, a mile in 2:16½, and his Carlocita, a three-year-old, a mile in 2:15, last quarter in 31¾ seconds. These two fillies are pacers.

Geo. A. Kelly, superintendent of the Pleasanton track, received a telegram last Monday from Monroe Salisbury, asking that twenty stalls be reserved for him at the track.

John A. McKerron 2:04½ already has some thirty mares booked to him for next year. There is no question but what the former matinee king is to be one of the really great sires.

The following pacers have taken records better than 2:10 over half-mile tracks this season: Barnett B. 2:06½, Nutwood Grattan 2:07¼, Allenwood 2:07½, Dorcas H. 2:09½, Harry L. 2:09¼, and Hallock M. 2:09½.

Doc Tanner will have the horses to be sold at Madison Square Garden owned by Mr. Billings in shape to show for their lives. They not only look good, and while they have fast records, they will be able to show that they are just as fast as their records indicate. Not one will be a disappointment in point of speed or in any other way. There are few better conditioners than Mr. Billings' trainer and superintendent.

Mr. W. H. Lumsden of Santa Rosa was at Pleasanton last week to see his two three-year-old Bonnie Direct fillies which Chas. DeRyder brought back from their Eastern campaign where they were under the charge of Ed Benyon. Bonalet 2:09¼, winner of the pacing division of the Kentucky Futurity and holder of the world's record for pacing fillies of her age, looked slick and fat, and is certainly a two minute prospect. Bonnie Me, the trotter, took sick soon after reaching the East and never recovered, but worked several miles below 2:15. She could have trotted in 2:10 this year to a certainty had she remained well. Ed Benyon was greatly pleased with both these fillies and predicts great things for them in the future. He has suggested to Messrs. Griffith and McConnell, owners of Bonnie Direct 2:05½, that they send the son of Direct and Bon Bon back to Kentucky for the stud season of 1906 and they are seriously considering the matter. Bonnie Direct would get a lot of high class mares in the blue grass State and the result could not help being satisfactory to all parties, as he is destined to be one of the greatest, if not the greatest member of the famous Director family. We do not know of another stallion that has made the showing he has in the stud. Out of his first crop of foals which probably did not comprise more than a half dozen all told, two were trained and raced this year as three-year-olds. One took a world's record and the other showed herself capable of trotting in 2:10, but sickness prevented her getting a record. We should hate to see Bonnie Direct leave California.

Owing to the death of her husband, Mrs. Jane Hogo-boom of Santa Rosa desires to sell a four-year-old stallion by Washington McKinney out of Yolo Belle by Waldstein, also the mare Yolo Belle. Both are very handsome individuals. The stallion is a pacer and fast. The mare is a trotter and very handsome and stylish, with a fine coat and an arched neck, and can be driven by a lady. See advertisement for further particulars.

ORPHANAGE WILL BE BENEFITED.

The Board of Managers and Trustees of the Armitage Orphanage have accepted the very kind offer of the California Polo and Pony Racing Association to donate the proceeds of the race-meeting to be held at Mr. Chas. W. Clark's track, San Mateo, Tuesday, November 7th, for the benefit and relief of the Armitage Orphanage.

The Orphanage is in immediate need of clothes, bedding, food and stores of every description, the main building having been burned to the ground on Friday evening, October 27th, leaving nearly two hundred boys with nothing but the clothes they were wearing.

Temporary quarters are being erected to house the boys until the new building is completed, which will be about twelve months hence.

An excellent program of pony races will be given next Tuesday and it is hoped as many as possible will avail themselves of the opportunity of aiding a good cause while enjoying good sport by attending.

The lady managers of the Armitage Orphanage are as follows:

Mrs. A. L. Brewer, honorary president; Mrs. H. R. Judah, honorary vice-president; Mrs. Henry T. Scott, president; Mrs. M. S. Wilson, vice-president; Mrs. Daniel Drysdale, secretary; Miss M. I. Tobin, corresponding secretary; Mrs. William B. Hooper, treasurer; Mrs. E. D. Beylard, Mrs. A. C. Tubbs, Mrs. Francis Carolan, Mrs. G. W. Gibbs, Mrs. George Pope, Mrs. J. D. Grant, Mrs. William S. Tevis, Mrs. James L. Flood.

The officials for the day are: Colonel Dan Burns, presiding judge; Major Rathbone and John Parrott, stewards; Fred Mulholland, starter; R. B. Leighton, clerk of the scales and handicapper; D. W. Donnelly, clerk of the course.

Following is the program of the day:

First race, three-eighths of a mile, for non-winners this year. Top weight 160 pounds. Two pounds allowed for each one-quarter of an inch under 14 hands two inches. Ponies beaten once since October 13th allowed five pounds; beaten two or more times allowed eight pounds additional.

Second race, match, one-half mile—Rudolph Spreckels' Althomer, 144 pounds, vs. Charles W. Clarks' Bas Blancs, 152 pounds.

Third race, match, three-eighths of a mile—Charles W. Clarks' Midlove, 148 pounds, vs. Rudolph Spreckels' Uletma, 144 pounds.

Fourth race, one-quarter of a mile, handicap—Weights announced Monday, November 6th.

Fifth race, seven-eighths of a mile, handicap.

Sixth race, three and one-half furlongs—Top weight 155 pounds. Four pounds allowed for each one-half inch under 14 hands 2 inches. Non-winners this year allowed five pounds additional.

Entries to the races close to-day.

The first race will be called at 2 p. m.

THE COUNTY FAIR.

Secretary A. Sandles of the Putnam county, Ohio, Fair Association, thus describes the real genuine article the old fashioned and new fashioned county fair that will never be out of date:

President McKinley in his last speech, made upon the grounds of the Buafflo Exposition, said among other things: "Fairs and expositions are the time pieces which mark the progress of nations, and every fair, great or small has helped in some onward progress."

Centuries ago the fair was held in high favor, and will continue to be so as long as old friends love to meet and greet and tell each other the joys and woes of a passing year.

The mystic invisible cord of friendship, which runs from one heart to a thousand others, is the secret power which draws the young and old, the rich and poor, together in one grand reunion under the shade of the spreading trees, which grow upon the grounds of the "Old County Fair."

When you clasp the hands of those whom you used to know, when you were boys and girls and sweethearts together, it will drive dull care away and the songs of the birds will be sweeter, the burdens of life will be lighter, the ties of true friendship be stronger, the cream on the milk will be thicker, and the roses and lilies more fair.

It is the place where youth and maid exterminate roasted peanuts and red lemonade, and joyously wander, hand in hand, through the gardens and fields of the future, knowing little, caring less, of the world and its woes.

The plains to be crossed, the mountains to be climbed, the seas to be sailed and the harvests to be gathered give them no concern. It's a clear sky and is yet only life's morning.

It's the time and place for father and mother to rest and refresh; time to pause in life's struggle and forget all about gold; time to stop for a day the plow that is turning the furrows of time.

"The heart of the toiler has throbbings that stir not the bosom of kings" if you stop, now and then, for a day to mingle and mix with your fellows.

Perhaps it was there that grandfather first met and smiled at grandmother. You know the rest. There is a tide in the affairs of men, which taken at the flood, leads on to marriage, a happy home and prattling children. A hearthstone, a rocking cradle, a mother's lullaby song and a father's strong right arm, keep the world a-moving on.

There is no place on the outside of God's green earth where two hearts are more sure to heat as one, than at the County Fair, "October every year."

No, old man, it isn't your turn to klick. The youngsters are going to the fair, and so are you. Don't you remember the day when God made the sun

shine the brightest, a quiet place, a pair of trusting eyes, a soft, warm hand, and two heads close together? This great big round world only had two people in it then. You were one and SHE the other. And the words she said were the words you wanted to hear—and the promise was made.

The whole thing started about fair time, didn't it? Had a good fair that day, of course, long time ago. No doubt the sun doesn't shine today as it did then; perhaps the quiet place would be hard to find; perhaps those eyes have closed in eternal sleep, that hand may have vanished and be cold; that voice may be stilled in death; but the memory of that day, and place, and that old sweetheart is planted in your heart forever. And were the whole world yours, you would give it all, old man, to go right back there now. Well, your children and maybe your grandchildren are looking for the self-same place and day. It's about fair time. The frost will soon be on the pumpkin and the fodder in the shock; and human nature's just the same as 'twas some fifty years ago.

May the golden sunlight of God's favor shine upon you from a cloudless sky; may your bark of life drift gently down the river of time into the great ocean of eternity; may your corn and cattle be your only care, and your supreme delight the "County Fair."

Ottawa, Ohio, October 9, 1905.

THE MARYSVILLE MEETING.

"That the race meet of last week was a success is the gratifying report of the Yuba and Sutter Driving Club, by whom it was managed," says the Marysville Democrat. "The programs were excellent each day. On this the public is the judge, and the verdict of all who witnessed the different events of the three days is unanimous. There were three days of excellent sport. The meet was a success from a financial standpoint because the balance is on the right side of the ledger—and this was not expected to be the case. The members of the club fully expected to be compelled to make good a deficiency, for there were many unfavorable conditions to be met.

"In purses the sum of \$810 was paid out. As most of the horses on the track belonged here nearly all the money remained here, although some good purses were won by outside horses. A less number of outside horses entered than were expected, but another meet will see many of them brought here.

"All of the decisions on the track were approved and there was no wrangling or objection on the part of owners or the public. The entire meet was well managed in every particular."

The summaries of the harness events follow:

Trot or pace, 2:40 class, purse \$100.
Sir John S. (W. L. Vance) 1 1
Silver Bells (M. Gomez) 2 2
Baron Bretto (W. Leech) 3 3
Hazel B. (L. Padillo) d
Time—2:37, 2:35.

Special trot, 2:50 class, purse \$75.
Babe (Brown) 1 1
Buster (Duncan) 2 2
Pegasus (McCune) 3 3
Crescent (Renatta) 4 4
Time—2:53½, 2:42.

Trotting, 2:28 class, purse \$100.
Kentucky Baron (Duncan) 1 0 1
Baron Bretto (Leech) 2 0 3
Silver Bells (Gomez) 3 3 2
Buster (Pearl) 4 4 4
Time—2:26½, 2:36½, 2:35.

Trot or pace, two year olds, purse \$75.
Monteo (Ohleyer) 1 1
George M. (Walton) 2 2
Hiawatha (Leech) 3 3
Time—1:50, 1:43½.

Trotting, consolation purse.
Silver Bells (Gomez) 1 1
Adaline C. (Blue) 3 2
Baron Bretto (Leech) 2 3
Time—2:29½, 2:40.

Match race, purse \$60.
Kentucky Baron (Duncan) 1 1
Sir ohJn S. (Vance) 2 2
Time—2:30, 2:28.

Bubby race, mile dash, purse \$25. Cooper's Jennie L. first, Renatt's No Name second, Stennett's Prince third, Sligar's Almont fourth.

STALLIONS IN DEMAND IN INDIANA.

It is doubtful if ever there was a time when so many people were in the market for trotting or pacing stallions as is the case at the present time—and there are huyer for all classes. Some want renowned successful speed sires; some want fairly young stallions which have raced successfully and have fairly low records; some want three to five-year-olds which are well bred and have speed—but no records; others want two and three-year-olds with sufficient breeding for use in the stud lightly, and still others want high bred weanlings or yearlings to "bring along" their own way for future use in the stud, or on the track. Indeed, as a prominent combination sale manager said to us the other day, there never before was anything like it; why we have inquiries for everything in the stud line, from a \$60 weanling to a no-limit priced champion speed sire. And why should not people want stallions? Horses are scarce and high priced in the country; they are scarce and high priced in the markets; there is nothing else the average farmer can produce which is so profitable to him; the number of horses needed, in both country and in the cities, increases with the increase of population, wealth and industries, and with the constantly increasing export trade it does not seem likely that this country will ever again, in good times or bad, be able to produce a surplus of horses.—Western Horseman.

THE KANSAS CITY HORSE SHOW.

The expected happened at Kansas City last week. As entries overran all previous bounds, so attendance and enthusiasm exceeded all former records for the horse shown in Convention Hall. As respects people and interest, not to say enthusiasm, the horse show at the city by the Kaw's mouth is perhaps entitled to the palm. We have heretofore dwelt on this point, and succeeding years add force to the comment. It was believed, and rightly, that the support accorded this exhibition by residents of Kansas City and its suburbs was of notable character, but not even the fondest imaginings of its promoters had attained the heights realized at the exhibition just closed.

Entries by far exceeded all former displays and the character of the horses was of a class to command outspoken admiration. Entries were contributed by exhibitors that owned residence at such geographical extremes as New York and Denver, and the presence of the Eastern horses added much drawing power as well as real strength to the arena.

The championship of the show fell to Reginald Vanderbilt on his Kentucky-bred Dr. Selwonk, an upheaded and very flash horse in his forward action, that has been one of the most attractive public favorites seen at our shows in recent years. Mr Busch's gray mare Odette was the runner up for this honor—a very shapely and substantial sort for heavy leather. Among the walk-trot saddle horses the Balls carried off championship honors with Morning Glory.

Miss Belle Beach of New York was kind enough to award the prizes on the equestrian classes for little girls, and discovered, as have some other judges at this show, that when it comes to the local riding classes there is a disposition on the part of the audience to judge more from personal favor than from the performance. Miss Beach, than whom there is no more competent authority, was not able to follow the popular favor, which ran toward a little girl with a very incorrect seat in the side saddle, and sent the honors to a girl who rode astride so cleverly as to entitle her to the blue ribbon, according to the accepted standards of equestrianism.

Judging by the crowds at some of the performances it will be desirable to enlarge the capacity of Convention Hall, if this show makes further growth, or at least to enlarge the promenade between the boxes and the arena rail. Passage along this promenade was well-nigh impossible at several performances. The show closed in a blaze of glory, and set a high mark for succeeding exhibitions to shoot at—Breeders' Gazette.

OF VALUE TO HORSEMEN.

Do you turn your horses out for the winter? If so, we want to call your attention to a very important matter. Horses which have been used steadily at work, either on the farm or road, have quite likely had some strains whereby lameness or enlargements have been caused. Or perhaps new life is needed to be infused into their legs. Gombault's Caustic Balsam applied as per directions, just as you are turning the horse out, will be of great benefit; and this is the time when it can be used very successfully. One great advantage in using this remedy is that after it is applied it needs no care or attention, but does its work well and at a time when the horse is having a rest. Of course it can be used with equal success while horses are in the stable, but many people in turning their horses out would use Caustic Balsam if they were reminded of it, and this article is given as a reminder.

Work on the new athletic grounds and speedway in Golden Gate Park is progressing satisfactorily. The grading of the turn at the west end of the track is practically completed and gives an idea of how the grounds will appear when all the work is finished. The infield where the polo grounds and football fields are to be located is also leveled to grade and is being covered with loam, on which grass will be sown. The entire grading will probably not be finished before the first of next May, but when the work is completed Golden Gate Park will have the finest athletic grounds and speedway in the world.

A well staked filly by Stam B. 2:11¼ out of a McKinney mare is offered for sale in this issue. She is a foal of 1904, of good size and a trotter. She is entered in the Breeders' \$7000 Futurity, the Occidental and Stanford Stakes, and the Kentucky \$20,000 Futurity. The owner desires to sell to some one who will train and race this filly. See advertisement.

Hazel Patch 2:03¾ and Zolock 2:05¼ are to meet in a series of match races on the Southern California circuit, which opens at San Bernardino November 9th. On form Hazel Patch should win, but Zolock will be there at the finish.

Axtell 2:12 as a three-year-old, is credited with twelve new standard performers for 1905. Angle 2:10½ is the only one whose record is below 2:21½, and but four have records below 2:25.

Thos. R. McMahon, a New York horseman, who died recently, was a son of James D. McMahon, who drove Flora Temple to her record of 2:19¼.

LIVONIA, IND., March 21 1905.

Mr. W. F. Young, Springfield, Mass.
Dear Sir:—The Absorbine ordered from you gave perfect satisfaction. You will find enclosed money order for \$1 for two bottles. Send by express at once, etc. Yours truly,
J. F. KELLEY, M D,
Physician and Surgeon.

Absorbine \$2 per bottle, at your dealer's or sent express prepaid upon receipt of price. W. F. YOUNG, P. O. F., 51 Monmouth St., Springfield, Mass.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Nov. 15, 16—New England Beagle Club's specialty show. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 21, 22—Brockton District Kennel Club. Brockton, Mass. J. W. Sullivan, Secretary.
Nov. 30-Dec. 2—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.
Dec. 13, 14—Southwestern Kennel Club's bench show at Pasadena. Entries close.

1906.

Jan. 17, 20—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 12, 15—Westminster Kennel Club. New York. Robert V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburgh, Pa. F. S. Steadman, Secretary.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. N. J. Mathews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.

Field Trials.

Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 30—National Beagle Club of America: 16th annual trials. Stevenson, Md. Chas. R. Stevenson, Secretary.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Huntsville, Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Roehm, Secretary.
Nov. 13—New England Beagle Club. 12th annual trials. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov. —Indiana Field Trial Club, (Week following Illinois Champion Stake). C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary, Richmond, Va.
Dec. —Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 128 Malden Lane, New York.
Dec. 2—Continental Field Trial Club, 11th annual trials. John White, Secretary, Hempstead, Long Island.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan. —Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

OUT AFISHIN'.

(By George Wentworth.)

Bass in de slough
An' me out on de sho—
Dat's enough o' comfort—
Don't want no mo'.
Fishin' rod in my hand
An' clam bait in de can—
Dat's enough enjoyment
Fur any mortal man.

Few people know that there are three distinct periods every year in a bear's life. From April until September it lives upon fruits, vegetables or any thing of this kind to be found. From September until December the diet is changed entirely and the bear lives upon nuts and acorns. During this period a great deal of fat is accumulated which forms a cushion over the entire body, thus making a protection from falls, injuries, etc. Next the bear prepares for its long sleep, which lasts usually four months. It digs a great hollow in the floor of a cave which serves as a bed for many years. The females usually become mothers during this period of hibernation and are forced to guard their young with greatest care for fourteen months, as the male bears will attack even its own young when hungry. The dams are possessors of great strength and will sacrifice their own lives to shield their cubs from harm.

Ducks and quail are reported to be plentiful in nearly every part of the Sacramento Valley.

THE QUAILS OF THE UNITED STATES.

By Sylvester D. Judd, Assistant U. S. Biological Survey.

(Continued from last week.)

General Habits of the Bobwhite.

The habits of bobwhite, like those of many other birds, vary considerably, and the following, observed by E. W. Nelson, is a case in point. In 1875 the Wash bottoms near Mount Carmel, Ill., were covered with a magnificent forest, quite tropical in the size and luxuriant growth of trees and other vegetation. Scattered here and there through the forests were small clearings planted to corn. Bobwhites were found about all these clearings, and the males were commonly heard calling from the tops of the tall trees in the edge of the bordering forest, and on more than one occasion were stalked and shot in the midst of the woods from the tree tops, more than 100 feet from the ground. When flushed in the cornfields, the coveys dashed away into the forest where they took refuge in the tree tops, thence sending forth their rallying call notes.

There appears to be a tendency among bobwhites, at least in some regions, to a local migration. In certain sections, as in Virginia and Maryland, they commonly leave their summer homes on the approach of winter and congregate near the larger watercourses. In an old number of the American Sportsman Lewis refers to this fall movement, and says: "At this period the birds are said to be running or travelling, and will not lie to a dog; and to pursue is lost time, as it will be found utterly impossible to keep up with them, no matter with what speed you attempt it."

The habits of the bobwhite during the hunting season are well known. The birds move about most actively and feed in the early morning and late afternoon. The best shooting is to be had the hour before sunset, in the places where the birds have decided to spend the night. They roost on the ground, forming a solid ring with tails in and heads out. In Virginia and Maryland the roosting places are almost never in the woods, though in Mecklenburg county, Va., the writer has found them in the grassy, briery little clearings among pine woods. At Marshall Hall the birds were found roosting in the edges of woodland, orchards, patches of ragweed in wheat stubble, cornfields, truck plats, broomsedge, dewberry and blackberry tangles, pastures and fence corners. In Massachusetts Edward A. Preble found no roosts in the open fields, but found them among scrub oaks and in tall pine forests. Bobwhites habitually use a roosting ground again and again. A covey of a dozen, found the middle of November, 1899, at Marshall Hall, resorted to a corner of a peach orchard for eight consecutive nights, and during December, 1902, a covey of fifteen on the Roanoke River bottom used a narrow strip of cocklebur, ragweed and smartweed for ten consecutive nights. It is interesting to note that, although quail seek the woods for shelter from enemies during the day, they generally regard the open as safer at night.

It is the general opinion that with the oncoming of winter the bobwhite is found less often in the open fields, where withered herbaceous plants afford but scant protection from enemies, than in dense bushy briery coverts and woods.

In Maryland and Virginia the scattered and depleted coveys after the shooting season evidently unite into large bevy. Their favorite resort in severe weather is a bank with southern exposure and suitable food supply. At Marshall Hall during one of the heaviest snowfalls of the season, when the Potomac was frozen over and the thermometer near zero, a covey was always to be found on the southeast side of a steep bank bordering a large swamp. Here the birds found food and warmth, for the rays of the sun fell on this slope so directly that even when the snow elsewhere lay from three to six inches deep it was here melted or remained only in patches. It was noticeable that when snow was on the ground the birds ventured only a few rods from cover, a fact that apparently indicated their appreciation of danger from the numerous hawks and foxes. At Kinsale, Va., the writer found bobwhites crossing open fields when there was an inch or two of snow, though for the most part they kept close to cover. In April and May the birds again venture out into the open, and they breed when vegetation is sufficiently grown to conceal the nests.

At Marshall Hall little oval pits in dry soil, in which quail had been dusting, were found in various situations, usually under cover of weeds and bushes about the fields. Dusting is a part of the toilet of all gallinaceous and many other birds, and may also be a protection against vermin.

Bobwhite as an Ally of the Farmer.

In summing up the relations of the bobwhite to agriculture it will be well to emphasize certain facts developed by our investigation of its food habits. In the first place, careful observations at Marshall Hall, where the acreage under cultivation is large and the bobwhite abundant, and less extended investigations elsewhere afford no evidence that the species does appreciable injury to crops of grain or fruit. Further, its habit of destroying weed seeds is of much economic importance. For instance, it is reasonable to

assume that in the States of Virginia and North Carolina, from Sept. 1 to April 30, the season when the largest proportion of weed seed is consumed by birds, there are four bobwhites to each square mile of land, or 354,820 in the two States. The crop of each bird holds half an ounce of seeds and is filled twice a day. Since at each of the two daily meals weed seeds constitute at least half the contents of the crop, or a quarter of an ounce, a half ounce daily is consumed by each bird. On this basis the total consumption of weed seeds by bobwhite from September 1 to April 30 in Virginia and North Carolina amounts to 1,341 tons. It is to be remembered also if it were not for foxes, hawks and trespassing pot hunters the birds would be more abundant and their services correspondingly greater. Insects form about one-third of the bobwhite's diet from June 1 to August 31; and a calculation similar to the one employed above shows that 340 tons of insects are destroyed during this period.

Among the insects consumed by the bird are such very harmful pests as the Rocky Mountain locust, the chinch bug, the Colorado potato beetle, the Mexican cotton boll weevil, cutworms, the two cotton worms, and the army worm. The highly insectivorous chicks cause a proportionally greater destruction of insects than the adult birds. Further, while many other useful birds confine themselves to the woodland or swamp, or merely scout along waterways, hedges and fence rows, the bobwhite feeds directly among field crops. In the South it is found in cotton fields; in the North it delights in the ragweed-grown wheat stubble; in the West its favorite feeding ground is cornfields, and it often spends the night there instead of flying to cover, as do most birds. The facility with which it passes from field to field, either on foot or on the wing, distributes its services to an unusual degree.

Bobwhite as an Asset of the Farm.

Every land owner should realize the value of the bobwhite, and should demand from sportsmen a fair price for the birds killed on his property. With proper management some farms of from 500 to 1,000 acres would probably yield a better revenue from bobwhites than from poultry. Many farms in North Carolina derive a regular income from this source. This is obtained by leasing the shooting right to wealthy sportsmen, who, in localities where birds are abundant, willingly pay considerable sums for the privilege. This is probably the most profitable use to which certain poor lands in the South can be put. In some places in Maryland, Virginia and North Carolina the sportsman often pays the landowner from five to twenty-five cents for every bird shot. In other places the farmer or his boy is hired as guide to locate the quail. In addition the sportsman pays liberally for his board and otherwise adds to the farmer's income. Wide-awake farmers appreciate the fact that the genuine sportsman pays well for his sport and should discriminate between him and the market hunter. Millions of dollars can be realized by the proper management of the quail crop of the United States. The time is perhaps not far distant when land owners will protect their game birds from foxes, injurious hawks and human poachers as diligently as they now do their poultry. The sooner the farmer realizes the value of the bobwhite and the fact that the market hunter is a bird exterminator, profiting at the land owner's expense, the better will be his chance of an income from his crop of quail.

Bobwhite as Article of Food.

Perhaps no game is more generally known and liked than quail. The flesh of the bobwhite is juicy, tender, delicately flavored, easily digested and nutritious. It is well adapted to the needs of invalids. To the farmer's table, where fresh meat is often not obtainable, this bird furnishes a welcome supply. No game is so much sought for in market, and countless numbers are sold every year. The writer knows of a single dealer in Washington who in 1902 sold 100,000 quail. Yet the supply is far short of the demand, and the price is constantly rising. In connection with the present price, which is \$3 to \$5 a dozen, it is interesting to recall Audubon's statement that in 1810 these birds could be bought for twelve cents a dozen, and in 1831 for fifty cents. Then they were on the tables of rich and poor alike.

Bobwhite as an Object of Sport.

Edwyn Sandys says of the bobwhite. "He truly is the king of his race; and not alone that, for, in the opinion of hosts of enthusiastic sportsmen, he is the best bird that flies." The well known author, T. S. Van Dyke, says: "Dear little bobwhite has brought more rest to the business-wearied soul, more new life to tired humanity than nearly all other American game combined." The pursuit of many kind of game is possible only in distant wilderness, where traveling is difficult and the exposure incident to the sport may be dangerous to health; but the pursuit of the bobwhite belongs to open, accessible country, and is not too severe for men accustomed to sedentary life. To thousands of such men quail hunting is the yearly means of restoration, and results in a direct benefit to the community, though one not readily computed in money value. At the conservative estimate, between 300,000 and 400,000 sportsmen go out from cities every fall to hunt bobwhite, which means a large expenditure of money, much of which goes to farmers who hold shooting land. Such revenue is timely, for it comes when farm work yields small returns and employment is welcome. Where non-resident licenses are required, with fee of from \$5 to \$25, the State also derives a direct income from the sport.

The bobwhite deservedly stands at the head of American game birds, because it lies so well to the dog, and when flushed springs from the earth like an arrow, demanding a quick eye and a trained touch on the trigger to bring it to bag. When, at the advance of the hunter, the covey explodes like a bomb, his skill is sharply tested if he would bring one of the whirring, meteor-like projectiles to the ground. Birds

of a scattered covey are hard to find. Good authorities say that when they alight they remain quiet and compress their feathers to the body, with the result of withholding the scent. Many sportsmen, therefore, before hunting a scattered covey, give them time to run about and leave scent.

Paradoxical as it may seem, sportsmen exert a powerful influence for the protection of bobwhite. Many individuals and clubs own or lease large tracts, where they maintain the birds and shoot only the surplus. These enthusiasts assist in the enforcement of game laws, restock depleted coveys, and provide food for the birds in times of scarcity. Certain clubs are organized for the purpose of holding field trials, the object of which is to test the ability of competing dogs to find and point birds. As retrieving is not required, the birds are not shot. One of the best known patrons of field trials recently told the writer that he had not killed a bobwhite in ten years. A number of clubs control each a preserve of from 5,000 to 20,000 acres, on which no shooting is allowed—or, if permitted, is carefully regulated—and suitable measures are taken for protecting birds and facilitating their propagation. These trials are held in a score or more of States, and in some of the larger contests more than a hundred dogs are entered. Some owners of field trial dogs have preserves of their own, stocked with hundreds of pairs of bobwhites. Thousands of live birds for the above purposes are in demand at high prices. If the bobwhite could be domesticated and reared in captivity for sale, the enterprise would doubtless be very profitable. From these facts it is evident that the sport of hunting bobwhite contributes to the health and happiness of thousands of men, and that in various ways it can be made to add to the prosperity of farmers and others interested.

(To be Continued.)

GOSSIP FOR SPORTSMEN.

A New Phase of the Game Law.

Charles Flanders, who complains that sixteen hunters entered his hunting preserve over the American river last Sunday, broke down his fences and shot ducks over the preserve, will not have the offenders arrested, says the Sacramento Union. He knows who the intruders were, and Constable Mike Judge stood ready to pounce down upon them. But Attorney P. S. Driver advises Mr. Flanders that he would probably have his trouble for his pains.

Mr. Driver finds that a preserve or tract which may be trespassed upon must have three sides inclosed to the mile; that under the statute a trespass is not committed except the entry is made for some one purpose set out by the statute, and that none of these purposes were evidenced by the acts of the shooters. Finally he holds the ducks shot were not the property of Mr. Flanders, though flying over his preserve—in short, that the conditions will not sustain a charge of trespass under the statute, which abrogates the common law rule regarding that offense.

In the Citrus Belt.

Last Sunday was another gunfest among the Los Angeles sportsmen. Just enough clouds overhead to make good shooting and the season is yet young enough to keep the birds from being gun shy.

Down at the Ballona Club grounds limit bags were reached, while the Recreation Club reports good results.

The most important thing which the day's meet brought out was the general tendency on the part of the club men to cut down the limit of the bags in order to preserve the shooting. Members of the Ballona and Santa Monica clubs have considered the advisability of making the limit as low as twenty-five, with a closed preserve six days of the week. The reason that this step is being agitated by the clubmen is because of the known lessening supply of wild fowl along the coast.

With the draining of the marshes and the building up of this section of the country the hunting is bound to go, unless the English method is resorted to.

At the Ballona Club, for instance, there is now one mallard hole where there used to be four, and in the Santa Ana marshes snipe have practically disappeared. There was a time when a professional hunter could bag a hundred dozen each season, but now it is doubtful whether he would get one dozen, unless he happened to be a particularly good shot.

Widgeon are coming in all along the coast, while teal and spoonbills form good bags.

In the quail district at San Bernardino, Saugus and way stations limit bags were reported in only a few instances Sunday. It may be that the man who made the limit made more and is afraid to say anything about it.

With the followers of the rod and reel a prosperous week has just closed. San Pedro has been the mecca for all pilgrimages, for croaker of the big, bigger and biggest variety have invaded the harbor. H. Slotterbeck reports a record-breaking catch from the wharf, while out on the breakwater bass and sheephead are running.

At Catalina the launches have been running into the harbor at Avalon flying the tuna flag, but no record-breaking fish are reported as landed.

Hermosa beach has reported good sport in surf and yellowfin, but few fishermen care to venture into pastures new so long as Grandpa Croaker is at San Pedro.

Largest Buck of the Season.

To I. K. Miller of Pacific Grove belongs the honor of having bagged the largest buck reported killed this season in California. Three weeks ago this buck, a splendid four pronged animal that scaled over 200 pounds, muddressed, was laid low in Denica canyon, about 25 miles east of old Carmel Mission.

State Sportsmen's Association.

The annual meeting of the California Fish and Game Protective Association which was to be held in Marysville, November 11th and 12th, has been postponed until November 24th.

President H. T. Payne has written the following letter explaining the matter:

San Francisco, Cal., Oct. 25, 1905.

Dr. J. H. Barr, Marysville. My Dear Barr: Your favor to hand today. We have changed the date of our meeting until November 24th. I have to go to Los Angeles, and will be gone some time, and there are many things to attend to and no one else to do it.

We will get our circulars out in a few days and try and rake up as big a crowd as possible. But there being no session of the Legislature this winter there is no hope of having a very large attendance. But there will be enough most likely to have a good time anyhow, and finish up with a good duck hunt. Many thanks for attending to the local matters. I will try and be on hand a few days beforehand and help you out if necessary. Sincerely yours,

H. T. PAYNE, President.

Santa Clara Quail and Duck Hunting.

The exodus of sportsmen to the gulches, the marshes and mountains from San Jose since the opening of the duck season has been phenomenal. It would seem as if every man who loves the sport or is addicted to it has gone forth fully fledged for the conquest. The fever has overtaken the city denizen, he whose business holds him gripped like a vise, in urban haunts and dines in restaurants. Duck is ordered by 50 per cent of the guests, but the supply is not equal to the demand. The importunity was so severe and fervent that what passed for ducks, but which were really "mud hens," were served to a number of leading citizens a few days ago. Incidentally it may be said that the host was a San Jose real estate dealer who prides himself on his ability and agility as a hunter.

For the various sportsmen of the garden city and the surroundings the season bids fair to be a most favorable one.

Scores of San Joseans are now in the vicinity of Warm Springs, Alviso, Alvarado, Mount Eden and the drawbridge. All are having the best of luck, according to the reports received. Quail are likewise plentiful. Those who went out last Sunday and the results of their trips as reported are as follows:

Z. O. Field, 25 quail; Frank Hudner, John Hudner and party, 108 quail; Chauncey Saunders, 8 mallard; Charles Thomson, 11 quail; Bart Lorigan and H. French, 38 ducks; Frank and Fred Garrison, 38 quail; E. Corey, 25 quail; George Doll, 15 quail; L. Farrell, 12 quail; Fred Fowler, 50 ducks, Sunday and 34 ducks Monday; Dr. Gerlach, 10 quail; R. Bridgeman, 10 quail; Tony Delmas, 15 quail; Andy Hogan, 20 ducks; Charles Marcene, 26 ducks; R. Perry, 20 ducks.

Al Bosquet, 15 quail, Uvas; J. Hickey and Dan Thornton, limit, Calaveras; L. Farrell, 11 quail, Alum Rock; J. Wenzel and J. Dorsey, 11 and 9 quail, respectively, Stevens creek; J. W. Briggs, 14 quail, Guadalupe; S. White, 15 quail, back of Cupertino; D. Veloso, 12 ducks, Alviso; J. Friene, 36 ducks, drawbridge; G. Robertson, 7 quail Stevens creek; G. Machado, 19 quail, Mount Hamilton; R. Dampier, 15 ducks, Alviso. Tuesday, at Alviso—Fred Fowler, 27 ducks; Louis Wanderer, 24 ducks; Rick Wright, 24 ducks.

Clarence Letcher has returned from a hunting trip along the San Joaquin near Antioch. He did not return over delighted. He is of the opinion that the best of the hunting season has yet to come. J. H. Asselin and Charles Christopher hunted quail near San Juan on the opening day and both got the limit of 25 birds.

Dr. A. M. Barker reports great enthusiasm amongst duck and quail hunters, but the most successful part of the season is in the future. Very few birds have come down from the north yet. When the cold weather sets in there and freezes up the feed then the birds will migrate to our marshes and hunters will have a more encouraging story to relate.

A Hunting Casualty.

We regret to note the passing away of a well-known sportsman last Sunday under peculiarly distressing circumstances. O. H. P. Sheets, a popular traveling representative of the Pacific Hardware and Steel Company, was stricken with heart failure whilst duck shooting with a number of other members of the Empire Gun Club on the Elkhorn slough preserve.

Mr. Sheets and Con Roman were shooting from nearby blinds on one of the ponds early in the morning. There was a good flight and both sportsmen were enjoying the shooting. Roman suddenly noticed that his companion's gun was silent. Watching in the direction of Sheets' blind for a few moments he observed that birds were repeatedly coming within shooting distance, but were unmolested. Surmising that all was not right, he hastily made his way to Sheets' blind and found the latter lying back almost unconsciously in the tules. Sheets was partially revived and then conveyed to the club house, where he finally succumbed late in the afternoon.

Hunting Near Willows.

Frank Burgl is preparing to commence the usual season of goose shooting. Last week he took out his five decoys to the grounds which he has made famous, and we may expect the good sport which Frank always affords to his guests when they visit his widely-known goose-hunting spot.

As yet there have been no reports of good duck shooting in Glenn county, and this seems strange. From many other points come news of big bags of ducks, but for the present the birds have not made their appearance in that section.

Halibut Fishing.

With the coming on of winter, halibut are waxing fat, and taking livelier interest in the more or less savory allurements of the piscatorial experts who frequent the longer wharves at Redondo, Newport, Port Los Angeles, Playa del Rey and others of the western beach resorts where his slab-sided majesty flourishes in all his voracity and unglorious ugliness of form and feature.

Prosaic to the limit, far more certain in his fighting than in his biting—for, whatever else may be said to the discredit of the halibut, he is always game enough to take a chance—there is a certain amount of rough and tumble sport to be had in this prospecting the bottom with a live smelt or deceased sardine carefully impaled, and the pursuit of "Old Slab-sides" is one of the most popular diversions, says the Los Angeles Times, of the rod and reel, and headline contingents that go out of Los Angeles Sundays and occasionally in the week, on pleasure bent, with fish as an objective.

Probably no branch of the sinker-shier's art tends more surely to develop patience than the pursuit of the halibut. In some respects he is even more vexatious than the croaker, which has long been a sort of standing mark to swear by for general "cussedness" among fishermen.

There are times and tides, which, taken at the flood, lead on to success swift and sure in halibut fishing, but they are few and far between, for day in and day out, these big flatfish are very ginger biters, never swallowing a bait without first giving it a rather careful examination for hooks or other deviltry concealed therein.

The modus operandi of the average halibut's bite is so characteristic that an experienced angler calls the biter before he sees the fish. In places like San Pedro Bay—good, by the way, for halibut—resorts where croakers are likely to come along at any time, one has some excuse for going wrong, but in the open, where one's fish bait is usually on the bottom or near it, and croakers are not present, feeling a few tentative nips and a sensation as of a fish chewing the bait are circumstantial evidence of the presence of a halibut. As the doctors say, the chewing symptoms are pathognomic—that is to say, they denote only one condition, and that is the champing of a halibut's tooth-studded jaws.

It is at this stage of the game that the tyro distinguishes himself from the veteran by getting busy at once, scaring away the fish, losing a bait, and generally making a mess of the matter. Meanwhile the old hand who has had several "bites"—it is hardly piscatorial good form to speak of the tentative efforts of a halibut as a "strike"—is letting everything severely alone and giving the fish a chance to work out his own salvation—or the other thing.

The result is, in a few minutes, unmistakable evidence indicates a hooked fish; the gaff is brought into play, and before long a big, fat prize is thumping away on the wharf deck.

The manner of pursuing the halibut is so delightfully simple that one might well think nobody ignorant of it, but the fact remains that very few go after these big flat fellows in the most "killing" manner.

A sinker heavy enough to carry the bait down is needed, and when a heavy one is employed, it is advisable to let the line run free through it.

With "sliding tackle," well so-called, a halibut picks up a bait, starts slowly off with it; encounters no resistance, and swallows the mouthful. A strike with the wrist usually hooks him deep, and by careful handling he is seldom lost.

Early winter is the best of all seasons for halibut fishing, and those who like the game are now in their element. At nearly all the resorts, fine specimens are being taken every day, an abundance of bait fish in the water being of great assistance to the anglers.

Fine wire leaders are quite advisable in halibut fishing, as the scissors-like jaws of the quarry often bite the best gut in two at a snap, while the mouthful of sharp-pointed teeth is sure to fray a leader dangerously.

Cut into steaks, the "filet of sole" of the markets, halibut are very good eating, though no stretch of the imagination could construe them as a delicate fish. They are a most valuable source of food supply—or were; the market fishers have in many sections cleaned them out within the last few years.

Hunting and Fishing on Submerged Lands.

A decision vitally affecting every hunting and fishing club in Illinois and millions of dollars worth of property was handed down recently by the Supreme Court, which decides that owners and lessees of submerged lands, whether the surface be navigable or not, are entitled to sole rights to hunt and fish.

The case comes from Mason county, where 2800 acres of land, belonging to John H. Schulte, were submerged by the construction of locks and dams in the Illinois River and by the inflow of the sanitary canal. Meredith Warren and others hunted and fished on the property and Schulte asked for an injunction.

The Appellate Court refused to grant the injunction, thereby destroying not only Schulte's rights of control over the fish and game in the waters on his land, but making void the leases of hundreds of hunting and fishing clubs which have held out preserves on similar land along the Illinois River.

The Illinois Supreme Court holds that along rivers title to land extends to the middle line, while on lakes title extends to the edge as measured by the government survey, while the bed of the lake belongs to the State.

The easement of the public to navigation over submerged land does not necessarily carry with it an easement to hunt and fish. The Appellate Court was reversed and a permanent injunction ordered.

Black Bass Plentiful.

A report from Sacramento states that Capitol City anglers are enjoying better fishing than ever before, black bass being particularly plentiful. This condition is also credited to the efficiency of the service given by officers employed by the Fish and Game Commission, one of the most industrious and effective officers being Game Warden George Neale of that county, according to the declaration of sportsmen. This season Mr. Neale has captured a number of pirate fishermen from Black Diamond, and in some instances has secured conviction, while in other cases the men have escaped punishment because of defects in the law.

Under the provisions of the present statute it is unlawful to catch black bass with a net, consequently it would be next to impossible for a fisherman to take 500 or 1000 pounds of bass with the hook, yet if a fisherman is caught with that quantity of fish in his boat, as has been done, he frequently escapes conviction by saying that the fish were caught with hook and line. No matter how preposterous this may seem, unless somebody saw the fish taken with a net it would be impossible to secure conviction.

The fact that a fisherman has a net in his boat would, of course, be a suspicious circumstance, and an officer might be morally certain that the fish had been caught with that net, but that would not be sufficient to secure conviction, since it is the custom of every unlawful fisherman to wound the mouth of each fish by scratching it with a hook, so that if apprehended with the unlawful catch he may be able to point to the wound to show that the fish had been hooked.

Anglers draw attention to the fact that thousands of dollars have been expended in planting bass all along the Sacramento River, and near Clarksburg, where the fish thrive and increase wonderfully. It is this region of the lower part of the river that is most frequented by the pirate fishermen with their big nets, and it is believed that unless something can be done to stop their depredations the supply of both striped and black bass will be seriously diminished, if not depleted.

A plan suggested to curb these illegal fishing methods is to establish a creel limit of say twenty-five or even fifty pounds to the individual per day, just as the bag limit in ducks is established. In this way it would be unprofitable for the illegal fisherman to use their destructive nets and they would give up such traffic, for if they knew they could be convicted for having more than fifty pounds of fish in their possession they would not longer make the arduous trips up the river with their expensive nets, since the lawful catch would not pay them and the risk of conviction would be too great.

Big Wild Game Was Plentiful.

Few among the present generation realize that when their fathers came to this section, the valley was alive with game of the larger kinds of most every description common to the West, several specimens of which, notably the grizzly and antelope, have become extinct hereabouts. Such was, however, the case, and one did not have to search far for them, either, says the Chico Record.

The plains around Willows were thick with antelope, while the hills just back of the town were favorite haunts of the grizzly. The same condition existed on this side of the river, and in the neighborhood of the Marysville Buttes in particular. The writer has often heard his father relate that during the early part of 1850, while he was engaged in freighting on the Sacramento River in a whale boat, that when camped near the Buttes in the early morning great herds of elk, deer and antelope would be seen feeding their way back to the rocky peaks which afforded them security during the daytime, from the marshes at their base, in numbers which made them resemble herds of domestic cattle. Frequently, too, could be seen immense grizzlies in pairs also seeking the same place for their day's rest. Except a few "tule" deer, these have long since been all killed off, and these, too, will before many years have followed. The geese and ducks which existed on the plains at that time in myriads are also becoming scarcer year by year, and with the invasion of the breeding places in the far north by gold hunters, timbermen and farmers, the date of their almost total disappearance can almost be presaged.

Sultan River a Hunters' Paradise.

The Sultan River country is looked upon by Seattle sportsmen as a region offering some of the best sport to be had. Sultan Basin is, of course, the best spot in that wild section, but it is a hard trip into the basin, and takes longer than the average huntsman can take away from his business. Also, it is not necessary to go so far up the creek to get good shooting, which can be had not more than four miles from the village of Sultan, on the Great Northern railroad. A very good, but very little used road leads from Sultan to the Habaker mining claim, four and a half miles out, and from the Habaker a trail leads through three miles of overgrown burn that is ideal deer country. The trail leads through the brush and bends round down to Sultan River, and on the river deer can be seen nearly every morning or late evening. A second road leads from Sultan station up the north bank of the river to the Sultan Gold Mining Company's camp, and a mile above the camp, in another big burn, is more good deer country. Here, as in the Snoqualmie country, there are deserted cabins on nearly every side.

Hunting in the Sultan country is not limited to deer. For a month to come there will be good black bear shooting, and the cougar are thick enough to be a nuisance. Up to the first of the present month there were also grouse and pheasants to be had, but latterly

these have disappeared, probably coming down into the lower woods, and, in the case of the pheasant, hunting out the alder ridge and willow creek bottoms.

A Big Silvertip Killed.

Early this month a rare specimen in the big game line was bagged near Montrose, Colo. Bears are not by any means scarce in that section, but this fellow was a bit out of the ordinary for he weighed 1200 pounds, half a ton, and proved to be the largest silvertip ever killed in that country.

Nine men surrounded the bear in a dense thicket and shot at it several times. Finally Oscar Lampman got off his horse to get a better shot at the bear. J. K. Gill, who was about fifty feet away, called to him to look out, as the bear was charging. Lampman jumped on his horse as the bear ran toward him and rose on its hind feet. Mr. Lampman turned in his saddle and shot the bear squarely between the eyes when the infuriated animal was not over six feet from his horse, which had pushed its way into the brush as far as possible to avoid the bear. The bear fell dead at the horse's feet. Gill was unable to shoot for fear he would hit Lampman. This bear had been killing many cattle in that section and is believed to be 30 years old.

Striped Bass.

The San Antonio and one or two sloughs in that vicinity, also Shell slough, near Shellville, are giving anglers excellent sport with the striped bass. Big catches are not the rule, but quite a number of large fish have been taken. W. T. Hillegass landed three fish on Thursday. They weighed 22, 5 and 4 pounds, respectively. A. M. Cumming's take was four bass—18, 10 and two 4 pounders. Sam Wells landed a 7 pound fish. A number of fish running from 10 to 20 pounds have been caught within the past week and the sport seems to be improving daily, much to the satisfaction of a large number of local anglers.

Local Conditions.

Duck hunting, excepting on odd days when the weather has been exceptionally fine, continues good generally. The birds are about the bay marshes in great numbers, but are beginning to get more cautious daily, for they have had a lively bombardment for the past three weeks. In consequence the open waters of Suisun, San Pablo and certain portions of San Francisco bays are a safe haven in the day time during the pleasant weather. Stormy weather is what the gunners now want; the season in this respect has been very backward so far.

Canvasback ducks are already here in fairly plentiful numbers and generally in fine condition. Pete Walsh of Black Point, one day last week shot a "can" on Petaluma creek that weighed four and one-half pounds.

Northern birds are still arriving daily in large flocks. The first rains will scatter the flocks now here, but other birds will soon take their place.

Quail hunting conditions, locally, so to say, have not changed to any extent. Cooler weather and a rain or two is needed to promote the best phases of the sport. Despite the unfavorable weather conditions, hunters returning from Point Reyes and other stations along the North Shore last Sunday, brought back between them all over 500 birds.

The shooting of ducks on the marshes to San Jose continues unrelentingly. Favorable reports have also been received from Redwood City and other points adjacent to the waters of San Francisco Bay. The long continued fair weather has greatly aided hunters in their quest of mallard, sprig or teal as the ducks will scatter overland to fresh water creeks and lakes upon the first rain-storm.

SPOKANE SHOW.

A total of about eighty dogs made up the entries for the third annual show of the Spokane Kennel Club held at Spokane, Wash. October 11th to 14th. The show was held, as usual in connection with the annual State fair. The show developed more in the nature of a local exhibit than as a representative bench show. Spokane is not favorably located, it seems for a big entry at this time of the year. The Seattle fanciers, being mostly in the disqualification list, were not represented. Portland, Victoria, Tacoma and other points, however, contributed some good dogs. The standard of quality, generally, was very good. James Cole of Kansas City, judged all classes. The officers of the club are: John M. Bunn, president; C. D. Bond, vice president; A. B. Jackson, secretary-treasurer.

Awards.

Cocker Spaniels (black)—Novice dogs—1 Duke Royal, R. G. Gamwell. Limit dogs—1 K. Ushan Duke, R. G. Gamwell. Winners dogs—1 Duke Royal; res K. Ushan Duke Novice and winners bitches—1 Portland Josie, Riverside Poultry Farm.

Cocker Spaniels (parti colors)—Puppy and novice dogs—1 Dandy, H. Speidel. Limit—1 Portland Lord Sholto Douglass I, Z. G. Withrow. Open dogs—1 Portland Kid, Portland Cocker Kennels. Winners dogs—1 Portland Kid; res Portland Lord Sholto Douglass I.

Cocker Spaniels (other than black)—Novice, limit and open, bitches—1 Portland Eva Gray, F. Christy.

Cocker Spaniels (any solid color other than black)—Puppies—1 Nugget, Mrs. Henry Green. Novice—1 Red Varnish, R. G. Gamwell. Open—1 Portland Twinkle, R. G. Gamwell. Winners—1 Portland Twinkle; res Portland Eva Gray.

English Setters—Puppy dogs—1 Bob White, A. C. Ware. Novice dogs—1 Whitestone's Hunter R., R. E. Wright; 2 Rox F., H. Fleming; 3 Blackie's Count Gladstone, Dr. H. B. Luhn. Limit dogs—1 Whitestone's Hunter R. Open and winners dogs—1 Mall-

wyd Bob, T. P. McConnell; 2 Whitestone's Hunter R. Puppy bitches—1 Pet Windem, A. F. Wleseman; 2 Jessie Shirley, Mrs. P. Buseh. Novice bitches—1 Belle Windem, A. F. Wleseman; 2 Lady of Rosalla, J. F. Anderson. Limit bitches—1 Fanilla, F. H. Fleming. Open and winners bitches—1 Rockline Lady Bird, T. P. McConnell; 2 Fanilla.

Pointers—Novice dogs—1 Whitestone, A. B. Jackson; 2 Minnesota Joe, H. F. Ziegler; 3 Spokane Sam H. Peel. Limit dogs (55 pounds and over)—1 Whitestone, 2 Minnesota Joe; 3 Spokane Sam. Winners dogs—1 Whitestone; res Minnesota Joe. Novice bitches—1 Clatsop Beauty, W. F. Halderman; 2 Princess Zig, H. A. Chisholm. Open bitches (under 50 pounds)—1 Clatsop Beauty; 2 Oregon Dot, H. F. Ziegler; 3 Rosebud F. J. Moore. Winners bitches—1 Clatsop Beauty; res Oregon Dot.

Irish Setters—Puppy dogs—1 McElroy, T. B. Ware. Novice dogs—1 Nick, W. E. Richardson; 2 McElroy. Limit dogs—1 Nick. Winners dogs—1 Nick; res McElroy.

Field Spaniels—Limit—3 Sport.

Chesapeake Bay Dogs—Limit dogs—1 Jiggers, W. W. Flinney; 2 Jack, A. B. Jackson; 3 Donald, Dr. C. S. Moody. Open dogs—1 Jack; 2 Donald. Winners dogs—1 Jiggers; res Jack. Limit bitches—1 Topsy, W. H. Flinney.

Collies (sable and white)—Puppy dogs—1 Brighton Laird, William McLuckie; 2 Glen Tana Kuroki. Novice dogs—1 Brighton Laird; 2 Spokane Highland, J. L. McDonald; 3 Jim, John Dock. Limit dogs—1 Craigmore Cracksman, T. S. Griffith; 2 Brighton Laird, 3 Craigmore Councilor, Mrs. J. S. Kloeber. Open dogs—1 Glen Tana Bouncer; 2 Brighton Laird. Novice bitches—1 Brookmere Hazel, Mrs. J. S. Kloeber; 2 Glen Tana Molly, Mrs. J. S. Kloeber. Limit bitches—1 Glen Tana Talent, T. S. Griffith; 2 Brookmere Hazel; 3 Glen Tana Molly. Open bitches—1 Winnetka Countess, Mrs. J. S. Kloeber. Open (other than sable and white)—1 Glen Tana Marquis, T. S. Griffith. Winners dogs—1 Glen Tana Marquis; res Glen Tana Bouncer. Winners bitches—1 Winnetka Countess.

Russian Wolfhounds (Borzois)—Limit dogs—3 Jack Jr., C. H. Carlson.

Fox Terriers (smooth coated)—Limit, open and winners dogs—1 Multnomah Boy, W. B. Fechheimer. Puppy bitches—1 Potlatch Princess, Mrs. J. Colie. Novice bitches—1 Norfolk Mistake, W. B. Fechheimer; 2 Essex Frixie, Mrs. T. M. McAuliffe; 3 Trilby, Mrs. J. Colie. Limit, open and winners—1 Norfolk Mistake; 2 Essex Trixie.

Fox Terriers (wire haired)—Limit and winners dogs—1 Sunshine Bristles, F. W. Welch; 2 Halderness Dasher, A. Melrose.

Bull Terriers—Novice dogs—1 Jerry, D. C. McClelland, Jr. Open dogs—1 Edgocote Peer, F. E. Watkins. Winners dogs—1 Edgocote Peer; res Jerry. Novice and winners bitches—1 Willamette Beatrice, F. E. Watkins.

Boston Terriers—Novice limit and winners dogs—1 Elmore's Strongheart, G. J. Elmore.

Dachshunde—Limit, open and winners—1 Gretchen, C. N. Lockwood.

Scotch Terriers—Open and winners bitches—1 Saa-nish Shortcake, J. Allwood.

Irish Terriers—Open dogs—1 Bolton Woods Despot, Wm. Ollard. Limit bitches—1 Boyne Fidget, Wm. Ollard. Winners—1 Bolton Woods Despot, res Boyne Fidget.

Special Awards.

Best Pointer or Setter puppy—English Setter Bob White.

Best Pointer or Setter owned in Washington—Whitestone's Hunter R.

Best Pointer dog—Whitehead's Hunter R.

Best Pointer bitch—Clatsop Beauty.

Best novice Pointer—Whitestone's Hunter R.

Best English Setter dog—Mallwyd Bob.

Best English Setter bitch—Rockline Ladybird.

Best novice English Setter—Belle Windem.

Best novice Irish Setter—Nick.

Best Irish Setter—Nick.

Best Chesapeake Bay, dog or bitch—Jiggers.

Best Cocker Spaniel—Duke Royal.

Best Cocker Spaniel dog—Duke Royal.

Best Cocker Spaniel bitch—Portland Twinkle.

Best novice Cocker Spaniel—Duke Royal.

Best Collie (other than sable and white)—Glen Tana Marquis.

Best novice Collie—Brighton Laird.

Best Collie dog—Glen Tana Marquis.

Best Collie bitch—Glen Tana Molly.

Best pair of Collies—Glen Tana Marquis and Glen Tana Bouncer.

Best Fox Terrier dog—Multnomah Bay.

Best Fox Terrier bitch—Norfolk Mistake.

Best novice Fox Terrier—Norfolk Mistake.

Best Bull Terrier dog—Edgocote Peer.

Best Bull Terrier bitch—Willamette Beatrice.

Best Boston Terrier dog—Elmore's Strongheart.

Best Irish Terrier dog—Bolton Woods Despot.

Best Irish Terrier bitch—Boyne Fidget.

TRADE NOTES.

What Causes the Rush?

Never in the history of sports afield on the Coast has there been such a heavy sale of firearms and ammunition as has prevailed, particularly in California, since the opening of the hunting season.

Sportsmen these days are up-to-date and well posted on what the manufacturers and dealers offer them—needless to say merit counts all the time.

A significant fact in this connection is the following telegram recently sent to the Ithaca Arms Company, Ithaca, N. Y.:

"We are cleaned out of every 12 and 16-gauge Ithaca gun. Can't you rush us some. Everybody fighting for them.

Phil. B. Bekeart Co."

The Ithaca Gun Company have been running night and day for the entire year and have been behind orders all the season notwithstanding a capacity of nearly 100 guns a day. It is, we repeat, significant—sportsmen want good guns and know one when it is used.

Would there be such a big demand for Ithaca, if they were not just what was wanted?

Averages Reported.

Grayville, Ill., October 13th, Al Willerding of Evansville, Ind., first amateur and first general average, 179 out of 200, shooting DuPont. C. O. LeCompte, second general average, 178 out of 200, shooting Infalible, with a long run of 65 straight. Wm. Huddy of Evansville, Ind., second amateur and third general average, 172 out of 200, shooting DuPont. I. Z. Scott of Jacksonville, Ill., third amateur average, 169 out of 200, shooting DuPont.

St. Louis, Mo., October 13th, 14th and 15th, Harold Money, first general average, 394 out of 450, shooting New E. C. (Improved). F. C. Riehl, shooting New E. C. (Improved), second general average, 390 out of 450. Alex Mermod of St. Louis, Mo., first amateur and third general average, 387 out of 450, shooting DuPont. Joe O'Neal of St. Louis, Mo., third amateur average, 325 out of 450, shooting DuPont.

Rockford, Ill., October 15th and 16th, W. D. Stannard, first general average, 381 out of 425, shooting DuPont. G. G. Bills of Chicago, Ill., first amateur and second general average, 375 out of 425, shooting DuPont. F. L. Pierstorff of Middleton, Wis., third amateur average, 366 out of 425, shooting DuPont.

Waco, Tex., Oct. 12th and 13th, M. E. Atchison of Giddings, Tex., 353 out of 400, shooting DuPont, won first average.

Rantoul, Ill., October 12th and 13th, Chas. Spencer, first general average, 277 out of 300, shooting DuPont. W. D. Stannard, second general average, 270 out of 300, shooting DuPont. Lee Barkley of Chicago, Ill., first amateur and third general average, 267 out of 300, shooting DuPont. M. Arie of Thomasboro, Ill., third amateur average, 257 out of 300, shooting DuPont.

Some Corking Good Amateur Records.

Jay D. Greene of Avon, N. Y., a strict amateur, won high average at Leroy, N. Y., shoot, October 5th, in a gale of wind, breaking 129 out of 150, a magnificent showing under the conditions. Mr. Greene is a popular Parker gun man.

M. E. Atchison of Giddings, Tex., at Paris, Tex., September 25th to 28th, won high amateur average with 437 out of 475 at 19 yards rise out of a possible 475. In the live bird race at 30 yards' rise Mr. Atchison killed 19 out of 20. Mr. Atchison always uses a Parker gun.

Mr. J. S. Thomas of Pleasant Hill, Mo., on September 28th, at Rich Hill shoot, broke 170 out of 175; out of the last 130 breaking 129 with a straight run of 100. At the same shoot W. A. Smith of Greenwood, Mo., and George K. Mackay, Scammon, Kans., tied on second with 168 out of 175. All three shooters shot Parker guns.

F. D. Alkire of Williamsport, O., at the Cincinnati tournament, September 18th to 21st, won high amateur average, 534 out of 600. R. S. Rhodes of Colum-

bus at the same shoot won the cup with 540 out of 600.

Mr. Wallace of Marshalltown, Ia., at the Brooklyn, Ia., tournament, September 21st, broke 198 out of 200; straight run of 157, using the Parker gun.

Walter Huff, at Valdosta, Ga., September 19-20, won high average, 274 out of 280. On September 4-20 Mr. Huff shot at 1245 targets, breaking 1210. Mr. Huff is a staunch advocate of the Old Reliable.

F. McCoughan of St. Louis, an amateur shooter, on August 28th, tied for high amateur average with a score of 153 out of 160. Mr. McCoughan shoots the Parker gun, and it is good shooting.

Peters Ammunition at Sea Girt.

The military competitions held at Sea Girt, N. J., August 21st to September 29th, gave new emphasis to the fact demonstrated in previous years, that Peters factory loaded cartridges are peculiarly adapted for accurate long range military shooting. The most noteworthy single achievement of the meeting was the record made by Lieut. Tewes, who not only won the Wimbledon Cup, but also the Grand Laffin & Rand Aggregate for the best total score in the Wimbledon, Leech, Seabury, All Comers, Hayes, Hale, Meaney, Trophy and Spencer matches. Lieut. Tewes' score was 16 points ahead of his nearest competitor. Other winnings made with Peters ammunition were as follows:

Inspectors' Match, won by Lieut. K. K. V. Casey; Seabury Long Range, won by Lieut. W. A. Tewes; Seabury Long Range, won by Lieut. W. A. Tewes; Reading, won by Lieut. H. L. Smith; Disappearing Target Revolver, won by Lieut. J. Stedje; Any Revolver, won by Thos. Anderton; Jones' Rapid Fire Revolver, won by Thos. Anderton; Hale Match, second, Lieut. W. A. Tewes; Leech Cup Match, second, Wm. F. Leushner; President's Match, third, Major R. W. Evans; All Comers Military Revolver, Thos. Anderton first, R. W. Evans third, W. F. Leushner fourth; Spencer Match, Lieut. Casey second, Capt. Cookson fourth, W. F. Leushner sixth; Meaney Match, Lieut. Tewes second, Lieut. Casey third, Ben South fourth; Lieuts. Tewes and Casey tied the winner in this event but were out-ranked; Hayes Match, Lieut. C. S. Benedict second, Capt. W. W. Cookson third; N. J. S. R. A. Trophy Match, Major R. W. Evans third, Lieut. C. S. Benedict fourth, Lieut. W. A. Tewes fifth, Capt. Cookson sixth; All Comers Match, Major R. W. Evans third, Wm. F. Leushner fourth; Consolation Match, C. F. Silvester second; Wimbledon Match, Lieut. Casey second. Seven of the high ten scores made with Peters cartridges.

In addition to the above, there was some very fine work done in some of the other matches. Lieut. Casey in the Spencer and Seabury matches at 800 yards made a total of 20 consecutive bulls. The finish of the Wimbledon Cup Match was very interesting. Lieut. Tewes was almost the last man to shoot and was generally conceded to have the match won, before his last shot was fired. He was just as careful in this shot as his previous ones, however, and after deliberate preparation and careful gauging of wind and light, he fired, scoring a center bull's eye. All these performances indicate that Peters primers, the now famous Peters bullet, and Peters manner of loading are not approached by any other goods.

Supreme Test of Winchester Ammunition.

It has often been proven that Winchester factory loaded ammunition shoots where you hold, so at the recent Sea Girt Rifle Tournament, the President Roosevelt Trophy, emblematic of the military championship of the United States, was won by a rifleman using this time tried and reliable make of ammunition. Sergeant C. E. Orr of Newark, Ohio, was the man, and it is needless to state that his wonderful shooting at all the ranges is now the talk of all military rifle experts throughout the world. This was not the only match won by shooters using Winchester ammunition, far from it, as the following important matches were also captured with this make of ammunition: The Spencer match, won by Captain W. B. Martin; the All Comers Military Match, won by Mr. H. E. Simon; the Kuser Rapid Fire Match, won by Mr. A. L. Laudensack; the E. P. Meaney Match, won by Captain W. G. Hudson; the Hayes Match, won by Captain W. B. Martin, who established a new world's record by making twenty-four straight bull's eyes, demonstrating the uniformity of Winchester factory loaded cartridges to the fullest extent to even the most skeptical rifle expert. The Jones Rapid Fire Match, tied for by Mr. A. L. Laudensack, Mr. W. D. Kittler and Mr. C. S. Hudson; the All Comers Pistol Match, won by Mr. G. W. Waterhouse, and the Consolation Match, won by Mr. H. E. Simon.

"Billy" Crosby, shooting the "Leader" shells, the shells he always shoots, did funny things to the inanimate targets at the New London, Ia., tournament. Arriving at New London the evening before the shoot, direct from the Pacific Coast, he seemed none the worse from his long journey across the continent, and started in the next morning by pulverizing targets, and after missing his ninth target ran out 271 straight, fifty of these being from the twenty-two yard mark. For the tournament he scored 592 out of the 600 shot at. That old reliable shot, Mr. Garrett of Colorado Springs, who, by the bye, is another champion who always shoots the "Leader" shells, won the high amateur average of the tournament with the splendid score of 577 out of the 600, making a run of 145 straight during the tournament, thus it will be seen that both the expert and amateur high averages, also the longest straight runs, expert and amateur, were made by shooters that used the time tried and reliable "Leader" shells.

At the tournament of the Spokane, Wash., Rod and Gun Club, Mr. C. M. Powers, an amateur, shooting Winchester "Leader" shells carried off the honors by winning the high average of the shoot. When it is taken into consideration that such world renowned expert shots as Fred. Gilbert, Jack Fanning, Rollo A. Heikes and T. A. Marshall, were in attendance at this shoot it speaks volumes for Mr. Powers' keen eye, steady nerve and the reliable "Leader" shells. At every tournament held on the Pacific Coast in which the Eastern experts took part, namely: The Interstate Shoot held at Ingleside, the Medford (Ore.) tournament, the Portland (Ore.) tournament, the Tacoma (Wash.) tournament, the Seattle (Wash.) tournament, and the Spokane (Wash.) tournament—the shooters that used the Winchester "Leader" shells carried off the premier honors, making a clean sweep at all these places for Winchester goods.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

SHEEP DIPPING PLANT.

An extensive plant for dipping sheep has been installed by the Bellevue ranch, San Joaquin county, which for thoroughness of treatment and economy of operation is an advance on former methods. The plant is on a hillside. At the top is a furnace of cement with vats for boiling the dip, which consists of three parts sulphur and two parts quick lime, with sufficient water to give the desired strength. The dip is delivered into a cement trench, with the sheep corrals at one end and the drying corrals at the other.

The sheep are passed into the trench at one end, care being taken to submerge each animal. Each sheep has to swim the length of the trench filled with dip. This saturates the wool with the sulphur solution. At the farther end of the trench a leadway guides the animals into corrals with cement floors sloping back into the trench, thus saving the dripping solution. The sheep are held until the wool has drained the excess dip, and are then passed on to a holding corral. A gravity drain empties the dip trench when the work is done. By means of this very simple and efficient arrangement 5000 head of sheep can be treated in one day by five men.

Last year 5000 sheep were fattened at Greeley, Colorado, by a beet sugar company. They were divided up in pens of 700 to 800 sheep, each pen in charge of a feeder whose business it was to watch them closely. October 11, at the time they were put on feed, they averaged seventy-four pounds each and during the first three weeks made a gain of two and a half pounds a head weekly. The ration was ten pounds of pulp to one-half pound of alfalfa hay daily. To this ration a small portion of sugar beet molasses was eventually added. The experiments indicated that the molasses tended to make a firmer flesh and that sheep fed with it as part of the ration shrunk less in shipping.

Potatoes that are too small to market may be used to advantage as a food for young pigs. Many farmers consider it no loss to have from two to three per cent of their potato crop too small for commercial use as it gives them such a good winter pig food. It requires but a short time to cook them, in which way they are very beneficial. A little salt added while they are boiling will give them a relish.

WOODLAND STOCK FARM HORSES AT AUCTION

FRED H. CHASE & CO., 1732 Market Street, announce that Woodland Stock Farm, Mr. Alex Brown proprietor, will offer to the highest bidder

Tuesday Evening, November 21st, at 7:45,

A consignment of high-class, standard bred Mares and Three-year-old, Two-year-old and Yearling Fillies and Geldings by Nushagak (sire of Aristo 2:08½, etc.) and Prince Ansel 2:20, out of such mares as Viola by Gen. Benton, Hattie W. by Electioneer, Addie W. by Whips, Hilda Rose by Dawn, Bonnie Derby by Charles Derby, Addie B. by Dexter Prince, and other high-class brood mares.

ALFALFA FOR HORSES.

It seems to be the general opinion that alfalfa hay is not a good horse feed, especially for horses on the road or for fast work. Now I would like to correct this, as alfalfa is too good a feed to be condemned for any purpose. The fact is, nearly every one who feeds horses gives them too much hay and this applies to all kinds of hay. If a horse is given about what alfalfa it should have, say, twelve or fifteen pounds daily for horses of 1000 pounds and a fair grain ration, the animal will travel just as far and just as fast as with other kinds of hay and in better condition.

But if a horse is allowed to eat thirty to forty pounds a day, which they will of alfalfa if it is given them the horse is sure to become short-winded and sloppy. One of the famous trotting horses on the Eastern turf with a record below 2:03 is fed alfalfa as its only hay. A good ration for the horse of any kind of feed is about one pound of grain and one and a half pounds of hay to each one hundred pounds of horse and this would apply to alfalfa. In fact, the horse should do better on the alfalfa than with other hays and with less grain.

This might be the opportune time to say that the majority of the farmers feed too much hay of all kinds to their horses. In fact, the horse barn, to my notion, is where one of the greatest wastes of the farm can be found. Horses will travel better, stand more work and be healthier if fed less hay. Most farmers give them all they can eat and aim to have them waste enough to make their bedding, when they have plenty of good straw going to waste on the farm. The London cab horses which are considered the finest and best kept in the world, have but two hours in the morning and two hours in the evening with the noon hour for feeding.

At eight o'clock in the evening every scrap of feed is taken away from them and they are bedded for the night. The average farmer would think his horses were being starved if he found no food in the manger after eight or nine o'clock in the evening. The feeding of alfalfa to horses does away with the old-time bran mash once a week, which was considered so necessary. A great many alfalfa feeders have from experience decided that the first cutting of alfalfa is best for horses, or alfalfa that is fairly coarse, or some that had come to full bloom. The idea is, although they do not know it, that in feeding this kind of alfalfa the horse gets about the amount it should have. The horse picks it over and takes the best of it and manages to get about what it should have.

If horses were given the same amount of good, well made alfalfa hay they would eat it all and then would have too much. An overworked horse or one run down and thin will pick up and get fat and in good condition on alfalfa pasture quicker than on any other grazing known and when a grain ration is added they have been known to put on as high as three pounds a day. Horses will eat and do well on the refuse from sheep feeding lots where alfalfa has been fed, while on straight timothy it will get thin with no work.—I. D. O'Donnell.

SECURING GOOD LAYERS.

While every farmer should resort to the pure breeds for the best results, there are some matters pertaining to the management of poultry which the farmer or poultryman must personally attend to, as he cannot delegate the duties to others. To have a flock of good layers next year each of the pullets should be observed carefully, as it is only by daily observation of the members of the flock that a selection of the best can be made. The desired results are not always accomplished in one year. To bring a flock up to a high degree of efficiency depends largely upon the management, yet one must breed for something better every year. The best pullets should be the foundation, and with careful selection every year there will be progress and improvement. It is a problem to pick out the most suitable breeds, as climate, markets and other conditions are factors; but each farmer can take the best of his pullets every year, as well as retain any meritorious hens that have given satisfactory results. There is no known breed that satisfies all farmers. Poultrymen and farmers

have their preferences. experience teaching each that the best breed is the one adapted to his farm. When introducing new blood, aim to secure stock from yards that contain hardy fowls, and do not fail to cull and dispose of all unpromising stock.—Exchange.

POULTRY NOTES.

Medicine is seldom necessary for fowls that are properly cared for.

Air slaked lime is valuable in many ways in the poultry house as a disinfectant.

It is almost impossible to keep more than one breed on a farm without getting mixed.

Parched corn is the best form in which to give charcoal to poultry. It is far better than charcoal alone.

The tendency of most poultry keepers is to make the roosts too high. They should be from eighteen inches to two feet high, and about three or four inches wide.

The fowls and animals have sense enough to recognize good treatment from bad. They reason, and their dispositions are such that a little persuasion will go farther than violence, in accomplishing good results.

Usually male birds are as good about dusting themselves as the hens, and need to be looked after more closely. Free access to a good dust bath will usually control the lice on the hens, and in the henhouse.

A writer says: "I fully believe that a large per cent of breeders who quit the business with the conclusion that there is nothing in it, or those who make an absolute failure of it entirely, can turn back, if they would, and point to overcrowding as their main cause of defeat. It is impossible to get fertile eggs from stock kept under such circumstances."

F. W. KELLEY, Care of BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco.

HEIFERS YIELD RICHER MILK.

The production of milk and butter fat by dairy cows under normal conditions increases with each year up to the fifth and sixth years, when the cow is at her best. The length of time she will maintain her maximum production depends on her constitutional strength and the care with which she is fed and handled. A good dairy cow should not show any marked falling off until after ten years of age. Many excellent records have been made by cows older than this. The quality of the milk production by heifers is somewhat better than that of milk of older cows, for we find a decrease of one-tenth to two-tenths of one per cent in the average fat content for each year until the cows have reached full age. It is caused by the increase in the weight of the cows with advancing age; at any rate there appears to be a parallelism between the two sets of figures for the same cows.

Young animals use a portion of their food for the formation of body tissue, and it is expected therefore that heifers will require a larger portion of nutrients for the production of a unit of milk or butter fat than do older cows. After a certain age has been reached, on the average about seven years of age, the food required for the production of a unit of milk or butter fat again increases as regards dry matter and the digestible components of the food. A good milk cow of exceptional strength, kept under favorable conditions, whose digestive system has not been impaired by overfeeding or crowding for high records, should continue to be a profitable producer till her twelfth year, although the economy of her production is apt to be somewhat reduced before this age is reached.—Bulletin Wisconsin Experiment Station.

NEW POULTRY FARM.

E. H. Winship and C. F. Grant of Napa have formed a co-partnership, and under the firm name of C. F. Grant & Co. have purchased from T. N. Mount the Meredith place of eighty acres, five miles north of Napa, and will establish thereon the Mammoth Poultry Farm. The old buildings which are now on the property will be torn down, and the work of constructing a residence, brooders and incubator houses, and other structures planned and equipped for the care of poultry will be commenced. Two chicken houses, 400 feet in length and 24 feet in width, will be built. Down the side of each building will run a tramway, and on one side of the tramway and next to the nests will be troughs for the soft feed. Above the nests will be slides, inclined toward the tramway, which will enable the workmen to thoroughly and conveniently clean the houses. Above these slides will be the roosts. At the end of each building will be provided a cook house for the preparation of feed, and adjoining it a granary. An incubator house with a capacity of 5000 eggs will be built. From the brooding house will be runs, and these runs will lead into large corrals, enclosed with wire netting. It is estimated that over six miles of wire will be used in this manner on the farm. A complete water system will be established, the water required to be pumped with a gasoline engine. The C. F. Grant Co. has already purchased 2000 hens, and hopes to be ready for business within a few months.—Napa Register.

PASTURING GOLD LAND.

Tom Hood, in that inimitable poem "Miss Kilmansegg," tells of a breed of sheep that were pastured on land so rich that "their teeth turned to gold by browsing." Perhaps the Folsom Development Company, an organization formed to dredge hundreds of acres of land near Folsom, Sacramento county, for gold, will meet with the same good luck. It will be several years before dredgers can be built and put in operation on this land, so the company has decided to go into the cattle raising business, using the land for ranges upon which the herds will graze. The company will go into the business on quite an extensive scale. In the past the land has been rented to stock raisers, but they have been notified that the company will reserve the lands for its own use.

"SAVE-THE-HORSE" SPAVIN CURE

HOWE & CO.,
Real Estate, Estates Cared For,
AND BUSINESS OPPORTUNITIES,
247 Washington St., Room 2.

Boston, Mass., Jan. 21.
Dear Sirs:—I have used a bottle of "Save-the-Horse," and I consider it the best thing that as yet I have been able to obtain for what it was intended, it having entirely cured a very valuable mare which has been lame since last September with a sprained ankle. We had her blistered twice and laid up for two months, but it did no good. I was just about ready to breed her when I gave it a trial; she is now entirely sound.
Yours respectfully,

ALBERT E. BAKER.

WERE THESE TWO CASES WORTH THE COST OF TREATMENT?

Brooklyn, N. Y.

One of my horses went lame from side or shell bones on both feet, which extended entirely around the quarter, and was laid up for about three months. I used two bottles of "Save-the-Horse," and the horse is perfectly sound. I have driven her over paved roads, and one day gave her a sixty-mile drive and she never showed the least particle of lameness. The growths have nearly all disappeared. I have owned horses for years, used them to build railroads and in all kinds of contract work, and have used remedies, blisters, firing and electricity, but never saw anything take hold and produce such results as "Save-the-Horse" in this case.

D. C. BENNETT, Builder,
416 79th St.

Nyack, N. Y.

In August I had a mare with an ankle cocked from a bad wrench in a race. It was so bad I had concluded to shoot her, but was persuaded to breed her and turn her out. I bred her, but instead of turning her out used your "Save-the-Horse." In three weeks I was more than surprised to see the swelling disappear, and the remedy produced a complete cure. She is as good as ever. I have raced her since and drive her any distance without any sign of lameness. I cannot say too much for your remedy.

GEO. F. BEHRINGER, JR.

Write us before you fire or blister your horse and you will understand why our written guarantee is an absolute legal contract.

Positively and permanently cures BONE and BOG SPAVIN, THOROUGHPIN, RINGBONE (excepting ringbone), CURB SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, BROKEN DOWN, SPRAINED and RUPTURED TENDONS and all LAMENESS, without scar or blemish. Horse may work as usual.

\$5 per bottle. Written guarantee with every bottle, as binding to protect you as the best legal talent could make it. Send for copy.

At all druggists and dealers, or express paid.

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitation that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials etc.

ENTRIES TO STAKES CLOSE NOVEMBER 1st. Records made after entry no bar.
ENTRIES TO PURSES CLOSE NOVEMBER 23rd. Records made on and after November 8th no bar.

No race longer than five heats. American Trotting Association Rules to govern, except that hoppers will be allowed. Six to enter and four to start. Entrance fee to harness races, five per cent and five per cent from money winners.

Two horses may be entered in one class and be held but for entry fee on horse that starts; but if neither starts, one entry fee will be required. A horse may be entered in two races and be held only for entry fee in race in which he starts; but if no start is made, entry fee will be required in one class, and if entered in a stake and a purse race entry fee will be charged on the larger amount.

ENTRIES TO RUNNING RACES close at 6 o'clock the evening before the race. Entry fee in running races five per cent. No additional fee from money winners. Western Jockey Club Rules to govern running races, as far as applicable. Outlaw horses barred.

The management reserves the right to change the order of the program without notice.

Our meeting follows close of Southern California Circuit, which offers \$17,200 for harness races. Remember we have a new \$50,000 plant, first-class mile and half-mile tracks, and the grandest winter climate in the world.

Horses unloaded at the grounds without change over either Santa Fe or Southern Pacific rail ways.

BOOKS FOR STALLION OWNERS

1. Hoover's Stallion Service Record.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding, description, dates of service, dates of foaling, etc., with index, complete, size 10x7 1/2. Each book is handsomely and substantially bound.....\$2.00

2. The Standard Stallion Service Book.

The neatest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, date of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherette, suitable for pocket use.....\$1.00

3. Breeder's Note and Certificate Book and Stallion Service Book Combined.

This book contains 75 blank certificates to be given to owners of mares, certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed.....\$1.00

IT MAKES NO DIFFERENCE

what particular kind of shooting you are interested in—sportsmen differ as to make of guns, advantages of various loads etc., but sooner or later most of them come to the same opinion about ammunition—that

Peters Shells and Cartridges

have all the other makes beaten in the race for quality and results. See what they have recently accomplished in the three chief departments of "the game":

RIFLE

At Sea Girt, N. J., Aug. 24-Sept. 9, LIEUT. TEWES won the Wimbledon Cup Match, the Grand Luffin & Rand Aggregate, the Seabury and N. J. Members' Matches; LIEUT. CASEY won the Inspector's Match, and LIEUT. SMITH the Reading Match—all using Peters .30 U. S. Gov't ammunition. In the Spencer and Seabury Matches LIEUT. CASEY made a total of 20 consecutive bull's-eyes. In the Wimbledon Match seven of the first ten places were with Peters Cartridges.

PISTOL

The Pistol Championship of the United States, competed for Sept. 1-11, was won by J. A. DIETZ of New York scoring 465 out of a possible 500 with Peters 22 Stevens-Pope Armory Cartridges. Standard American Target, 8-in. Bull's-eye, distance 50 yards. At Sea Girt, N. J., Aug. 24-Sept. 9, THOMAS ANDERTON won the All-Comers, Any Revolver, and Jones Matches, and LIEUT. STEDE the Disappearing Target Match, all with Peters Cartridges.

SHOTGUN

The Consolation Handicap at the Grand American, June 30, was won by JAS. T. ATKINSON, score 99 out of 100, using Peters Ideal Shells. First Amateur Average at the Cincinnati Tournament, Sept. 19-21, won by R. S. RHOADS, using Peters Shells. First General Average at the Indianapolis Tournament, October 9-10, won by L. H. REID with the phenomenal score of 392 out of 400, using Peters Factory Loads.

GUARANTEED

BY THE

GUARANTEED

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1905.

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES TO CLOSE MONDAY, DEC. 4, 1905.

ONLY \$2 TO NOMINATE MARE.

\$4250 for Trotting Foals. \$1750 for Pacing Foals. 8 00 to Nominators of Dams of Winners and \$200 to Owners of Stallions. Money Divided as Follows:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate Mare on December 1, 1905, when name, color, description of Mare and Stallion bred to must be given. \$5 May 1, 1906. \$5 October 1, 1906. \$10 on Yearlings January 2, 1907. \$10 on Two-Year-Olds January 2, 1908. \$10 on Three-Year-Olds January 2, 1909.

STARTING PAYMENTS—\$35 to start in the Two-Year-Old Pace. \$35 to start in the Two-Year-Old Trot. \$35 to start in the Three-Year-Old Pace. \$50 to start in the Three Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered Is a Trotter or Pacer. Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3) and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before January 2, 1907, her nominator may sell or transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1905. Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7000, the amount of the guarantee only. Hopples will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more monies in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

San Francisco, Saturday, November 11, 1905

PACIFIC BREEDERS FUTURITY No. 6 will close December 4th for the nomination of mares bred this year. Again this popular stake is announced to have a guaranteed value of \$7000, and again it should receive a long list of nominations. Secretary Kelley of the Pacific Coast Trotting Horse Breeders' Association has been sending out blanks this week to all those residents of this Coast who within his knowledge bred mares to trotting or pacing bred stallions this year, and will mail them on application to any who have not received them. This futurity has done and is doing much to encourage the breeding of good horses on this Coast and should have the support of every breeder and stallion owner. The men who own stallions should especially be the ones who should lend their assistance in securing entries to the stake. Every stallion owner should take a pride in having his horse represented in the list of foals entered in this stake, and should do what he can toward securing the nomination of mares bred this year to his horse. The more foals entered, the greater the chances of one of them winning. As the owner of the sire of the winner is paid \$100 out of the stake, there is an additional inducement for stallion owners to see that their horse is represented. That entering in colt stakes is a paying proposition for all breeders and owners whether their colts win or not is admitted by all. Stakes enhance the value of horses entered in them and create more interest in breeding than any other one thing. The Breeders' Futurity, the Occident and the Stanford stakes are worth more to the stallion owners of the Pacific Coast than the majority of them imagine, and should these stakes be discontinued, the falling off of stallion patronage would be greater than most owners imagine. We hope every person who has bred a trotting or pacing mare to a standard bred stallion this year will see that it is to his advantage to nominate the mare in this stake. It is guaranteed to be worth \$7000, but it can by liberal patronage be increased to \$10,000. Read the advertisement in this issue for the conditions of this rich stake.

CONEY ISLAND JOCKEY CLUB STAKES for the meetings of 1906, 1907 and 1908 will close on Wednesday next, Nov. 15th, with the Clerk of the Course, at 571 Fifth Avenue, New York. The stakes are as follows: For the June meeting, 1906, the Foam, \$2500 added for two-year-olds at five furlongs; the Surf, \$2500 added, for two-year-olds, at five and a half furlongs. For the June meeting, 1907, the Tidal, \$20,000, for three-year-olds, at one mile and a quarter; the Mermaid, \$3000 added, for three-year-old fillies, at one mile and a furlong; the Lawrence Realization, \$10,000 added, estimated value \$40,000, for three-year-olds, at one mile and five furlongs. For the Autumn meeting of 1907 the Great Filly Stakes, \$5000 added, estimated value \$20,000, for two-year-old fillies, at six furlong; the Century, \$20,000, for three-year-olds and upwards, at one mile and a half. For the Autumn meeting of 1906, the Annual Champion, \$20,000, for three-year-olds and upwards, two miles and a quarter. For the June meeting 1908, the Lawrence Realization, \$10,000 added, estimated value \$40,000, for three-year-olds, one mile and five furlongs. The Coney Island Jockey Club's race course is at Sheephead Bay, New York, and is one of the grandest race courses in the world. The full conditions of these stakes will be found in our advertising columns to-day, and should be read by every owner and breeder of thoroughbreds.

GREAT REJOICING AMONG HORSEMEN doubtless followed the defeat of Governor Herriek for re-

election in Ohio last Tuesday. Herriek is the man who promised to sign a bill permitting harness racing to be held with betting in the Buckeye State, but who went back on the promise and vetoed the bill after it had been almost unanimously passed by the State Legislature. The Cleveland meeting, which had always been one of the largest and best on the Grand Circuit, was held without betting last year, with a resulting loss of thousands of dollars, and was declared off this year when it was found that Tom Johnston, Mayor of the city, said that he would be compelled to enforce the law prohibiting betting. That the horsemen did not hold Mr. Johnston to blame for enforcing the law is shown by the fact that he was re-elected Mayor on Tuesday, while Governor Herriek ran thousands of votes behind his ticket in Cleveland and in other parts of the State. The horsemen of Ohio, finding they could not get justice from Governor Herriek, simply united against him and their power is told by the vote. It is a lesson to horsemen elsewhere to unite and act when their rights are taken away from them. They are numerous enough to be a power in the land.

THE CHRISTMAS EDITION of this journal, which will be issued December 23d, will be something different from the majority of previous holiday issues. The special articles prepared for it by writers of extended reputation will be more numerous than ever, while the statistical matter will be found unusually extensive and complete. The cover page will be an original and handsome design and great effort and care will be expended in making the edition one of the best holiday numbers issued by any weekly journal on the Coast. Advertisers who desire space in its columns should apply early, as the space given to advertisers will be limited this year.

The Horseman: Chicago's recent horse show again illustrated the fact that breeders of the trotter do not take any great amount of interest in such events. That is, they do not go to the trouble of entering and showing their horses in the classes reserved for them. The result was, as in former years, that few horses were shown in the distinctively trotting classes. Miss Wilks, who is engaged in establishing a breeding farm at Galt, Ontario, and Will J. Davis of Chicago were two exceptions to the rule. In the roadster classes Miss Wilks made a clean series of victories with Rhea W. and Easter Belle, these two being shown both single and double, practically every day of the show. These, however, were not samples of horses of her own raising, but were show horses pure and simple. Mr. Davis in Strangeville had a handsome horse of his own breeding which has been a successful blue ribbon hunter at the matinees this season. There are scores of stock farms of easy access from Chicago and yet the owners of these did not trouble themselves to advertise their stock at this fashionable exhibit. Because of this attitude of the breeders for a series of years the managers of the horse shows, not only in Chicago but in other horse show centers, these exhibitions are becoming more and more merely shows. The horse is seen in his high estate but it is that of the horse in the city and not on his native heath. The American trotter is very much in evidence, but oftentimes he is so changed that none but an astute admirer of the breeder is able to penetrate his disguise. With fancy mane, tail docked, and mannered in high stepping he is oft confounded with the hackney and the latter sometimes profits at the expense of his cousin. There are no indications that these exhibitions are to become less of a show and more of a breeders' exhibition, and such being the case it behooves the friends of the trotter that they insist on the pedigrees of all horses being properly catalogued. Then the casual attendant of such shows would be able to distinguish between the trotter and the other breeds supposedly more adapted to the show ring, but which seldom prove their worth in competition. The breeder allows the dealer to do his showing for him, but he should insist that the latter so label his exhibits that a portion of the honor and the glory be shared by the breeder who made such things possible.

HARNESS RACING IN MONTANA.

The meeting and banquet of the Butte Driving Club, held at the Butte Hotel on the evening of October 26th, was one of the most successful and enthusiastic gatherings of horsemen ever held in the State says Stockman and Farmer. Covers were laid for sixty people and outside of four guests all in attendance were members of the Butte Club. The past season in Butte has been very satisfactory to the horsemen of that city. There has been more and better matinee racing than was ever held in Montana before and it has aroused enthusiasm in behalf of the light harness horse that will result in the purchase of new blood by Butte rangemen.

The guests of the evening were Senator Hoffman of Bozeman; W. B. George of Billings; J. W. Pace, Secretary of the State Fair, and Harry Lane of the Belmont Stock Farm.

It was decided that for matinee purposes a half-mile track was preferable and \$10,000 was subscribed at the meeting for the building of such a track. W. A. Clark, Jr., president of the Butte Driving Club, headed the subscription list generously and has promised a site for the half-mile track.

The building of a half-mile track in no way interferes with the racing on the old Daly grounds, as the new track will be club property and will be used strictly for the matinee of the club members. The Butte Driving Club will send a representative to the meeting of the Secretaries to be held in Helena in December for the formation of a Montana circuit and will do what it can to promote racing in this State.

OAK PARK DRIVING CLUB.

The second matinee of the Oak Park Driving Club was held at the New Agricultural Park, Sacramento, October 28th, and drew a good crowd. The day was ideal and the track in fairly good condition for a new track.

Two trotting races and a half-mile running race was the card for the afternoon's sport.

The first was a four-minute trot best two in three and was won by Clarence Crouch's Maud in straight heats, best time 3:12.

The next race was the 2:40 trot with three entries; this race went to Bess W., also in straight heats, best time 2:47, last half in 1:20.

The entries for the gallop were Ed Haley's O'Meaga and Lady Reed, owned by H. Cowell. The flag fell to a good start; Lady Reed forging to the front, hugged the pole and won out in 52 seconds, O'Meaga the one-time \$10,000 two-year-old coming in a poor second.

Summary: First Race—Maud (Crouch) 1-1, Twinkle (Raynsford) 2-2, Trilby (Smith) 3-3. Time 3:15, 3:12.

Second Race—Bess W. (White) 1-1, Prince L. (Lewis) 2-3, Fannie (Brown) 3-2. Time, 3:00, 2:47.

DRIVERS WHO WON \$1000.

The Grand Circuit of 1905, which does not include the Lexington meeting, resulted in just fifty drivers winning \$1000 or more. Ed Geers, as has become a habit with him, leads the list. His winnings amount to \$34,054. Chas. DeRyder, although not having a stake horse in his stable, stands eighth on the list with over \$12,000 to his credit. The list of drivers who won \$1000 or over is as follows:

Geers \$34,054, L. McDonald \$26,035, A. Thomas \$16,708, Murphy \$15,681, Stinson \$15,390, Ames \$13,539, Dickerson \$12,916, De Ryder \$12,562, Gerrity \$12,075, McCarthy \$11,059, Snow \$10,800, Andrews \$10,625, James \$7,334, Benyon \$6,897, G. Saunders \$6,715, Rose-mire \$6,520, A. P. McDonald \$5,635, Clark \$5,201, Brady \$4,645, Patterson \$4,050, Cox \$3,950, Hogan \$3,682, Walker \$3,525, McEwen \$3,490, Grubb \$3,375, Chandler \$3,350, McMahon \$3,182, Dodge \$3,150, Curry \$2,935, Rutherford \$2,650, Nuckols \$2,550, Demarest \$2,450, Allen \$2,445, McCargo, \$2,245, Bowerman \$2,200, Childs \$2,025, Franks \$1,805, McDavitt \$1,635, Tyson \$1,625, Gaghan \$1,500, Flack \$1,475, D. McDonald \$1,405, Wickersham \$1,400, Laird \$1,220, Valentine \$1,175, W. B. McDonald \$1,100, Jolly \$1,040, Lyon \$1,030, Freeman \$1,000, Estes \$1,000.

MEMPHIS TRACK NOT TO BE SOLD.

It is gratifying to every man identified with trotting to receive the assurance that the stories recently given to the public to the effect that the experiment of light harness racing a Memphis, Tenn., was to be abandoned on account of legislation adverse to pool selling, and the beautiful course at Billings Park cut up into building lots, emanated from a wholly irresponsible source and have not the slightest foundation in fact. The short but eventful history of the Memphis track abounds with so much of brilliant speed achievement, and records the reduction of so many important world's records, that its interruption for a single season was everywhere hailed with regret, and its permanent extinction would be regarded as an irreparable loss to the sport. The recurrence of the exigency which prompted the abandonment of the Memphis meeting this season is not likely to be witnessed in many years, while the statutory interdiction of pool selling in the state is not contemplated with serious discomposure. The extravagant stories concerning President F. G. Jones' retirement from harness racing, and his purpose to sell all his horses on account of his dissatisfaction with the sport, proves also to be not merely exaggerations but absolutely canards, as Mr. Jones has withdrawn the few horses that he had decided to sell for purely commercial reasons and will proceed to make his stable even stronger next season.—Trotter and Paer.

The Rural Spirit says: E. B. Tongue, of Hillsboro, Oregon, and Thos. H. Brents, of Walla Walla, Wash., have brought suit in the circuit court against the State Board of Agricultural to compel them to pay added money in a race competed for at the Oregon State Fair in 1904. One of the conditions in the stake reserved the right to declare less than three starters a walk-over. There were only two starters in the race and the board refused to pay the added money under the advertised conditions. The plaintiffs claim that because the judges did not declare from the housetops that no added money would be given they are entitled to it. This case with all the evidence was taken before the Board of Appeals of the National Trotting Association, of which the State Fair Board is a member, and was decided against Tongue and Brents, and they now seek to recover in the civil court. Both these gentlemen are able lawyers, but we think they have overlooked rule 2 section 6 of the National Trotting Association, which reads as follows: "Every entry shall constitute an agreement that the person making it, the owner, rider, driver and horse shall be subject to these rules, regulations and by-laws, and will submit all disputes and questions arising out of such entry to the authority and judgment of this association, whose decision shall be final."

JOTTINGS.

CHARLES DERYDER was a caller at the office of the Breeder and Sportsman last Saturday, and reports that he is settled at the Pleasanton track, where he has opened a public training stable, and has the old champion Star Pointer in the stud. Mr. De Ryder says that he expects Monroe Salisbury to arrive soon with about twenty head of the Butler horses, which are to be trained on the Pleasanton track. He does not know who will be the trainer for Mr. Butler, as the latter had not engaged a trainer when De Ryder left for California. Although through accidents and other causes the Butler string did not make quite as good a showing this year as was expected, yet the horses driven by Mr. De Ryder won over \$12,000 on the Grand Circuit alone, and the two horses that Gil Curry took to the Great Western Circuit won a large sum additional. De Ryder says he expected Consuello S. 2:07½ and Izetta 2:13½ to be the principal money getters of the string when he started east, but both went wrong and were out of it. The little mare Mamie R. 2:15½ that Mannie Reams sold to Mr. Butler, he considers a great mare. She was taken sick and was not able to make much of a showing, but in Mr. De Ryder's opinion she should beat 2:10 three times in a race next year, as she is not only a very fast mare, but game.

In bringing Star Pointer to California Mr. De Ryder selected a horse that he felt would be appreciated by the breeders here, and from the letters he is already receiving it is evident that he judged the desires of the breeders about right. "The demand," said he, "is for fast pacers that can go the route, and this is the quality the famous Hal family possesses." Star Pointer was the first horse to beat two minutes, and when he paced a mile in 1:59¼, at Readville in 1897, without the aid of a runner in front, he set a mark that no stallion has yet been able to lower. Dan Patch himself has taken two whacks at this record and has only succeeded in equalling it, although with the aid of the runner in front he has paced a mile in 1:55½. Star Pointer is full of thoroughbred blood, and that is where he gets his wonderful endurance and ability to carry his speed to the end of the mile. "He is the only horse," said Mr. De Ryder, "that I ever saw pace a mile in two minutes and come home on the bit." In all other record performances where the time has been in two minutes or better, there has usually been much shouting and urging to encourage the horse to finish the last quarter and keep trying until the wire was reached, but old Star Pointer finished his record miles with the bit in his teeth and not all out. In that he is the most wonderful horse that ever wore harness. Star Pointer's fee will be \$100 for the season with the usual return privileges. Mr. De Ryder has a lease on him for two years, with the privilege of five. Mares will be received at any time, and a few have already been bred.

We have several families in California that take to the pacing gait like a duck to water. The Direct family holds the world's record for a two year old pacer with Directly 2:07½, and Direct's granddaughter Bonaleet 2:09¼ shares with Little Squaw the champion three year old record for fillies. Steinway's son Klatawah 2:05½ is the champion three-year-old pacer, and the Steinway family is largely represented in the 2:10 list. Yolo Maid 2:12 by Alex Button was once a champion, Gold Leaf 2:11 and several others by Sidney held world's records. Flying Jib 2:04 by Algona carried the champion banner. Anaconda 2:01½ by Knight was also in the list. There is plenty of blood that paces in California and good mares of any of our leading California families that have shown an inclination to pace should nick well with Star Pointer, who should be able to sire a future champion right here on the soil of the golden State.

"You can tell the boys that 'the only trotter' is at the Santa Rosa track," said Joe Cuicello, the well known trainer, while in the office of this paper last Monday. "His name is Charley Belden and he belongs to the veteran Mart Rollins. You have had an item or two in the Breeder about him. He is that bay gelding by Lynwood W. out of a Silas Skinner mare. Mart named him Charley Belden after his friend, the senior member of the harness firm of Belden & Hehir of Santa Rosa, whose place of business is horsemen's headquarters. Rollins asked me to drive him a mile last Saturday. They had a couple of alleged runners at the track to carry him along, but the first one quit after a quarter of a mile and the second one was not in condition for the last half, so the trotter had to virtually go it alone. The wind was blowing a hurricane almost, but the gelding trotted the mile in 2:13¼ and did it nicely. I think I could drive him in 2:10 almost any day when the weather was good."

Mr. Cuicello is very enthusiastic over Mr. Rollins' trotter and believes the gelding would do to campaign on any circuit east or west, as he shows every sign of being one of those all day trotters that would not be bothered about the three in five or any old system that causes races to be long drawn out. He would be there the last heat as well as the first and would only be beaten by a faster horse.

Cuicello tells me he has just taken up seven weanlings owned by Mr. James Coffin of San Francisco, all by that gentleman's young stallion Cassian, that he purchased as a two year old at a Palo Alto sale in 1903. Cassian it will be remembered was the highest priced colt of the sale, fetching \$1300. He is a fine looking horse now and is a choicely bred stallion to put onto Wilkes mares, as he is by Mendocino 2:19½, son of Electioneer, out of Cressida 2:18¾, by Palo Alto 2:08¾, another son of Electioneer, next dam a

great producing mare by Abdallah Star, and next dam by Hambletonian 10. There is not a drop of Wilkes blood in his veins, and when one considers the great success the Electioneer-Wilkes cross has achieved, Cassian should certainly attract the attention of breeders who have mares that are strong in Wilkes blood. He is a fine individual and a fast, natural trotter. The seven weanlings by Cassian will class so far as looks are concerned with a similar number by any sire. They are all nicely made, even, round little fellows, and after being handled and gentled during the winter will be given a few lessons in harness next spring to see if they have inherited any of the speed which their breeding entitles them to possess.

Cuicello worked the pacer Ringrose by Falrose a mile in 2:13¾ last Saturday. Here is a bay gelding, a good looker, with speed enough to show a quarter in 30 seconds, that would make an ideal road horse. Joe offered him for sale, but says he made the mistake of putting too low a price on him. Two or three different persons looked at him, and seemed to like him, but when the price was stated, began to ask all sorts of questions as to what ailed him. Ringrose is sound and all right, and Cuicello thinks he would have sold him some time ago had he made the price just twice as much as he advertised him for.

Mr. Coffin bred three mares to Zolock 2:05¼ this year, including the dam of Coney 2:02, and two or three to Kinney Lou 2:07¾. As all his mares were selected for their breeding, speed and individuality he should have some very choice youngsters by these two sons of the great McKinney.

The people who bred mares to Tom James' good horse Barondale 2:11¼ when he was in California will be pleased to hear that the son of Baron Wilkes is making a record for himself as a sire. He put six new standard performers into the list this year, and five of these records were made on half mile tracks. In addition two of his get reduced their records, both on tracks but a half mile in circumference. Those that took new records are: Garfield Maid 2:15½, Allanadale 2:17¾, Hal Baron 2:22¼, Fashoda 2:24¾, Ima Barondale 2:24¼, and Ellendale 2:19¼. Those reducing their records were Barondale from 2:25¼ to 2:22¼, and Ima Barondale from 2:15¼ to 2:14¼. This is a mighty good showing and will do much to call the attention of breeders to Barondale who, however, is already a very popular horse in Iowa.

SANTA ANA ENTRIES.

(Meeting Nov. 15th, 16th and 17th.)

2:12 Class, Pacing. \$600.

El Diablo, ch. g., Thompson & Wilson.
Richard B., br. h., Sears & Clark.
Albata, b. g., J. C. Kirkpatrick.
Prince Charles, ch. g., E. E. Smith.
Lady R., b. m., M. B. Sweeney.
Byron Lace, br. s., E. B. Tongue.
Glenn, ch. g., Geo. A. Pounder.
Oma A., b. m., S. S. Bailey.
Mistake, br. g., S. E. Kent.
Hattie Croner, b. m., I. H. Lichtenstein.
Vinnie Mann, b. m., H. M. Houser.

2:14 Class, Trotting. \$600.

R. Ambush (formerly Ambush), br. h., Bonnell & Prescott.

Wild Bell, br. g., F. J. Ruhstaller.
Lady Madison, b. m., F. E. Ward.
Electric Maiden, b. m., W. A. Clark, Jr.
Rozell, gr. g., J. H. Reynolds.
Red Skin, ch. g., S. S. Bailey.
Cuate, b. g., Chas. Durfee.
Bellemont, b. m., W. G. Durfee.
The Commonwealth, b. h., N. K. West.

2:20 Class, Trotting. \$600.

Edmond S., b. g., Wm. Morgan.
Burnut, b. g., Geo. W. Ford.
Judge, b. g., J. C. Kirkpatrick.
Homeway, b. g., Geo. Lindaur.
Bonita, br. m., L. F. Clapp.

Directum 2:05¼ is now a grandsire of standard speed. Two of his sons appear in the list of 2:30 sires this season for the first time.

SOME OBSERVATIONS.

I saw in an Eastern paper that the two-year-old filly by McKinney, dam Our Lady by Nearest, is considered about as fine a specimen of two-year-old horseflesh as her admirers ever saw. She doubtless will prove another illustration of the "happy nick" resulting from the McKinney-Nutwood Wilkes cross. What is a "happy nick"? It is the nick that produces happy results and the surest way to get happy results is in the union of the blood of two or more great sires through their best representatives, and the oftener the names of great sires appear in a pedigree the greater the certainty of a "happy nick." California was never so well supplied with the blood of great race horse sires as at present. There will very soon be available the blood of two of the greatest harness racing stallions that ever blessed the Golden State—Searchlight 2:03¼ and Lecco 2:09¾—and when their blood is united with the blood of the great race horses and sires of races McKinney and Director through their great sons, Kinney Lou, Zolock, Zombro, Direct and Directum, and that backed up by the blood of Guy Wilkes, Electioneer, Nutwood and Steinway, no man can doubt that the "happy nick" will occur oftener than ever before and that California will not only continue to lead all other states but assume a greater lead than ever in the production of winning trotters and pacers.

T. W. Barstow of San Jose is the happy owner of another "happy nick" in a two-year-old colt, artificially sired by McKinney out of a mare by the brother to the great John A. McKerron 2:04½, that is a large fine looking bay colt now two years old, of which my friend Barstow is so enthusiastic over that when talking to me about him I suggested that as a precaution he get an iron band fitted into his hat and to take the hat off only at night. He said:

"He's the greatest trotter, sir, I ever saw, and you don't have to take my word for it, sir. Everyone on the race track will tell you they never saw one like him; even the 'knockers' have to admit it."

This I found was true and Theodore has without any doubt got an unusually bright prospect. Even the always conservative Budd Doble said: "He is a great colt."

At the Oakwood Park Stock Farm sale held in San Francisco last spring, Joe Spaulding, brother-in-law of Jack Phippen, and his partner in the livery business in Mayfield, purchased for \$110 a three-year-old chestnut gelding by Owyhee 2:11, dam Prosperina by Diablo 2:09¼, second by Allendorf, son of Onward and Alma Mater, third dam by Mambrino King, fourth dam by Blue Bell 75. He was slightly thin and skinny at the time. Joe has jogged him on the road since and he has improved in condition and developed into a strong racy looking colt. Last week he entered Jack Phippen's training school at San Jose and upon the next day after his arrival there trotted a quarter in 41 seconds under a strong pull and "Jack" saying "Whoa, hoy!" all the way through the stretch. Mr. Phippen says that since the days when he first handled the wonderful filly Sunol he has not driven such a precocious young trotter. He is another "happy nick" and an inbred one. He carries the blood of Owyhee, Diablo, Chas. Derby (twice), Steinway, Strathmore, Ateantara, Onward, Geo. Wilkes (three times), Electioneer (twice), Mambrino King and the great Blue Bull, the blood of the great dam Bertha, dam of seven, Alma Mater dam of eight (twice), Green Mountain Maid, dam of nine (twice), Katy G., dam of six (twice), and others. He's better gaited than Lou Dillon and on breeding ought to beat the Queen. There are lots of them that ought to do that, but they don't.

One that goes like the making of an extremely fast trotter is a beautiful black three-year-old filly in Honest John Gordon's stable at San Jose. Her gait is the "poetry of motion," and while not just the same as Sonoma Girl's, the best gaited trotter to my mind I ever saw, it is similar and just as pleasing to look at. She is by Mr. Gordon's stallion, Silver Arrow, son of Silver Bow, and Lady Weeks, dam of that lamented black mare Ethel Downs 2:10, by the great Nutwood. Her dam is by Richard's Elector, son of Electioneer. She came into Mr. Gordon's hands scarcely broken, and with her first set of shoes on trotted a mile in 2:35. Mr. Gordon told me that he believes she could have stepped in 2:30 had he asked her to and he believed it or he wouldn't have said it. Here's hoping she beats 2:10.

Mr. Dohle has a lovely two-year-old filly which in gait, breeding and beauty is hard to improve on. She is by the champion brood mare Beautiful Bell's youngest son, Monbells 2:23½, her dam is Idle May 2:24½ granddam of Memonio (three years 2:14, second in 2:11½), sister of Wild May 2:30, dam of L. 96 2:16½ by Electioneer, second dam May, dam of two and dam of "Little Joe," a pacer, that, had he not been spoiled and made erratic by the "hurry up process" would have made a phenomenal side wheeler and I believe a do-or-die race horse. His speed was intense, a half in a minute just like breaking sticks; third dam the great Mayflower dam of two world's champion trotters and eight producing daughters.

Kinney Lou 2:07¾ has enjoyed a very successful season in the stud and is now in fine shape. Mr. Doble is giving him stiff slow work and will winter him with the view of having him ready to take East next summer if he should conclude to do so. He is not satisfied to permanently retire the greatest son of the illustrious McKinney without giving him a chance of acquiring a record somewhere, near his capacity, which is in the immediate neighborhood of the world's stallion record. It is not generally known that this great trotter was not a well horse at any time during the season of 1903 when he made his memorable campaign winning over \$11,000 and ob-

taining his present record. During that racing season his temperature was never less than 101 and often hovered around 104, which means that he was nothing if not a sick horse. Yet how he raced. His victories are still fresh in our minds but we did not then fully appreciate them as we did not know they were the victories of a sick horse over the best trotters in his class in America. That he possesses extreme speed is known by the fact that he has repeatedly stepped quarters at the last end of a fast mile in 29 seconds. What kind of a field of trotters would it take to get the decision over him when well and fit? In the opinion of his owner and others, better than he has yet met on the race track. Will he make a great sire? Beyond any possible chance of a doubt the answer is: He will. He possesses all the necessary qualifications a great sire must have—not part of them, but all of them. He lacks nothing. Lacking nothing, there is no chance to fail, only from lack of opportunity, which misfortune often befalls some really great horses and they live and die in obscurity. But this can never be the lot of the greatest son of the greatest sire.

C. C. C.

OTHER PEOPLE'S OPINIONS.

Dr. A. S. Alexander. There has been general lack of these principles in our breeding operations, as there has in every state where imported animals have been employed. Our farmers have attempted to improve their horses by grading up, by which is meant, mating with pure-bred stallions until the blood of these sires shall have predominated over that of the native stock and stamped the characteristics of the pure breed upon the resultant progeny. Every step taken in this direction has been well intended and the results would have been highly satisfactory had the breeders continued to breed on and up by successive top-crossing with sires of the same breed. Five or more of such top-crossings are required to obliterate the native blood in the combination and, in fact, constitute practical purity of blood, according to the requirements of some of the stud books. But breeders here, as elsewhere, have followed no concerted plan in their grading up operations. They have commenced right, but gone wrong shortly, by mating the female progeny with horses of another pure breed—one different from the first used, yet possibly of as good type and character. All sorts of crosses have been made in this way, the result being that most of our horses are of mixed breeding and many of them mere mongrels and misfits. Out of this heterogeneous collection of nonentities are a few phenomenally good individuals. Where all of the requisites for perfect development of frame and body exist it may be taken for granted that vim, vigor, hardy constitution and "staying powers" will be the natural legacy of the horses there bred, provided the climate is not innervating.

While fine individual animals are sometimes produced by mixed breeding or cross breeding, there is nothing definite about such mating methods and the progeny is much more apt to be nondescript than above average. The only certain method of raising the general average of our horses as regards type, quality, character, action and specific utility must come from persistent breeding to sires of the same breed until the blood of that breed has wholly obliterated the impure, or native, blood derived from the mares originally used. Where this is done the resultant progeny will be pure in blood, to all intents and purposes and, to the same extent, true in every character and quality of the pure breed employed. Naturally, then, we should find among these animals, graded up to practical purity of blood, general excellence of form, quality, action and utility, such as characterizes the breed used in the work of improvement, and such is the case, as a general result, wherever this course has been pursued. To make our argument more clear let it be said that if the owner of a brood mare, or number of mares, of selected type, but of native or mixed blood, starts to grade up by mating them with a pure-bred Percheron stallion, that breed should be used right along, year after year, until all of the native or mixed blood has been overcome and obliterated by the Percheron blood. This is to be done by castrating and selling all of the male progeny and weeding out all poor individuals of the female progeny; then mating the selected grade fillies each time with Percheron stallions. As already stated, at least five top-crosses of pure Percheron blood must be used in this way to obtain practically pure-bred Percheron stock from a scrub or mixed breed foundation, and when these crosses have been put on, the owner would be foolish indeed to mar it by the admixture of alien blood.

The same principle applies to whatever breed of horses is started with. That breed should be persisted with until its characteristics predominate in the blood of the entire horse stock of the farm, and if the breed commenced with was suitable for the district and the market and the horses in general were fully fed for perfect development and obtained from sound sires and dams, the resultant stock would be marketable at remunerative prices to buyers of the particular class of horses bred. During the grading up process every out cross to a sire of other blood than the one commenced with will set the entire operation back to where it started. Should a number of outcrosses be made the process is not grading up, but standing still, or retrogressing; and the stock bred will have neither definite character nor certain value. We have been using pure bred sires, to a greater or less extent, for upwards of fifty years, yet few, if any, districts have persistently used such sires in a right line until the character and quality of any one breed have become predominant and the breeding district consequently noted as a center for excellent horses of the breed chosen and, therefore, attractive to the buyer in need of that market commodity. In Wisconsin, as elsewhere, we should have many centers noted for the annual production of numbers of horses of standard

breed, quality and character, and we can in time create numerous centers of this kind by uniformity and persistency in breeding.

Horse Show Monthly: As every cloud has its silver lining so have the farmer man and the regular dealer in horses found, or soon will find, that the troubles of the race track people will work to their profit. The same thing happened in 1893, when, you probably remember, there was a great slump in the racing game as well as in other forms of business. Race horses were actually given away by owners who found the business of running them did not bring enough to pay for their keep. Others were sold for so little that not even vocal efforts were encouraged. Anybody who could buy oats could afford a thoroughbred, and he could get it without a song. Most of the horses so disposed of were of little value as runners, but they had the blood strain that is bound to tell in the last analysis. As the Barbary steeds that Pizarro and Cortez brought to the pampas of the South developed or degenerated into the tireless mustang of the prairies, so have the cast-off horses of the racing stables of something more than a decade ago been transformed into staid but indomitable work horses. The thoroughbred blood is there and it asserts itself in demonstrations of energy at the plow or in the family surrey. Many a good old family horse of this generation is sprung from a mare or a horse that knew as much about the saddle call or the starter's drum (they used a drum in those days and the barrier was unknown) as the favorites that so recently broke records at Belmont Park.

The cast-offs were bred by farmers into whose hands they fell, and the stock of the country was thereby greatly improved. There never was, and never will be a good type of horse for any purpose that has not a large infusion of thoroughbred blood, and every time there is a decrease in the value of thoroughbred horses more of that sort of blood will be disseminated among the horses of the common people, and for the use of men who want horses that can do things, and will do or die.

The United States Government recognizes the value of the thoroughbred as a cavalry horse, though the agents of the government do not generally admit it, and some of them do not even know that they know. This last class only know that they want a typical cavalry horse, and that such a horse is being bred slowly but surely. They do not connect the filling of the want they recognize with the apparent, and possibly temporary passing of the horse as a gambling machine. The men who are breeding the ideal cavalry horse are utilizing the thoroughbred. They are breeding race mares of divers sorts to thoroughbred stallions that have been slanted out of the racing stables. With that sort of sires and dams nearly any sort of desirable horse can be produced, and finally there will be developed a sire of such prepotency as to found a new type. It was thus that the celebrated Morgan horse was evolved. It is the same with the French coach horse, and the American roadster. In every recognized type of superior horse flesh there is necessarily a strong foundation of thoroughbred blood, of the blood that made the coursers of Saladin famous, and the same blood that has made the English bred racer the conqueror of the world.

Up in Missouri on the prairies where the eye can reach for ten or twelve miles, and the land is so flat that it is "dished," there are horses that can drag a heavy buggy and two heavy people fifty miles in six hours and do it again next day, then run away and break up the wagon if a fool gets hold of the lines and they realize that he is a fool. These horses are nearly full thoroughbred, but they are trained to trot, and never run unless the fool, heretofore referred to, gets behind them. Their descendants will forget even that much of the instinct of the thoroughbred to use the gait that covers the most ground in the shortest time.

Down in Arkansas an elderly gentleman with long whiskers, named Rice, has crossed his country bred mares with thoroughbred stallions, and permitted the progeny to get their own living in the cane brakes. The result is that he has twenty or thirty hunting ponies that could be sold for thousands of dollars each if they were put on the market for polo players. They are small but capable of carrying a two-hundred pound man a hundred miles in fifteen hours, or dashing off a quarter in 25 seconds. It is the thoroughbred blood that gives them their speed and their endurance.

So let me tell you again the more thoroughbreds that are turned over to men who will mingle their blood with the colder strains of the common every day horse the better for the horse owner generally, and particularly for the man who wants a show horse. When you see a good show horse you can go and bet your overcoat just before a blizzard that he has a liberal dash of thoroughbred blood in him. If he hasn't he isn't much of a show, and he is less of a horse. Always remember, however, that types of horses are created and may become so nearly permanent that the thoroughbred origin is forgotten, but it is always there.

Forty years ago the old champion Dexter set a world's record of two miles to wagon of 4:56¼, a record that has since stood until the first of this month, when the bay gelding Ed. Bryan 2:22½ by Little Corporal won a heat at Belmont Park track in 4:45. As Dexter's two miles were made when hitched to the old fashioned high wheel road wagon, while Ed Bryan pulled an up-to-date pneumatic tired racing wagon, the two records cannot be well compared. There are many horses that can lower this record if driven for it, as two miles at the rate of 2:22½ is not considered fast trotting nowadays. Cresceus holds the world's two-mile record to sulky of 4:17, the last mile of which was in 2:06½.

NOTES AND NEWS.

Star Pointer's fee will be \$100.

The Southern California circuit opened at San Bernardino on Thursday of this week.

Al. McDonald has quite a string of horses in training at Pleasanton, and expects to have the best string of horses on the circuit next year that he ever campaigned. McDonald had one of the best winning stables out this year.

About all the stall room at Pleasanton has been engaged. Winter training tracks need not lack patronage if kept in order. The new inside track at Santa Rosa Stock Farm, which was built especially for winter work, is one of the best ever constructed. Santa Rosa should become one of the great training centers in California.

James Butler, proprietor of East View Farm, has consigned to the "Old Glory" sale the following horses from his racing stable: King Direct 2:05½, Direct View 2:08¾, Ben F. 2:07¾, Josie 2:08¾, Princess Athel 2:14 and Minter 2:14¾.

Joe Goss of Pleasanton has recently purchased a gelding by Sidmore that is showing enough speed at the pace to warrant being trained for the circuit next year.

It is rumored that Millard Sanders may return to Pleasanton this winter with a string of horses to train for the Grand Circuit of 1906.

About as good an investment as can be made is a McKinney filly. Any breeder who can secure one at a reasonable figure will invest his money to good advantage. Mr. R. P. M. Greeley of Oakland advertises one for sale in this issue that should be "oil in the can" to any breeder, and one worth taking a chance on as a race mare as she has worked quarters in 35 seconds right handily with little or no training. She is out of that fast mare Winnie Wilkes 2:17¾ that has had but two or three foals and all fast. A daughter by Diablo can trot a two minute gait. This McKinney filly is a very fine looking and worth more than Mr. Greeley asks for her.

The Montana Stockman and Farmer has inaugurated a futurity on the same plan as the Pacific Breeders' Futurity. It has a value of \$5000, and is open to mares bred next year in Montana, Oregon, Washington, Idaho, Utah or British Columbia. Entries are to close November 1st, 1906.

J. M. Alviso of Pleasanton, who has owned and driven several with fast records, is devoting his spare time these days to a two-year-old by Stam B. that he thinks will be the fastest horse he ever drove.

Had the California circuit been longer this year the list of new 2:15 performers would have been larger. Quite a number of good green trotters and pacers were kept at home because the meetings were so few.

Ed Parker is training several Rex Direct youngsters at Pleasanton for Geo. Davis that look like "the goods."

Getaway 2:12¾ was not outside the money this year. The son of Strathway goes to the Chicago Horse Sale, December 11th.

Manager H., the yearling that lowered the pacing record for his age to 2:20 two weeks ago was hitched to a McMurray sulky when he did it. The Kenney Manufacturing Company, at 531 Valencia street, is State agent for these sulkies, and have a new stock of the latest models on hand.

Dr. G. W. Stimson, recently of Fresno, who has been a practicing veterinary on this Coast for a number of years, is now located at Detroit, Michigan. He took his stallions, Kohlan King by Simmocolon, and Kohlan Prince by Kohlan King, with him, and will place them in the stud there.

Mr. J. G. Sherman of Lake Geneva, Illinois, is the owner of the stallion Hazel Patch 2:02¾, and the horse is driven by Mr. Sherman's son. Father and son will winter at Los Angeles.

The two fastest of the new 2:10 trotters, Admiral Dewey 2:04¾ and Sadie Mac 2:06¾, were both bred by the late J. Malcolm Forbes.

Chas. A. Durfee has sold his filly Aunt Joe by Iran Alto, dam Rose McKinney, dam of Almaden 2:22¾, as a two-year-old. The buyer is Mr. T. W. Barstow of San Jose, who intends to keep this very promising filly paid up in all the stakes in which she is entered and to race her. She is a foal of 1904.

There is a two-year-old filly in Indiana that is credited with a trial of 2:10¾ pacing, a half in 1:00 and a quarter in 27½ seconds. This remarkable filly was bred and is owned by John T. Manlove of Milton, Indiana. She was sired by Hal Dillard 2:04¾ and her dam is Gussie B., a mare with no record, but very fast, that had a leg broken when young and was never trained. Gussie B. was sired by Gambetta Wilkes, a stallion which, with one exception, has sired more standard pacing performers than any other horse. Her second dam is by Harry B., and he by Blue Bull 75, consequently the filly is a Hal and Wilkes filly with Blue Bull for an outcross.

Get your orders for stallion cards in by the first of the year. The new records will all be compiled then and the sooner you get your horse advertised the better. It pays to keep in the lead in any kind of a race. The Breeder and Sportsman is prepared to get out these cards on short notice.

Read the advertisement of the Horseman's Handbook, for sale at this office. This is one of the most useful books a horseman can own.

Sphinx 2:20½ is the sire of sixty-six trotters and forty-four pacers, a total of 110 standard performers. Norval 2:14¾ is now credited with seventy-three trotters and twenty-three pacers that have made records in standard time, a total of ninety-six. Chimes is the sire of fifty-five trotters and thirty pacers in the standard list, a total of eighty-five. These are the leading sons of Electioneer as sires.

A dispatch to the daily press announces the death of Mr. Dan A. Messner Jr., Oxford, Ind. Mr. Messner was known as the breeder of Dan Patch 1:55¾.

Axtell (3) 2:12 occupies a conspicuous place among the leading sires of new standard performers of the season just closed. He is now credited with ninety-three trotters and twelve pacers that have made records in standard time.

Prominent American and English horsemen identified with the National Horse Show Association, are considering the project of an international exhibition in England next year. Among the prime movers in the enterprise are James T. Hyde, the man who brought the National into existence; Richard F. Carman, one of the largest stockholders in the association, and F. V. Gooch, the English dealer who has judged saddle horses at the National for several years past. Their present plans contemplate a big exhibition on the lines of the National in London in May, under management of Mr. Hyde. Much encouragement is being given to the project by prominent exhibitors who have been invited to join in exploiting American horses abroad by shipping their stables across the transatlantic ferry for this show. It is said that several leading American owners have given assurance that they will take their horses over if the exhibition is held. A final decision in the matter will probably be reached at the November show at Madison Square Garden.

Among the recent purchases of W. A. Clark Jr. is a two-year-old colt by Liberty Chimes, dam Miss Isadore by Pamlico 2:10.

It is reported that the Spokane Fair came out about \$13,000 ahead this year.

In an exhibition mile paced by Dan Patch at Memphis, November 3d, the champion pacer equaled the world's record without a wind shield, covering the distance in 1:59¾. This record has been held by Star Pointer for a number of years. The quarter was passed in 0:30, the half was reached in 0:59½ and the three-quarter pole in 1:29.

One of the handsomest youngsters at Oakwood Park Stock Farm this year is a colt by Stam B. 2:11¾, out of Electway, sister to Chas. Derby 2:20, Klatawah 2:05½ and other good ones. This colt is a perfect gaited trotter.

Mr. C. W. Wright purchased last week from O'Brien & Sons, Coast agents, a new model low seat Toomey sulky, and a pneumatic tire Toomey road cart, both of which vehicles were sent to Australia.

Mr. Ezra Thompson, a prominent road driver of Salt Lake City, and one of the solid business men of that community, was elected mayor of that city at the election held last Tuesday. A horseman is a hard man to beat at any election. Mayor Schmitz is a regular road driver, while Mr. Partridge is not. Mayor Thompson is the owner of the horse Robert I. 2:08¾ by Hambletonian Wilkes, that is being raced on the Southern California circuit this month.

Mr. H. W. Lawrence, a prominent business man of Los Angeles, and owner of that good young stallion Murray M. 2:14, winner of the Breeders' Futurity for three-year-old trotters in 1904, dropped into the Breeders' office last Wednesday on his way home from a trip East. Mr. Lawrence states that Murray M. had a big season in the stud this year, and has filled out into a fine, handsome and large four-year-old. Murray M. is by Hambletonian Wilkes out of Anna Belle by Dawn, being an own brother to the fast pacer Robert I. 2:08¾. He is a grandly bred young horse and having a three-year-old record of 2:14 as well as being a stake winner, he will be well patronized by breeders who aim to breed the best. As he closed his racing season in good shape last year, there is nothing to prevent his lowering his record to 2:10 or better next season if he is raced.

The American Sportsman of Cleveland prints the following: The boys say that the California trainer, James Thompson's car contained, besides his horses, a brindle bull dog, a Maltese cat, four game chickens, a fan-tailed white pigeon, four barrels of sour winter apples and two tons of hard coal. With all these pets and a brand-new wife, Mr. Thompson's time should be fully occupied this winter.

A trotting or pacing colt that was bred to race but is not entered in any stakes often leads a prospective buyer to believe that the breeder did not think much of him or he would have been entered. The Pacific Breeders' Futurity will close for the nomination of mares on the 4th of December.

Don't be one of those kickers who kicks himself because he owns a fast colt that has no stake entries. Enter in the stake and get the money.

Several of the young fillies to be sold at the Rose Dale Stock Farm are entered and paid up on in the Occident, Stanford and Breeders' Futurity. The auction sale is to be held next Tuesday evening at Fred H. Chase & Co.'s salesyard, 1732 Market street, this city.

Go out to Fred H. Chase & Co.'s salesyard any time between now and Tuesday evening next, the night of the sale, and look over that seven-year-old bay mare, No. 13, in the catalogue. She stands 15.3 and weighs 1050 pounds. She is by St. Whips 29,721, a son of Whips 2:27½, and is out of a mare by Daly 2:15, next dam by Milton Medium, the horse that sired Lou Dillon's dam. Here is a pretty rich combination of blood. This mare is in foal to Washington McKinney, a magnificent son of the greatest sire of 2:15 trotters. She is worth a great deal more than she will bring.

A filly that will make an ideal driving animal is a two-year-old bay by Washington McKinney out of Danville Maid by Daly 2:15, grandam by Steinway 2:25¾, that goes to the Rose Dale Stock Farm sale at Chase & Co.'s next Tuesday evening. She is broken nicely, is gentle and very attractive in appearance. She trotted a mile in 3:10 the first time hitched to a cart and is entered in the Stanford Stake for next year.

Monday, December 4th, is the day for the closing of entries for the \$7,000 Breeders' Futurity, which is for the foals of mares bred this year. Mares must be nominated on or before that date. It only costs \$2, and you have a number of chances to win.

Tuesday evening, November 21st, is the date set for the sale of young trotters from the Woodlind Stock Farm. Here is an opportunity to get good youngsters from a farm that breeds stake winners.

Bellemont 2:17¾, by Zombro 2:11, winner of the two-year-old trotting division of the Pacific Breeders' Futurity last year and of third money in the same stake this year as well as second money in the Occident Stake, is reported as trotting very fast for Will Durfee at Los Angeles. She was entirely off early in the season this year and was short of work when the racing season opened, but is now stepping like a coming champion. She trotted a mile in 2:11¾ at Los Angeles last week and finished strong.

No less than thirty-seven horses with records of 2:10 or better are consigned to the Old Glory sale. Cresceus 2:02¾ heads the list as the fastest trotter, and Sir Albert S. 2:03¾ is the fastest pacer.

Zombro 2:11 was bred to fifty-seven mares in Oregon this year, and there were many high class ones among them.

Nominate your mares, bred this year, in Pacific Breeders' Futurity No. 6, which has a guaranteed value of \$7,000.

Here is a good one on Scott Hudson. At Lexington he took a look at his former pupil Nervoio, who the week before had paced in Cincinnati in 2:03. Turning to Owner Lockwood, Scott said: "I can shoe him so that it will make about three seconds difference in his speed." The horse went to the shop and was shod as Hudson directed, with a result which made the auburn-haired Kentuckian a true prophet. The next day he raced with Hudson behind him and his fastest heat was 2:05¾.

The death of Clarence Van Bokelen, a student of the Santa Clara High School and son of the well-known horseman B. O. Van Bokelen of San Jose, occurred last week and resulted from injuries received while playing a game of football. Young Van Bokelen was a particularly bright and exemplary youth, a general favorite and his death is deeply deplored. The sympathy of their numerous friends and acquaintances among the horsemen of this coast is extended to his sorrowing parents.

Look in our advertising columns for the announcements which the leading live stock auctioneers, Fred H. Chase & Co., make of thoroughbred sales.

Nushagak and Prince Ansel are two stallions that sire speed. The young things by them which are to be sold by Fred H. Chase & Co. in this city on the evening of Tuesday, November 21st, are a very fine lot. Go to the sale and get another one like Aristio 2:08¾ that sold for \$10,000.

Nothing definite has been decided on as to whether Lou Dillon will be bred to John A. McKerron 2:04½ or not. If she is bred at all she will be bred to McKerron, but not until spring. The chances are, however, that the queen of all trotters will be bred to Mr. Devereux's horse. Mr. Billings was greatly pleased with the colts foaled by his mares last spring and will no doubt send Lou Dillon to the brood mare ranks in the spring. If he does, McKerron will have the distinction of having bred to him two great mares, one an ex-champion world's trotter and the other the present world's champion. It will be a distinction never before enjoyed by a stallion.

Chas. De Ryder brought over with him from Salt Lake the pacing mare Alpha W. 2:08, to be bred to Star Pointer 1:59¾. Alpha W. is by Judge Norval and is owned by Mr. J. T. Richards of Salt Lake City.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

The Opening Handicap, one mile, to be run this afternoon at Emeryville, on paper is such a severe riddle to solve that I would not be surprised to see the favorite as good as 3 to 1. Proper is the top-weighter at 126 pounds, and justly so, as he is the classiest horse in the contest, taking courage and weight-packing ability as the test. He ran a mile this season in the heavy going better than 1:41 with 122 pounds up, went the short six furlongs in 1:10 1/4 with 114 pounds, and a mile and a furlong in about 1:52 4-5 with 127 pounds in the saddle. Thus, even on a time and weight basis, his races will compare favorably with those of any horse in the race. Bragg is nicely weighted at 108 pounds, and as he not long ago ran a mile in 1:40 1/4 with 106 pounds up, has an undoubted opportunity to win. Graziallo (113 pounds) was beaten half a length at seven furlongs in 1:27 with 127 pounds up, and if he should be in as good shape now as then ought to run the mile in about 1:39 3-5. As he is the stable companion of Proper, Walter Jennings has a right to shake hands with himself and do a little chuckling. San Nicolas (109 pounds) in 1904 ran a mile in 1:39 1/2 at Kansas City, winning easily by two lengths with 103 pounds on his back. Beau Ormonde (107), in the stud for some time past, has a mile in 1:38 to his credit at Worth track with about 90 pounds up. Rightful (106) did seven furlongs over the slow Memphis track in 1:28 on July 1st last, carrying 109 pounds, and winning the Gaston Hotel Handicap, and beat Andrew Mack and other good ones at seven furlongs previous to that. In all his other Memphis races he was placed. Red Leaf (100) carried 105 pounds at Latonia and was beaten a head at a mile by Maj. T. J. Carson (94) in 1:39 3-5. Figuring that the Emeryville track and the Latonia course are about the same these days, and taking five pounds off the filly, Red Leaf should go a mile this afternoon in about 1:39 1/4, which would make her chances appear very rosy. Callaghan (95) and Neva Lee (95) have been working very fast of late, and will have many friends. Briarthorpe, with 97 pounds up, should render a good account of himself. At Los Angeles, March 24, 1905, with 106 pounds up, he ran a mile and a furlong in 1:53 1/2, and with nine pounds off would have gone the route in about 1:52 4-5. Take 13 1-5 seconds off for the extra furlong, and the mile would be run in 1:39 3-5, and this would give Briarthorpe an outside opportunity to a certainty. Others with a "look-in" are Gorgalette (101), Judge (105), and Sea Air (98 pounds). The first named ran a mile and a sixteenth at Emeryville, April 29th, with 102 pounds up, in 1:46 1/2, and a mile in 1:40 with 100 pounds, on April 25th, beating High Chancellor (115 pounds) in the last named event by half a length. If Bonsack's horse (asked to carry but 108 pounds in the Opening Handicap) were "on edge" (he looks very "high") he would have to be reckoned with. Claude (118) will probably not come out, and Reservation (113) is not the horse he was when he downed Claude. Following are the weights announced by Handicapper Egbert last Monday evening:

Proper	126	Ocyrohe	101
Claude	118	Gorgalette	101
Graziallo	113	Hugh McGowan	101
Reservation	113	Good Cheer	102
Cruzados	113	Red Leaf	100
Gregor K.	109	Ishlana	99
San Nicholas	109	Lubin	99
High Chancellor	108	Watercure	99
Bragg	108	Warte Nicht	99
Corrigan	108	Ed Sheridan	98
Beau Ormonde	107	Letola	98
Kenilworth	107	Divina	98
Deutschland	107	Blue Eyes	98
Rightful	106	Salable	97
Elliott	106	Sea Air	98
Celeres	105	Jack Full	97
Judge	105	Briarthorpe	97
Corn Blossom	105	Tern's Rod	97
Rockaway	104	Callaghan	96
Bombardier	104	Neva Lee	95
Souffriere	103	Golden Sunrise	95
Epicure	102	Barnock Belle	95
The Reprobate	94	Lucrece	92

Jockey Will Davis arrived early in the week from New York. He now has difficulty in "doing" 107 pounds, and will in all likelihood not be able to ride more than another season. Jockey "Big Bill" Knapp is also a recent arrival. He is getting heavy, too, but is not likely to have to quit the business as soon as Davis. Knapp has made a great name for himself this season, and next season will in all likelihood ride for James R. Keene. Turf writers now rate Knapp with Frankie O'Neill as a jockey, and O'Neill has been accounted the premier rider of America for the past two seasons.

The races at Emeryville will begin at 2 p. m. this season, improved service to the track (a boat over both lines leaving every 20 minutes) being responsible for this.

Heeter Comisky, the well-known bookmaker, is the latest arrival from New York to announce that he will "cut in." Harry Froelich and Henry Wendt are also on the scene of action.

Presiding Judge Ed C. Hopper, accompanied by his daughter, arrived from Covington last Wednesday night. The judge is unusually enthusiastic over the prospects for a season of superb racing here.

Charles Cella, the St. Louis bookmakeer, who isn't nearly as nolsy as his big brother Louis, has been blackballed by the Metropolitan Turf Association, as was Louis. Wonder if the "Mets" hold their noses when they voted on "Big Louis'" application?

Among the bookmakers to arrive here lately are Barney ("Kid") Weller, Louis Snell (who is on a world's tour), David Honeyman, Ed Soule, Phil Howell and John Barker. Weller will "cut in" at once, and Mr. Barker will be with "Young Man" Martin. Mr. B. says the Middle West racing situation is not pleasant to contemplate.

The Sausalito poolrooms will be closed at the usual time after all. Messrs. Daroux and Harvey are in the six-figure mark "to the good," as usual, say those who should know. Each poolroom winner on the season is welcome to a large sized oil painting entitled "Ajax Defying the Lightning."

Recent arrivals of horsemen are Ed Gaylord, of Denver, who has his flyers at Emeryville; "Red" (Charley) Comerford, who will manage Barney Schreiber's Los Angeles string, and Wally Brinkworth, owner of Silverskin, Stroller, Little Wally, etc. Brinkworth's gallopers are not to race here, it is declared. Jockey Frank Payot is also here.

Eddie Burke, who booked in California one or two seasons, was recently elected president of the Metropolitan Turf Association of New York. John J. Evans is the treasurer and Timothy Sullivan secretary, while David Gideon, I. Hackelberg and Charley Heaney were elected directors.

C. E. Murray, owner of Anvil and other horses, is a recent arrival from Idaho, where he raced. Mr. Murray has the good rider Wright under contract.

The California Jockey Club's new rule about apprentices only getting the allowance for their contract employers is a solution of a "vexed question." The agents of riders will now be forced to get themselves a string of gallopers or lose their agencies.

MR. C. K. G. BILLINGS' TROTTER PRINCE OF ORANGE 2:06 1/2

The apprentice allowance business was certainly done to death, and I am glad to see the N. C. J. C. play the dead march over it.

Colonial Girl's injury turns out to be so serious that she may never be able to face the starter again. Her turf winnings foot up \$66,080. Miss Woodford, Firenze, Los Angeles, Yo Tambien, Yorkville Belle, Artful, Hamburg Belle, Reckon, Blue Girl, Imp and Wanda excelling her as money-winners among the mares.

THE ORPHANAGE BENEFIT.

About \$800 was realized for the benefit of that worthy charity, the Armitage Orphanage, at the California Polo and Pony Association's race meeting at Mr. C. W. Clark's track at San Mateo last Tuesday.

The first race, three-eighths of a mile, for non-winners, was a fast race and was won by Captain Mel-Kittrick's pony, Helen Warwick, in 1:37 1-5, Chauncey Hayes' Ramona second, and C. W. Clark's Chanate third.

The second race was a half-mile match between C. W. Clark's Bas Blancs, with Mackay up, and Rudolph Spreckels' Althomer, with Skinner up. Althomer won easily in 1:51 1-5.

The third race, at three-eighths of a mile, was another match between the Clark and Spreckels stables. Clark's Midlove, Dunphy up, met Spreckels' Uetma, Skinner up. Spreckels' horse was the favorite, as she had already outrun Midlove and had beaten every pony she had been pitted against this season. As usual, with these two jockeys up, there was a long delay at the start, but Dunphy finally got away in front. Skinner couldn't overtake him in the short distance and Midlove won by several lengths, running the distance in 1:37.

The fourth race, a quarter-mile handicap, had five entries, and J. Chauncey Hayes Jr.'s Ramona, with

the owner in the saddle, won in .25. Pedley's Carlotta Mackay up, was second and Lynch's Leah, Dunphy up, was third. Clark's Alvernie and Spreckels' Hopeful also ran. The winner was a long shot and only two bettors invested in his chances.

The fifth race, at seven-eighths of a mile, was won by Rudolph Spreckels' Carlotta, Marsh up, in 1:33 1/2. Clark's Ethel G. was second and Spreckels' Honoma was third. Clark's Chanate also ran.

Young Hayes rode his second horse to victory in the sixth and last race. Lynch's Leah, Hayes up, ran the three and one-half furlongs in 1:44. Spreckels' Althomer, Skinner up, was second, and Pedley's Carlotta, Mackay up, was third. Clark's Bas Blancs also ran.

The next meetings of the association will be held at Ingleside race course on Thursday, November 30 (Thanksgiving Day) and Saturday, December 2. The proceeds of this meeting will be devoted to the great cause of the Youths' Directory.

AMERICAN BREEDERS' ASSOCIATION.

Washington, D. C., November 3, 1905

The American Breeders' Association will hold its second annual meeting at Lincoln, Nebraska. Arrangements have been made for a three days' session on Wednesday, January 17th; Thursday, January 18th, and Friday, January 19th.

The American Breeders' Association will be the guest of Nebraska's numerous agricultural societies, which meet together at Lincoln during "Agriculture Week." Several of the sessions will be held jointly with one or more of the state societies interested in animal and plant breeding.

Many leaders in animal and plant breeding are being secured for the program and the large attendance during Nebraska's "Agriculture Week" will be in-

creased by many from other states.

Breeders of animals and breeders of plants, scientists, experimenters and students interested in breeding and heredity, the agricultural press and every agency devoted to the advancement of agriculture should not neglect this opportunity to get in touch with and be a part of this vigorous organization by being present at these meetings. Its annual report and directory was recently published and sent to all members.

Lincoln, Nebraska, is accessible by rail from points north, south, east and west and reduced railroad rates are being provided for. Information regarding railroad rates and local accommodations can be had by applying to the chairman of the local committee, Dr. A. T. Peters, Lincoln, Neb., or the secretary of the American Breeders' Association, W. M. Hays, Washington, D. C.

FAST COLTS IN TULARE CO.

Tulare, Cal., Nov. 7th, 1905.

Three as great yearlings as ever lined up for the word raced at Hanford and Tulare this year, not one of them having had work enough to mention, yet they raced like old campaigners and showed 2:10 speed in spots. Two of these yearlings were by Stoneway and one by R. O. Newman's Robert Direct. The Direct colt is eligible to start in the two-year-old pacing division of the Breeders' stake next year, and if he falls into good hands will lower the two-year-old Futurity record for this Coast of 2:15 1/4 almost to a certainty if need be. Not all the good ones are at Pleasanton and Los Angeles by any means, and we will show our friends north and south that California is all over like any good thing—the same wherever you get your hands on it.

J. BROLIAR.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

April 1-Sept. 15. Or. 16-Feb. 1—Open season for taking steelhead in tidewater.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Nov. 15, 16—New England Beagle Club's specialty show. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 21, 22—Brookton District Kennel Club. Brookton, Mass. J. W. Sullivan, Secretary.
Nov. 30-Dec. 2—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.
Dec. 13, 14—Southwestern Kennel Club's bench show at Pasadena. Entries close—.

1906.

Jan. 17, 30—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.
March 14, 17—Passaic County F. and Game Protective Association. Paterson, N. J. N. J. Matthews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.

Field Trials.

Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 30—National Beagle Club of America. 16th annual trials. Stevenson, Md. Chas. R. Stevenson, Secretary.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chapin, Secretary. Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Huntsville Ill. S. H. Socwell, Secretary. Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Rochm, Secretary.
Nov. 13—New England Beagle Club. 12th annual trials. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary. Marshall, Ill.
Nov. —Indiana Field Trial Club, (Week following Illinois Champion Stake) C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary. Chatham, Ont.
Nov. 23—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary. Richmond, Va.
Dec. —Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 126 Maiden Lane, New York.
Dec. 2—Continental Field Trial Club, 11th annual trials. John White, Secretary. Hempstead, Long Island.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary. Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary. Atlanta, Ga.
Jan. —Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

THE QUAILS OF THE UNITED STATES.

By Sylvester D. Judd, Assistant United States Biological Survey.

(Continued from last week.)

Aesthetic Value of Bobwhite.

Much money has been spent, and well spent, merely for the enjoyment of the beauty and companionship of birds. For the protection of gulls and terns along the Atlantic coast thousands of dollars have been expended at the instance of bird lovers, in whose eyes these delicate and graceful creatures are the crowning attractions of marine landscape. In like manner the admirers of bobwhite derive aesthetic pleasure from his presence. To pastoral inland scenes—woodlots in a green mist of young leaves, summer grass fields and bushy pastures, brown stubble and skeleton cornfields—the bobwhite adds a distinctive charm—homely, but none the less attractive. As the bird calls from the fence post or runs fearlessly across the road, the stroller can but admire its trim, alert figure and tasteful color pattern of black, white and brown, set off with delicate tinges of blue-gray. Its mellow whistle seems a proffer of good-fellowship, investing even a solitude with cheer, while the plaintive covey-call heard in the growing darkness to summon a scattered flock to the nightly resting place is one of the tenderest of evening sounds. Because of such traits the bird has made many friends, some of whom spend time and money to insure its undisturbed presence in their neighborhood.

Decrease of Bobwhite.

Every few years, on the recurrence of unusually severe winters with heavy snows which cover the food supply, great numbers of bobwhites perish, and sometimes in the northern part of its range the bird becomes almost extinct. This unnecessary loss of life could be largely prevented if land owners and others interested would scatter a little grain in suitable places. This is done in some localities, as at Sandy Spring, Md., where H. H. Miller drives over the snow-covered country, scattering grain for the starving quail. The practice is worthy of general adoption. It is necessary only while the ground is snowbound, and especially after sleet storms.

The bobwhite has taken kindly to civilization and has followed the plow of the settler into new sections, so that with the advance of the farming area in the West, and especially in the Northwest, its range has been much extended.

There is little doubt, however, that, while the bobwhite is a fairly hardy and prolific species, its numbers are decreasing in much, if not all, of its range, where not specially protected. In the early fifties Lewis reported sixty-one birds killed in a day to a single muzzle-loader, and mentions 900 birds trapped on one estate in a season. Within the last few years the scarcity of bobwhites has been so notable that several projected field trials have been abandoned for lack of birds on which to try the dogs.

Severe winters, as already noted, are an occasional cause for a great decrease in the number of the birds, though they increase rapidly with a few succeeding good seasons. In sections where the birds are still common unlimited slaughter is often indulged in by thoughtless hunters. Recent instances of such slaughter are on record, and the following may be cited: A bag of 175 birds to three guns in eight hours in the fall of 1902 at Tiffin, O., another of 300 birds to a single gun in a day and a half in the fall of 1902, in Marshall county, Ky., and still another of 292 birds to three guns in a day in South Carolina during the same season. The value of this bird, both to the farmer and the sportsman, renders the question of its maintenance and increase one of much importance. So assiduously is the bobwhite sought by sportsmen and market hunters that intelligent and concerted efforts are needed even to maintain its present numbers.

Legislation in Behalf of Bobwhite.

In addition to natural causes, reasons for the diminished numbers of bobwhites are diversity in the open season, shooting out of season, excessive shooting in season, and unrestricted shooting and trapping for market. Lack of uniformity in laws of adjoining States, and in some cases of adjoining counties, renders their observance difficult and their enforcement often impossible. No other game bird has been the subject of so much legislation, which, beginning in New York in 1791, now extends to every State and Territory where the bird is native or has been introduced. The length of season during which the bird should be protected by law is a matter of paramount importance. It goes without saying that no shooting should be permitted during the breeding season, which must be understood to last until the young of the year are strong of wing and fully developed for the struggle for existence. Besides this the close season ought to include months of rest, during which the birds can fortify themselves for the physiological strain of the next period of reproduction. As now established the open season varies from twenty-one days in Ohio to seven months in Mississippi. In North Carolina, however, where nearly every county has its own law, the bobwhite may be shot throughout the year in five counties. Virginia has recently abolished county laws and established uniformity, an example that other States, especially Southern States, would do well to follow. It is gratifying to note that in 1903 the open seasons were shortened by New York, Illinois, Texas and Virginia. In eight States—Maine, Rhode Island, Wisconsin, North Dakota, Montana, Colorado, Wyoming and Utah—the bobwhite is absolutely protected for a term of years, extending to 1929 in Colorado. Two conditions justify such prohibition of shooting. First, when excessive shooting or other causes have made recuperation necessary; second, when birds just introduced into a new locality need time to establish themselves. Wherever the bird can not hold its own with an open season of three weeks, absolute protection for a period of years is demanded. The length of the open season must vary with varying conditions, but in view of the general decrease of the birds there would seem to be a growing need for shortening it. The sooner Northern States limit their shooting to one month the better. Even Southern birds can not stand the present continuous fusillade of from four to seven months, and the open season in the South should be limited two or at most three months.

The slaughter of the bobwhite by sportsmen who hunt for pleasure is insignificant in comparison with that by professional market hunters. At the present time (1904), in about twenty-five States, the law takes cognizance of this fact by prohibiting the sale of birds killed within the State or imported from other States, and the general tendency altogether to prohibit the sale is growing each year. Every State except Mississippi forbids the sending of certain game outside the State—a restriction on the sportsman as well as the market hunter, although the privilege of carrying home a limited amount of game is often granted under a non-resident license. Fourteen States have laws, also affecting both classes, limiting a day's bag to

from five to fifty birds. Many sportsmen and farmers would be glad if the limit were set at twelve. Laws discriminating against non-residents protect the game and benefit the land owner, provided visiting sportsmen are not barred altogether by unreasonable fees. Thirty-one States and Territories require non-resident licenses. In addition to State game laws there are certain Federal laws, the most important of which is the Lacey Act, which provides, among other things, through the Department of Agriculture, for the preservation, distribution, introduction and restoration of game birds, and also undertakes to bring to justice persons who transport from one State to another game killed in violation of local laws. The latter clause proves effective in restricting such illegal shipments and in suppressing professional dealers that kill out of season in one State and attempt to sell in another where the season is still open. A law to prevent keeping birds in cold storage from one season to another would stop certain loopholes in the present laws and greatly aid in preserving game. An effective system of State game officials where it is lacking would aid in enforcing game laws. A number of States depend solely on county officers; but experience has shown that without a central State organization and special game wardens the law to a great extent becomes a dead letter.

Stringent laws against trapping the bobwhite have been enacted, but such legislation should permit legitimate trapping for purposes of propagation. One of the most important problems before game commissioners is the restocking of depleted covers. If, however, the bobwhite can be reared successfully in captivity, all trapping may be prohibited. The sporting magazines (Forest and Stream and American Field) mention cases of the bird's laying in captivity and raising its young; and in a letter to the writer, dated September 2, 1904, G. W. Jack, of Shreveport, La., says:

"I now have a pair of quails (bobwhites) which were trapped last winter and which I keep in a large wire coop. They have made a nest in some grass and have laid about twelve or fifteen eggs."

"The eggs were laid very irregularly, not more than two or three a week, so that by the time the nest was full the season was far advanced, which perhaps accounts for the female not sitting. The eggs were set under a hen and proved fertile, but the young were eaten by the chicken as fast as they hatched. I concluded that this irregularity or slowness in laying was the result of the lack of insect and other egg-producing food, as the birds subsist almost wholly on grain. Of late, however, they have learned to eat with much relish the yolk of an egg hard boiled."

The failure of the female to sit was probably due to the unnatural confinement in so small a space, a difficulty which could readily be remedied if attempts to raise quail were made on a large scale. Unquestionably, too, it would be necessary to feed the quail, at least during the nesting period, to a considerable extent upon animal food. An instructive account of quail breeding in confinement appears in Forest and Stream for September 28, 1882 (p. 164). The female had been hatched and reared by a bantam hen, and this circumstance has an important bearing on experiments of this kind. It is altogether probable that bobwhites hatched and reared in this way would lend themselves to experiments in propagation far more readily than wild birds trapped for the purpose.

The Department of Agriculture obtained three pairs of bobwhites from Kansas, which after five months' captivity are almost as wild as when first caged and show no sign of mating. Experiments in the domestication of bobwhites are well worth trying, however, because of the demand from clubs and individuals for live birds to restock their grounds. So great has become the demand in recent years that it is estimated that 200,000 birds would be required annually to fill the supply, even at \$5 a dozen, and sometimes at twice that figure.

Success in increasing the number of bobwhite depends largely on controlling its natural enemies, which include snakes, foxes, weasels, minks, skunks, domestic cats and certain hawks and owls. Several species of snakes eat its eggs and young. Writing from Texas, Major Bendire says: "The many large rattlesnakes found here are their worst enemies. One killed in May had swallowed five of these birds at one meal; another had eaten a female, evidently caught on her nest, and half a dozen of her eggs; a third had taken four bobwhites and a scaled partridge." In Mecklenburg county, Va., the king snake has been known to eat a clutch of eggs. At Fall Church, Va., Harvey Riley captured a black snake which disgorged a newly hatched bobwhite. Reference has been made already to the marked decrease in the number of bobwhites on the 230-acre farm at Marshall Hall, from fifty odd birds in July to less than a dozen in December, though not more than a dozen had been shot. This decrease was probably due, at least in part, to gray foxes; for in August and September these animals were numerous, and often came after the chickens within a stone's throw of the farmhouse. Other predaceous mammals and birds of prey were not numerous, but foxes frequently were seen at midday searching through pastures where there were broods of bobwhites. It must be easy for a fox to exterminate a whole brood of newly hatched bobwhites, and no difficult task to catch them, even when three-fourths grown. Minks and weasels, when numerous, are probably even more destructive to young bobwhites than to domestic poultry. The domestic cat that takes to foraging in woods and fields is also a menace and should be shot on suspicion, for it undoubtedly preys on game birds, as it is known to do on song birds and young rabbits.

(To be continued.)

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

AMERICAN FIELD FUTURITY STAKE.

Much interest has been manifested by Coast sportsmen in the American Field Futurity which was started last week. A special telegram published in the American Field gives the following preliminary proceedings:

The First American Field Futurity, announced to begin on Monday, October 30, at Robinson, Ill., made that city the center of attraction last week for owners, handlers and field trial patrons generally. By Saturday most of the handlers with their dogs were located and ready for the word to start.

For several days heavy rains had soaked the trial grounds to such an extent that riding over the meadows and stubbles meant sinking into the soft earth fetlock and knee deep. This condition compelled a postponement of the beginning of the American Field Futurity for a few days, to allow the grounds to dry out. Many of the handlers, however, had their dogs keyed up and were anxious to start, notwithstanding the unfavorable conditions.

Judges Zell Gaston and Dr. E. R. Hickerson gave the matter of starting serious consideration, it being their earnest desire to start the trials at the earliest possible time.

The drawing took place Sunday night. Just before the drawing Judge Gaston addressed the assembled owners and handlers as follows:

"Gentlemen—The American Field Futurity is about to be inaugurated, and I know that the management of the American Field regrets as much as we do the unfavorable condition of the grounds, which necessitates a postponement of the trials for a day or two. I know, too, that the American Field desires and will see that everyone shall receive the fairest treatment, and that the trials shall not be postponed one hour more than is necessary. Therefore, to-morrow the judges and the management of the American Field will go over the trial grounds, and if it is at all possible to start Tuesday morning the announcement will be made to-morrow night and all advised in time. If the grounds cannot be worked without cutting them up too much, then the Futurity will start Wednesday morning. In this connection I wish to state that the American Field Futurity is not an event of to-day only. It is a great stake, and the future must be looked into. The good-will of the farmers, over whose lands trials must necessarily be run is something to be cherished. While the farmers are only too willing to have the field trials on their lands, they object seriously to having their meadows cut up by riders going over them when in the present condition. The American Field believes that farmers are the sportsmen's friends, and desires to retain this friendship for the future good of all field trials in this community. For this reason, and to give every dog an absolutely fair trial, we will, as before stated, go over the grounds to-morrow and, if possible, start the First American Field Futurity Tuesday morning."

Upon the conclusion of Judge Gaston's address all the handlers were satisfied that the postponement for a day or two was for their good as well as for the good of field trial interests, and expressed hearty accord with the judge's sentiments.

The following is the list of final starters, drawn to run in the order named herewith—a total of twenty-three out of fifty-eight entries:

Maxine (9229, F. D. S. B.) with Patsy Buckellew (7159, F. D. S. B.)

Lingfield Bragg's Major (9210, F. D. S. B.) with Hurstbourne Nellie (6740, F. D. S. B.)

Lakefield Count (8496, F. D. S. B.) with Infalible (9172, F. D. S. B.)

Ria Baby (9083, F. D. S. B.) with Lad McKinley (9170, F. D. S. B.)

Count's Goldie with Rodfield's Dash Buckellew (7171, F. D. S. B.)

Tess (7991, F. D. S. B.) with Clipper Okaw (9207, F. D. S. B.)

Mildred (9205, F. D. S. B.) with Ransom (9084, F. D. S. B.)

Senator (9257, F. D. S. B.) with Tonopaugh (9084, F. D. S. B.)

Miss Ransom (9085, F. D. S. B.) with Jessie's Melrose (7197, F. D. S. B.)

Senator Don (9258, F. D. S. B.) with Alford's King (7715, F. D. S. B.)

Oakley Verona (7421, F. D. S. B.) with Count Sedfield (9162, F. D. S. B.)

John Bragg (7483, F. D. S. B.) a bye.

The trials began Wednesday morning on the Granby farm.

Tuesday evening the American Field tendered a banquet to those present attending the Futurity trials, the following being present: Mrs. N. Rowe, Mrs. Geo. W. Strell, Mrs. W. W. Updike, Mrs. Charles Askins, Judge Zell Gaston, Dr. E. R. Hickerson, Messrs. George W. Strell, J. E. Isgrigg, R. E. Smith, C. A. Riley, Cecil Gaston, Stillwell, Beardsley, Parmeter, Major Taylor, Updike, Werner, Gude, Wilson, Judge Crowley, Gilchrist, Hammond, Lockhart, Munger, Middleton, Askins, Rose, Garr, Bishop and McGill.

He Has the Eye.

Considerable comment was made concerning Major J. M. Taylor's ability to keep track of the dogs and their work at the recent trials up north and the major's eyesight, in consequence, was believed to be somewhat deficient.

However that may be, he has an eagle eye from a duck shooter's standpoint. During a duck hunting trip in company with Captain Ed Swift of Seattle and Sam Foot, a hunters' guide, in the La Conner Flat country, the major outpointed his companions to a finish. He could locate flying birds, tell what variety they were at a greater distance than either of the other two, and they are both experienced and skilled duck shooters. The major is a clever shot and has what a thorough duck hunter needs—a long distance eye.

AMERICAN FOX TERRIER CLUB.

Mr. H. H. Hunnewell, secretary-treasurer of the American Fox Terrier Club, publishes the following interesting report of the club's doings for 1905 in the American Kennel Gazette for November:

Ladies and Gentlemen: Your secretary begs to present to you the following report. Since the last report Messrs. A. H. Higginson, Lincoln, Mass., and R. B. Adam of Buffalo, N. Y., have been elected to membership.

"Wandee Doris" is proclaimed the American Fox Terrier Club champion for 1906, having won the Grand Challenge Cup at New York and Boston.

The Meersbrook Bristles Challenge Cup, donated by Mr. Charles W. Keyes, to determine the best Wire-Haired Fox Terrier of the year, having been won by Wandee Lucretia at New York, by Warren Remus at Boston, and by Mariska at Chicago, it will be put up for the fourth time at Philadelphia, and if won by either of above dogs, winner will be proclaimed champion.

The winners of special prizes offered for best American-bred Fox Terriers, open to members, are as follows:

Chicago Kennel Club.

Judge, Mr. Walter F. Render. Grand Challenge Cup, Sabine Refusal, F. H. Farwell; Meersbrook Bristles Challenge Cup, Mariska, D. E. Lynn.

Cups, value \$2.50: Open class, smooth, S. Reynard, F. H. Farwell; wire, Mariska, D. E. Lynn. Limit class, smooth, S. Reynard, F. H. Farwell; wire, Mariska, D. E. Lynn. Novice class, smooth, S. Rebel, S. A. Hardin; wire, Mariska, D. E. Lynn. Puppy class, smooth, Viola Flashlight, E. H. Ingwersen; wire, Mariska, D. E. Lynn.

Buffalo Kennel Club.

Judge, Mr. Thomas Ashton, Leeds, England. Cups, value \$2.50: Dog, wire, Warren Remus, Mrs. W. Rutherford; smooth, Aldon Tipster, A. A. Macdonald. Bitch, smooth, Warren Vogue, W. Rutherford.

Rochester Kennel Club.

Judge, Mr. James Mortimer. Cups, value \$2.50: Open class, Sabine Reynard, F. H. Farwell. Novice class, smooth, Viola Twilight, E. H. Ingwersen. Puppy class, smooth or wire, Fox Hills the Roman, Mrs. R. F. Mayhew.

Duquesne Kennel Club, Pittsburg.

Judge, Mr. J. A. Caldwell, Jr. Cups, value \$5: Novice class, smooth, Sabine Fabella, F. H. Farwell. Limit class, smooth or wire, Sabine Reynard, F. H. Farwell.

Long Island Kennel Club.

Judge, Mr. E. N. Barker. Cups, value \$2.50: Smooth, Warren Vogue, W. Rutherford; wire, Warren Remus, Mrs. W. Rutherford.

Atlantic City Kennel Club.

Judge, Mr. James Mortimer. Cups, value \$2.50: Open class, C. Barker, A. H. Rutherford. Novice class, smooth, C. Knighthead, G. M. Carnochan; wire, C. Beelzebub, G. M. Carnochan. Puppy class, C. Knighthead, G. M. Carnochan.

Wissahickon Kennel Club.

Judge, Mr. W. F. Render. Cups, value \$2.50: Smooth, Sabine Reynard, F. H. Farwell; wire, Primrose Barmad, Mrs. H. R. Barry.

Ladies Kennel Association of Massachusetts.

Judge, Mr. Nelson McIntosh. Cups, value \$2.50: Hillcrest Friar, Chas. W. Keyes.

Ladies' Kennel Association of America.

Judge, Mr. Chas. W. Keyes. Cups, value \$2.50: Smooth, Sabine Reynard, F. H. Farwell; wire, Fox Hills the Roman, Mrs. R. F. Mayhew. Novice class, smooth, Warren Rajah, W. Rutherford; wire, Warren Bacchant, W. Rutherford.

New City Dog Show, N. Y.

Judge, Major G. M. Carnochan. Cups, value \$2.50: Smooth, Warren Dandle, W. Rutherford; wire, Fox Hills the Trojan, Mrs. R. F. Mayhew.

Orange County Agricultural Society.

Cups, value \$2.50. Wire, Meersbrook Highball, Wm. H. Saxton.

Stakes and specials have been offered to members, as follows:

Philadelphia Dog Show.

The Meersbrook Bristles Challenge Cup. Second division, nineteenth Grand Produce Stakes (Smooth and wire.) Cups, value \$2.50: Best American Fox Terrier, open class, smooth and wire; limit, smooth and wire; novice, smooth and wire; puppy, smooth and wire.

Nominations for the Second Division, nineteenth Grand Produce Stakes, smooth and wires, should be sent to me on before entries to the Philadelphia Show close.

San Mateo Cancellations.

The following awards made at San Mateo September 9th, 1905 have been cancelled for the reasons stated below, and the following dogs moved up:

Class 8, Great Danes, novice, Zida; particulars not given.

Class 60, Collies, novice, Bob, son of Holmby; not eligible. Tallac Kittle takes 3d.

Class 63, Collies, open dogs (American bred), Clunker of Holmby; not eligible.

Class 69, Collies, open bitches (American bred), Rosalind; not eligible. Wellesbourne Coquette takes 3d.

Class 72, Dalmatians, novice dogs, Glenwood Venus; particulars not given.

Class 138, Yorkshire Terriers, novice dogs and bitches, Brownie; particulars not given. Nellie takes 1st.

Class 144, Pomeranians, novice, Papinta and Queen; particulars not given.

The following exhibitors have been fined \$2 each for imperfect entry:

O. J. Albee, Colile California Poppy; wrong breeder given.

S. A. Commings, Italian Greyhound Duke; shown previously as Duke II.

THE ANGLERS' JONAH.

(By Jas. Watt.)

Every angler has a grievance—
When the water isn't right;
When the dry north wind is blowing,
On the sun is far too bright.

Much worse than these all merged in one—
Is the idiotic crank
Who too oft is found
Upon the rippling river's bank.

He persists in fooling round you—
If in a boat he'll shine;
Of course he always makes a point
Of running o'er your line.

Then he asked annoying questions—
Concerning many kinds of bait,
Whilst your ire is quickly rising,
And your soul is filled with hate.

GOSSIP FOR SPORTSMEN.

Duck Hunting Near Rio Vista.

Some good bags have been made by several up river sportsmen during the past week on the preserves in the Rio Vista section, and if reports are true the best record was made by Dr. W. S. Makemson, Charles Kearney and Claude Kagee on the Egbert preserves, that are in charge of Sam Kirby. These gentlemen visited the ponds early Tuesday morning and Dr. Makemson took the lead, lacking one of killing the limit. The birds were mostly mallard drakes. Charles Kearney came in second with a string of thirty birds, nearly all canvasback, and reports he could have killed more than he did if he had been more familiar with the mysteries of a duck boat. There has been a sad look in Kagee's eyes since the eventful morning, as his string was the smallest and nearly all teal. He feels that his reputation as a hunter has been dealt a severe blow by Makemson and Kearney, and will some day take them out and lose them in the tules. It has been hinted that the large strings of Makemson and Kearney was the result of an exchange of cash from these gentlemen's pockets to Kagee's, but this report cannot be verified, so Kagee's reputation as a hunter is still questioned. Otto Johnson and Murray Isham report good shooting on the Mallard preserves and showed good bags of ducks as a result of a recent visit. H. W. Butler, Frank Wilson and S. Kirby also made a good shoot on the Egbert ponds Sunday morning, and L. Miller of the Acme Club reports a good shoot on the Tyron ponds. Ducks and geese are still plentiful in this vicinity and good shooting should be had for some time to come.

The tule sections on the mainland between Rio Vista and Clarksburg, a district covering an overflowed marsh shooting territory twenty-five miles or more in length and varying from one to ten miles in width, is one of the best duck shooting territories in this state. Distance from this city and lack of knowledge of the topography of the district has probably been the principal reasons why the district is not visited by more local sportsmen. It is extremely improbable, however, that so good a thing will long remain overlooked by sportsmen.

United to Kill Dogs.

A dispatch from Seattle, Wash., last week, states that twenty-seven hunting dogs, including Deerhounds, Setters, etc., have been killed in one week by the ranchers living along Hood's canal. All were valuable. The killing is but the first movement in a campaign planned by the farmers of that section in an effort to protect their rights and to save their crops from devastation and ruin, it is claimed.

For some years farmers there have been worried by hunters, who, getting upon the trail of a deer, would chase the animal across farms and through fields, regardless of the damage done. They have been warned time and again, but the warnings, even the printed and posted ones, have had little apparent effect.

The farmers held a big meeting two weeks ago to discuss the best ways of preventing hunters from running over their cultivated property, and the above record is the work of the committee appointed at that time.

The farmers and ranchers in the vicinity of Seattle have had the reputation for several years past of holding a deadly animosity against the dogs of sportsmen and hunters that were used in that section of country. Whatever their grievances against the dogs and their owners, the remedy is a cruel and illegal one. For any and all damage done the trespasser is amenable, either by a civil damage suit or a criminal prosecution.

It does not reflect any credit upon a community, individually or collectively, when illegal, and perforce cowardly methods, of relief are taken against dumb animals.

What Do You Know of the Quail?

If the average hunter will carefully read "The Bob White and Other Quails of the United States in Their Economic Relations," the work of Sylvester D. Judd, assistant, Biological Survey, United States Department of Agriculture, he will no doubt be surprised to ascertain how limited is the general knowledge concerning this dainty and popular American game bird. If every farmer in the United States could be induced to read this latest bulletin it is safe to say the quail would receive better care through the cold winter months at the hands of the agriculturists. The farmer can well afford to feed and care for bob white in winter. It would only be a return for past kindnesses. In summer and fall the quail rids the farmer's place of injurious insects and worms. In winter when snow or sleet covers the earth a few

handfuls of grain and a small space cleared of snow will in part repay the little birds for their good work in the months gone by. For example, an analysis of the contents of stomachs of 918 quail revealed the following constituent parts:

Grain 17.35 per cent; various seeds, chiefly weeds, 52.83 per cent; fruit, 9.57 per cent, and miscellaneous vegetable matter, 3.81 per cent. The animal matter in the food was distributed as follows: Beetles, 6.92 per cent, grasshoppers, 3.71 per cent; bugs, 2.77 per cent; caterpillars, 0.95 per cent; miscellaneous insects, 0.70 per cent; and other invertebrates, largely spiders, 1.36 per cent. Of the grain, it is said, the quail has never been known to feed on the growing stalks, feeding wholly from the ground.

Gun clubs and other associations for game protection would aid the cause largely if they would secure copies of the booklet referred to, through their congressional representative or otherwise, and see to it that every farmer in their vicinity received a copy. The campaign of education would more than pay for the trouble in real results.

The introduction of the bobwhite on the Coast has been successful in a number of locations. In Washington at Whidbey Island and La Conner Flats, near Seattle, this Eastern quail has thrived well. In the Willamette valley bobwhite has also found to a small extent a congenial habitat.

In California bobwhite has proved that he could get along all right in several sections. The rapacity of the market and pot hunters, however, have almost exterminated the Eastern quail in every district where he was introduced.

The information in Bulletin No. 21 is not confined entirely to the bobwhite, interesting generally as it is, but gives some timely information regarding the other varieties, which will appear in due course in the columns of the Breeder and Sportsman.

Fresno Game Warden's Report.

Game Warden R. E. L. Cobb of Fresno county gives the following report of fish and game conditions in his district for the past quarter:

"During August, September and October I went over the principal parts of the county where there are fish and game. I have been through both ranges of mountains. In the Coast range quail are plentiful, and also quite a few deer. As for fish, there are none on account of the lack of water. In the other mountains I found a good hatch of quail and grouse, but the deer seem to be decreasing very fast. I found the first to be scarce though water was plentiful. If fish are to be planted in the streams we should have a hatchery on account of the distance of the streams from any shipping point. In the valley things are in good condition.

"I find that the fish ladder at Miller's dam is not running any water to speak of and the fish cannot go up. All the fish hatched that try to reach salt water are going out in the ditches as all of the water is going that way now. In my judgment there should be a channel cut around the dam for the use of the fish instead of the wooden ladder, and then no matter how low the water gets the fish could come and go freely.

"While a good many ducks were hatched, they are getting scarce, as there has been no cold weather to bring northern ducks this way.

"Two men were arrested for seining and one for killing quail out of season. Jack Roads and L. Rogers were examined before A. G. Smith of Laton and were dismissed on the motion of the deputy district attorney. Ed Daulton was fined \$25 by Judge Beall for killing quail."

Hunting Conditions.

The continuance of the dry weather has changed shooting conditions materially in most sections. Last year, up to November 10th, the rainfall amounted to twelve inches; this season, not a drop of rain has fallen, save in a very few interior localities. The ponds on many preserves are dry and untenanted by ducks. As the lack of water affects duck hunting so does it also make unfavorable conditions against the quail hunter.

Despite the dryness and general need of rain, many sportsmen manage to enjoy fair sport. The best duck shooting for the past week has been found in the Suisun marshes and in the tule sections of the Yolo and Sacramento basins.

Quail hunting in Marin county the past week has been unrewarded by more than one-half as against results obtained earlier in the season. Some good bags of quail, however, have been shot on the Country Club and Point Reyes Sportsmen's Club preserves during the past week.

On the Alameda marshes, near Alvarado and Mt. Eden but fair bags have been shot for a week or so.

Duck hunting on the Alviso marshes is rapidly waning in popularity. The webfoots are not as numerous as they were at the beginning of the season and reports of limit shoots become scarcer every day.

Quail shooting is fair in almost every place in Santa Clara county frequented by San Jose gunners.

In Santa Cruz country, quail are numerous in the foothills but the undergrowth is so dense in most places that few birds are bagged. The quail are now wise to shotgun users and flush on the approach of hunter or dog and find refuge in the thick, impassable chaparral.

Striped Bass Angling.

Nearly three dozen devotees of salt water fishing were at San Antonio slough last Sunday bombarding the water with clam baits.

General results were only fair. During the week a number of fish, some of them of fair size, have been caught.

On the Sonoma marsh section, near Schellville, it is reported that Cardinal Bebeshelmer captured a

30-pounder and several goodly sized smaller bass on Sunday.

Bill Street has recently succeeded in crossing striped bass with "hardmouths" and will plant fry of the new variety—the Wingo bassoon—in Shell slough.

Striped Bass Club Outing.

A strong delegation of San Francisco Striped Bass Club members enjoyed a very pleasant outing near Rodeo last Sunday. The anglers fished for striped bass from the shore, at a spot known as Dolliver's Point. Luck was indifferent, for the fish were either coy or absent, Nat Mead's three-pounder was high hook for the day.

Chef Breidenstein's toothsome clam chowder made the anglers callous to the biggest fish in San Pablo bay.

Shrimp Law Upheld.

A recent decision of the California Supreme Court sustains the law, passed at the last session of the legislature, prohibiting the exportation of shrimps from this state to foreign countries.

The Chinese shrimp fishermen combined and secured the aid of legal talent to test the constitutionality of the act. The case was strenuously fought through all the courts with the final result that the embargo on shrimp extermination by the Mongolian bay pirates will remain force.

Salmon are reported running in the Yuba river by the thousands. The stream at times seemed to be alive with the fish, while in the shallow places they crowded and splashed about "like a drove of hogs."

FOREIGN GAME LOCUSTS.

The one urgent need for the protection of game and fish in this state is the curbing of the foreign man behind the gun. These foreigners are mainly Italians and Japs.

Many of the Italians are laborers, with no fixed residence. These fellows generally have a cheap hammer breech-loading gun, use black powder and brass shells. Some of them use cheap double barreled muzzle loading guns, thus making a slight saving in the cost of ammunition. The Jap, as a rule, will buy a fairly good grade of gun. The little brown men are mostly all contract laborers, unreliable at that.

Both varieties of these human locusts are equally expert in their persistent and systematic work of exterminating game and fish, by poaching all the year round. Anything and everything with feathers is game for these vandals; in fact the "Dago" depends upon the gun for most of his meat. In the agricultural and fruit growing districts these foreigners do their own cooking, etc. They work for comparatively small pay and their expenditures in any community that is unfortunately burdened with their presence are correspondingly limited. The Japs, for instance, employed in the Belmont and San Mateo marshes take their guns with them daily for the purpose of potting any bird or edible animal that they can bring down. When it is known that thousands of these locusts are carrying on this nefarious warfare on game and song birds the year round, it will readily be understood that the amount of damage is of no small degree. As they ravage the fields, so do they with equal diabolical success deplete the streams and bay tributary waters. There used to be a hue and cry raised in the State against the Chinaman, but whatever his shortcomings, viewed from a Caucasian standpoint, the Chink had one redeeming virtue, he was not a poacher, save possibly in a few instances.

A case in point is the territory round about Isleton, Sacramento county. Years ago Andrus island, Twitchell island and the adjacent country afforded most excellent duck, snipe and quail shooting in season. The hunting was enjoyed by many of the sportsmen, young and old, of that district. Since the advent of the Italians and Japanese employed by the fruit growers, truck farmers and dairymen, the feathered game of that once prolific region has seemingly melted away under the blighting presence of these locusts, until now there is but a paltry showing of feathers for the incensed sportsmen of that section. Instances are recounted where hen quails have been potted and the chicks left to perish. The fish—striped and black bass, perch, catfish and several other varieties—have also received the deadly attention of these foreigners, so much so that a growing scarcity has become suddenly noticeable.

Isleton is the center of a wealthy farming and dairying community, it has two large hotels always full of travelling men and visiting country residents, a bank and large stores, and is what is known as a "lively river town." The Japs and Dagoes are not contributors, in anything but a small way, to the general business prosperity. Unfortunately, these foreigners are regarded as a necessary evil, they being about the only material procurable for the purposes for which they are employed. It would be far better if the fish and game of the region were properly protected for the sport of legitimate sportsmen than for the feeding of non-producing and non-resident foreigners. Sportsmen pay liberally, directly and indirectly, for their outings, and observe the game laws; the locusts do not.

The general feeling of indignation and resentment of many individuals in that section is so strong against the game law violators referred to that it will not be surprising if an example were to be made of one or more of the poachers who may be caught redhanded in their depredations.

The condition of affairs above stated can be found duplicated in many other parts of California, much to the shame of the indifferent citizens of such communities.

Sober up on Jackson's Napa Soda.

DOINGS IN DOGDOM.

California Greyhounds Won.

D. K. Cartter, who coursed a big string of Greyhounds at the local coursing parks during the past season, took the best of his dogs to Chapman, Kans., last month and won the American Waterloo, the Burke Cup and the Mississippi Valley Futurity. In the latter his entries ran one, two, three.

Lord Sefton, by Parton-Quickstitch, won the Waterloo, running in the firm name of Lowe & Cartter. He was a fast dog here, as on September 17 he beat Gambit, Richard Anton, Reckless Acrobat and The Duke.

Bartagis, by Barton Tag-Grace Conroy, the latter being a branch of the famous Nellie Conroy stock of this State, won the Futurity. The Flight, from the same litter, was runner up. Great Northern, by Northern Surprise-Jessamy, ran third.

Mr. Cartter won the Burke Cup, for which there were 109 entries, with imported Patched Up, by Sir Geoffrey-Causeway Girl. Mr. Cartter left Kansas for this city last week with fourteen dogs. He bought a number of puppies which performed well.

G. Lacy Crawford's Agile Spurt ran third in the Waterloo.

A Ladies' Kennel Association.

A ladies' kennel association here would no doubt be a very nice thing for dogdom, but all that ever will materialize anent a ladies' kennel association in San Francisco is rumor, nothing but idle rumor, at all events for some time to come. The mixing qualities are not in the brewing; it was attempted once before and proved a dismal failure.

An exclusive club could have but a comparatively small membership. A show would have a corresponding small entry, for the simple reason that those beyond the pale of membership would not exhibit. The published story going the rounds is merely guff.

Treatment of Mange.

In an interesting article on mange in dogs the London Field says that genuine disorder is associated with dirt and neglect, and when it appears in the domestic pet dog or in the well managed kennel it is always a safe conclusion that the outbreak is due to accidental infection from contact with an animal affected with the malady or with something on which the parasite or its eggs have found a refuge. Treatment of mange is by no means easy, as its success depends on the remedy reaching the acari in their habitats under the cuticle into the fibrous structure of the true skin, and in advanced forms of the disorder it is necessary to prepare the skin for the remedy by thoroughly washing with warm water and soft soap, and the careful removal of all hard scabs. Numerous forms of dressing are recommended by different experts, but it is generally allowed that the selection of the dressing is not of so much moment as the method of its application. One thorough dressing is likely to do more good than a dozen of a perfunctory kind. A very favorite dressing for a horse affected with mange was composed of equal parts of oil of tar, train oil and turpentine, but the mixture was so unpleasant in its appearance and smell that its use was mainly confined to the coarser breed in large working establishments, and it was not considered to be safe for dogs, owing to the extreme susceptibility of the animal's skin to the action of turpentine.

It was only by chance that it was ascertained that the preparation might be safely used for dogs; notwithstanding its bad reputation, a well known veterinary surgeon many years ago was in the habit of using it, and affirmed in public that he never found the least injury, but on the contrary, the greatest benefit from its use in skin disease of a serious kind in the dog, and sarcoptic mange among them. The offensive qualities of the mixture would certainly render its use impossible in a house, but in any case of mange of so severe a character the obvious course would be to send the animal to a veterinary infirmary. Probably in the early stage of the disease there is no better dressing than a mixture of flour of sulphur with sweet oil, to form a creamy fluid, which may be applied without any risk to the animal, which will probably lick it. In very bad cases it is advised that long-haired dogs should be completely shorn, so that the remedy, whatever it may be, may have a chance of penetrating into the galleries which the parasites have made. Gerlach recommends, as a remedy, a preparation which would commend itself to the owners of pet dogs, on account of the odor of vanilla which it exhales. It is simply a solution of the balsam of Peru in spirit, one part of the balsam to 30 of the spirit, which will be applied to all the diseased parts of the skin. Among the remedies which may be looked upon as domestic applications, is carbolic soap, the strength of which may vary from 1 to 20 per cent of the carbolic acid, according to the severity of the disease. The affected parts may be moistened in the first place and the soap rubbed on before the animal is placed in the bath, in which the soap must be thoroughly washed off. It must be understood that the strongest admixture, from 10 per cent and above, if allowed to remain on the dog, may do serious mischief.

Jos. E. Terry's English Setter bitch Lady Like, who was lost afield near Pylema, Kern county, last June, is still missing, despite the fact that a liberal reward has been offered for her return either to J. E. Terry, Sacramento, or to Fred Coutts, Bakersfield. Every effort, so far as search and the distribution of printed circulars goes, has been made to regain this well known Setter, but so far Mr. W. B. Coutts informs us, without avail. More's the pity.

The English Kennel Club Jubilee Show has the record list of entries—3,503.

CATTLE FOR MILK AND BEEF.

Interest in cattle for milk and beef seems to be increasing. The breeds that are classed as dual purpose or milk and beef cattle are Red Polls, Brown Swiss, Polled Durham, Devon and some families of the Shorthorn. The choice of a breed depends so much on the personal preference of the purchaser that it is not only unwise but impossible for one to dictate to or decide for another in that regard. Human nature is a factor in this calculation and the breed a man likes best he will take the best care of. For the benefit of our subscribers, and many others who may desire the information, we give brief descriptions of the dual-purpose breeds which may aid in a selection.

Red Polls.—The Red Poll is a very handsome animal. They are rich red in color and have intelligent heads without horns. The poll is nicely pointed, the neck is thick (in the cows) but blends smoothly into the shoulders, which are not so thick and beefy as are the beef breeds, nor sharp and peaked as the dairy breeds, but medium. There is good spring to the ribs, the barrel is deep, the rumps square, the thighs fairly plump and the udder large and of good quality. A good Red Polled cow (there are of course good and poor cows in all breeds) is a wonderful animal. She is a milker of exceptional ability, and turns her surplus flesh into milk. When dry a cow of this breed fleshes rapidly and we have known men to pronounce as unfit for dairy purposes Red Polled cows that when dry were blocks of beef but that would produce between four and five hundred pounds of butter fat in a year. Red Polled cattle originated in England, in the counties of Norfolk and Suffolk, and have been recognized as a distinct breed since 1846. Uniformity of type has been an object so universally sought that animals in the best herd are "as alike as peas." Red Polls were first imported into the United States in 1873. There are more cattle of the breed in Iowa than in any other State. The president of the American Red Polled Cattle Club is P. G. Henderson, Central City, Ia., and the secretary, H. A. Martin, Gotham, Wis.

Brown Swiss.—The Brown Swiss is one of the most picturesque breeds. Their wide branching horns and peculiar brown color, some light and at some seasons gray, make them very attractive. They have a light stripe along the back. Brown Swiss are good milkers, and strong in body. Butcher tests of cows and steers acknowledge them satisfactory killers. When crossed on common stock a Swiss bull marks his offspring after himself, and we have seen half-bloods that would pass for purebred as far as external characteristics are concerned. N. S. Fish, of Gorton, Conn., is secretary of the American Brown Swiss record.

Polled Durhams.—As far as dual purpose qualities are concerned Polled Durhams and Shorthorns may be considered together, for Polled Durhams are Shorthorns without horns. This is especially true of the double-standard Polled Durhams. These are registered in both the Shorthorn and the Polled

Durham herd books. Single-standard Polled Durhams have not a clear Shorthorn ancestry, but generally have a cross of the native mooley in them. There are many excellent milking families among the Shorthorns and Polled Durhams, and their breeding qualities are first class.

Devon.—Devons are smaller than any of the other dual-purpose breeds and the least common. They are a neat, tidy cattle, active and vigorous, a rich red in color, have wide branching horns gracefully turned up and of waxy color, the nose is flesh colored and the eyes are surrounded by a flesh-colored ring. Devons are the most ancient breed of cattle in Great Britain. They are good milkers and make "handy" steers, generally of lighter weight than the steers from the other breeds.—Wis. Agriculturist.

TO KEEP MILK SWEET.

Mr. W. J. Frazer of the Illinois Experiment Station, gives the following suggestions as to how to secure milk from your own cows that will keep sweet for a reasonable length of time: "Keep the cows clean, and do not compel or allow them to wade and live in filth. This means clean yards and clean well bedded stalls. Every thing short of this is positively repulsive and should not be tolerated any longer in a civilized country.

"Stop the filthy habit known as the wetting of teats, by which is meant the drawing of a little milk into the hands with which to wet the teats before and during milking, leaving the excess of filthy milk to drop from the hands and teats into the pail.

"Wash all utensils clean by first using lukewarm water afterwards washing in warm water and rinsing in an abundance of boiling water then exposing until the next using in direct sunlight which is a good sterilizer.

"Use milk pails, cans, etc., for no other purpose but to hold milk.

"Keep out of these utensils all sour or tainted milk even after they have been used for the day. Using them for this purpose at any time infects them so badly that no amount of washing is likely to clean them. Bacteria are invisible and millions can find lodging in the thin film of moisture that remains after dishes are apparently clean.

"Brush down the cobwebs and keep the barn free from accumulations of dust and trash.

"Whitewash the barn at least once a year."

The reasons for the above suggestions are as follows: All soured milk is due to the presence of germs. These are abundant in every stable; more so in a dark stable than in one well ventilated, for the reason that sunlight kills the germs; more abundant in a filthy stable than in a clean one. They are found on the udder of a cow and on the hair. They are found in the teat itself, where they establish themselves in little colonies. Hence when the farmer milks on his hands and wets the teats he is not only getting a colony of germs in the milk started but he gets with it a solution of whatever filth there may be on the teats. The very first milk should be milked on the ground and not in the pail. Wash the germs out of the teats by two or three motions, letting these go on the floor. Germs harbor in the pails, hence the necessity for absolute cleanliness. A pail that held sour milk will be admirably stocked with germs, which even warm water cannot remove immediately.

Give horses a variety of food. While oats will continue to be a standard food for horses, yet a small allowance of linseed meal and corn fodder will also be relished and give excellent results.

Castor oil well rubbed in twice daily for a week will remove warts on cattle. The animals suffer no pain. Try it.

McKINNEY FILLY FOR SALE.

I OFFER FOR SALE AT A REASONABLE figure the black two-year-old filly SUKEY MAC by McKloney 2:14, dam Winnie Wilkes 2:17 1/2 by Rey Wilkes (son of Mambrino Wilkes and Fannie by John Nelson); second dam Pet by Cresco 4:08; 3d dam Topsy by General Taylor SUKEY MAC is entered and paid upon in the Pacific Breeders Futurity for next year. She has only been worked a very little and has paced quarters in 35 seconds. Apply to R. P. M. GREELEY, 14th and Franklin Sts., Oakland.

THE BEST BREED OF SHEEP.

The question of breeds is one that never will be settled. The particular breed of any kind of stock that a man likes best is the one that will usually do best for him, writes E. P. Snyder in Ohio Farmer. Because sheep are grown for both mutton and wool and because either one is grown, to a great extent, at the expense of the other, there is a wonderful variation in this family of the domestic animals. Flockmasters are usually pronounced in their opinions as to the merits of the different breeds and decidedly and emphatically favor their own particular class.

A dairyman whose farm has been destroyed for that purpose by a railroad, lately told me he thought of buying a small flock of breeding ewes and wanted my opinion as to the best breed; whether he had better try one of the mutton breeds or one of the fine wool class. He said he wanted to raise early lambs for market. I advised him to get, if possible, good, large, smooth grade Merino ewes, and for a sire use a full blood Shropshire ram. I advised Merino ewes. First, because they can be bred earlier; second, because they are hardier, less liable to disease; third, because they shear more wool; fourth, because they require less range and less feed; fifth, because they live to a greater age.

I have known a good many men to change from Merinos to some of the mutton breeds and I never knew one yet who didn't regret it. One of my neighbors who made such a change said to me: "Those coarse sheep are starving to death on my woods pasture right where my Merinos kept fat; about four out of five have the scours all the time. Besides, after every storm, they have a bad spell of catarrh and snuffles, and I just everlastingly never can keep them clear of ticks." One trouble with this man was that he had been used to handling Merinos, and the methods that succeed with them will not do at all with the mutton breeds. They must be kept in smaller flocks and they require closer attention and more generous feed. I have known men to do well with a small flock of coarse sheep, but I have known two breeders to dispose of their whole flocks because they became so infested with stomach worms as to be practically worthless.

The prices of both mutton and wool have been unusually good for the last year and many who have had no sheep for years are thinking seriously of investing in a small flock. I believe that they will do better with sheep of the Merino class than with any of those of the mutton breeds. Especially if they have had little experience in handling sheep. The Merinos are so much better able to take care of themselves. And while they will stand a good deal of hard treatment and neglect they respond readily to skillful handling and generous care. The most successful business men make it a point to buy when things are low and sell when they are high. According to that maxim it is bad business to buy sheep at this time. No doubt there are men who will rush into the business now, and then become disgusted and go out when the first season of depression comes. This practice can, of course, only result in serious loss. I have such a strong and abiding faith in sheep, and I don't hesitate at all to advise a man who has none, to buy a few good breeding ewes with which to start a flock. And having embarked in the business, stay right by it. Give the flock good care and they will respond more generously than any other stock.

When starting sheep on a grain ration do it with caution, especially is this true where corn is fed. Oats make a good feed for the principle part of the ration. A little bran will be helpful. Two or three weeks should be taken to get sheep on a grain ration.

Feed new corn with caution to hogs in the early fall. A good plan is to feed corn on the stalks while green. Roots, such as mangles, turnips or old pumpkins are good to keep the hog's digestive apparatus in good condition.

A few fowls well fed, and well housed will give better satisfaction if well cared for than twice the number improperly looked after.

"SAVE-THE-HORSE" SPAVIN CURE

HOWE & CO.
Real Estate, Estates Cared For,
AND BUSINESS OPPORTUNITIES,
247 Washington St., Room 2.

Boston, Mass., Jan. 21.
Dear Sirs:—I have used a bottle of "Save-the-Horse," and I consider it the best thing that as yet I have been able to obtain for what it was intended, it having entirely cured a very valuable mare which has been lame since last September with a sprained ankle. We had her blistered twice and laid up for two months, but it did no good. I was just about ready to breed her when I gave it a trial: she is now entirely sound.

Yours respectfully,

ALBERT E. BAKER.

WERE THESE TWO CASES WORTH THE COST OF TREATMENT?

Brooklyn, N. Y.

One of my horses went lame from side or shell bones on both feet, which extended entirely around the quarter, and was laid up for about three months. I used two bottles of "Save-the-Horse," and the horse is perfectly sound. I have driven her over paved roads, and one day gave her a sixty-mile drive and she never showed the least particle of lameness. The growths have nearly all disappeared. I have owned horses for years, used them to build railroads and in all kinds of contract work, and have used remedies, blisters, flogging and electricity, but never saw anything take hold and produce such results as "Save-the-Horse" in this case.

D. C. BENNETT, Builder,
416 79th St.

Nyack, N. Y.
In August I had a mare with an ankle cooked from a bad wrench in a race. It was so bad I had concluded to shoot her, but was persuaded to breed her and turn her out. I bred her, but instead of turning her out used your "Save-the-Horse." In three weeks I was more than surprised to see the swelling disappear, and the remedy produced a complete cure. She is as good as ever. I have raced her since and drive her any distance without any sign of lameness. I cannot say too much for your remedy.

GEO. F. BEHRINGER, JR.

Write us before you fire or blister your horse and you will understand why our written guarantee is an absolute legal contract. Positively and permanently cures BONE and BOG SPAIN, THOROUGHPIN, RINGBONE (except low ringbone), CURB, SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, BROKEN DOWN, SPRAINED and RUPTURED TENDONS and all LAMENESS, without scar or blemish. Horse may work as usual.

\$5 per bottle. Written guarantee with every bottle, as binding to protect you as the best legal talent could make it. Send for copy.

One Bay Yearling Filly by Iran Alto 2:12 1/4
One Brown or Black, Weanling Filly by Lecco 2:09 1/4

The Mares are BESSIE D., that is out of Stemwinder, the dam of Directum 2:05 1/4; ROSE McKINNEY, that is out of a mare by Forrest Clay 1934 and is the dam of Almaden (2) 2:22 1/4, winner of Breeders Futurity and Occident Stake; KAGSY, that is out of Babe by Ferdinand 1835, son of Strathmore; and Black Mare out of Fontanita by Antevolo 2:19 1/4, son of Electioneer; second dam Fontana, dam of Silas Skinner 2:17, etc.

The Yearling is by Iran Alto out of Rose McKinney; dam of Almaden (2) 3:22 1/4.

The Weanling is by Lecco 2:09 1/4 and out of Rose McKinney.

Also, one Bay Gelding with a record of 2:17 1/4 by McKinney. This is the best and fastest roadster of his size in California.

Also, one three-year-old Stallion—the best bred one ever sired by McKinney; dam Elsie (dam of 5 in list) by Gen. Benton; second dam Elaine (dam of 4 in list) by Messenger Duro; third dam Green Mountain Maid (dam of 8 in list) by Harry Clay 45. A grand young horse; has trotted a half in 1:14 as a two-year-old.

Will sell one or all of the above at fair prices. Address C. A. DUFFEE.

ONE MILE AND A FURLONG

THE LAWRENCE REALIZATION

\$10,000 Added.

Estimated Value, \$40,000.

For Foals of 1904—Now Yearlings.

FOR THREE YEARS OLD (Foals of 1904). A sweepstakes by the following respective subscriptions: For horses nominated as foals by November 15, 1904, \$75 each, or only \$10 if declared out by November 1, 1905, or \$30 if declared out by November 1, 1906.

For horses nominated as yearlings by November 15, 1905, when the stakes shall be closed, \$150 each, or \$75 if declared out by November 1, 1906.

EACH STARTER TO PAY \$250 ADDITIONAL, all of which shall go to the second and third horses, as further provided.

The Coney Island Jockey Club to add ten thousand dollars (\$10,000). The second to receive \$1500 of the added money and two-thirds of the starting money; the third \$750 of the added money and one-third of the starting money. The nominators of the winner, of the second horse and of the third horse to receive \$500, \$300 and \$100 of the added money, respectively, whether they are the owners of the horses when the race takes place or not.

Colts, 126 lbs.; geldings, 123 lbs.; fillies, 121 lbs. Non-winners at any time of \$5000 allowed 4 lbs.; of \$3000, 7 lbs.; of \$1000, 10 lbs.

By filing on or before November 1, 1905, with The Coney Island Jockey Club an accepted transfer of the foal's entry, the original subscriber will be released from any liability as to the engagement of said entry except the first forfeit of \$10, leaving the purchaser liable for same unless duly struck out.

ONE MILE AND FIVE FURLONGS

FOR THE AUTUMN MEETING, 1907

THE GREAT FILLY STAKES

With \$5000 Added.

Estimated Value, \$20,000.

FOR FILLIES TWO YEARS OLD (Foals of 1905). By subscription of \$5 each, the only liability if declared out by November 1, 1906; or \$25 each if declared out by May 1, 1907; or \$50 each if declared out by July 15, 1907; or \$100 if left in after the last-mentioned date. EACH STARTER TO PAY \$150 ADDITIONAL, which shall be divided between the nominators of the fillies placed first, second and third, as further provided.

The Coney Island Jockey Club to add \$5000, of which \$1250 to the second and \$750 to the third. The nominator of the winner to receive 50 per cent of the additional fees paid for starting; the nominator of the second 30 per cent, and the nominator of the third 20 per cent.

Winners of two races of \$2000, or one of \$5000, 5 lbs extra; two of \$5000, or one of \$10,000, 8 lbs extra. If sire or dam has not produced a winner prior to November 1, 1905, the filly will be allowed 3 lbs. for first, or 5 lbs. for both, said allowance to be claimed at time of entry.

By filing on or before November 1, 1906, with the Clerk of the Course of The Coney Island Jockey Club an accepted transfer of engagement in this Stake, THE NOMINATOR WILL BE RELEASED FROM FURTHER LIABILITY, other than the first forfeit of \$5 each.

LAST SIX FURLONGS OF FUTURITY COURSE

Entries to be addressed to the

Entry Blank, can be had at the Office of the BREEDER AND SPORTSMAN.

ENTRIES TO STAKES CLOSE NOVEMBER 1st. Records made on and after November 9th no bar.

ENTRIES TO PURSES CLOSE NOVEMBER 23rd. Records made on and after November 9th no bar.

No race longer than five heats. American Trotting Association Rules to govern, except that boppies will be allowed. Six to enter and four to start. Entrance fee to harness races, five per cent and five per cent from money winners.

Two horses may be entered in one class and he held but for entry fee on horse that starts; but if neither starts, one entry fee will be required. A horse may be entered in two races and he held only for entry fee in race in which he starts; but if no start is made, entry fee will be required in one class, and if entered in a stake and a purse race entry fee will be charged on the larger amount.

ENTRIES TO RUNNING RACES close at 6 o'clock the evening before the race. Entry fee in running races five per cent. No additional fee from money winners. Western Jockey Club Rules to govern running races, as far as applicable. Outlaw horses barred.

The management reserves the right to change the order of the program without notice. Our meeting follows close of Southern California Circuit, which offers \$17,200 for harness races. Remember we have a new \$50,000 plant, first-class mile and half-mile tracks, and the grandest winter climate in the world.

Horses unloaded at the grounds without change over either Santa Fe or Southern Pacific railways. W. N. TIFFANY, Supt. of Speed, Phoenix, Arizona.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Sprains, Splints, Cuts, Bruises, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Bick writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For cuts, sprains, windpuffs and all bunches it has no equal."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking. W. B. Eddy & Co., Whitehall, N. Y.

McKINNEY, 2:11 1/4

World's Leading Sire of Extreme Race Horse Speed.

FEE, \$500.00

Fees are invariably payable before mares leave the farm. No return privilege, but fee returned if mare fails to produce a foal. Keep, \$2. per week. Our terms are rigidly adhered to in all cases, and we cannot deviate from them.

McKinney is now located at the farm, 10 miles from Cuba.

Mention this journal when writing.

Horses on exhibition Saturday, November 11th. Send for Catalogue.

FRED H. CHASE & CO., 1732 Market St. (nr. Van Ness Av.), San Francisco

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

CRAFT'S DISTEMPER CURE COSTS NOTHING IF IT FAILS.

Distemper can be cured so quickly and thoroughly as to astonish those who have never tried Craft's Cure. No other remedy like it. Safe and sure in its action. Get and test the remedy under our money-back guarantee. If not at your dealers, we will send it prepaid. Price 50c and \$1. Drop a card today for our free pamphlet, "Veterinary Pointers." Gives valuable veterinary information not to be had elsewhere.

IT MAKES NO DIFFERENCE

what particular kind of shooting you are interested in—sportsmen differ as to make of guns, advantages of various loads etc., but sooner or later most of them come to the same opinion about ammunition—that

Peters Shells and Cartridges

have all the other makes beaten in the race for quality and results. See what they have recently accomplished in the three chief departments of "the game":

RIFLE

At Sea Girt, N. J., Aug. 24-Sept. 9, LIEUT. TEWES won the Wimbledon Cup Match, the Grand Luffin & Rand Aggregate, the Seabury and N. J. Members' Matches; LIEUT. CASEY won the Inspector's Match, and LIEUT. SMITH the Reading Match—all using Peters 30 U. S. Govt. ammunition. In the Spencer and Seabury Matches LIEUT. CASEY made a total of 20 consecutive bull's-eyes. In the Wimbledon Match seven of the first ten places were won with Peters Cartridges.

PISTOL

The Pistol Championship of the United States, competed for Sept. 1-11, was won by J. A. DIETZ of New York, scoring 465 out of a possible 500 with Peters 22 Stevens-Pope Army Cartridges. Standard American Target, 8-in. Bull's-eye, distance 50 yards. At Sea Girt, N. J., Aug. 24-Sept. 9, THOMAS ANDERTON won the All-Comers, Any Revolver, and Jones Matches, and LIEUT. STEDJE the Disappearing Target Match, all with Peters Cartridges.

SHOTGUN

The Consolation Handicap at the Grand American, June 30, was won by JAS. T. ATKINSON, score 99 out of 100, using Peters Ideal Shells. First Amateur Average at the Cincinnati Tournament, Sept. 19-21, won by R. S. RHOADS, using Peters Shells. First General Average at the Indianapolis Tournament, October 9-10, won by L. H. REID with the phenomenal score of 392 out of 400, using Peters Factory Loads.

THESE RECORDS SPEAK FOR THEMSELVES. COMMENT IS UNNECESSARY.

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1905.

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES TO CLOSE MONDAY, DEC. 4, 1905.

ONLY \$2 TO NOMINATE MARE.

\$4250 for Trotting Foals. \$1750 for Pacing Foals. 8 00 to Nominators of Dams of Winners
and \$200 to Owners of Stallions. Money Divided as Follows:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner
of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner
of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot
when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner
of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner
of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace
when Mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate Mare on December 1, 1905, when name, color, description of Mare and Stallion bred to must be given. \$5 May 1, 1906. \$5 October 1, 1906. \$10 on Yearlings January 2, 1907. \$10 on Two-Year-Olds January 2, 1908. \$10 on Three-Year-Olds January 2, 1909.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace. \$35 to start in the Two-Year-Old Trot. \$35 to start in the Three-Year-Old Pace. \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.
Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3) and for Three-Year-Olds 3 in 5. Distance Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead foal, or twins, or if either the Mare or foal dies before January 2, 1907, her nominator may sell or transfer nomination or substitute another Mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1905.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7000, the amount of the guarantee only. Hopples will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more monies in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

San Francisco, Saturday, November 18, 1905

DAN PATCH BROKE ANOTHER RECORD at Memphis last Saturday. For some time past his owner, Mr. M. W. Savage of Minneapolis, has had his heart set on lowering the record made by Star Pointer in 1897, when that grand stallion paced the Readville track in 1:59 1/4 without a runner or a wind shield in front, the horse accompanying the son of Brown Hal being at his side or behind him during the entire mile. For eight years this record of Star Pointer's has remained the fastest for a harness horse at that way of going. Several times this year Dan Patch had tried to lower it, but until last Saturday the best he could do was to equal it. Mr. Savage kept Dan at Memphis, however, and waited for a favorable time which was offered Saturday. Conditions were ideal, there being no wind to speak of and the temperature and track being just right for a horse that was to be sent against a world's record. It has been the opinion of horsemen that when all the conditions were right the mighty Dan Patch would be able to pace a mile better than 1:59 1/4 out by himself, his record of 1:55 1/4 with a runner in front leading to this conclusion. But few thought he would be able to clip a second and a quarter from Star Pointer's time, but he managed to accomplish this wonderful feat, although the dispatches report that he was very tired at the finish. He was driven by Hersey who certainly should be given credit for being one of the best trainers, conditioners and drivers in the country, as he has handled Dan Patch in a manner that reflects nothing but credit on his abilities. The first quarter of this last and most wonderful performance of Dan Patch was made in 30 seconds, the second in 29 seconds, the third in 29, and the fourth in 30 seconds. He was accompanied by two runners, but neither was permitted to race in front of him any part of the mile. He was tired at the finish, but within twenty minutes after could have repeated his performance. Dan Patch now holds about every world's record for a pacing horse.

MANY PERSONS ARE AFFLICTED with a craze for riding at a high rate of speed at any place and at any time that suits their convenience, no matter whether it interferes with the rights or convenience of others. Some of these people drive horses, and others ride in automobiles, but they are all of that class who have little or no respect for law or the comfort of their fellows. If they feel like riding at a high rate of speed, it makes no difference to them whether they are on a country road or a crowded city thoroughfare, the horse is put to his limit or the throttle of the machine is pulled wide open and they dash wildly in the direction they wish to go, without caring a continental whether there is anybody or anything in their path. "Get out of the way or get run over" is their command, and happily for them the majority of people give them the road and only utter a mild protest. There should be a united effort on the part of all citizens to see that the laws limiting the speed of vehicles on public roads is strictly enforced. There are race tracks and other places where those who desire to test the speed of their horses or vehicles can indulge in the sport to their hearts' content, but the public thoroughfares are not the places for racing. Magistrates can do no better service to their constituents than making the fine for exceeding the speed limits a heavy one in every instance. There have been a half dozen deaths in the past two months in this State of persons who were run down by automobiles. No punishment that we have heard of has been or will be inflicted on the parties who were driving the death dealing machines. An American millionaire recently ran over and killed a person in

France. The killing was not intentional, of course, but the speed law had been violated and the millionaire not only had to pay a heavy fine but go to prison for a time. To the discredit of the State Department of the United States of America, an effort was made to induce the French authorities to refrain from inflicting the punishment of confinement on the millionaire law breaker, but to the credit of the French government the request was denied. There is no place where people should respect the majesty of the law any more than on the highways, and a crusade against violators of the rules of the road could be started at the present time with much propriety.

JOTTINGS.

THE GRIEVANCE OF JOHN GILMER SPEED has been printed in book form by McClure, Phillips & Co. of New York, under the title "The Horse in America." Mr. Speed's particular grievance, which he airs to the fullest extent in this volume, is the American trotting horse, and he attacks it with all the fierceness and nearly as much judgment as Don Quixote displayed when making his famous onslaught against the windmill. I have read Mr. Speed's work from cover to cover and can not rid myself of the idea that it has been prepared as a brief to advocate the purchase of Mr. Randolph Huntington's stock of Clay-Arabian horses by the United States Government. The frequent statement made in the volume that it is a great pity the Government has not taken over all of Mr. Huntington's horses "so as to perpetuate this new and useful type" is my reason for classifying this work as a brief. The frequent assertion that there is a large demand for the type of horses Mr. Huntington has been breeding, coupled with the further statement made on page 145 that Mr. Huntington "produces with an absolute certainty" two classes of as admirable horses as Mr. Speed has ever seen, would cause the average man to wonder why Mr. Huntington should not be able to endow a farm to perpetuate this wonderful breed of horses, and immortalize his name, with the money received from the annual sales of his stock. Surely a man who can produce "the highest type of horse" with "absolute certainty" need not appeal to anybody, not even a government, for pecuniary assistance. Mr. Speed's book reads in many other ways like the argument of a lawyer in a bad case—he abuses the other side. His scoffing at the evidence on which the breeding of Hambletonian 10 is established, and his blind acceptance as eternal truth of evidence not half as authentic, but which he claims settles the breeding of other horses, makes it bear these ear marks. The best parts of Mr. Speed's volume are those in quotation marks. There are several accounts of old time races copied from early writers on turf matters that are very interesting. While the volume costs a dollar and a half, I advise every man who can spare the money to purchase and read it. After doing this get the issue of the American Horse Breeder of October 17, and read Arthur Caton Thomas's review of it, especially that portion of it which deals with the Arabian horses that Mr. Speed calls the Nejdee. It is about the most entertaining thing in contemporary horse literature. Mr. Thomas's criticism was the only thing needed to make Mr. Speed's book one of rare humor, and it has accomplished this to a certainty.

ROSE DALE STOCK FARM SALE.

A very large crowd filled the Chase Pavilion at 1732 Market street last Tuesday evening on the occasion of the Rose Dale Stock Farm sale. There were a number of ladies in attendance and several were bidders. The sale was a success in every way. The stock was not in the best of show shape but sold readily at an average of \$134, which was more than was expected. The sales were as follows:

Bay gelding, five years old, by St. Whips, dam by Daly, \$90.
Bay filly, two years old, by Washington McKinney, dam by Daly 2:15, \$100.
Bay gelding, five years old, by St. Whips, dam by Daly, \$110.
Chestnut mare, seven years old, by Daly, dam by Steinway, \$135.
Brown gelding, two years old, by Washington McKinney, dam by Steinway, \$145.
Chestnut mare, eleven years old, by Daly, dam by Milton Medium, \$100.
Chestnut filly, four years old, by St. Whips, dam by Daly, \$85.
Bay mare, eight years old, by Daly, dam by Alexander, \$95.
Brown gelding, three years old, by Washington McKinney, dam by Alexander, \$140.
Gray gelding, five years old, by Daly, dam by Eugene Casserley, \$130.
Dick 2:28 1/2, bay gelding by St. Whips, dam by Daly, \$280.
Chestnut filly, yearling, by Washington McKinney, dam by Daly, \$70.

Bay gelding, three years old, by Washington McKinney, dam by Digitalis, \$150.

Bay gelding, three years old, by Washington McKinney, dam by Daly, \$200.

PONY RACING FOR CHARITY.

The officials of the California Polo and Pony Racing Association have come to the aid of another worthy charity. They gave a successful meet recently at San Mateo for the Armitage Orphanage and are now preparing one for the benefit of the Youths' Directory, to be held at Ingleside race course. The directory receives neither city, county nor State aid, but depends for support on voluntary contributions. The races will all be interesting and will present the sport in its highest class.

The feature of the first day's card will be the return match at half a mile between Rudolph Spreckels' Uctma and Charles W. Clark's Midlove. On the second day the features will be the race for ponies nominated by ladies. The nominator of the winner will receive a gold bracelet and the nominator of the second a gold brooch. The rider of the winner will receive a silver cup, while the last man in will be rewarded with an alarm clock. The list of events follows:

Thursday, November 30—Two furlongs, top weight 165 pounds, 2 pounds allowed for each 1/4-inch under 14 hands 2 inches; prize cup or purse, value to the winner \$25, to the second \$15.

Four furlongs, match race, C. W. Clark's Midlove, 148 pounds, vs. Rudolph Spreckels' Uctma, 144 pounds.

Five furlongs, for non-winners of more than one race this year, top weight 155 pounds, 3 pounds allowed for each 1/4-inch under 14 hands 2 inches, non-winners of a race allowed 5 pounds additional; prize cup or purse, value to the winner \$25, to the second \$15.

Three furlongs, top weight 160 pounds, 2 pounds allowed for each 1/4-inch under 14 hands 2 inches; prize cup or purse, value to the winner \$25, to the second \$15.

Four furlongs, top weight 155 pounds, 3 pounds allowed for each 1/4-inch under 14 hands 2 inches, non-winners of a race this year allowed 5 pounds additional, maidens 7 pounds, beaten maidens 10 pounds; prize cup or purse, value to the winner \$25, to the second \$15.

Six furlongs, top weight 150 pounds, 2 pounds allowed for each 1/4-inch under 14 hands 2 inches, maidens allowed 5 pounds additional, beaten maidens and non-winners this year, 5 pounds; prize cup or purse, value to the winner \$25, to the second \$15.

Saturday, December 2—Two furlongs, handicap; prize cup or purse, value to the winner \$25, to the second \$15.

Five furlongs, handicap; prize cup or purse, value to the winner \$25, to the second \$15.

Three furlongs, the ladies' plate, the ponies in this race to be nominated by ladies, top weight 155 pounds, 2 pounds allowed for each 1/4-inch under 14 hands 2 inches, previous winners at this meeting to carry 5 pounds extra, beaten maidens allowed 5 pounds; prizes, to the nominator of the winner a gold bracelet, to the nominator of the second a gold brooch, to the rider of the winner a silver cup, to the rider of the last pony an alarm clock.

One mile, top weight, 150 pounds, 2 pounds allowed for each 1/4-inch under 14 hands 2 inches, maidens allowed 4 pounds additional, beaten maidens and non-winners this year 6 pounds, previous winners at this meeting to carry 5 pounds extra; prize cup or purse, value to the winner \$25, to the second \$15.

Two furlongs, the consolation scramble, an owner's handicap, minimum weights 130 pounds for ponies that have started and have not won at the meeting, entrance free; prize cup or purse, value to the winner \$25, to the second \$15.

The last mail from Australia brought the news that the Allendale Stock Farm Company of Melbourne has suffered a great loss through the mare, Edna Patch by Dan Patch 1:55 1/4 slipping her foal by Star Pointer 1:59 1/4. This mare was purchased this year in America and shipped to Australia, and had the foal lived it would probably have been the only one in Australia that inherited two-minute speed from both sire and dam.

Jackson's Napa Soda untangles the feet.

SECOND PAYMENTS IN STANFORD STAKE.

Secretary Lindley of the State Agricultural Society reports that fifty-four colts and fillies have had second payment made on them in the Stanford Stake of 1907, for trotting foals of 1904. This stake is to be trotted at the California State Fair in 1907. Following is a list of owners, and the foals on which the second payment has been made:

Clem R. Arques' br. c. Dixielight by Searchlight-Dixie.

Clem R. Arques' blk. c. Sprylight by Searchlight-Spry Ruth.

GOOD ENTRY LIST FOR PHOENIX MEETING.

Phoenix, Arizona, Nov. 11, 1905.

Breeder and Sportsman—I enclose list of entries received to our stakes, which closed on the 1st inst. We think it makes a pretty good showing for a new enterprise. We are particularly lucky in the number and class of entries to our free-for-all pace. The Los Angeles Association received four entries to this class, whereas we received twelve, a possible nine of which can start. In view of such a fine list, we have decided to give a \$500 special for 2:03 pacers, thus affording the free-for-all pacers an opportunity to start twice during the week.

Our 2:22 and 2:10 trots failed to fill, and they have been declared off. We have also changed the 2:25 trot to a 2:24 class, and the 2:15 trot to a 2:14 class. You will also notice from the daily program for purses, which close on the 23d, that we have made some slight changes in the order of races—the changes being designed to give those desiring to start their horses twice during the week a little more time between races.

Everything at our grounds is progressing rapidly to completion, and our tracks are getting to a feather edge. All the trainers working here agree that our mile track will compare very favorably with the best in the country, and that by the time our meeting opens our track will be as fast as the fastest. There are over sixty horses now on the grounds, and we are rushing the work on sixty extra stalls, which will be ready in a few days. The horses are being edged up a little, and there were quite a number of miles well below 2:15 this week. Florence Wilton has paced a mile in 2:09½, and Billings, Col. Green's three-year old, has paced one in 2:11¼. A farmer from out in the country made the boys open their eyes a little last week by bringing in a green young pacer that had never been trained, and driving him a quarter in 30¼ seconds, the first time he ever was on a track.

Arrie Frost arrived from Albuquerque, N. M., this week, with eight head, among them being Stranger O. 2:08¼, Young Hal 2:10¼, Helena Morgan (3) 2:14¼, and a promising Zolock colt. Arrie expressed great surprise when he arrived at finding such a fine plant here, with such good tracks. One feature of our plant that some trainers find very advantageous is having a good, regulation half-mile track in addition to the mile track. This enables horses to be worked and prepared for campaigning over the one or two-lap rings next season.

We are going to send a personal representative over to Los Angeles to look after the details of providing for shipping horses over here at the close of their meeting, and the railroad companies have agreed to give us a rate of one-way charge for the round trip on horses from Los Angeles, which will make it only cost about \$20 per horse for the round trip, and to make the run in twenty-four hours or less. We are now arranging with the Arms Palace Horse Car Company to furnish palace cars enough to accommodate all the horses that are to come over. We will also have a one-fare round trip passenger rate from Los Angeles to Phoenix for the fair.

Yours very truly,

W. N. TIFFANY,
Superintendent of Speed.

List of Stake Entries.

Stake No. 1, 2:35 trot—Sonny J., Peggy Arnett, Mormon, Arizona Bess, Miss Boydello, Boralmas Brother Jessie Mc, Edmon S., Helen Dare, D. E. Knight.

Stake No. 4, 2:30 pace—Sally Pointer, Bystander, Loganette, Fearnot, Hattie Croner, Sweetheart, Pointer Star, Sullivan, Billings, Colonel Green, Florence Wilton.

Stake No. 5, 2:17 pace—Billy A., Bystander, Loganette, Silk Twist, Fearnot, Hattie Croner, Dot, Sullivan, Surprise, Paul D. Kelly, Florence Wilton, Billings, Colonel Greene, Cobre Grande.

Stake No. 6, free-for-all pace—Billy A., Sally Pointer, Custer, Nance O'Neil, Vision, Hazel Patch, Stranger O., Zolock Florence Wilton, Billings, Daedalion, Kelley Briggs.

Stake No. 7, two-year-old trot—Rachella, George, Arizona McKinney, Oaks Murphy, Senor Della, Willie Amber, Otto Sarony, Signet, Delta J., Ed. J.

Stake No. 8, yearling trot—Rosaline, Senator Tirzah, Prince Willmar, Victor Oh So, Yedrel Russell, Mayo El, Del So, Prize Oh So, Nanoso, To-Go, Bonita, Malho, Moqui, Navajo, Sombra Vista, Jane, Colonel Roundtree, Marguerite, Frosty, Mary Anne, Chiquita, Dulcie, Valley Star.

Stake No. 9, two-year-old pace—Winnie, Pickles, Gipsy Queen, Lad, Montrose, Sirius Beauty.

DEATH OF WILLIAM MCGRAW.

One of the old-time trainers and race drivers of California crossed over the great divide when William McGraw died at Vallejo one day last week. For twenty-five or thirty years Mr. McGraw was a prominent trainer and driver on California tracks and took part in some of the greatest contests ever seen on the Pacific slope. He owned, trained and raced that well-known trotter Silas Skinner 2:17, also the well-known mare, Lilly Stanley 2:17½, now a member of the Great Brood Mare list. For a number of years he conducted a livery business in Napa, and while there trained and raced Lilly Stanley for Frank and Nathan Coombs, and became the owner of Silas Skinner. He moved from Napa to Santa Rosa, where he placed Silas Skinner in the stud, and resided there several years. For a number of years past he resided at Vallejo, having returned to his trade of blacksmithing and holding a position in the Navy Yard. While residing at Vallejo he took a McKinney gelding to drive on the road and train at the trot for Prof. E. P. Heald of San Francisco. This gelding began to show speed and was sold a few months ago to Mr. J. W. Zibbell & Son of this city, who raced him successfully this year under the name of Adam G. He took a record of 2:11¼ in a winning heat and is considered one of the greatest prospects now in California. Mr. McGraw was a born horseman, and in his younger days was reckoned one of the leading trainers on the coast. For several years previous to his death he was in poor health, but continued at his work at the Navy Yard until a few weeks ago. He leaves to mourn his loss an invalid wife and a son and daughter.

There are only about twenty horses and young colts and fillies catalogued for the Woodland Stock Farm sale to be held at Fred H. Chase & Co.'s next Tuesday evening, but they are choice ones in looks as well as breeding. This is the first of annual sales which are to be held by this farm, and are expected to make a reputation for the farm if they are trained and raced.

A NOTABLE SALE.

Will G. Durfee, the well-known Los Angeles trainer, makes the extraordinary announcement that at Agricultural Park, Los Angeles, on Friday morning, at 10:30 o'clock, during the big harness meeting to be held there next week, he will offer for sale at auction, the following horses:

Jupiter B. 2:12 by Gen. Beverley, Bellemont (3) 2:17½ by Zombro, Cuate 2:17½ by McKinney, Helen Dare, trial 2:15 by Zombro, Great Peter, pacer, trial 2:11¼ by Peter the Great, Lee Burns, pacer, trial 2:12¼, and a number of other promising young horses.

Here is an opportunity to get some rare good ones, in training and all ready to step on the road or race next year, and at your own price.

While Jupiter B. 2:12 and Cuate 2:17½ are not owned by the same parties, Mr. Durfee has had them hooked together and believes they will make the fastest team of pony trotters in the world. They drive like one horse and could show a 2:10 gait together the first time hooked up. They do not pull a pound, need no boots and are absolutely sound. Either can beat 2:10, and will be good in their classes on any circuit.

Bellemont, the three-year-old Zombro filly is a grand prospect and a royally bred one. She won the two-year-old trotting division of the Breeders' Futurity last year, and was second to North Star in the Occident Stake this year. She was short of work when she started in the last named stake and recently worked a mile in 2:11¼ at Los Angeles, showing her to be one of the very fastest three-year-old trotters of 1905. She is out of a mare by Altamont, and is one of the best bred fillies on the Coast. She can show a mile in 2:10 and is one of the best prospects for a Grand Circuit winner.

Lee Burns is a five-year-old green pacer by Bobby Burns, first dam by Red Wilkes, second dam by Nutwood, and can step a quarter in 30 seconds any time. He is very steady and goes without hoppers.

Great Peter is one of the grandest bred horses in California. He is by Peter the Great 2:07¼, sire of the great Sadie Mac, and is grandly bred on his dam's side. He is extremely speedy, having shown a trial of 2:11¼, and is a most beautifully turned young horse with one of the richest colored coats any one ever saw.

Helen Dare is a green trotter by Zombro and considered by competent judges to be one of the best in Southern California. She is very handsome and a perfectly gaited mare and trotted the last three-quarters of a mile in 2:15 in 1:39¼, showing that she has gameness as well as a high rate of speed.

There will be many horsemen in Los Angeles next week to attend the harness race meeting, and none should miss this opportunity of attending a sale where sound horses with known speed are to be sold. The sale will be held in the forenoon of Friday, beginning at 10:30.

GET A STAKE WINNER FOR 1907.

A brown colt, a foal of 1904, by Nushagak, dam Addie B. by Dexter Prince, second dam Addie W. by Whips, third dam Addie, dam of Woodnut 2:16¼, etc., and grandam of Arion 2:07¼, by Hasbrouck's Hambletonian, fourth dam by Harry Clay, will be sold at the Woodland Stock Farm sale in this city next Tuesday evening. The owner says: Individually, we do not believe there are many finer colts in California. He is large, smoothly turned and looks like a trotter. Is good-headed and good-gaited, and while he has had no regular training, gives every indication of developing into a very fast colt, as while being broken he has shown a 2:50 gait and can step close to a forty gait. His individuality, with his breeding, should make him a very desirable stallion, and his stake engagements being added, he should be a desirable piece of property. When led into the sale ring he will show for himself. His stake engagements are the Kentucky Futurity \$21,000, the Hartford Futurity \$10,000, the Horse Review Stake \$10,000, the Western Horseman Stake \$7,000, the Breeders' Futurity \$7,000, and the Occident and Stanford Stake, which altogether will aggregate \$60,000.

John Splan has purchased for \$12,000 the trotting stallion Harrison Wilkes for export to Europe. The Review says: Harrison Wilkes is probably one of the best horses that Splan has yet sent abroad. He is a brown stallion by Brignoll Wilkes 2:14¼—Bertha James, by Dictator, and at the beginning of 1905 had a record of 2:21½. He was raced at the early mile-track meetings in New England, winning regularly and taking a record of 2:11¼ over the slow track at old Saugus, which broke the record for the course. He appeared on the Grand Circuit later, and at Providence won a grand race of split heats, beating Leonardo 2:08¼ and the sensational Deloree 2:09¼, and lowering his record to 2:11¼, in which time he trotted all three of his winning heats. He finished his campaign on the half-mile tracks, his last race being two weeks ago, at Baltimore, where he won a \$1,000 stake. It was here that Splan purchased him, for a long price, for export. His complete score for the season was eleven wins in thirteen starts. Harrison Wilkes is a rarely good individual as well as a fast and game horse, and should prove a star across the pond.

A bill will be introduced in the next Congress forbidding betting at the Bennings track, which is in the District of Columbia. The track is owned by August Belmont and is a member of the Jockey Club. Two meets in a year are held on the track, one in the early spring and the other in the late fall. The bill, if passed, will close the track, as running races cannot exist without betting.

Sober up on Jackson's Napa Soda.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

The local winter racing season of 1905-1906 began most auspiciously last Saturday at Emeryville. The weather was delightful, the card offered decidedly "classy," the contests very exciting in four of the six events. Eight thousand attended the races, notwithstanding the Stanford-California football game was down for decision the same afternoon at Palo Alto. Twenty bookmakers drew positions in the big ring, and there were besides three field books and one combination. Barney Schreiber's broad Teutonic phiz loomed up prominently on a booky's block after an absence of a year and Joe Harlan looks to have gained fifteen or twenty pounds through his long hunt in Wyoming for big game. The public began picking winning wagers at once, and J. O. Keene, who cut in as a bookmaker, lost with such regularity, that he retired and decided that the galloper's barn was a more pleasant spot than the big draughty betting ring.

The first winner of the season was Zeke Abraham's bay Belvedere filly, Miller's Daughter, and she put a lot of the best quality of flour in Zeke's barrel by not only winning, but winning at odds of 25 to 1, in a very busy finish by a neck, Dod Anderson being second, a nose before Potrero Grande. This was certainly a clever way to start the ball a rolling, even if the favorite did finish fifth. Watercure evened up matters for the brainy burners of midnight gas by winning the second race with all the ease and much of the speed for which he was famous five or six years ago, for he it known that the Watercress gelding has reached the good old horse age of nine. I'm Joe surprised many by winning the third in slow time at odds of 10 to 1, Loyal Front, favorite, finishing fifth, and F. W. Barr, second choice, bleeding and being pulled up. San Nicholas, the black Bakersfield-bred gelding by the dead Reggie, dam Virginia Dare, by imp. Darebin, running with 109 pounds in the colors of P. Ryan, with W. Davis in the saddle, and at odds of 6 to 1 in the betting, made every post a winning one in the Opening Handicap, worth \$2450, to the winner. At the sighting rod his margin over the fast coming High Chancellor (also at 6 to 1) was but a head, while Tern's Rod (40 to 1) wound up third, half a dozen lengths back. Proper, the 3 to 5 favorite in the race was caught at the barrier at the start, and would not thereafter extend himself, being an inglorious sixth in the thirteen-horse field at the finish. Cruzados, off right foot first, Tocolaw away sixth and Beareatcher all but left, was the order at send-away time in the fifth event. As a result Baldwin's bay beauty, Cruzados experienced no pain in pulling off the big end of the purse, which he did in the splendid time, track considered, of 1:13½. Tocolaw second, a little over half a length before the unfortunate Bearcatcher, who would undoubtedly have given Cruzados a clever argument if off on good terms with the Californian. Reservation, a 9 to 10 favorite, got home first by a scant neck in the last race, mile and a sixteenth, while Lady Goodrich beat Hugh McGowan a length for second money. McBride rather carried off the riding honors of the afternoon, with one win and two seconds to his credit. Radke, the boy who cut a wide swath in the Middle West this season, his first as a rider, made his bow to the public on San Primo, who was a fair fourth in the first race. Aubuchon, Rice, Goodchild, Davisson, Schade, young Battiste and E. Robinson, also new to the local racing public, made their first appearance here. W. Smith rode a nice race on Watercure, Loague likewise on Miller's Daughter, while Willie Davis had to do his prettiest to land the principle event with San Nicholas.

* * * * *

The features of Monday's racing (which was fully up to Saturday's standard of excellence) were the wins of Avonalis, Judge Denton and Cloudlight, at very pleasant prices for the investors; Epicures good showing in the seven furlongs, High Chancellor's splendid performance in the mile and a sixteenth purse, which he won in a gallop in 1:46¼ with 112 pounds on, and the Lady Rohesia's decided improvement in the last race, which she won by four lengths with utmost ease. Radke rode his first winner on Molera and Joseph's Bright Phoebus filly, Cloudlight, and Aubuchon had the mount on The Lady Rohesia. Avonalis, the black filly, that won the first race, is by imp. St. Avonicus, the St. Simon horse owned by the late Charles L. Fair and later the property of the late Caesar Young. It looks as if the good looking horse would get plenty of speed, and the St. Simons have the faculty, generally, of "going on." Judge Denton and High Chancellor, winners of Monday, were owned by Louis A. Bonsack, the young St. Louis turfman, who seems to have his flyers in first-class shape. Washington, as black as the proverbial ace of spades, had the mount on Judge Denton, who was at odds of 12 to 1. The Judge had to be hustled hard to beat Ed Lilburn out. Lilburn is an own brother to Cloudlight, winner of the fifth event of the day.

Tuesday's racing was very good, the finishes in three of the six events being exceedingly close. The sensation of the session was Succeed's success at odds as good as 40 to 1 (30 at the close). McBride got the Blalock filly off well on her stride, and Silver Sue could never collar her. Isolation was a poor favorite in this race. Royal Rogue woke up and showed his old time speed by beating Titus by a head in 1:07½ for five and one-half furlongs, Duelist (30 to 1) third. Titus had been played from 5 to 1 down to 8 to 5,

and the bookies thus had a very "narrow squeak." Princess Titania, well-played in the fifth, got away flying and landed by less than a length from the Schreiber horse Deutschland, a 20 to 1 shot, while Tocolaw, the favorite, was a poor third under a poor ride from Minder, who also showed to poor advantage on Hugh McGowan, favorite in the last event, won by Lady Goodrich in clever fashion.

C. C. McCafferty arrived early in the week from Latonia with the local idol of the turf, Dr. Leggo, Delagoa, M. A. Powell and others with winning ways. The Doctor is declared to have "rounded to," and if so, no horse on the local scene can take his measure.

Tommy Griffin's big six string should reach Emeryville about Monday, as he left Aqueduct Wednesday night.

John F. Schorr and wife arrived from New York last Sunday night. Mr. S.'s good horse Ananias went lame and he had very poor luck all around, it is said.

Next week we should see Bullman, Taylor, Joe Kelly, and Ralph Murphy in the saddle. The latter is under contract to Billy Roche, can "do" 105 pounds, and is a clever rider who has "made good" wherever he has ridden.

The excellent jockey, Frank Prior, who has been under contract to 'Boots' Durnell for the past two seasons, is now under Billy Cross' management. Prior can "do" 109 pounds.

W. O. B. Macdonough has just purchased a fine filly by Compute (son of the great Hanover and the famous racer and producer Reckon) out of a mare of the Bend Or family. She should be immensely valuable in the stud, as the Hanover and Bend Or blood has been "on top" in America for many years past. Hanover led all our stallions for four seasons, while imp. Ben Strome by Bend Or, led in 1903.

Harry Robson's horses, also those of E. L. Fitzgerald, arrived last Tuesday. In the Robinson string is Eduardo (a rare good one), Lid Silver, McGinnis, Youth, Ada N., and Pierce J., the last named too well known in these parts. Mr. Fitzgerald owns Pentagon, Sand and Mildred Grist, the first named two being good winners on the Canadian circuit.

Walter Adams, a clever jockey, is a late arrival from the East. He rides at about 110 pounds.

Mrs. Garnett Ferguson has named a fast yearling filly by St. Simonian from a Spendthrift mare Tetraxini, in honor of the great opera singer.

Charles Kerr, the Bakersfield breeder, saw San Nicolas, a horse of his breeding, win the Opening Handicap Saturday. The Kerr yearlings by imp. Kismet, Herald and Cromwell will probably be sold here shortly.

E. J. ("Lucky") Baldwin is lying in a darkened room at Lane Hospital, this city, and it is feared that he will lose his eyesight completely within the next month. Mr. Baldwin was one of the first men to ever send a string of race horses from California to the eastern side of the Rockies to battle for the coin, and for years his string cut a big figure on the turf of this country, East and West. He is even now the owner of the largest string in the West, having close to fifty horses in training at this time. When Grinstead was at the height of his glory as a sire, Mr. Baldwin was second as a breeder to no man in America. At Santa Anita, a principality in Los Angeles county of over 50,000 acres, he bred Volante, Santiago, Silver Cloud, Gano, Wheel of Fortune, Cleopatra, Grismer, Lucky B., Rey El Santa Anita, Mission Belle, Goliah, Rey del Carreres, Cruzados, Santa Ana, and many others, and he campaigned Los Angeles and Miss Ford, two of the greatest race mares in turf history, also the Champion Emperor of Norfolk.

THE HORSE'S TEETH AFTER EIGHT YEARS.

After the age of eight years the evidence which is afforded by the wear of the incisor teeth is much less definite and trustworthy than it is prior to that age, and an opinion has to be based on general observation, and in any case is not supposed to be absolutely accurate. The expression "about nine," or "nine or ten years old," will be used very frequently, and sometimes a good judge will decline to be limited to a year or two in cases where the conditions of the incisor teeth indicates that they have been subjected to exceptional wear from crib biting or some other cause.

At nine years old the marks in the ventral incisors, which at eight years are triangular, become more rounded in form, and are nearer the posterior boundaries of the teeth. The corner incisors are still more square than they were a year before, and the tusk is conical and blunted.

At nine years old the marks in the central incisors, are commonly reduced to small round spots and are quite close to the posterior edges of the teeth, which are beginning to assume the triangular form.

As a matter of fact only the upper corner incisors need be consulted for evidence of age, from ten to thirty, and the only mark to be looked for is a dark line or groove which commences to appear on the outer surface of each top corner incisor immediately below the gum, at ten years of age.

Careful observation of the upper corner incisors at ten years old will reveal the presence of a slight depression extending from the edge of the gum downwards about an eighth of an inch. This depression is really the end of a groove which exists in the fang of the tooth, and it is brought into view by the growth of the tooth, and the decrease in the depths of the color cavity in which the tooth is lodged.

As these processes go on, year by year, more of the groove is seen, while the constant wear of the cutting surfaces of the incisors bring them nearer to the groove, and in about eleven years from its first appearance, it reaches from the gum to the cutting edges

of the incisors. At the same time it will be seen by a close inspection of the top of the incisor, close to the gum, that the groove is at an end; there is, in fact, no more of it to appear. The further growth of the tooth will expose the perfectly smooth surface of the fang and the combined effects of the wear at the bottom and the growth from the top will finally lead to the obliteration of the groove entirely.

This system is really the only method of judging the age above ten years worthy of consideration. But it is quite certain that to use the system effectively, experience on an extensive scale is necessary. Clearly success depends entirely on keen observation of the condition of the groove in the corner incisors in reference to the gum at the top of the tooth, and the cutting surface of the bottom. The whole length of the tooth must be mapped out in imagination and a certain length of groove marked for every year, thus allowing ten years for the groove to reach the whole length of the tooth. The fact of it having reached the middle of the tooth will be evidence that the age is about fifteen or sixteen. If the tooth be divided into four equal parts the extension of the groove to the first line will mean between twelve and thirteen, and to the third line between seventeen and eighteen years of age.

In adopting the foregoing descriptive method the observer is left to exercise his ingenuity, and it is a very interesting inquiry when an aged horse whose age is known to the owner comes under observation. It will be seen that no special skill is required in the application of this test. It is not necessary to secure the horse in any way or even to open his mouth. The corner of the upper lip must be raised sufficiently to bring the top corner incisor into view. The rest is a mere matter of calculation.

When the groove has reached the bottom of the incisors and the horse has obtained the ripe age of twenty-one years further observation must be directed to the top of the groove. Certain exceptions to the normal development of the teeth and some irregularities and accidents may be expected to occur during the period of temporary and permanent dentition, and from time to time various degrees of constitutional disturbance will be observed, which are, however, invariably referred to other causes, or left without any explanation. The process of "teething" in the human being is always estimated as having an important bearing on the health of the sufferer, but there is a novelty in the idea that horses or other of the lower animals experience any inconvenience from the eruption of, or changes in, the teeth, although it is known that these changes take place on a much more extensive scale than they do in the higher animal.

During the third year of a horse's life twelve new teeth, eight molars and four incisors, are cut, and in the course of the fourth year there are sixteen new teeth, four incisors, eight molars and four tusks, which are all advancing at the same time, causing, as a matter of necessity, considerable irritation and requiring more attention than is ever given during these periods.

It is surprising that no investigation has been made into the diseases which are incidental to the process of teething in the horse and it is not, therefore, possible to refer to any specified disorders which are met with during the third and fourth years; but irregular appetites, refusal of certain kinds of food, dropping half masticated food (quidding) from the mouth, cough and sore throat, "lampas," and general loss of condition may quite consistently be referred to irritation and fever induced by cutting the teeth.

Disease in the structure of the teeth, so common in man, is rare in the horse, but not unknown to the observant veterinarian who has looked for it. Injury to the fang of a molar in the bottom jaw has led to the formation of arcolar abscess, which has defied all kinds of treatment, because the real nature of the disorder has not been suspected and a dead tooth has been allowed to remain in its cavity.

One of the most disastrous accidents which can happen to a horse's teeth is the loss of one of the molars from any cause, when the occurrence has not been observed. The result is the growth of the tooth which formerly came in regular contact with the absent one, but it is now unchecked by any persistent pressure, and therefore continues to grow until it prevents proper closure of the mouth and renders mastication impossible.

The real difficulty in regard to dental irregularities is the frequent absence of any suspicion on the part of the owner of the horse out of condition as to the cause of the derangement being in any way connected with the teeth, and his consequent neglect to call in veterinary assistance.

W. R. GILBERT.

John Shepard, the Boston amateur reinsman, thought the ownership of Ethel's Pride 2:06¾ brought the fullest measure of pleasure when she won the Transylvania, but recently he found out that this was not so. He went out to the Readville track, hooked the daughter of Directum up with Promise 2:10, and discovered that he had a perfect pole horse in his latest purchase. Then he hitched her to a single wagon to give her a slow mile. Going up the back stretch the temptation to step her a bit was too much and he clucked at her and she was off like a quarter horse. At the six-furlong post he snapped his watch and stopped it when he reached the wire. The timer showed 29¾ seconds, which he could hardly believe was correct until one of the rail birds shouted "I caught that last quarter in 29 seconds."

At the auction sale at Glenworth Stock Farm, Burgin, Ky., saddle bred horses made high prices, weanlings selling at \$120 to \$357.50, yearlings at an average of \$225, and brood mares around \$360.

NOTES AND NEWS.

Sweet Marie 2:04½ will be wintered at Alta McDonald's stables near Island Park, Albany, New York.

The list of standard performers of Axworthy 2:15½ has received eight additions the past season, all trotters, and three of them are two year olds.

Harold Dillon, the son of Sidney Dillon, now owned in New Zealand, is very popular with breeders there, as his book for the season is already full.

Don't overlook those colts and fillies by Prince Ansel (2) 2:20½ that are in the Woodland Stock Farm sale catalogue. Prince Ansel was one of the greatest colt trotters ever bred in California and is siring fast ones himself.

Thomas S. Denham, known all over the country as "Race Track Jack," died recently at Glenville, Ohio. He was the caretaker of the Glenville track for many years, and had few equals in putting a track in condition for fast time.

It is now said that Detroit will open the Grand Circuit as usual, but no matter what dates the Michigan city selects. Libertyville, Ill., will take the week preceding, and hence will really open the circuit if the association is not a member of the big ring.

Secretary Henry Wade, of the Canadian Horse Breeders' Association, has been requested by the Canadian Live Stock Commissioner to start a register for thoroughbred and standard bred horses. Mr. Wade's idea is to work with the American Stud Book and the American Trotting Register. In other words, he does not propose to set up a Canadian Stud Book for these breeds, but will start a register for them. The Ontario Jockey Club has been keeping a register of foals in Ontario, but Mr. Wade proposes to embrace a wider area and take in the whole of Canada. This will doubtless be one of the chief topics for discussion at the next meeting of the Canadian Horse Breeders' Association.

South 2:17¾ will be McKinney's companion in the stud in 1906 at the Empire City Farm. He is by Prince of India 2:13¾, (son of Baron Wilkes 2:18), dam Amayllis by Director 2:17, second dam Maud S. T. by Governor Sprague 2:20½, third dam Belle Patchen, fourth dam Sally Chorister by Mambrino Chorister, fifth dam by Blood's Black Hawk, sixth dam by Moore's Pilot, son of Pilot Jr.

The sale of the Billings horses marks the retirement of Mr. Billings from the matinee turf for a year and possibly two. The report which was sent out from New York last summer that he was to forsake the harness horse for motor vehicles he did not consider worth denying, but before he sailed for Europe he remarked that after his European business was finished he would come back and stock up with a fresh lot of trotters and pacers. Every patron of the turf is hoping that he will then take up professional racing, and many look for him to do so and think he will find the entering wedge the futurity engagements of the John A. McKerron colts, which he will raise from such mares as Lucille, Mazette, Imogene, Louise Jefferson and Lou Dillon.

The pavilion on the grounds of the Dixon Driving Park was burned last week. This building has been in use for the past twenty years for exhibitions, etc., during the fairs and race meetings held at Dixon. The building will probably be rebuilt.

Mr. C. C. Oliver and Dr. F. N. Folsom of Forestville, Cal., have purchased the stallion Silas Skinner 2:17, the hero of many a hard fought race on the California circuit in years past. This horse has been owned by Grace Bros. of Santa Rosa for several years past and has been used to a limited degree in the stud. He is the sire of Ole 2:10½ and also of the dam of Charley Belden, Mart Rollin's green gelding that is working miles close to 2:12 at Santa Rosa. He is by Alcona, Jr., dam Flora Belle 2:25 by Almont 33.

Mansfield 1358 by Messenger Duroc 106, dam Green Mountain Maid by Harry Clay 45, died a few weeks ago at Ogden Center, Mich. At the time of his death Mansfield was owned by Weth Bros. He was the sire of ten in the 2:30 list and of the dam of Direct View 2:08¾.

One of the fastest trotters seen in California in some years was the mare Daisy B. that unfortunately went wrong and did not get a fast record. Her dam Viola was by Gen. Benton, out of a producing mare by Electioneer, grandam the famous Victress by Williamson's Belmont. A three-year-old out of Viola and by Nushagak, sire of Aristo 2:08¾, will be sold at the Woodland Stock Farm sale next Tuesday evening. She has been driven some but never trained, but will trot fast, and her blood lines could hardly be surpassed for breeding purposes.

Dan Patch reduced the world's pacing record for one mile without a wind shield to 1:58 at Memphis last Saturday. This is a reduction of one and a quarter seconds from the record of Star Pointer made at Readville in 1897.

The pacer Rey Del Diablo 2:12¾, bred and raced by J. M. Alviso of Pleasanton in California for several years, but campaigned on New England tracks this season by Ben Chaboya for Tony Bernal of Pleasanton, has recently been sold to Mr. O. W. Ramsey of Rochester, New Hampshire, who will use him on the snow paths this winter.

A prominent New York horseman who attended the Chicago Horse Show and who has devoted all his life to the breeding and handling of trotting-bred horses, expresses the opinion that at least seventy-five per cent of the blue ribbon winners at the Windy City affair would prove to be strictly trotting-bred horses if their full and correct pedigrees were stated in the entry list. Many horsemen believe that this statement is true, not only for one, but for all the big shows held all over the country during every season of the year. It is a great drawback to the trotting horse breeding industry of the country that managers of the leading horse shows do not require the full breeding of all and every horse entered for competition, and thereby help the breeding public to get some knowledge as to the best method of producing high class animals.

Now that Phoenix, Arizona, has a first class mile track and will give an annual meeting in December, it may develop into a great record breaking and record making point for trotters and pacers.

Draft horses are in great demand and prices are soaring skyward. Last week a Los Angeles buyer visited Rio Vista and purchased six spans of drafters the lowest price for a span being \$550 and the highest, \$600. Good draft mares are very scarce in California and where the draft horses are to come from to supply the demand of the near future is a question hard to answer.

Mr. J. A. Jones of Springfield, Oregon, was in this city last Wednesday on his way to Santa Ana and Los Angeles, where his good mare Lady Jones is to start in the races. Mr. Jones' McKinney stallion, Captain Jones, is being much talked about at the present time by horsemen who are ranking him as one of the future great producers of speed. All his colts and fillies trot fast when trained and his list will soon be quite a large one. He is out of a Gos-

Woodland Race Track

sier mare, consequently is bred something like Zolock 2:05¾. He could be given a fast record himself and has often stepped miles around 2:20. His get are very handsome and shapely. Chehalem, a yearling by him out of the dam of Belmont 2:17½, took first prize as a yearling, and also the reserve Junior Champion prize at the Lewis and Clark Exposition.

Welcome Mac 2:12½ is a new one in McKinney's 2:15 list. He is also his seventh new performer for 1905.

Zolock 2:05¾ was bred to seventy-five mares this year.

An own brother to that whirlwind trotter Dr. Hammond 2:11¾, is to be sold at Fred H. Chase & Co.'s salesyard on Tuesday evening next after the horses from the Woodland Stock Farm are disposed of. He is a five-year-old gelding and a good one.

The three-year-old colt Billings will start at the Phoenix, Arizona, meeting in December to lower the world's record of 2:05½ held by Klatawah. This is about the hardest job a three-year-old pacer can tackle.

Down at the San Jose track Jack Groom is working a half sister to Lou Dillon 1:58½ that is a natural trotter if there ever was one. She will be five years old next spring, having been foaled April 8th, 1901. Bred at Santa Rosa Stock Farm, she was purchased by Mr. C. F. White, of Seattle, when a three-year-old, and put in Mr. Groom's hands. She is by Beau B. 2:16½, a pacer that was one of the fastest horses for the amount of work he got that was ever seen in California. Beau B was sired by Wilnut, and was out of Nettle Benton, a great brood mare by Gen. Benton. The name of this daughter of Lou Milton is Cornelia, and from the way she has been stepping since recovering from a severe case of distemper, there are prophecies a plenty that she will step in 2:10 as sure as fate.

Cuate and Jupiter B. would make one of the fastest and best pole teams of pony trotters in America. They can trot close to 2:10 hitched together, and are matched in height and gait. They are to be sold at auction at Los Angeles next Friday.

The Santa Ana meeting opened on Wednesday of this week. Oma A. by Dictatus won the 2:12 pace, best time 2:10½. Cuate by McKinney won the 2:14 trot in which seven horses started.

Boulta 2:16, winner of the 2:20 trot at Santa Barbara is picked as a high class mare that will reduce her record to 2:10 or better. She is by Knight and was bred at Rancho del Paso.

John Caldwell's race at San Bernardino was a good one. The track was at least two or three seconds slow.

A good Shire stallion, that has proven himself a good foal getter, is for sale. Particulars can be had at this office. He will be a money maker in any community where there are farm mares to breed to him.

Daedalion 2:09½ is showing himself a race horse and good judges say he will do 2:06 in another year.

The Old Glory Sale catalogue has been received and like all the catalogues issued by the Fasig-Tipton Company, is complete in every way. It contains the pedigrees of very nearly 1100 trotters and pacers to be sold at Madison Square Garden next week.

Dr. Defoe of San Jose, offers the stallion Frank Coney for sale. This horse is by Mendocino 2:19¾, sire of Monte Carlo 2:07¾, etc., and is out of Rose McKinney, the dam of Almaden 2:22¾, as a two-year-old, winner of the Occident stake of 1904. See advertisement.

On account of rain the Santa Ana meeting was declared off after one day's racing was held. The horsemen all united in a request to the management to this effect so the Los Angeles meeting, where they all had entries in \$1000 purses, would not be interfered with.

Mr. Mabry McMahon is now driving on the park roads one of the handsomest and fastest trotters that has been seen there. Birdcatcher, son of Direct, is his new purchase. He has hooked him double once or twice with his handsome pacer I Direct 2:12¾, and they pale together in fine style, although of different gaits.

Mr. C. W. Wright, who recently arrived here from Australia, left for the east last week, but will return by the first of December. He purchased the fast green mare Black Venus by Rajah at Tulare, and an own sister to Directly 2:03¾ at San Jose. He will ship these mares to Melbourne on his return from the east. They are now in the care of Mr. T. C. Cabney of this city.

On Wednesday morning when the defeat of Governor Herrick was announced and positively confirmed, every trainer and caretaker was uproariously enthusiastic over the good news. It was the first "good news" proclaimed since the gloom of the declaring off of the Grand Circuit settled over the track last spring. The news was hailed with delight, and welcomed as the first step towards Grand Circuit racing at the famous old Glenville track—American Sportsman.

The fast pacing stallion Directly 2:03¾ has three performers to his credit. They are Town Directly 2:18¾, Daffodil (2) 2:19¾, and Direct's 2:24¾. Directly is now credited with five standard performers.

S. H. Turner of Columbus, Ohio, gives out the statement that he will match Edwin C. 2:07 against any horse in New York City over the speedway before he is sold at Madison Square Garden. The match to be for twenty dinners for twenty horsemen.

The veteran trainer, Charles Marvin, has engaged to train the horses of Colonel Henry Exall of Dallas, Tex., and is making arrangements to leave Lexington, Ky., soon for his new location.

Sterling R. Holt of Maywood Stock Farm has sold to R. A. Rouse, Danville, Ill., for \$1750 a half interest in the young trotting mare Icelandic, trial 2:15¾, sister to Chalm Shot 2:06½ by Red Hart 2:19, dam Prifu. Icelandic goes to Memphis with Mr. Rouse's big string of race prospects to be wintered and trained by George Foster.

Quite extensive improvements in the way of box stalls and paddocks are being made on Mr. Whalen's Santa Rita Stock Farm at Pleasanton. An additional large water plant, supplying all the paddocks about the stalls, has just been completed.

In the heat at Santa Barbara where Welcome Mac took his record of 2:12½, the Lynmont gelding Farnot was a close second.

The 2:14 trot at San Bernardino is the longest race of the year in California. It took seven heats to decide and there were four heat winners in the race.

We regret to learn that Dr. Finlay of Santa Rosa, proprietor of the Rose Dale Stock Farm, is quite ill at his home in that city. He was unable to attend the sale of horses from his farm in this city last Tuesday and is confined to the house. His many friends hope that his recovery will be speedy and permanent.

SAN BERNARDINO RACES.

In spite of rain that fell for two days previous to the opening day, a program of excellent racing was given by the San Bernardino Driving Club at its first meeting, which opened on Thursday, November 9th, and continued three days. This meeting was made possible by the enterprise of four of the leading horse breeders of this vicinity, viz: John A. Cole, G. W. Prescott, S. B. Wright and Geo. H. Parker, associated with A. W. Bruner of Los Angeles, who is striving hard to place the breeding and racing of horses on a high level. The magnificent meeting at Los Angeles in July and this one mark a new era in the sport in this section of the State. Owing to the rain the track was heavy and slow, but was pronounced by the trainers to be the equal when in shape of any in the East. Several from the north were so pleased that they contemplate returning here to winter, the altitude being a bar to the foggy, chilly forenoons so prevalent along the ocean shore.

The program on the opening day consisted of three races, the first of which was the 2:12 class pace with seven starters. After the mare from the far north, Vinnie Mann, had taken the first heat, the Los Angeles pacer Glen won three straight heats and first money. The time seemed slow for the class of horses but the condition of the track must be considered. It was a good contest, and every man and horse seemed doing everything possible to win.

and when they appeared all necks were craned to catch a glimpse of the kings of American turf. Hazel Patch 2:02½ drew the pole. The track was sticky, and slow, but the \$700 first money and no entrance out "looked good" to the owners, and proved a great stimulant to the drivers to hurry up on the turns and stretches, and get around as soon as possible, which they did. Hazel Patch won, time 2:08 flat, with thousands of eager eyes watching every motion. They got the magic word "Go" on the third score. Hazel Patch set the pace with Zolock hanging on the outside on even terms. In this position they quickly swung by the eighth pole, reaching the quarter in 32 seconds; down the back stretch they stepped like a pole team, reaching the half in 1:02½. On they sped to the five-eighths pole, neither being able to shake the other off; the three-quarter pole was close at hand, but still Hazel Patch had not gained, both going to the limit of their speed, neither making any false moves. The friends of each horse by this time felt one or the other must soon weaken, the three-quarters being reached in 1:35, but on they flew toward their breathless admirers. Zolock, faltering slightly, felt the tingle of the whip, but Hazel Patch proved the most lasting, and won the heat in 2:08, about 20 feet ahead. Considering the track the time was equal to about 2:05½.

A cheer went up for the winner, but it did not have the soul-stirring echo it would have carried had Zolock wrested victory from the Eastern horse.

Darkness was closing on the scene of the mighty struggle; the great white capped snow peaks of Mt. San Bernardino, and Gray Rock, had gleams of sunshine tossed back from the Pacific's rounded bosom, but for Zolock there was no ray of sunshine. He had done his best to retain the supremacy of the

John Caldwell 2:09

Winner at San Bernardino

Six trotters faced the starter in the 2:14 class and this proved a long drawn out contest where every heat was fought for by every horse that had the speed to get up in front at any stage of the game. After three heats had been decided, with three different horses winners, the race had to be postponed until the following day, when it was again a see-saw and four heats more were required to find the winner, which turned up in the old gray campaigner Rozelle. All the finishes were under the whip and the best efforts of each driver were put forth to get to the wire first.

The matinee cup race for 2:30 class pacers was won by Harry H. Jr., in straight heats, but not without a struggle, as both owners were very desirous of possessing the trophy and drove hard for it.

The second day opened with a much improved track, and there was great enthusiasm over the finish of the 2:14 trot, the 2:20 trot that had seven starters, and the match between Hazel Patch 2:02½ and Zolock 2:05½. The first heat of the 2:20 trot was won by Billy Dooley after a desperate struggle with Hank in 2:20, while the second heat resulted in a hot contest between Bonita and Homeway, the latter winning in 2:19½. Bonita then went to the front and made it three straight for first money. She is a small brown mare by Knight, dam by Goldust Jr., has a most level head, and was the most beautifully gaited of any horse on the track. If nothing happens her she will yet equal the speed of her near relative, the fast pacer and trotter Anaconda.

There were nine entries in the 2:20 pace and all started, the race going in straight heats to McKinney's son Welcome Mac, who was driven by Walter Mabon and given a record of 2:12½ in the third heat.

Never in the history of San Bernardino county has two such champions met as Hazel Patch and Zolock,

Coast which was all any horse could do.

A strong wind began early in the forenoon of the third day. It cast a gloom over all outdoor undertakings, and spread discomfort to the management of the races, but the programs for the day were faithfully carried out.

The second heat of the great special was a skyrocket exhibition. The track had greatly improved but the wind was a belligerent factor. On the second score the champions got an even start, Zolock carried his Eastern competitor to the quarter in 31 second, to the half in 1:00½, but this clip was too much for him to keep up. He faltered, and finished second in 2:10. The next heat was a sore disappointment to all his friends, being without speed from wire to wire. Time 2:11¼.

The 2:09 trot aroused great interest, as the spectators were anxious to see how Jupiter B. would appear when he met the three cracks that have only just returned from the Grand Circuit. The majority thought Caldwell would win, which he did in straight heats, best time 2:10½, excellent for the track. Jupiter B. got second money and showed that he will be a 2:10 trotter in another year. All the finishes in this race were close and exciting.

Daedalion, hero of many a good race this year, added another to his score of wins by taking the 2:09 pace from a high class field in straight heats. He is a 2:06 pacer sure.

The meeting closed with a cup race for matinee horses and was won by Conchita, a daughter of Zolock, who took a record of 2:29, giving him another standard performer.

The judges during the meeting were Messrs. John A. Cole, R. T. Curtis, and George W. Prescott. Secretary A. W. Bruner acted as starter and made a success of getting the horses away. The timers were Geo. H. Parker, Geo. W. Parsons, William Rourke,

and Mr. E. J. Gilbert acted as Clerk of the Course. The summaries:

Thursday, November 9.

Pacing, 2:12 class; purse \$600. Three heats first day.
Glenn, ch. g. by Glenwood..... 6 1 1 1

Conchita, br. m. by Zolock..... 1 1
Pete, b. g. by Unknown..... 3 2
Baby, br. g. by Unknown..... 2 3
Time—2:29, 2:31.

POLO IN THE SOUTH.

Polo bids fair to be the winter sport in this section of the country, for interest in the pastime has been revived to such an extent that not only are the southern teams to play on the southern circuit, but the northern teams as well will be represented hereabouts.

It is announced the Burlingame team and the San Rafael aggregation will send a string of ponies to the Santa Barbara and Riverside tournaments.

After the meet at the Channel city in January the strings will go to Riverside, where the Mackey cup will be the prize. This cup was won last year by the English team, but will be contested for again and the winners will hold the trophy for a year.

The last match will be at San Diego, where a new challenge cup has been offered and where the added feature of pony races, gentlemen riders only, will be introduced.

The Southern California Polo and Pony Racing Association has a membership of five teams—Santa Barbara, Riverside, Los Angeles, Santa Monica and Coronado. The Ocean Park Riding Club offered to come into the association, but the proposition was rejected on the ground that the club owned no horses and could not ride them if it did. In scorn the polo men pointed to the meeting held at Del Rey for the purpose of organization and the subsequent trip to the Santa Monica canyon on the electric car.

The officers of the association are Robert Lee Bettner of Riverside, president; Benjamin Nantucket Smith, secretary-treasurer, and about a dozen vice-presidents who either own polo ponies or have vacant lots on which the teams can practice—R. Cameron Rodgers, Santa Barbara; T. H. Dudley, Santa Monica, and W. Clayton, Coronado.

The best time and place to buy a made trotter or pacer is at W. G. Durfee's sale at Los Angeles next week. See the advertisement.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

April 1-Sept. 15. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Nov. 15, 16—New England Beagle Club's specialty show. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 15, 18—Boston Terrier Club Specialty Club. Boston. F. H. Osgood, Secretary.
Nov. 21, 22—Brockton District Kennel Club. Brockton, Mass. J. W. Sullivan, Secretary.
Nov. 30-Dec. 2—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.
Dec. 13, 14—Southwestern Kennel Club's bench show at Pasadena. Entries closed.

1906.

Jan. 17, 20—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emory, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburgh, Pa. F. S. Steadman, Secretary.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. N. J. Matthews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary.

Field Trials.

Oct. 30—American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Robinson, Ill., entries closed July 1. Address Am. Field Publishing Co., Chicago.
Oct. 30—National Beagle Club of America: 16th annual trials. Stevenson, Md. Chas. R. Stevenson, Secretary.
Oct. 31—Connecticut Field Trial Club. Hampton, Conn. F. M. Chaplin, Secretary, Pine Meadow, Conn.
Nov. 6—Independent Field Trial Association. Huntsville, Ill. S. H. Socwell, Secretary, Indianapolis, Ind.
Nov. 8—Dayton Pointer Club. Dayton, O. John Roehm, Secretary, Dayton, O.
Nov. 13—New England Beagle Club. 12th annual trials. Grafton, Mass. A. D. Fiske, Secretary.
Nov. 13—Illinois Field Trial Association. Robinson, Ill. Wm. R. Green, Secretary, Marshall, Ill.
Nov. —Indiana Field Trial Club, (Week following Illinois Champion Stake) C. F. Young, Secretary, Clay City, Ind.
Nov. 21—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan. —Pacific Coast Field Trials Club, 23d annual trials. Bakerfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

THE QUAILS OF THE UNITED STATES.

By Sylvester D. Judd, Assistant United States Biological Survey.

(Continued from last week.)

Measures for Preservation and Propagation.

In Maryland and Virginia the writer has found the crow plundering nests of the bobwhite and in these States the crow is an enemy also of poultry. Doctor Fisher states in his "Hawks and Owls of the United States" that of the forty odd species which he studied he found only nine that killed the bobwhite. Four of these—the goshawk, Cooper hawk, sharp-shinned hawk and great-horned owl—are very destructive to poultry as well as game. Dr. W. C. Strode, of Bernadotte, Ill., writes that bobwhite's worst enemy is the Cooper hawk. "A few days ago one flew up from the roadside when I was passing, and a bobwhite was dangling from one foot." During November, 1900, this species so persecuted the birds at Marshall Hall that they were seldom found far from cover. In one instance a hawk was seen to swoop to the ground and rise with a cock bobwhite. The other species of hawks and owls rarely molest quail.

If bobwhites more frequently nested along fence rows instead of in open mowing land they would abound in many places where they are rare. The mowing machine lays many nests bare, and they are either despoiled by enemies or deserted by the old birds. At Sandy Spring, Md., early in July, 1903, four

nests with their eggs were cut over in a fifty-acre grass lot. In other hay fields several nests were discovered in time to leave the grass uncut about them, but boys robbed them all. Between such lads and the crows and other enemies bobwhites have a hard time in certain sections.

To enable them to withstand the winter, bobwhites need suitable food and cover. In severe winters coveys are sometimes saved by being trapped and fed in confinement until spring. Naturally the birds suffer most in the northern part of their range, but there are reports of their death from severe and protracted cold in Maryland and Virginia. Sandys says, "The birds know when the snow is coming, and they creep under the brush, intending to remain there until the weather has cleared. * * * Then the rain comes and wets the surface all about, then the sleet stiffens it, * * * the cold becomes intense, and every foot of damp snow promptly hardens into solid ice. * * * The quail are now imprisoned beneath a dome of crystal, which may endure for days." H. C. Oberholser says that in severe winters in Wayne county, O., whole coveys are found dead from this cause. Dr. P. L. Hatch reports that in Minnesota the birds increase in numbers during years with mild winters and decrease when the winter is exceptionally severe. Wilson Flagg states in "Birds and Seasons of New England" that thousands of bobwhites were destroyed by the deep snows of 1856-57. During the severe winter of 1903-4 bobwhites were nearly exterminated in portions of Massachusetts. That quail do not always succumb to exceptional cold appears from the fact that in Susquehanna county, Pa., at an altitude of 2,000 feet, W. W. Cooke found a covey of a dozen bobwhites apparently in the best of condition on December 9, 1902, though a foot of snow covered the ground and the thermometer stood at 20 degrees below zero.

A study of the winter habits of the bobwhite by the writer in the vicinity of Washington, D. C., so far has yielded only fragmentary results. In February, 1900, after a foot of snow had fallen, in a careful two days' search he failed to discover even a track of a large covey that usually frequented river flats along the Potomac at Marshall Hall. The birds must have been under the snow or back in the timber. At Falls Church, Va., after a lighter fall of snow, he saw a covey of five moving among the briars on the edge of a wood, and their fresh tracks showed that they had been feeding systematically on rose hips, but had not ventured from cover. At Cabin John Bridge, Md., after a snowfall of several inches his dog pointed six birds on the south side of a river bluff, where the sun had melted holes in the snow. On one of these bare spots he saw two birds, which rose and were joined by four others. The covey had made wallows two inches deep in the leaf mold on the bare spots. All the birds had avoided stepping on the snow. At hand was such food as the berries of sumac and the seeds of Galactia volubilis and Chamaechrista fascicularis. Examination of the droppings indicated that less than one-tenth of the food had been animal matter, the remains of which consisted of ants, the tibiae of grasshoppers, the spotted cuticle of soldier bugs, and the cowhorn-like mandibles of spiders. So far as could be made out, the remains of vegetable food consisted of the skin of kernels of corn, fragments of the akenes of ragweed, and pulverized bits of sumac seeds (Rhus copallina), partridge pea (Chamaechrista fascicularis), milk pea, (Galactia volubilis), and crown-beard (Verbesina), besides unidentified leaf material. The weather had been severe for more than a week, but the birds were in good condition.

On the Marshall Hall farm, a short distance back from the banks of the Potomac, is a swamp that has a steep bank with a southern exposure, where there is usually more or less bare ground in patches. For several years bobwhites have made a winter haunt of this warm, sunny bank, and here some interesting observations were made Feb. 18 and 19, 1902, when the snow was from two to four inches deep and the minimum temperature was 4 degrees F. above zero. A covey had spent the night of Feb. 17, not on the warm bank, comparatively bare of snow, but on the level above the bank, where they had squatted on the snow under a dewberry bush among broomsedge. Their feet and droppings had melted the snow, and subsequent freezing had formed an icy ring. The birds had not flown thither, but had walked from the swamp up the steep bank and through the broomsedge level. The next morning they had flown from the roost to the steep slope, had run along the edge of the swamp to a bushy, tree-bordered stream, then up its north bank for 300 yards and back on the south bank, and thence to the steep, sunny slope again. On their journey they had gone under every matted tangle of cat-brier vines—possibly for berries, but more probably for protection. At one point they had fed freely on sumac berries. The tracks of a fox were found with those of the birds for about 100 yards. In the morning of the 19th they traveled not more than 200 yards, this chiefly among outstanding willows and alders of the swamp and along the belt of land five to twenty yards between the boundary fence and the reeds of the swamp. In one place two pairs of birds had walked so near together as to cross one another's tracks; two single birds had made clear lines of tracks on one side of them, and a single bird had walked alone on the other side from one to four feet from his nearest companion. All had evidently

eaten rose hips, mutilated remains of which still clung to the bushes. The covey might have been expected to range far and wide in the open fields for seeds and even to straw ricks for grain, but except when traveling to their roost they had never gone more than a rod from cover. Apparently fear of enemies restrained them.

An article in the American Field, Feb. 25, 1899, by the well known sportsman, John Bolus, of Wooster, O., illustrates the hardness of the bobwhite. When several inches of snow were on the ground and the thermometer registered from 15 to 27 degrees below zero every night for a week, Mr. Bolus took a tramp to see how the birds had fared. He found no dead birds, but saw six thrifty coveys—eighty-one birds in all. They were feeding on ragweed projecting from the snow, and were jumping up to reach seeds on sprays above their heads. Some coveys remained under shelter of little weed patches, but others ranged over the more open fields.

In Maryland and Virginia large land owners often feed their birds in severe weather. Wheat and corn are the best food, and should be scattered, if possible, among the briars where the birds are safe from hawks. Bobwhites have been known to feed with chickens in barnyards. By a little forethought landowners and sportsmen can easily make winter provision for their birds. Sumac bushes should be left along hedgerows and the edge of woodland to furnish food that is always above the snow and lasts well into spring. Twelve bobwhites collected in December in North Dakota had made nine-tenths of their food of sumac, having eaten from 50 to 300 berries each. A similar use, in coast regions, of the bayberry and wax myrtle has been noted. Their berries, as well as those of sumac, last till May, and the plants should always be spared by everyone who is interested in the welfare of the bobwhite. Smilax, affording little food but fine cover, and wild roses, giving both food and cover, are also valuable. Blackberry thickets, young pine woods, laurel, and holly furnish safe retreats from enemies.

The farmer can well afford to feed the bobwhite in winter, but he cannot afford to spend as much time and money as the owner of game preserves, and for the latter class further suggestions may be helpful. In the Eastern and Southern States land that will not grow profitable crops may be used for the game preserve, provided it has water and bushy coverts.

The use of the mowing machine, so destructive to eggs and young birds, should be avoided when possible during the breeding season. Wheat for the birds should be sown in long strips not over fifty yards wide. The best of the grain may be harvested and the rest left standing. In the stubble a luxuriant growth of ragweed will generally spring up—a perfect food supply, except that it does not last till spring; hence the need of sumac or bayberry. In regions too dry for ragweed to grow in the stubble, sunflowers are an excellent substitute. Sorghum, millet and possibly panicum may be planted and left standing. Popcorn will be found particularly valuable, as large corn cannot be easily swallowed by the younger birds. Buckwheat, and in the South the nutritious cowpea, and the climbing false buckwheat, the thick tangles of which also afford good cover, bear excellent food. Other plants of the genus Polygonum are fond of moist land, and furnish palatable seeds for the bobwhite; for instance, black bindweed Pennsylvania persicaria and black heart. All wild leguminous plants should be left undisturbed, for the birds feed on seeds of most of our legumes. Small clumps of locusts may well be left in open fields to give both food and cover. Tick trefoil, bush clover, Japan clover, the milkpea, and the wild bean—all wild plants—are suitable for food. Of the summer fruits the dewberry is the most important, and in the absence of water furnishes a substitute; therefore these vines, nearly everywhere plentiful, should be left in places remote from water. A water supply is, of course, important. Streams with bush-grown banks through open fields are most valuable. Beside them will be found spreading panicum, which shells out its grain a kernel or two at a time until well into spring. Birds find food, shade, water and shelter in the vegetation along small streams. Marshes also afford cover and food. If connected with estuaries they often support a rank growth of wild rice, an ideal provision for birds. Sufficient shelter to protect the birds from hawks is almost indispensable. Oak and beech woods supply mast as well as shelter, but pines afford the best cover, and some of them, notably the longleaf pine, furnish food. A comfortable retreat for the coldest weather is invaluable. In Maryland and Virginia fields of heavy broomsedge answer this purpose well, but best of all is a steep bank with southern exposure, where the sun quickly melts the snow, and gives the birds a chance to forage on bare spots for food and gravel. If such a bank is not far from cover, and has a growth of briars on it to give the birds a feeling of security, it will become a favorite winter haunt, and during severe weather is the best place to scatter grain. With a little help from man the bobwhite will be found to winter well, even in the northern part of its range.

Bobwhite is prolific. A pair of birds under favorable conditions will raise a dozen young in a season. Then, too, it is longlived, for a bird kept in captivity is known to have reached the age of nine years. The outlook for the future of the species is most satisfactory, provided it is given even a small amount of care, with proper legal protection. The Audubon societies, with a membership of 65,000 to 70,000, which cherish the bobwhite for aesthetic and humanitarian reasons, the sportsman who loves the whirr of its brown wings, and the farmer, whose enemies it destroys and whose resources it increases, can do much to favor the bird in its natural environment and to protect it by adequate and effectively enforced laws.

(To be continued.)

COAST FIELD TRIALS.

Second forfeits for the Pacific Coast Derby were paid November 1st on nominations of twenty-two English Setters, one Irish Setter and fifteen Pointers, just eight dogs less than were originally nominated. One of the young Setters withdrawn was Chas. N. Post's De Charney (Petrel's Count-Moxy Danstone), bred by W. J. Baughn. Second forfeits were paid last year on sixteen English Setters and thirteen Derby nominations. The Derby last January had a field of seventeen starters. Out of the total of thirty-eight second payment entries the indications are strong for a much larger number of starters than at the last trials. Entries for the All-Age stake will close December 15th. Four events are on the card this year—the Derby, All-Age, Members and Championship Stakes.

The twenty-third annual coast field trials will commence on Monday, January 8th, on the club grounds near Bakersfield—the same location over which the trials were run last January.

The grounds have been patrolled for some time past and the birds protected from molestation with the pleasing result, after a favorable breeding year, that quail are more numerous than ever before in that section. So Mr. Will S. Tevis states after a recent tour over the ground. What is needed, however, is a good rain, for the present, and more rain later on.

W. J. Baughn, as has already been announced in these columns, will preside in the saddle. The outlook is favorable for a strong entry in the other three stakes to be run. The list of second forfeit Derby nominations paid is as follows:

English Setters.

J. W. Riplinger' (Seattle, Wash.) white and black bitch Cynthia (Ch. Stylish Sergeant-Ch. Pera), whelped July 22, 1904. Owner, breeder.

H. A. Jones' (Eureka, Cal.) white, black and tan dog Montauk J. (Bruce-Juna H.), whelped April 10, 1904. Owner, breeder.

Jos. E. Terry's (Sacramento) white and black bitch (unnamed), (Drake Windem-Mary 'Lou), whelped June 18, 1904. Owner, breeder.

Same owner's white and black bitch (unnamed). Same breeding.

Same owner's white, black and tan bitch (unnamed). Same breeding.

Same owner's white and orange bitch Bessie Mortimer (Kilgarif-Maggie F.), whelped April 3, 1904. P. D. Linville, breeder.

Same owner's white and orange bitch Merry Duchess (Fairland Dude-Merry Hart), whelped July 30, 1904. Chas. N. Post, Sacramento, breeder.

Same owner's white and black bitch (unnamed), (Kilgarif-Belle of the Ball), whelped 1904. H. S. Humphreys, Indianapolis, Ind., breeder.

Hugh Hopkins' (Minturn, Cal.) chestnut and white bitch Aunt Marie (Uncle B.-Sport's Belle), whelped Jan. 3, 1904. H. R. Edwards, breeder.

S. Christenson's (San Francisco), black, white and tan dog Goliath (Kilgarif-Maggie F.), whelped April 3, 1904. P. D. Linville, breeder.

Chas. N. Post's (Sacramento) orange and white bitch Sunburst (Fairland Dude-Merry Hart), whelped July 30, 1904. Owner, breeder.

Same owner's white, black and tan bitch Light Heart. Same breeding.

Dr. E. E. Stone's (Napa, Cal.) black, white and tan dog Narcisse (Fairland Dude-Merry Hart), whelped July 30, 1904. C. N. Post, breeder.

Albert Betz' (San Francisco) black, white and tan dog Merry Dude (Fairland Dude-Merry Hart), whelped July 30, 1904. C. N. Post, breeder.

Mrs. C. E. Wilson's (Ross, Cal.) white, black and tan dog Encinal (Clipper W.-Rod's Sylvia) whelped Sept. 8, 1904. Dr. C. E. Wilson, Ross, breeder.

Same owner's white, black and tan dog Sour Jack. Same breeding.

J. W. Considine's (Seattle, Wash.) blue belton bitch Miss Hap (Count Rowdy-Roxane), whelped Sept. 23, 1904. Owner, breeder.

J. W. Considine's white and black bitch Lady's Count Gladstone Jessie Rodfield Galore (Count Rowdy-Roxane), whelped Sept. 23, 1904. Owner, breeder.

J. E. Lucas' (San Rafael) black, white and tan dog Uncle Dudley (Count Whitestone-Count's May Belle), whelped May 17, 1904. White and Peebles, breeders.

W. W. Van Arsdale's (San Francisco) white and orange dog Mendocino (Uncle B.-Count's Gift), whelped August 24, 1904. Owner, breeder.

Same owner's white and orange bitch Madera. Same breeding.

Same owner's white and orange bitch Pima (McCloud Boy-Peach Mark II), whelped July 20, 1904. Owner, breeder.

Irish Setters.

Paul Piepers' (Los Angeles) red Irish Setter Lady Elcho II (Ch. Fred Elcho-Miss Lady Finglass II), whelped April 25, 1904. Geo. E. Walter, Rushville, Ill., breeder.

Pointers.

W. B. Coutts' (Kenwood, Cal.) liver and white dog Tod Sloan (Bolin's Duke-Whisper), whelped July 19, 1904. Owner, breeder.

W. W. Van Arsdale's white and liver bitch Sonoma (Dr. Daniels-Babe Jingo), whelped January 13, 1905. Owner, breeder.

F. H. Jermyn's (Scranton, Pa.) white and black dog Raffles (Ch. Senator P.-Miss Rap), whelped July 23, 1904. J. W. Flynn, San Francisco, breeder.

John Erikson's (Seattle) white and black dog Senator's Jack (Ch. Senator P.-Miss Rap), whelped July 23, 1904. J. W. Flynn, breeder.

J. W. Flynn's (San Francisco) black and white bitch May (Ch. Senator P.-Miss Rap), whelped July 23, 1904. Owner, breeder.

Same owner's white and orange dog, Senator's Don (Ch. Senator P.-Flynn's Dolly Jingo), whelped May 13, 1904. Owner, breeder.

Same owner's white and lemon bitch Dollie. Same breeding.

F. G. Schumacher's (Los Angeles) lemon and white bitch Lady Belle (Teddy Kent-Jack's Fashion), whelped May 20, 1904. W. J. Morris, Los Angeles, breeder.

W. J. Morris' (Los Angeles) white liver and ticked bitch Navajo (Teddy Kent-Jack's Fashion), whelped May 20, 1904. Owner, breeder.

Stockdale Kennels' (Bakersfield, M. R. Dodge, Manager) liver and white dog Combination Boy (Cuba Jr.-Bow's Daughter), whelped March 1, 1904. Owner, breeder.

Same owner's liver and tan dog Oakwood (Ch. Cuba of Kenwood-Petronella), whelped May 1, 1904. Owner, breeder.

Same owner's white and liver dog Baywood. Same breeding.

Same owner's liver and white bitch Cypresswood. Same breeding.

Same owner's white and liver dog Hickorywood (Ch. Cuba of Kenwood-Petronella), whelped May 1, 1904. Stockdale Kennels, breeder.

DOINGS IN DOGDOM.

American Field Futurity.

Published accounts of the initial A. F. Futurity stake, respecting attendance of sportsmen, running of the trials, general success, etc., materially differ. What concerns Coast field trial followers to quite a degree, in consequence, is the showing made by the Coast entries. The stake was won by Tonopaugh (Tony Boy-Sport's Estelle), an Eastern bred puppy owned in British Columbia, and of which dog the American Field says:

Tonopaugh, the winner of the first American Field Futurity, is a medium sized, white, black, ticked and tan English Setter dog, with no large splashes of black. One ear is black and there is a small black splash at root of tail. He is a stylish and good going dog and possessed of a wonderfully good nose and is an excellent game finder, pointing in grand style. Any time he is at his best his friends need have no doubt as to what the result will be, no matter what the company in which he may be found.

He is owned by Mr. W. T. Hunter, Greenwood, B. C., was whelped April 20, 1904. Bred by H. W. McGarry and handled by Jacob Bishop.

Senator's Don and Senator, two Ch. Senator P ex Flynn's Dolly Jingo puppies, both bred, owned and entered by J. W. Flynn of this city, were handled by W. J. Wilson.

Don was carried into the fourth series. He ran an extra heat with Lad McKinley for the purpose of determining the dog to be put down with Alford's King for third place.

In mentioning these two Coast Pointers the American Field says: Senator Don cut out his ground well. He goes fast, with style, but is inclined to false point. We are of the opinion, however, that he did not do his best here and that he will be heard from in the near future.

Both Senator's Don and Senator were put down in fine condition. Senator ran against Tonopaugh in the first series.

In this meeting the dogs ran thirty minute heats, a rather arduous performance for Derbies to go through on trials, series after series.

Ria Baby, winner of second, is a fast and stylish bitch, a good game finder. She is by Colonel R.-Monterey, whelped April 18, 1904. Bred and owned by H. R. Edwards. She was handled by J. A. Gude.

Alford's King, winner of third, a good-sized Pointer, "a chip of the old block" Ch. Alford's John, showing all the latter's speed, but being a little short on range. His dam is Belle of Rip Rap. He is owned by Alonzo W. Smith, was bred by E. G. Leas and handled by E. S. Munger.

Kennel Notes.

We are in receipt from Englewood Kennels, Campbell, Cal., of an artistic circular descriptive of their Collies and Bull Terriers. Among the announcements Ch Hanover Monarch, winner of eighteen firsts and specials and a producing sire, is offered in the stud at a very moderate fee for so good a dog. Some good brood bitches and puppies are offered at bargain prices.

Glen Tana Kennels, Spokane, Wash., have forwarded us a tempting circular descriptive of bargains in Collie puppies. Fourteen of their best brood bitches have recently whelped. The youngsters are royally bred and worth developing. The G. T. Kennels won three silver cups, eight first and two second prizes at the recent Spokane show.

Wm. Ellery's good Collie bitch Southport Sphinx recently whelped a litter of eight (3 dogs) to his Southport Philosopher. Both dam and sire are well known to the local fancy and were imported by Mr. Ellery this year.

J. I. Sparrow reports expected litters from several good bitches recently served by the Silkwood Kennels' stud dog Croydon Czar. This stud dog has been a consistent producing sire as well as a bench winner. Mrs. C. R. Thorburn's Meg Merrilies II, one of the best Coast bred bitches ever shown here, is by Czar out of S. Kennels' Newmarket Jean.

Edgewood Jean II is nursing a litter of eight puppies by Czar at present.

Silkwood Della, November 7th; Silkwood Betty, October 4th, 5th; Newmarket Jean, October 6th, are three recent breedings to Czar.

Monk, the handsome and well broken English Setter which was George Walker's hunting companion and pal on many an outing, has joined the canine majority. The ailments coming with old age made an application of chloroform a merciful relief for faithful old Monk.

English Hounds Make Good.

British Foxhounds scored a big success two weeks ago at Hempstead, L. I., in a trial hunt. Thomas Hitchcock and others, who favor the American breed, declared that English hounds were good only to follow a drag, and would not kill a fox. "Jack" Foster, the English huntsman, took exception to the statement, and as a result several big sums were wagered as to whether the imported hounds would kill a fox this season. The start was made October 20th from the Meadowbrook Clubhouse in a pouring rain, which kept the field very small. The run, which was a lively one, lasted forty minutes, the advocates of the English Hounds being successful.

The fox was started at East Williston, and ran toward Wheatley Hills and around Jericho, and then back to East Williston, Reynard being finally caught within 200 feet of its hole and killed by the pack. Mrs. Thomas Hitchcock, the only woman in the saddle, and who rode astride, got the brush, and Beverly Robinson got the mask. After "Billy" Scarratt, the English first whip of the Meadowbrook Hunt, had jumped the fox it was hunted mostly in sight, but at times, while going through thick undergrowth, the pack had to depend entirely upon the scent. Mr. Foster, who had charge as huntsman of the English pack, had just recovered from a broken leg. He essayed to join the hunt, but found the pace too fast, and designated First Whip Scarratt to take his place.

High Class Dogs Pay.

Many people argue against paying high prices for dogs, and many more are unable to see where there can be any return for a large sum of money paid for one. But good dogs are valuable and are bound to receive recognition, and in this way repay their owners for trouble and outlay.

Appearing in bench shows always enhances the value of a good dog or bitch, even though it does not score a win, for no matter in what show they may be exhibited, there will be plenty of people to appreciate the merits of the animals.

It is no disgrace for a good dog to get beaten in a strong class, and if the judge makes a mistake of placing it behind an inferior one in either good or bad company, the circumstance is usually drawn attention to, and the defeated dog earns the sympathy of the public and thereby gains a valuable advertisement.

The Bulldog of Today.

To enthusiasts there is something peculiarly attractive in a Bulldog, with huge skull and head, broad jaw and full nostrils, bowed shoulders and forelegs, the latter of great thickness, a short, crumpled up stern, arched loins, narrow hindquarters and ungainly waddle of gait. These, though not things of beauty from an artistic point of view, are no doubt the causes of his popularity, as such eccentricities of form are not found in any other animal. At the same time, the modern Bulldog is kindly and affectionate, with a peculiar method of pushing his huge head into the hands of his master that is particularly endearing. Perhaps in no other animal is there a better representation of natural habits and disposition being changed by its surroundings than in the Bulldog. Originally used for a brutal purpose, his savageness and ferocity were encouraged, with the result so well known and of which so many stories are told. With the discontinuance of bull-baiting, he has been kept as a companion, his ferocity being allowed to remain dormant for generations, until it has now pretty well disappeared altogether.

It is unusual to find an ill-dispositioned Bulldog nowadays, and he has gradually drifted, as it were, into a docile companion, a favorite of the ladies, and a playmate for the children, as the many popular pictures seen at the present time in the print show windows prove. Shows, dog clubs, and literature have done much for Great Britain's national dog, and under a regime of them he has become the most valuable of the canine race, although at times the prices paid for a specimen have been exaggerated. Still, a tip-top dog will easily raise £500, and if particularly well placed £800 or £1000 may be procured for one with the elements of a champion about him. Whether any purely fancy dog is worth so much is a matter of opinion, although there is an adage to the effect that anything is worth as much as it will bring. Still, it seems odd that such a creature as a Bulldog, that cannot give actual pleasure to anyone but its owner, is worth as much or more than a pack of Foxhounds, and double as much as a winner in embryo of the Waterloo Cup, the running of which affords amusement to tens of thousands, and is the means of turning over vast sums of money. Such comparisons are ready examples of the peculiarity that can prevail in our customs of sport.

THE CRACK SHOT.

(By "Ole Bill.")

Man with gun, out fer ducks,
'Coudn't shoot wuth old shucks.
Started 'fore break o' day
Fer a blind, miles away.

Set decoys; birds flew low,
Thick ez clouds 'fore a blow.
Stooled down in the bay,
Man riz up, blazed away.

Ducks flew high, not one hit;
Man cock-eyed; cursed a bit.
Sez he: 'I'll buy bag instead,
Ducks alike when they're dead."

At the club, showed his string,
Swore he shot all on wing.
Thus is fame often got—
Biggest lie, best wing shot.

DUCK GROUNDS FOR LEASE.

We call the attention of our readers to the announcement in our advertising columns of an opportunity to secure by lease, 500 acres of marsh land for a term of years.

The tract is the familiar McMaster property near Cordella, on the line of the S. P. Railway, and easily reached from this city. The duck shooting—and also English snipe shooting—of that locality is too well known to need extended description here. A number of gun clubs, the Field and Tule, the Green Valley, etc., are now comfortably located near by, and the members have for several years past had the best of sport. There are plenty of ponds, as well as fresh water on the tract, and the chance offered for securing one of the best shooting grounds at the head of the Suisun marsh is too good to go begging for any length of time.

The tract was recently purchased by the E. B. and A. L. Stone Co., of Oakland, to whom reference is made for further particulars. The company intend to build a spur track from their quarry to connect with the S. P. tracks, buying originally for right of way. The surplus marsh land is now offered for lease and is an ideal shooting ground, one of the few good resorts now available, for season after season shooting ground leases, or purchases, are going higher and will eventually go up to almost prohibitive figures.

DUCK HUNTING NOTES.

Weather conditions for duck hunting around the bay marshes assumed a more favorable phase Thursday evening last, when indications for rain were better than have transpired since the season opened. Reports from Fresno, Pacific Grove and other points to the south of this city were that rain was falling. Should stormy weather ensue today and tomorrow good duck shooting will be had by an army of local sportsmen who have been awaiting the turn in the weather conditions.

Reports are that northern birds have been coming in for two weeks past. Most of these birds had become poor in condition owing to the dry spell. Furthermore the birds have taken refuge in the day time on the bay waters, where they were comparatively safe. The moonlight nights enable the ducks to feed unmolested on hundreds of baited ponds.

Notwithstanding the generally unfavorable aspect of affairs good shooting has been had in many sections. Phil B. Bekeart, Judson Brusie, W. L. Gerstle and Bush Pinnel, for instance, bagged 200 ducks, mostly sprig and teal, with a few mallards for good measure, last Sunday on the Family Club preserve at Oluta station, in the Suisun marsh. Last Wednesday, Achille Roos killed forty-six, A. D. Harrison twenty-two, and A. M. Cumming thirty-nine on the Field and Tule Club ponds near Cordella. These birds with the exception of a few mallards were nearly all teal and were also in very good condition. A heavy frost had fallen the night previous and there was but a small flight in the early morning. Contrary to the expectation of the gunners, later in the forenoon the birds came in to the ponds again.

Near Alvarado, Mt. Eden and further south on the Alameda marshes, results have not been up to the earlier days of the season.

In the vicinity of Rio Vista and further north along the Sacramento river good mallard shooting has prevailed.

Near Collinsville members of the Montezuma and Black Jack Clubs have had fair duck shooting, but nothing to what will be had in that section when the weather becomes boisterous. As an offset to the lack of ducks, English snipe have recently been in evidence most plentifully near Collinsville. W. W. Richards and W. C. Swain, shooting on the Montezuma preserve, recently bagged limits of the long bills. These dainty birds were reported this week to be also very numerous near Newman. Weather conditions are not exactly proper to make the "scaipers" show up on the snipe patches within touch of San Francisco. Rain is needed to prepare the pasture grounds for the boring longlegs. As to that, when a patch is ripe for the attention of the bird, it will show up from anywhere within a hundred miles.

The anticipated turn in the weather should make a trip to Point Reyes, either for ducks or quail tomorrow worth the while.

Among the new arrivals bluebills have been observed to quite an extent. Widgeon, on the contrary, are not as plentiful as they usually are at this time of the year.

Recent reports from Sacramento, Visalia, Hanford, Chico and Modesto indicate fair duck and quail shooting near those points.

Reports of storms up north, in the vicinity of the mouth of the Columbia river and nearby sections, would indicate that there should be a lively migration from the disturbed zone to more southern latitudes, in which happening the California gunners would have an expected inning.

As an indication of what may come this way in the duck line when winter boisterously holds sway up north we quote the following account of duck hunting conditions in the vicinity of Seattle:

"With most of the water on this side of the mountains—and also most of the ducks—it is a matter of fact that the best bags of last week were brought over from across the divide. It was no trouble at all to break the lay in the Yakima section, and easier still up on Lake Chelan. Fat mallards were in both places in clouds and they liked the sound of a gun so well that they would snuggle right up to a hunter to hear the thing go off.

"A well known local hunter, with three of his friends, came in from the Yakima with more than 400 mallards and thirty-eight geese, the result of part of one day's shooting. They brought their whole catch back

on the train with them and into the city, but there was no game warden in sight, and they are still unhung.

"E. A. Bridgman and Wm. Arnold put in two weeks at Chelan and declare that they never in their lives had such shooting. A few minutes in the early morning or in the late evening were enough to get the limit bag, and the weather was so cold that they were able to keep their game on natural storage until their return to this city.

"But over here west of the big hill it has been different. Those are country ducks over on the other side and you could run over them with a street car for the first few days they are in from the ranch. But give them a few days around the metropolis and they get as wise as a sneak thief.

"Hunters concede that the greatest home the mallard has in all the West is between the two mouths of the Skagit river. Conservative estimates are that there are between a half million and a million mallard lying 'off and on' along the eight miles of slough and coast. But they know a gunman by sight, and when they can't see him they can hear him buying his ammunition.

"Dozens of Seattle's best known shots tried out these grounds during the last week and limit bags were a rarity. In a big flock like that there are always many stragglers and there are still others that venture into the tules and fall prey to some one who has had patience enough to sit around and keep still, but the main flock is with other things that are unattainable.

"Duck hunting enthusiasts are divided in an opinion upon whether or not the Alaska ducks have come in. A majority believe that they will not show up until the next heavy storm, and that then there will be more good sport until they have learned the ways of the city from those who have come before. Others believe that the Alaska delegation is already in convention and has been wised up to the situation."

So it would seem that the northern sportsmen are also up against the open water loafing proclivities of the birds. Perhaps some of the flocks that are now daily noticed on San Pablo bay and other open waters have come from the Skagit section and have posted their local congeners. Who knows? Ducks show much wisdom at times, just when the gunner don't care to come under that particular influence.

Whether the birds are liable to get brain fag from too much thinking or not reminds us of a story told this week by Pete Walsh of Black Point.

Pete has a penchant for all sorts of wild pets—animals or birds. He knows their ways and has marvelous control over different wild creatures. He generally has, at his hospitable shack near the mouth of Petaluma creek, a combination menagerie and aviary. The inmates of the museum all seem to know him and are on rather friendly terms with the man who feeds them.

Among his wild friends this spring was a young mallard drake. The bird was retained in the pond enclosure by clipping the feathers of one wing. The trimming had been neglected long enough for the feathers to grow out, strong enough to enable Tom, for that was his name and he seemed to know it when feeding time was on, to fly. One morning last March Tom spied a bunch of ducks high in the air; instantly he spread his wings and was after his swiftly flying mates. Tom's departure was regretted, for he was a chipper sort of a bird and handsome for a duck.

Last week Pete was in a tule blind on the creek shore opposite his ark. He placed out a stool of canvasack decoys. Few birds were flying. He observed a mallard fly up the creek and shortly afterwards the bird came back again, flying high. He could not account for a mallard decoying to "cans" and awaited developments, for the bird was circling around his blind. The duck came nearer and nearer until it came within range, when Pete fired, bringing down the bird, badly wounded.

Just as he shot, the thought came to him that the duck was Tom. The bird's actions at first were peculiar and so they were, remarkably so, after it was splashing in the water. Pete arose in his boat to get a better view of the struggling bird. So strongly was he impressed that it was Tom that he called, "Tom," "Tom," as he had been wont to do, when straightway for the boat made Tom, coming in response to a familiar voice and call as he had done hundreds of times when a boarder at Walsh's duck pond. Pete picked the bird out of the water; it was nearly dead. The familiar mark, a slight deformity of one of the webbed feet, proved that Tom had returned to his old home.

The return was not contrary to the known habits of wild ducks, but the apparent recognition of man and voice was the singular feature of the incident.

Whether Tom was wise or not, needless to say that he was not prepared for the table.

Gold Medal Winner.

The following announcement from the Hunter Arms Company, of Fulton, N. Y., manufacturers of the L. C. Smith and the Hunter One-Trigger guns, is significant:

We have just been awarded the gold medal at the Lewis and Clark Exposition and would consider it a favor if you would give us a notice in connection with same. Will you kindly note:

1. That this medal is the highest award that the Exposition has given.
2. That it was given to us in the face of the keenest kind of competition.
3. That it was given to us on both our Hammerless Gun and the Hunter One-Trigger.
4. All of the judges were gun experts so that we consider the medal to be of special value.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

STRIPED BASS ANGLING.

Never at any period since San Antonio slough has been the resort of the striped bass fishing enthusiasts has that water yielded so many large fish nor have the bass landed averaged so well in fighting fish. Nor has any past season been up to the present averages in such a short time. The run of fish have been anxiously awaited for several months, the anglers basing their expectations on the appearance of the fish at, or near, the usual schedule time. In this there has been sanguine disappointment. Whatever the feelings of many anglers in this respect the present run of fish has more than made up for a temporary absence.

For about four weeks past the fishing has been improving, it might be said daily. This state of affairs has been taken due advantage of by the clam casters—for most of the bass have been caught with clam baits, and so every day has been taken advantage of recently by anglers who could spend a day on San Antonio. On Sundays there has been as many as forty rods out along the stretches of the slough, played by fishermen in boats and on the banks.

At one time the only ark near the trestle bridge was the Cuckoo, owned by the Anglers' Club, at the present time there is two additional arks and two sloops, these supplemented by a flotilla of skiffs and rowboats, which are kept near the bridge.

Close to the bridge, moored in a small creek, is the handsome yacht owned by Jabez Swan. This vessel, once a fast cruising yacht on the bay has been converted into a comfortable houseboat. The fact that here comfort reigns supreme is evidenced by the perfectly at-home position in which craft lays, her hull and mast listing to port at an angle of forty-five degrees. The list has been ignored and a picturesque cabin has been built on the main deck. The cabin is entered through one of the most artistically unique companion ways ever put in a sailing craft. The fleet of fishing craft in the slough bids fair to be enhanced by several additions in the near future, the haven being handy for sportsmen and secure in bad weather.

In some respects Schell slough on the Sonoma branch of the Northwestern, a tributary of Sonoma creek, has a shade the best of it on San Antonio slough, for on last Sunday a reliable report gave a Mr. Gompertz credit for landing a 35-pound fish, this was followed by a 16-pounder and 8-pounder; pretty good results for one day's bass fishing. San Antonio, being the more easily reached water, has had more attention from the orthodox anglers; possibly had there been more rods out at Schell slough, larger fish and larger catches than already reported may have resulted. As it is, Cardinal Bebesheimer's catch recently puts the best San Antonio take in the shade—over 160 pounds to one rod in one day's fishing, and Sunday work at that.

Among those who have scored last week were: Prospector McFarland, Charles Bond and J. E. Burns, 12 fish weighing 157 pounds to one boat, the record for San Antonio. Last Sunday McFarland, Fred Bond and J. Sammi landed several fish. At one time there was a fighting fish bending each rod. On the same day Jack Karney landed a fish that scaled 19½ pounds, Billy Hillegass and Bert Spring, on the 8th inst., accounted for five bass weighing fifty-three pounds. George Walthers and Nat Mead on Sunday were also lucky, their largest fish weighing ten pounds. W. J. Hines and friend landed two bass, one scaled fourteen pounds. C. B. Hollywood's largest bass was a sixteen-pounder. The Lurlingame brothers hooked and landed two, fifteen and sixteen pounds in weight respectively. Mrs. Johnson on Saturday landed a fourteen-pounder just to show the fishermen what the fair sex can do with a fishing rod. Al M. Cummings has visited the slough a number of times recently and has been very successful in making good catches of large fish. Frank Marcus had a lucky day also this week.

At Schell slough, last Sunday, near Wingo station, Bill Street selected a sixteen-pounder from the water and brought the fish to the city. Chas. Reynaud caught two bass, G. Bebesheimer eight, J. Stevens nine, F. Mills one and A. Martin two.

The names mentioned above are but a few of the many anglers who have had excellent sport on the waters mentioned, within a couple of weeks.

A partial list of the big fish recently taken is as follows: Mr. Gompertz, thirty-five pounds; W. S. Kittle, twenty-five pounds; S. A. Wells, twenty-five pounds; W. F. Hillegass, twenty-two and a half pounds; Mr. McManus, nineteen pounds, and J. Karney, nineteen and a half pounds.

Comment has been made by observing anglers that this year, as usual, after the opening of the duck season, evidences of the poaching work of the set net men are not so noticeable as earlier in the season. Probably the net men find shooting ducks for market, which they can do now in open season, more profitable than stealthy and illegal netting of striped bass at night.

Peters' Points.

At Santa Paula, Cal., October 11, Mr. J. E. Vaughan, Peters Cartridge Company representative in Southern California, won high average with 212 out of 225. At Orange, Cal., the next day, Mr. Vaughan was also high with 93 per cent.

At Moreland, Ind., October 21, Mr. L. H. Reid, shooting Peters Ideal Shells, won high average, scoring 99 out of 100. Mr. Reid is in such good form this year that he rarely fails to shoot somewhere above 94 per cent.

At the tournament given by the Elyria, Ohio, Gun Club, October 24, Mr. J. W. McMeans tied for high average, using Peters shells. Mr. D. D. Gross won third general average with his reliable factory loads of Peters make.

PROFITABLE TYPES OF LIGHT HORSES.

(Dr. George M. Rommel, Bureau of Animal Industry, U. S. Department of Agriculture, before the Pennsylvania Live Stock Breeders' Association.)

In discussing profitable types of light horses I want to speak on those types or classes of horses that are profitable from the standpoint of the man that takes them to the market and sells them. By a profitable light horse we understand that a horse that will pay the breeder for producing him when he takes him down to the place where the horse buyers congregate and pay good money for good animals.

There are three general classes of light horses on most markets: The roadster class, the carriage class and the saddle class. They are known under different names. The roadsters are known as drivers, gentlemen's drivers, light drivers or roadsters as the case may be. Carriage horses are known under such names as carriage horses, carriage teams, coach horses, coaches and actors, etc. Under the class of carriage horses there are two general sub-classes: Cobs and harness ponies—neither of them very numerous in any of our markets, but both profitable classes. Under saddlers there are a number of sub-classes but those classes are of importance more as matters of general information than as actual sub-divisions of the market. Before going into the characteristics of these different classes, I want to speak briefly on the characteristics that are common to all classes of light horses which, speaking broadly, regardless of whether they are light or heavy, by means of which you can build up in the mind's eye the perfect horse. The variations from this make the characteristics of the different classes.

Perhaps the first and most important essential in a market horse is soundness. It is absolutely useless to expect to sell a horse that is unsound for a good price on any critical market. Unsoundnesses that are most common are those of the limbs and the respiratory organs. A marketable horse should not have a splint so high up on the leg that it interferes with the articulation of the knee joint. A splint may be small and low down and not seriously affect the selling price of the animal. Understand, however, that where you have to consider the highest type of equine beauty you want to avoid blemishes just as much as possible. A splint at best is a blemish, and naturally will result in a discrimination being made against a horse possessing one when he is sold. With light horses everything that is an offense to the eye must be avoided. The more beautiful a horse is, other things considered, the higher he is going to sell. There must

be no ring-bone, no side-bone or other unsoundness of the feet, and in the hind legs no curb; no spavin, no thorough pin or bog-spavin; of course, he must not be a roarer or wind-brocker. Now most of those things are unsoundnesses that can be readily detected by any one who is at all competent in judging horses.

The next point is conformation. The conformation of the profitable horse is one that must be learned with a great deal of study. The head should be well shaped, neat, clear cut and straight, with breadth between the eyes, a large, open nostril, fine cut muzzle, and clean, firm lips, a full, bright eye, a neat, well set ear of medium size, a clean cut, open jaw, with a wide angle between the jaws, that is, the jaws should be set out rather than in; the jaws should not extend so far back that when a curb bit is put on the horse the jaw itself will press against the wind-pipe and interfere with his breathing. We must have a clean cut throat, a neck of good length, clean cut and well muscled, a clean cut wind-pipe, high withers, and a sloping shoulder without any tendency to meatiness. The arm should be thrown well back, the forearm long, well muscled, and flat; knees good-sized, cannon clean cut and strong, with tendon well defined; straight fetlocks, sloping pasterns, feet of fair size, with dense horn, with high and wide heels.

Now, that a short back is a something that will fool a beginner in a good many instances, because if the horse has a straight shoulder his back is going to look longer. The back must be short, strong and straight, with the ribs deep and well rounded, the chest deep and the loins broad and strong. In the hind quarters there must be good breadth of croup, which should be straight rather than strong, the quarters should be well rounded, smooth well muscled and muscular, the thighs long, with open angles, the lower thighs should be long and well muscled. The hock—the most important joint in the body—should be wide, deep and clean cut in front; at the back the hock should come up to a rather fine edge. The cannon should be clean cut, cordy, the tendons standing out distinctly, and the bone should be clean. The fetlocks should be wide and deep, pasterns sloping—not so much slope is necessary in the hind pasterns as in the front ones. To ascertain the straightness of the legs stand immediately in front of the animal and drop an imaginary plumb line from the point of the shoulder; it should divide the leg from the knee down. At the side a line from the center of the arm should fall on the center of the foot. A line dropped from behind the point of the buttock should bisect leg from this point down; from the side this line should touch the back and coincide with the cannon throughout its length.

The point of quality is extremely important and hard to describe because it is a very intangible thing. The horse should have a clean cut appearance throughout; there should be a cleanliness of bone, no meatiness below the knee and hock or around the shoulder. The head should be clean cut, and he should have a general well-bred appearance. His skin should be moderately fine and the hair soft.

The point of action is the next in importance. Action is extremely important in light horses. It should be straight and true. At the trot it should be what is known as the straight line trot no wabbling from one side to the other or swinging the feet. The action from behind should be straight, the feet picked up smartly, hocks well flexed, and the feet of both fore and hind legs at each step placed immediately in front of the former position.

Style is of the highest importance, and this is generally indicated by the way in which he carries his head, the general appearance of smartness, of good disposition and nerve.

Then we have the point of manners. No horse is going to sell well in any of these classes that is not well mannered or shows that he has had no education. I do not mean by that that he should lack spirit, because he must have spirit, but he should have been taught how to behave himself in the case of emergency. This is especially true in the cases of horses that are sold for city use. A great many horses are very sharply discriminated against on this point.

SPEED AT AUCTION!

at the

Los Angeles Race Track

(AGRICULTURAL PARK)

Friday, Nov. 24, at 10:30 a. m.

The following high-class Trotters and Pacers will be offered at public auction:

JUPITER B. 2:12 (Trial 2:10) by Gen. Beverley.

BELLEMONT (3) 2:17 1-2 (Trial 2:11 3-4) by Zombro, dam by Altamont.

CUATE 2:17 1-2 (Trial 2:11 1-4) by McKinney, dam by Gossiper.

HELEN DARE (Trial 2:15, last 3-4 in 1:39 1-4) by Zombro.

GREAT PETER, pacer (Trial 2:11 1-4) by Peter the Great.

LEE BURNS, pacer (Trial 2:12 3-4, last half in 1:03) by Bobby Burns.

Besides a number of Young and Promising Trotters and Pacers.

W. G. DURFEE,

University P. O., Los Angeles, Cal.

AUCTION SALES

Thoroughbred Yearlings, Brood Mares and Horses in Training

TUESDAY EVENING, NOV. 28, 1905

WE WILL SELL

10 ORMONDALE YEARLINGS

from the Ormondale Stock Farm W. O'B. MACDONOUGH proprietor. These Yearlings are the produce of OSSARY, ST. CARLO, ORSINI and ST. AVONICUS, out of famous mares.

WE WILL SELL ALL THE

YEARLINGS, BROOD MARES AND HORSES IN TRAINING

belonging to the late DON CAMERON, among them being SIR WILFRED, a yearling full sister to SIR WILFRED and the dam of SIR WILFRED.

Auctions take place at the Salesyard of

FRED H. CHASE & CO., 1732 Market Street, San Francisco, California
(W. P. MAGRANE, Auctioneer)

Horses at Yard three days before each sale. Send for Catalogues.

GOOD DUCK GROUND TO LEASE

For Term of Years.

Shooting Privilege on 500 Acres Marsh Land

KNOWN AS THE McMASTER PROPERTY

On S. P. Co. R. R. Near CORDELIA.

No bid for less than One Thousand Dollars per year will be considered. Bids opened November 20, 1905. For further particulars address the owners

E. B. and A. L. STONE CO., Oakland, Cal.

WOODLAND STOCK FARM HORSES

At Auction

FRED H. CHASE & CO., 1732 Market Street, announce that Woodland Stock Farm, Mr. Alex Brown proprietor, will offer to the highest bidder

Tuesday Evening, November 21st, at 7:45,

A consignment of high-class, standard bred Mares and Three-year-old, Two-year-old and Yearling Fillies and Geldings by Nushagak (sire of Aristo 2:08 1/2, etc.) and Prince Ansel 2:20, out of such mares as Viola by Gen. Benton, Hattie W. by Electioneer, Addie W. by Whips, Hilda Rose by Dawn, Bonnie Derby by Charles Derby, Addie B. by Dexter Prince, and other high-class brood mares.

SEND FOR CATALOGUE.

FRED H. CHASE & CO., Live Stock Auctioneers

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O

HELPFUL THINGS FOR ANIMALS.

A well stocked cabinet for the family is no unusual thing to find in the farmer's household, but another, wherein one may find necessary articles for relief when animals are sick or injured, is a thing rare indeed. Many allow an animal to get well as best it can; another calls in a veterinarian. Both are expensive methods of righting a wrong, or happening, and the first comes under the head of "cruelty to animals." Animals, and horses especially, are even more liable to accident than ourselves. This has been noticeably so, since the introduction of barb-wire fences. Cattle likewise suffer much from barb-wire cuts. To say that "it is good enough for them," when an animal comes up at night, torn and bleeding, is both an ignorant and cruel way of looking at the matter. Though many dumb creatures display intelligence than many of the people that own them it is not expected that an animal is going to stop to count the cost of trespass when it reaches over, attempts to jump over or to go through a barb-wire fence. It is enough for a man, or woman, to know that the animal is injured and is suffering, and to straightway give such relief as is possible. For barb-wire cuts we never found a simple remedy so good as the home-made ointment of kerosene and lard, well mixed, half as much kerosene as lard—to a pint of which mixture we added a half dozen teaspoonfuls of strong spirits of camphor and a half teaspoonful of carbolic acid. For colic, and for inflammation of the bowels try this prescription: Muriate of ammonia, ½ ounce; tincture nuxvomica, 1 ounce; cantharides, 1 ounce; with tincture of lobelia enough to fill an 8-ounce bottle. Divide this into five doses, and put each dose into a long-necked bottle with at least a pint of warm water. Give a dose every hour until relief comes. This prescription cost the writer \$5, but proved money well invested. It costs you nothing, and has the endorsement of one of the finest of veterinarians. If the case of colic is taken in time, it will never fail to effect a cure. Keep a bottle of it on hand. Keep in a dark colored bottle and in a dark place—in the medicine cabinet, or well wrapped in paper if kept on a shelf, and it will retain its full strength indefinitely. Take care of every creature that is dependent upon your care and mercy. It means not only money in your pocket, but it means a something that should be a thousand times more than that to you. No man, no woman needs to be told what that is. Look into the soul of it. Great is every man's responsibility to "The Giver of all."—Exchange.

Feed oats and clover to the colts that are being weaned. Avoid the corn ration in the fall. The feed required is one that will build up the bone and muscular system.

In buying cattle for feed, refuse the leggy, thin-flanked, narrow-ended, tight-hided cattle. Better sell your extra corn at home than to feed such animals at any price.

In feeding horses, bear in mind that it is the amount of food digested not eaten that gives the horse strength.

Raise all the feed you can on the farm and buy only those feeds necessary to piece out.

Cattle fed in open yards should have plenty of good water available at all times.

Provide shelter for the colts so as to keep them out of the cold fall rains.

In feeding stock, figure out the cost of putting on a pound of flesh.

Sponges. S. Adderley, 307 Market St.

Registered Shire Stallion FOR SALE.

JET BLACK STALLION: WEIGHT 1750; seven years old. Is a blocky built, big boned horse and a sure foot getter, and his colts will be shown. Price reasonable. For further particulars apply to offices of BREEDER AND SPORTSMAN.

VETERINARY ADVICE FREE

Dr. S. A. Tuttle, a veterinary surgeon of long experience has written a book entitled "Veterinary Experience" on the diseases of horses, giving symptoms and treatment in plain terms. It is fully illustrated with diagrams showing the skeleton and circulatory and digestive systems with references that make them plain. Tells how to buy a horse and know whether it is sound or not. Every horse owner should have one. It is sent to any one.

TUTTLE'S ELIXIR

Is the only guaranteed cure for Colic, Curb, recent Shos Bolls and Callosities. It locates lameness, relieves and cures Spavins, Ring Bones, Cockle Joints, Grease Heel, Scatches, Catarrh, etc. Send today and get the book free and information about Dr. Tuttle's specifics. Tuttle's Elixir Co., 52 Beverly St., Boston, Mass. Mack & Co., San Francisco and F. W. Braun, Los Angeles, California Agents.

McKinney Mares and Stallions FOR SALE.

Four Black Mares by McKinney 2:11½
One Brown or Black Weanling Filly by Lecco 2:09½

The Mares are BESSIE D., that is out of Stemwinder the dam of Directum 2:05½; ROSE McKINNEY, that is out of a mare by Forrest Clay 1934 and is the dam of Almaden (3) 2:22½, winner of Breeders Futurity and Occident Stakes; KAGSY, that is out of Babs by Ferdinand 1835 son of Strathmore; and Black Mare out of Bon-tania by Antevolo 2:19½, son of Electioneer; second dam Fontana, dam of Silas Skinner 2:17, etc.

The Weanling is by Lecco 2:09½ and out of Rose McKinney. Also, one bay Gelding with a record of 2:17½ by McKinney. This is the best and fastest roadster of his size in California.

Also one three-year-old Stallion—the best bred one ever sired by McKinney; dam Elsie (dam of 5 in list) by Gen Bentor; second dam Elaine (dam of 4 in list) by Messenger Duroc; third dam Green Mountain Maid (dam of 8 in list) by Harry Clay 45. A grand young horse; has trotted a half in 1:14 as a two-year-old.

Will sell one or all of the above at fair prices. Address C. A. DUFFEE, 599 Thirty first St., Oakland. Or Race Track San Jose, where horses may be seen at any time.

GOOD THREE-YEAR-OLD FOR SALE.

FRANK COVEY, BROWN COLT BY MENDOCINO (sire of Monte Carlo 2:07½, etc. etc.); dam Rose Kinney (dam of Almaden 2:10, 2:23½); 2d dam Bes by Forrest Clay 1934; 3d dam Lovella by Almont Lightning 1023; 4th dam by Imp Yorkshires. A very handsome colt, stands 16 hands and weighs 1100 lbs.; absolutely sound and well broken. With road work only has trotted quarters in 41 seconds, and with training promises to be a race horse. He was bred by Charles A. Durfee and, as will be seen by his pedigree is a half brother to Almaden, the great two-year-old. He is eligible to registration, and will make some one a great horse whether for the track, road or as a sire. He has a good disposition and is a high-class young horse in every respect. For price and further particulars address DR. A. DE FOE, 618 South Fifth St., San Jose, Cal.

McKINNEY FILLY FOR SALE.

I OFFER FOR SALE AT A REASONABLE PRICE the black two-year-old filly SUKEY MAC by McKinney 2:11½, dam Winnie Wilkes 2:17½ by Rey Wilkes (son of Mambrino Wilkes and Fannis by John Nelson); second dam Pet by Cresco 4908; 3d dam Topsy by General Taylor SUKEY MAC is entered and paid up in the Pacific Breeders Futurity for next year. She has only been worked a very little and has paced quarters in 35 seconds. Apply to R. P. M. GREELEY, 14th and Franklin Sts., Oakland.

FOR SALE.

YOUNG PACING STALLION, FOUR YEARS old, sired by Washington McKinney, dam Yolo Belle by Waldstein, son of Director. Is a handsome blood bay, with star; has been trained but a few months and shows a high rate of speed. Also Yolo Belle, dam of the above stallion; is one of the handsomest mares in Sonoma county, large and stylish, very gentle, and is driven daily by a lady. Coming eight years old and is a trotter.

Price for the stallion \$1000; for the mare \$500. Apply to MRS. JANE HOGBOOM, 1040 Fourth St., Santa Rosa, Cal.

HITS THE BULLS EYE

every time. "3 in One" gun oil lubricates the most sensitive action point perfectly, cleans out all residue of burnt and smokeless powder, positively prevents leading and pitting, also rust and tarnish. HEALD'S BUSINESS COLLEGE

24 Post Street, San Francisco, Cal.

The oldest, the largest, the most popular commercial school on the Pacific Coast. 20,000 graduates: 30 teachers; 70 typewriters; over 300 students annually placed in positions. Send for catalogue. E. P. HEALD, President.

TO DRESS POULTRY.

Poultry should not be fed for 24 hours before killing. A full crop injures the appearance of the dressed bird and is liable to sour and low prices are the result. Poultry should always be killed by bleeding in the mouth, or by opening the veins in the neck, then hang by the feet until they are properly bled. The crop and the intestines should not be removed and the feet and head should be kept on.

Either manner of dressing, by scalding or by dry picking sell best to shippers and those scalded best to the home trade. For scalding chickens you should have the water as near boiling point without boiling. Hold by the head and legs, which should be picked dry before scalding then immerse and lift up and down three times. If the head is immersed it turns the color of the comb and gives the eyes a very shrunken appearance, which leads the buyer to think the fowl has been sick. The feathers and pin feathers should then be removed immediately, very carefully and without breaking the skin. They are then "plumped" by dipping ten seconds into hot water and then put immediately into cold water, where they should remain until the animal heat is entirely out, after which they should be hung in a cool place.

To properly dry pick poultry the work should be done before the bodies get cold and while still bleeding. Dry picking is much more easily done while the bodies are warm. The work should be done very carefully, that the skin may not be torn or broken.

WITH THE LIVE STOCK.

Keep the pigs growing as rapidly as possible, unless intended for breeding stock.

The most extravagant economy for the breeder is the use of a poor sire. That "the bull is half the herd" is certainly true and this fact is brought home to the breeder every day.

Did you know that in baby beef production that well finished baby beef heifers bring as high prices on the markets as do steers? This is not true when maturity is reached. A friend of ours fits several car loads of baby heifers each fall and does it cheaper and makes more profit than in feeding baby beef steers.

We feel it our duty to urge every farmer to include among his farm stock a few head of pure bred cattle or hogs. It costs no more to keep a pure bred than a scrub animal. If you have a bank account and scrubs exchange some of the bank account for a few pure bred. It will pay a larger interest on your money than you are now receiving.

Hay and corn being the most plentiful foods on the farms are as a rule too liberally fed by the farmer who wishes to treat his horses with kindness. Farm work horses should be fed just that amount of hay which they will clean up readily. They should be fed in the morning after watering, and before grain. At noon in hot weather when much work is to be done hay should be withheld or but a pound or two be given after a sip of water and while horse is cooling before getting noon feed of grain. Feed at night liberally after the grain ration has been fully masticated. Hay should be of good quality and sprinkled, if dusty. The amount of hay fed should be increased as work decreases as in the winter when hay ration may be doubled as the grain is decreased.—Successful Farming.

THE PRECOCIOUS PULLET.

A prominent poultry breeder says that the pullet that commences to lay the earliest in life is the one that lays the largest number of eggs through life, as cattle that have the milk-producing organs active earliest make the best cows. Select the fast growing, early matured specimens, that present in full the type and size found in the breed, and use only these as breeders, and the egg producing merits will be increased. It is care and attention to the flock that finds and secures these merits in the progeny. Neglect and haphazard breeding never pay. If you have pullets that are laying, you may be certain that they are the ones that you should breed from next spring. Mark them with distinguishing bands so that you may know them when the breeding season arrives.

"SAVE-THE-HORSE"

SPAVIN CURE

Registered Trade Mark

KINNEY & SON,
MANUFACTURERS OF
Hard Wood Lumber and Sawed
Coiled Elm Hoops.

Orville, Ohio, Feb 9, 1905.
TROY CHEMICAL CO. Binghamton, N. Y.:
Nearly two years ago we had a horse with a ringbone, so lame that we could not work him. We tried "Save-the-Horse" on him and he worked every day since and does not go lame at all. Now we have a horse we think is getting a spavin and we wish to try it on him; so you will please send us another bottle and an 8-oz. box of "Save-the-Horse" Ointment. Enclosed find check for \$5.50 in payment of same. Yours truly,
KINNEY & SON.

REDBURN STORE CO.

Redburn, Pa., Dec. 19, 1904
After using "Save-the-Horse" on my driving horse, on what you pronounced blind spavin I have today a sound horse. When I started he could not get over an 8x8 in the doorway without jumping, and it was misery to ride behind him. I can most highly recommend it. Trusting this information will be of service to you, I remain respectfully yours,
M. A. PERCY.

Horse can be worked as usual. "Save-the-Horse" cures without scar, blemish or loss of hair. Can be used in all extremes of weather. Positively and Permanently cures Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil, Windpuff, Weak and Sprained Tendons and all Lameness.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent could make it. Send for a copy and booklet. At drug lists and dealers, or express paid.

TROY CHEMICAL COMPANY, BINGHAMPTON, NEW YORK.

Formerly TROY, N. Y.

D. E. NEWELL, Pacific Coast Agent, 519 Mission St., San Francisco.

BOOKS FOR STALLION OWNERS

1. Hoover's Stallion Service Record.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding, description, dates of service, dates of foaling, etc., with index, complete, size 10x7½. Each book is handsomely and substantially bound. \$2.00

2. The Standard Stallion Service Book.

The nearest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, date of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherette, suitable for pocket use. \$1.00

3. Breeder's Note and Certificate Book and Stallion Service Book Combined.

This book contains 75 blank certificates to be given to owners of mares, certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed. \$1.00

FIRST-CLASS MILE TRACK

ARIZONA TERRITORIAL FAIR PHOENIX, ARIZONA

December 4, 5, 6, 7, 8, 9, 1905

ADDITIONAL PURSES

Entries to Close Thursday, Nov. 23

2:30 Class Trot.....	\$400	2:28 Class Pace.....	\$100
2:24 Class Trot.....	400	2:22 Class Pace.....	400
2:19 Class Trot.....	400	2:13 Class Pace.....	400
2:14 Class Trot.....	400	2:09 Class Pace.....	400
Free-for-all Trot.....	400	Three-year-old Pace.....	400
Three-year-old Trot.....	400		

Special Race for 2:03 Class Pacers, for which a purse of at least \$500 will be offered, thus affording Free for all Pacers two races during the week.

The great three-year-old colt BILLINGS will start at our meeting to beat the world's three-year-old pacing record of 2:05 1-2, now held by Klatawah.

We are confident that our mile track is as fast as any in the country, and with the great horses that are already entered for our meeting sensational time and some of the greatest racing ever seen in the West is certain to result.

Very low rates will be in force on the Santa Fe and Southern Pacific railroads.

PROGRAMME:

MONDAY	THURSDAY
1-2:30 Trot (purse).....	15-2-Year-Old Pace, closed (stake).....
2-2:14 Trot (purse).....	16-2:30 Pace, closed (stake).....
3-2:09 Pace (purse).....	17-2:19 Trot (purse).....
4-Run, 1-2 mile heats.....	18-2:13 Pace (purse).....
	19-Run, 2 1-2 Mile, Cowboy Relay.....
TUESDAY	FRIDAY
5-3-Year-Old Trot (purse).....	20-3-Year-Old Pace (purse).....
6-2:17 Pace, closed (stake).....	21-2:35 Trot, closed (stake).....

9-Run, 1 Mile Novelty.....	
WEDNESDAY	SATURDAY
10-Yearling Trot, closed (stake).....	24-2-Year-Old Trot, closed (stake).....
11-Free-For All Pace, closed (stake).....	25-2:03 Pace special (purse) at least.....
12-2:24 Trot (purse).....	26-2:22 Pace (purse).....
13-Run, 6 furlongs for 3-yr. o. up.....	27-Run, 5 Furlongs (consolation).....
14-Run, 1-2 Mile Dash, Arizona Cow Horses.....	

ENTRIES TO PURSES CLOSE NOVEMBER 23rd. Records made on and after November 9th no bar.

No race longer than five heats. American Trotting Association Rules to govern, except that hoppers will be allowed. Six to enter and four to start. Entrance fee to harness races, five per cent and five per cent from money winners.

Two horses may be entered in one class and be held but for entry fee on horse that starts; but if neither starts, one entry fee will be required. A horse may be entered in two races and be held only for entry fee in race in which he starts; but if no start is made entry fee will be required in one class, and if entered in a stake and a purse race entry fee will be charged on the larger amount.

ENTRIES TO RUNNING RACES close at 6 o'clock the evening before the race. Entry fee in running races five per cent. No additional fee from money winners. Western Jockey Club Rules to govern running races, as far as applicable. Outlaw horses barred.

The management reserves the right to change the order of the program without notice.

Our meeting follows close of Southern California Circuit, which offers \$17,000 for harness races. Remember we have a new \$50,000 plant, first-class mile and half-mile tracks, and the grandest winter climate in the world.

Horses unloaded at the grounds without change over either Santa Fe or Southern Pacific railroads.

J. C. ADAMS,
President.

W. N. TIFFANY, Supt. of Speed,
Phoenix, Arizona.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc. W. B. Eddy & Co., Whitehall, N. Y.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

CRAFT'S DISTEMPER CURE COSTS NOTHING IF IT FAILS.

Distemper can be cured so quickly and thoroughly as to astonish those who have never tried Craft's Cure. No other remedy like it. Safe and sure in its action. Get and test the remedy under our money-back guarantee. If not at your dealers, we will send it prepaid. Price 50c and \$1. Drop a card today for our free pamphlet, "Veterinary Pointers." Gives valuable veterinary information not to be had elsewhere.

WELLS MEDICINE CO., Chemists & Germologists, 13 Third St., Lafayette, Ind
D. E. NEWELL, General Agent for Pacific Coast, 519 Mission St. San Francisco, Cal

IT MAKES NO DIFFERENCE

what particular kind of shooting you are interested in—sportsmen differ as to make of guns, advantages of various loads etc., but sooner or later most of them come to the same opinion about ammunition—that

Peters Shells and Cartridges

have all the other makes beaten in the race for quality and results. See what they have recently accomplished in the three chief departments of "the game":

RIFLE

At Sea Girt, N. J., Aug. 24-Sept. 9, LIEUT. TEWES won the Wimbledon Cup Match, the Grand Laffie & Rand Aggregate, the Seabury and N. J. Members' Matches; LIEUT. CASEY won the Inspector's Match, and LIEUT. SMITH the Reading Match—all using Peters .30 U. S. Gov't ammunition. In the Spencer and Seabury Matches LIEUT. CASEY made a total of 20 consecutive bull's-eyes. In the Wimbledon Match seven of the first ten places were won with Peters Cartridges.

PISTOL

The Pistol Championship of the United States, competed for Sept. 1-11, was won by J. A. DIETZ of New York scoring 465 out of a possible 500 with Peters 22 Stevens Pope Army Cartridges. Standard American Target, 8-in. Bull's-eye, distance 50 yards. At Sea Girt, N. J., Aug. 24-Sept. 9, THOMAS ANDERTON won the All-Comers' Any Revolver, and Jones Matches, and LIEUT. STADJE the Disappearing Target Match, all with Peters Cartridges.

SHOTGUN

The Consolation Handicap at the Grand American, June 30, was won by JAS. T. ATKINSON, score 99 out of 100, using Peters Ideal Shells. First Amateur Average at the Cincinnati Tournament, Sept. 19-21, won by R. S. RHOADS using Peters Shells. First General Average at the Indianapolis Tournament, October 9-10, won by L. H. REID with the phenomenal score of 392 out of 400, using Peters Factory Loads.

THESE RECORDS SPEAK FOR THEMSELVES. COMMENT IS UNNECESSARY.

GUARANTEED

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1905.

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES TO CLOSE MONDAY, DEC. 4, 1905.

ONLY \$2 TO NOMINATE MARE.

\$4250 for Trotting Foals. \$1750 for Pacing Foals. 800 to Nominators of Dams of Winners and \$200 to Owners of Stallions. Money Divided as Follows:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate Mare on December 1, 1905, when name, color, description of Mare and Stallion bred to must be given. \$5 May 1, 1906. \$5 October 1, 1906. \$10 on Yearlings January 2, 1907. \$10 on Two-Year-Olds January 2, 1908. \$10 on Three-Year-Olds January 2, 1909.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace. \$35 to start in the Two-Year-Old Trot. \$35 to start in the Three-Year-Old Pace. \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.

Cops that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (3 in 3) and for Three-Year-Olds 3 in 5. Distance Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before January 2, 1907, her nominator may sell or transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1905.

Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7000, the amount of the guarantee only. Hopples will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more monies in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

San Francisco, Saturday, November 25, 1905

STAKE YOUR FOALS. The man who builds a fine house and then fails to insure it, is always accused of a lack of sense if it burns down, although he may have sympathy extended from all sides. "He is a good fellow and we feel sorry for him, but he displayed poor judgment in not taking out an insurance policy." This is what his friends always say. You have a good mare. In your opinion she is bred right for a producer and mated with a good stallion will prove it. You paid from \$25 to \$100 for a service fee this year and believe (to almost a moral certainty) that the foal will have race winning speed. You feel in your bones right now that her foal will be fast enough to earn a big sum of money in the races when he is old enough to start. You have built a fine edifice. Is it insured? The way to do it is to nominate the mare in the Breeders Futurity, which closes on Monday, December 4th. The guaranteed value of this stake is \$7,000. Any division of it is worth winning and will pay for all the expense of breeding, rearing and training the foal if he wins it. He can't win it unless he is entered. Your house is worth a certain amount. You have paid a percentage of this amount to insure you against loss if it burns down. If it never burns you are out the premium money, but if it does you get paid for the loss. If your colt never trots fast you will be out a very small sum in entrance fee and payments, but if he does and wins you will get a nice little fortune. It pays to insure and it pays to enter colts in good stakes. Think this over seriously and ask yourself the question whether it is not better to spend a few dollars in making your colt eligible to this rich stake than it is to see the other fellow winning two or three years from now in slower time than you know your colt is capable of showing. Take the poet's tip: "Of all sad words of tongue or pen, the saddest are these: It might have been."

DR. WILLIAM FINLAW, one of the leading physicians of Sonoma county for the past thirty years, died at his home at Santa Rosa on Friday evening of last week. Dr. Finlaw was born in New Jersey on June 15, 1839. He studied medicine in Philadelphia and afterwards in Columbia College, New York. Later he entered the army and served four years during the Civil War. He was a prisoner of war for nine months. He afterwards served on General Sanborn's staff during an Indian campaign. At the close of the war Dr. Finlaw remained as a surgeon in the United States army for some time and then resigned from the service and engaged in the private practice of his profession as a physician and surgeon in Junction City, Kansas. Some thirty years ago Dr. Finlaw moved to California and Santa Rosa and was actively engaged in practice up to the time of his death. While stationed at Fort Riley, Kansas, in 1865, Dr. Finlaw was married to Miss Anna Love Snyder, the wife who survives him. Dr. Finlaw was an ardent admirer of a good horse, and years ago established the Rose Dale Stock Farm, just outside the limits of the city of Santa Rosa. He purchased the stallion Dally 2:15, and afterwards St. Whips, a son of the Electioneer stallion Whips. A few years ago he bought the handsome stallion Washington McKinney and placed him at the head of his stud. Dr. Finlaw bred quite a number of standard performers, but seldom raced any of the products of his farm. Among the record horses bred at the Rose Dale Farm were Bonnie N. B. 2:17, Favor 2:21½, Clatawa 2:21, Digitaletas 2:25½, Julia G. 2:23½, Bertha R. 2:22½, and several others. Dr. Finlaw was a man of strong

character, a popular and successful physician and an upright, conscientious and reliable citizen whose word was as good as his bond. His demise will be sincerely regretted by a very large circle of friends, who will sincerely condole with his widow in her bereavement.

• **ANOTHER SON** of Beautiful Bells is dead. Monbells, her foal of 1897, and the last of the wonderful old mare's produce, died suddenly at the farm of his owner, Harry W. Orr of Reading, Pa., Tuesday night, Nov. 14th. Monbells was sold at the Old Glory sale of 1903, being consigned by Palo Alto Stock Farm, and was knocked down to Mr. Orr for the absurdly low price of \$900. It is said that Mr. Orr had just bargained to sell Monbells to Mr. E. L. Featherstone at a price many times larger than he paid for him, and on Mr. Featherstone's man reaching the farm to take the horse he found he had died the night previous. Monbells was sired by Mendocino and was the eighteenth and last foal of his famous dam. He was worked a little as a four-year-old by Chas. A. Durfee and given a record of 2:23¾ at San Jose, making the tenth performer to be produced by the daughter of The Moor. While the sons of Beautiful Bells have been wonderful producers, death has decimated their ranks, Monbells being the fourth to die at an early age. Adbell died last year, and St. Bell and Bell Boy both died at early ages. Monbells left a few well bred sons and daughters in California, several very promising young trotters being amongst them. That he would have been a great sire of extreme speed and added fame to the already famous family had he lived is certain and his death is a loss to the breeders of the trotting horse.

TWO IMPORTANT CONTRIBUTIONS to irrigation literature have recently been printed for free distribution by the Southern Pacific Company. The first is an address made by Mr. J. B. Lippincott, supervising engineer Reclamation Service United States Geological Survey, before the irrigation committees of the Senate and House of Representatives, while at Red Bluff last June. The second is a reprint of an article on "Irrigated Agriculture" by Professor Samuel Fortier, in charge of the Pacific district of the Irrigation and Drainage Investigations, United States Department of Agriculture. The first is a report of a careful investigation of the water sources adaptable to irrigating the great Sacramento Valley, and contains much valuable information. The second is a careful, expert estimate of the land in California available for irrigation, the streams which can be utilized, the need of industrious and intelligent settlers, the cost of preparing the land for irrigation, the errors made by beginners, such as the use of too much water, the value of pumping plants, and a conservative estimate of the results which may be expected from a judicious use of water, judged by what has already been accomplished. Both pamphlets are handsomely illustrated.

MR. M. W. SAVAGE, principal owner and manager of the International Stock Food Company, paid \$21,000 for the champion trotting stallion Cresceus 2:02¼ at the Old Glory Sale last Tuesday. Mr. Savage now owns five champion stallions—Cresceus 2:02¼, Directum 2:05¼, and Arion 2:07¾, all trotters, and Dan Patch 1:55, and Roy Wilkes 2:06½, both pacers. All these stallions have held champion records and Cresceus and Dan Patch are now the undisputed champion stallions at their respective gaits. Mr. Savage has exercised excellent judgment in adding Cresceus to his group of great horses. In the hands of such a progressive and energetic owner Cresceus will pay a big profit on the investment.

THE OLD GLORY SALE began at New York last Monday, and from the meagre dispatches received so far it is evident that the horses are bringing a high average. Cresceus 2:02¼ was sold on Tuesday, going to the bid of Mr. M. W. Savage of Minneapolis for \$21,000. On Wednesday Czarina Dawson 2:08¼ brought \$10,000 and Morning Star 2:04¼ by Star Pointer sold for \$10,500. The total sales for Wednesday reached \$122,755 for 101 head, an average of over \$1000. A complete report of the sale will begin in our next week's issue.

In the 2:17 trot won by the Zombro three-year-old filly Bellemont at Los Angeles Wednesday three horses equally divided the other three moneys, all being the same in the final summary. An instance of this kind is of rare occurrence.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

F. H. JERMYN PURCHASES THE BUTTLER FARM.

Last week Mr. F. H. Jermyn, a wealthy coal operator of Scranton, Pa., who has spent the best part of three winters in California concluded the purchase from James Butler of New York, of the farm known to most residents of this section as the Valensin Farm, near Pleasanton. The farm comprises 160 acres of land and was the home of the famous stallion Sidney, when that horse was owned by the late Count Valensin, who used the place as a horse breeding farm, and bred thereon many champion colt trotters and pacers. After Mr. Valensin's death the property passed to Mr. R. E. de B. Lopez, who changed its name to Merriwa Stock Farm and established his Australian thoroughbred thereon, for whom the farm was named. Mr. Lopez also engaged in the breeding of trotters, owning the stallion James Madison 2:17¾. Two years ago James Butler, the millionaire grocer of New York, and owner of East View Farm, bought the place, and after stocking it with a few brood mares and colts, concluded that it was "too far from the Bowery" and for the past year it has been for sale, the price asked being \$32,000. The amount paid for it by Mr. Jermyn is not stated, but was probably a little below that figure. Negotiations in regard to the purchase of the property have been carried on for Mr. Jermyn for several months by Mr. S. Christianson of this city, and on Mr. Jermyn's arrival here a few days ago the sale was consummated. We understand it is the new owner's intention to greatly improve the property, build a fine residence on the site of the old house and to remodel and reconstruct the stables. He will ship here from Scranton a number of his trotters and pacers, including several valuable brood mares, and some young prospects, and will make of the place an ideal breeding farm, on which he will breed a few trotters according to his own ideas and principally for his own pleasure. Mr. Jermyn has many friends in California who will wish him every success in his venture.

ANSWERS TO CORRESPONDENTS.

RAY DITTUS, Sacramento—A horse bred as stated in your letter would be eligible provided his dam is registered and not otherwise. If the mare is not registered now it is doubtful if she could be until she has produced two standard performers. The Year Books do not show that Tam O'Shanter by Noonday ever sired a standard performer.

O. & F. Forestville—Silas Skinner 2:17 was foaled in 1885. He is the sire of Ole 2:10½. None of his daughters have produced a standard performer so far. Belden, whose dam is by Silas Skinner, has worked Belden, whose dam was by Silas Skinner, has worked well authenticated trials in 2:13¾. Alcona, Jr., sire of Silas Skinner, is also sire of the pacer Graceful George 2:23. The dam of Alcona, Jr., was Madonna by Cassius M. Clay 22, second dam by Joe Downing. The breeding of the second dam of Alcona 730 has never been traced.

Edmond S., one of the fastest green trotters in Southern California, broke a bone in his leg while being worked at the Los Angeles track last Saturday. The track was wet and in bad shape from the rain. The horse was going about a 2:24 gait when it happened. Edmond S. was sired by Zombro 2:11, and is owned by Mr. William Morgan of Pasadena. He was being driven by Frank Williams. Edmond S. is one of Zombro's first crop of colts and two weeks ago worked two heats in 2:15½ and 2:15, and Mr. Williams said he could step in 2:13 and probably better. Mr. Morgan has another good Zombro in Era, a four-year-old mare that worked a mile last Monday in 2:16, and her trainer thinks she can 2:12 right now, and says she will reach 2:10 next year, so the green trotters will have to go some to beat her. In her mile in 2:16 she trotted the last half in 1:07½, and the last quarter in 33 seconds. Mr. Morgan has been very unlucky with his horses this year. His mare Una K. 2:14 by McKinney trotted a nice mile in 2:12 about a month ago but is now quite lame. She is a very fast mare and when just right could get into the 2:10 list.

Mr. R. M. Tobin of San Mateo attended a sale of Alfred G. Vanderbilt's horses in New York recently and purchased two pairs of coach horses, paying \$3700 for them. The express charges for shipping them to California were \$900, so the two teams cost him about \$5000 landed at San Mateo. These horses are not only well matched but they are well mannced and make a good showing when driven together. It is the time and money spent on their education that caused them to sell for the prices Mr. Tobin paid for them.

Don't make up your list of 2:10 performers until after the Los Angeles meeting is over, and perhaps it will be still better to wait until the Arizona Territory Fair in December has been held.

Bellemont by Zombro reduced her record to 2:15¾ in a winning race at Los Angeles last Wednesday. She is only three years old but she beat a big field of aged horses.

A man with years of experience on Kentucky stock farms desires work at breaking and handling colts. See advertisement in this issue.

Hirdal, Geo. S. Kelly's roan mare, paced a dead heat with Welcome Mac in 2:12¼ at Los Angeles last Wednesday.

NOTES AND NEWS.

New of Chimes' sons are represented by performers in the new standard list.

Tiverton 2:04½ has had his ailing leg blistered three times and his trainer thinks he will race sound next season.

There is \$10 due December 1st on each weanling foal whose dam was nominated last March in the Kentucky Futurity for foals of 1905.

Andy Welch is going to send Vice Commodore, by Bingen 2:06¼, out of Naron, by Arion 2:07¾, second dam Nancy Hanks 2:04, to Kentucky next spring.

Miss Idaho 2:09¼ in the fourth heat is a new one in the 2:10 list for Nutwood Wilkes.

Dadalon reduced his record to 2:08½ on the opening day of the Los Angeles meeting.

County Clerk J. D. Kalar, of Salinas, Cal., has sent us a fine picture of his sixteen-months-old pacing filly Peaches by Searchlight 2:03¼, dam by Boodle 2:12½, second dam by Carr's Mambrino. This filly has already been a quarter in 36¾ seconds and is one of the most promising youngsters in the State. Her picture shows her to be a large, well formed filly, with speed in every point of her makeup. She wears no hoppers and needs no boots, and has been broken and driven entirely by Mr. Kalar.

It should be the policy of every man who raises a horse to get as much for him as possible, and it will pay every man who has a horse to sell to fit him especially to please the buyer. The majority do not study the matter of selling horses advantageously, and in consequence of this the man who does is in a measure able to avoid their competition and to place his produce in a more commanding position.

Mr. J. W. Zibbell & Son have lately received at their stables on Eleventh avenue, this city, a three-year-old colt by Dictatus that was bred by James W. Marshall of Dixon and sold to L. C. Swain of Vacaville when a two-year-old. Louis Mativia gave the colt six weeks' work at Dixon and he paced a mile in 2:28 hitched to a high-wheel cart. The last quarter was in 34 seconds. Mr. Zibbell, Sr., who is working this colt on the park roads, thinks very highly of him.

John R. Malloy, an oil inspector of Ohio, was one of the persons who strenuously advised Gov. Herrick to veto the Chisholm bill because it permitted betting on horse races, which of course was wicked. Well, Gov. Herrick vetoed the bill and then ran for Governor again. Mr. Malloy did not consider it wicked to bet on elections, so he put up nearly all the money he owned on his friend Herrick and lost. Doubtless he is now of the opinion that it is just as wicked and foolish to bet on a poor candidate as it is on a poor horse.

Mr. Martin Carter, proprietor of the Nutwood Stock Farm at Irvington, suffered a severe loss last Tuesday night of last week in the death of the mare Bonnie Derby, by Chas. Derby out of Bon Bon, dam of Bonnie Direct 2:05¼ and Bonsilene 2:14¼. Mr. Carter purchased Bonnie Derby at the sale of horses owned by the estate of the late Millen Griffith with the idea of breeding her to Nutwood Wilkes 2:16¼. Luckily she produced a filly, now a yearling, which is very promising. Bonnie Derby was worked some by Dr. Boucher, who drove her an eighth in 15 seconds and thought very highly of her. Mr. Carter bred her last spring to his handsome colt Lord Alwin, an own brother to John A. McKerron 2:04½, and she was in foal. It was Mr. Carter's intention to train her next summer after her foal was weaned and then give her a record, as he intended using her as a brood mare. Her death was very sudden as she had not shown any symptoms of ailment during the day, and was all right when put away for the night. About ten o'clock Mr. Carter's men heard her making a disturbance and found her covered with perspiration from her shoulders forward but dry and with rigid muscles from there back. Mr. Carter was called up and everything was done to relieve her, but after a short time she staggered and fell, immediately jumping to her feet, then fell again and was dead when she struck the ground. Her owner set a high value on this filly; her individuality, breeding and great natural speed making her about his ideal of a brood mare.

William Johnston, one of the most prominent citizens of Sacramento county, died at his farm south of the capital city last week at the ripe age of 76 years. Mr. Johnston was a successful farmer, fruit grower and dairyman, and at the time of his death was a director of the State Board of Agriculture.

Count Malynski, of Russia, owner of the American-bred trotter Valentine, who has been making a tour of America, is now in Lexington, Ky., where he will remain for some time, studying the methods of the trainers of trotting horses, with the view of becoming an expert trainer in his native country. Count Malynski has a select stud of about 20 mares, mostly American-bred, and will, while here, purchase several promising youngsters to add to his racing stable next season.

S. K. Trefry, who owns one of the best bred and fastest sons of McKinney in California in the three-year-old colt Kenneth C. 2:17, whose dam is Mountain Maid, dam of Tom Carneal 2:08½, by Cresco, has a new one in his string that is out of the same mare. This colt is by Stam B. and he looks like one that will be earning money as soon as he grows up.

It is reported that Knap McCarthy will join the ranks of the Eastern trainers who will winter in California. Come on, gentlemen, there is plenty of stall room, plenty of horses and a warm welcome for you all in this land of sunshine, flowers and record breakers.

There is offered for sale by an advertiser a five-year-old McKinney stallion that some breeder should buy and place in the stud. He is an exceptionally handsome horse, bay with black points and not a white hair, stands 15.3 and weighs 1050 pounds. He has not been trained but is naturally speedy and has trotted miles better than 2:30 with quarters in 35 seconds. His breeding is very choice as his dam is by Dexter Prince, second dam by a well bred son of Electioneer and third dam by that good sire McDonald Chief, sire dams of Tom Smith 2:13¼, Stella 2:15½, etc. Such a combination of blood was certain to produce a well turned handsome individual which this five-year-old is. That grand trotting mare Nora McKinney 2:12½ was out of a Dexter Prince mare, so the cross is potent for speed also, and this young horse has this qualification as well. Good legs are a great desideratum in a stock horse and he has the straightest, cleanest and best of legs without a pimple on them. His carriage is splendid and his disposition perfect, while he is one of the sort that never seems to get tired. He should be given a record and put to breeding as such individuals as he, by McKinney and out of a well bred Dexter Prince mare, should be making a name for himself, which he can certainly do if given a chance. For price and further particulars address this office.

Mules are raising in value every year and there will be many mares bred to jacks next spring. Mr. S. B. Wright of Santa Rosa advertises a good jack for sale in this issue.

It is said Gil Curry will dispose of all his thoroughbred interests while he is in California this winter and will then return East, where he will open a public training stable for trotters and pacers at the Pittsburgh track.

James Butler is not retiring from the horse business by any means. The millionaire New York grocer disposes of many horses by auction every year. He has now about twenty head at Pleasanton under the care of Monroe Salisbury. It is said Mr. Butler made an offer of \$30,000 for Direct Hal 2:04¼ recently, to fill the vacant place at East View Farm caused by the death of Direct 2:05½.

Walter J. Snyder, secretary of the Detroit Driving Club for the past two years, has connected himself with John Splan, the well known turfman and "father" of the "light harness horse" auction sale business. They will give their first sale early in January, at the Union Stock Yards, Chicago. The firm will also open a new market in Detroit. It is their intention to hold, annually, two sales; the "first of the New Year" sale in Chicago, in the month of January, and the "bring your watch" sale in Detroit, in the month of May. That this firm will be a factor in the field no horseman questions. Both are well known and popular. Splan, the "only Splan," has, undoubtedly, as large an acquaintance as is enjoyed by anyone in this country and abroad. Mr. Snyder is one of the younger generation, but what he lacks in years is fully compensated for by his energy, integrity and honesty; while his acquaintanceship is very large and his friends numerous.

Mark Twain has taken up the cudgels against over-speeding autoists, and in a characteristic letter in Harper's Weekly he proposes a novel means of detecting and punishing them. The law, he says, "dresses a convict in a garb which makes him easily distinguishable from any moving thing in the world at a hundred and twenty-five yards except a zebra. If he escapes in those clothes he cannot get far." He suggests that this principle be extended to include "his brother criminal, the Overspeeder," who every day, throughout America, runs over somebody and escapes. At present, he points out, the automobile numbers are so small that ordinary eyes cannot read them, upon a swiftly speeding machine, at a distance of a hundred feet. He suggests enlarging the figures, making them readable at a hundred yards. For offenses of over-speeding he would have the figures enlarged, as a penalty in place of a fine—to be re-enlarged for each subsequent offense. "With auto numbers readable as far as one could tell a convict from a barber pole, none of these criminals could run over a person and 'escape'."

An advertiser has reasoned it out this way: "If I want to get well acquainted with a man to whom I have been introduced, I speak to him every time I meet him. If I spoke to him but once and then passed him by without recognition the next time I saw him, and continued to pass him without speaking, or perhaps speak to him two or three times a year, we wouldn't get to know each other very well. That's the way I look at this advertising business. When I want the dealers of a certain territory to get so familiar with me that they will think of me whenever they are in need of goods in my line, I want to speak to them in every issue of the paper they get."

Ed. Geers is quoted as saying: "I never sat behind a pacer that was as fast as Walter Direct. It was no trouble for Walter to pace a quarter better than 30 seconds, and his going lame means a big loss to me. Right now he is as sound as he ever was in his life, but I hardly think I will race him before 1907, as I think that a year's rest will do him good, and will breed him next season to a lot of high class mares. In a few years I think that he will be one of the greatest sires in the country. I never saw a horse that was any gamer than he is or any faster."

Five stallions appear as sires of the dams of two or more 2:10 performers whose records were gained during the year, namely, Alcantara 2:23, sire of the dams of Lady Sealskin 2:06¼ and Owyho 2:07¼, both pacers; Gossiper 2:14¼, dams of Zephyr 2:07¼ and Zolock (p) 2:05¼; Happy Medium, dams of Admiral Dewey 2:04¼ and Bonnie Ailsie 2:08½; King Rene 2:30¼, dams of General Forrest 2:08 and M. J. Lewis 2:09¾, and Socrates, sire of Emma T., dam of Miss Adbell (3) 2:09¼ and Emma Brook 2:09¾.

Onward 2:25¼ lacks but 13 of having 200 standard performers. It is hoped that in this case the 13 will not prove an unlucky number and prevent him from being the first double-century sire. He has a total of 194 in the 2:30 list, but seven of them are pacers with records slower than 2:25.

Tony Bernal's trotter Major Cook, that was shipped to Los Angeles from Denver, will be back in Pleasanton after the close of the Los Angeles meeting.

The Stam B. yearling that J. M. Alviso is handling at Pleasanton is out of a mare by Director and looks and acts as good as his breeding.

Sukey Mac, the two-year-old filly by McKinney 2:11¼, that Mr. R. P. M. Greeley of Oakland has advertised for sale, ought to be able to win a portion of the money in the Pacific Breeders' Futurity next year. She is fully paid up on and has paced a quarter in 35 seconds with little or no training to speak of. She is a bargain at the price asked for her, as she is a great prospect.

Monterey 2:09¼ is a grandsire of standard speed. Rey Monte, a three-year-old pacer by his son Young Monterey 2:21, took a record of 2:23¼ in a winning race at Ferndale, Humboldt county, in September last.

Several parties having inquired about the Stam B. filly advertised for sale in this paper two weeks ago by Dr. J. P. Dunn of Oakland, we will state that she has been sold to Martin Carter, Esq., proprietor of the Nutwood Stock Farm. Mr. Carter read the advertisement and made it his business to go to Oakland without delay and call on her owner. When he saw the filly it did not take him long to make up his mind and he handed Dr. Dunn his check for the price asked forthwith. The filly is by Stam B. 2:11¼, dam by McKinney 2:11¼, second dam by Antevolo 2:19½, third dam Fontana, the dam of Silas Skinner 2:17, etc., by Almont 33. The filly is a yearling and is entered in the Breeders' Futurity, Stanford, Occident Stakes and Kentucky Futurity. While her new owner will train and race her in the stakes in which she is entered if she shows speed enough, he purchased her for a broodmare, being particularly struck with her breeding to mate with Nutwood Wilkes or one of his sons. The Nutwood Wilkes-McKinney cross has proved a successful one in every instance as shown by Tidal Wave 2:09, Lady Mowry 2:12½, Miss Georgie 2:10½ and others. Through Stam B. the filly has a Happy Medium cross, and this blood also nicks successfully with Nutwood Wilkes, as is shown by that fast trotter Who Is It 2:10¼, whose dam was by Brigadier, a son of Happy Medium. The Electioneer strain in the filly's veins has also been potent for speed when crossed with that of Nutwood Wilkes, as is shown by the horse Frank; Irvington 2:23½ with a trial of 2:14 that is out of a mare by Anteeo, own brother to Antevolo, sire of this filly's second dam. Another Electioneer strain, that of Albert W., produced speed when it met the blood of Nutwood Wilkes, as shown by the fast trotter Bob Ingersol 2:14¼, whose dam has already produced three standard trotters by Nutwood Wilkes. When Mr. Carter read the pedigree of this filly in the advertisement he was particularly struck with the fact that about every strain of blood in her veins had proved a potent nick for his horse, and he wasted no time in getting her. Since she became his property there have been at least half a dozen persons inquiring about her and regretting that they did not see her owner before Mr. Carter did.

Ed. Mills has taken the trotting stallion Lecco 2:09¼ to San Jose for the season of 1906. Lecco's yearlings and weanlings are very handsome and promising youngsters. He is certain to be a great sire.

Henry Helman has not yet made his contemplated trip to Oregon. He is waiting to take there in his care several horses now racing at Los Angeles. He expects to leave Pleasanton for Portland within another week however, and will return to begin work on his string at Pleasanton about the first of the year. He had Mack Mack 2:12 pinfired recently in both hind ankles and the big son of McKinney will be ready to take his work in a few weeks. The firing was done for the ankle that was so severely wrenched at Buffalo last summer, but Helman thought while the job was being done the other ankle might as well be treated to provide against contingencies.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

THOROUGHBRED DEPARTMENT.

(By Ralph H. Tozer.)

Monday was indeed a cold day, so cold that the blood of the "talent" was frozen in horror. Hot favorites were second on four occasions, third once, unplaced once. That was the afternoon's record that will go down in the dope book as a chapter of horrors. The offending first choices were E. C. Runte, Royal Rogue, I'm Joe, Watercure, Cloche d'Or and Celeres. Of these the Rogue, Watercure and Cloche d'Or were best, but victims of bad luck or bad rides, sometimes both. Had Watercure hugged the rail turning for home Divina could never have run around him and won, and had Cloche d'Or not been allowed to fall back to last place going the first three furlongs she could not have lost.

'Twas ever thus in manhood's hour,
I've seen the rosiest "dope" not pay.
I never dreamed of golden bower
But when I woke 'twas yellow clay.
I never laughed o'er figures "swell,"
To think what bookies' coin would buy,
But when dead sure I'd "give them h—ll,"
'Twas "yours" that "got it" in the eye.

In short, Monday's looked like about the "easiest card" of the session, but proved the hardest. On Saturday favorites had had their day, four of them finishing in front, one second and the other third.

The two handicaps of Saturday were things of beauty if not joys forever, Lady Goodrich, San Nicholas and Reservation finishing so close together in the mile and a sixteenth that any of the trio could have been awarded the race without arousing a snake chorus. In the next, for two-year-olds, over the Futurity course, Jennings' Nagazam beat I'm Joe by a good head only.

The departure of the Rancho del Paso thoroughbreds for New York this week is interesting and the following Sacramento dispatch shows what is going to be done with the great ranch after the horses have vacated the place:

"Sacramento, Nov. 20.—The forthcoming sale of the Haggin horses means the subdivision of the Haggin ranch, and practically the addition of 44,000 acres to the suburbs of Sacramento. So far as is publicly known, the owner adheres to his original terms of sale; but it is certain that many negotiations are in the air and are going forward. It is also certain that some Eastern parties intend to start a dairy farm upon the ranch ground, where 10,000 cows will be milked daily, and the promoters of this scheme are now in San Francisco upon the business.

"Next month Sheephead Bay will be the scene of the most notable sale of thoroughbred horses in history. Forty-eight cars, containing twenty-two stallions and 546 brood mares, will start for the East tomorrow, and they will be sold within six days of their arrival. Thirty yearlings are to be sold in San Francisco within the next few weeks, and there will then be left only some 250 weanlings, which will be sold next June in New York as yearlings. Well nigh the whole world has been warned of this unprecedented sale, and dealers from England and Australia are on their way with the intention of securing such horses as Star Ruby, Golden Garter, Watercress, Miss Woodford, Bassettlaw and many others of almost equal fame. Three-fifths of these horses are Haggin products, bred at Rancho del Paso.

"Each year has added to the value of the yearlings, until lately hardly one has been sold under \$800. The prices that they will fetch are, of course, a matter of conjecture, but they will be enormous and the effect upon the racing world of so great a distribution of thoroughbreds must be very marked."

Four special trains (forty-eight cars in all) were employed and this is the largest movement of the sort in the history of railroading. It is so important in the eyes of the railroad people that W. H. Snedaker, of the Illinois Central, came out to accompany the shipment and see that there were no unnecessary delays. The Haggin horses will go over the Southern Pacific and Union Pacific to Omaha, thence over the Illinois Central to Chicago, then probably the Lake Shore and New York Central to New York City. That many a valuable animal will lose its life through taking this journey is certain, for many of the brood mares have never been out of California and therefore will feel the cold weather of the other side of the Sierra Nevadas very keenly. The holding of the sale in December is regarded on all sides as bad judgment. As long as they had decided to sell, why not have had the sale late in October? Among the twenty-two stallions to be disposed of are imp. Gerolstein, Fresno, Glenheim, imp. Golden Garter, imp. Goldfinch, Gold Spinner, Indio, Maxio, Montana, imp. Royal Flush, imp. San Diego, Solanus, imp. Star Ruby, imp. Toddington and imp. Watercress. I believe imp. Bassettlaw and imp. St. Gatien died a short time ago, if memory serves.

Ed. Corrigan has refused an offer of \$750,000 from the Western Jockey Club for his interest in the Hawthorne, City Park and Kansas City tracks. This is par value, and as the Hawthorne and Kansas City courses are closed by law, the offer was considered a very good one. This is taken as a sure indication that the two turf bodies will fight to a finish in New Orleans—and eventually finish racing in the old French city of the South. It seems that a number of owners

have decided to race at both the Crescent City and City Park tracks during the coming winter.

The death of George C. Bennett, Fred Cook's great two-year-old Orsini colt, at Louisville, Ky., last Saturday, was deplored here on all sides. Many consider this half-brother to Honiton, Hainault and Gold Lace to have been the best two-year-old out this season, his only rivals being Burgomaster and Mohawk. W. O'B. Macdonough bred the youngster (which was a big brown fellow) on his San Mateo county ranch, now called Ormondale, and sold him at his yearling sale in New York in 1904 for \$2,200. Fred Cook, of St. Louis, being the purchaser. Bennett beat about everything he tackled in the South, and continued on his conquering career at the metropolitan tracks of the far East. He contracted a cold there, and upon being removed to Louisville, it developed into pneumonia. Thirty thousand dollars had been refused for the colt, and Cook valued him at \$45,000, according to the Louisville dispatch announcing Bennett's death.

Radlke, E. Robinson, Loague and McBride appear to be doing the best riding at Emeryville these days, the first named being the riding marvel he was claimed to be by Middle Western writers. Robinson is not far behind him, and Loague bids fair to follow in the footsteps of "Skeets" Martin and Hildebrand, who were considered so bad at one time they could not get a mount, yet developed into premier jockeys. By the way, Maher will finish second on the riders' list in England this season, E. Wheatley, who was an apprentice up to a short time ago, being in first position, Madden third.

Next Tuesday night's thoroughbred sales (the Macdonough and Cameron) will be the 'event of the season' in this direction, in all probability, combining, as it does, the most fashionably-bred yearlings, the best tried race horses and several gilt-edged stud matrons. That Sir Wilfred will bring a sum in excess of \$7,500 is the general opinion, while there will be some lively bidding for the yearlings by Ossary, Orsini, St. Avonicus and St. Carlo, a number of the youngsters by the last named two being from Ormondale mares.

Ormonde's Right won another good race last Monday at Bennings.

Charles Kerr of Bakersfield will sell his yearlings here next month some time. They are by Cromwell (winner of thirty-two races), the stake-winner All Green (by Knight of Ellerslie, sire of Henry of Navarre), William O'B. and Herald, and for the most part out of good producing mares.

George Rose, about the largest stockholder in Ascot Park, Los Angeles, was a visitor at the track last Tuesday, on his way from New York to the southern metropolis. Indications are that the Ascot meeting will be far and away the best ever held there. At the close of the Bennings meeting James McLaughlin, E. Angarola, J. Grant Lyman, J. A. Bennett, Jack McGinnis and "Boots" Durnell will ship to Los Angeles.

Judge C. E. Pettingill arrived from the East last Tuesday and began his work at Emeryville.

Frank Eckert, Joe Rose and Bill Jackman are among the bookmakers to arrive early in the week, and they "cut in" at once. Rose was at one time over \$200,000 to the good on the New York season, but did not quit at the right period.

Dick Dwyer opens the ball at Ascot Park this season.

After investigation, the stewards decided there was nothing wrong with the win of Sir Preston and that Jockey Wright merely made a poor ride on Royal Rogue in this particular event.

W. A. Pinkerton, the famous Chicago detective, is a recent arrival.

HORSES IN CHINA.

Special Agent Burrill of the United States government has made a report concerning the horses in China. He did this in response to inquiries of persons in the United States interested in breeding horses for shipment to foreign countries. It seems there are comparatively few draft animals other than those raised in China, and that nearly all imported animals are brought from Australia. Mr. Burrill describes existing conditions, and is inclined to the belief that there is a fair field in China for the introduction of American horses and mules. His letter on this subject follows:

That there are no American horses in northern China is probably due to the fact that no determined effort has ever been made to introduce them, and the market, though limited, offers inducements of which the American exporter might profitably take advantage. Practically all the horses now in use in this part of China are imported from Australia, for no especial reason apparently other than that the Australians are keen traders, and with frequent consignments, in the absence of all competition, keep the market well supplied. While foreigners and the wealthier class of Chinese are not dissatisfied with the horses now imported, it does not follow that they are so prejudiced in their favor that they would not welcome an opportunity to compare them with the American grown animal, and horse dealers here unhesitatingly express the belief that horses bred in the United States would not only stand the climate

well, but would be only temporarily affected by the necessary change of feed.

Australian horses are usually shipped on consignments averaging twenty-five head each, and are handled on arrival by the Shanghai Horse Bazaar Company (Limited). When in good condition the prices obtained at the first public sale range from \$175 to \$250 each, exceptionally fine horses, of course, commanding higher prices. The preference is for riding horses 14 to 15 hands high and for driving horses 15 to 15.2 hands high. Fine, upstanding, showy horses are most in demand, and if hardy and properly acclimated bring exceptionally good prices and have a ready sale. Cross-country riding is very popular during the winter months, but is abandoned when the planting of crops begins in March. Driving, however, is indulged in the year round, and the macadamized roads throughout the foreign settlement and extending far into the country about Shanghai, and which are kept in excellent condition, affording opportunities for recreation and enjoyment which are in sharp contrast to the narrow, uneven paved roadways of the native city.

Australian horses shipped from Sydney arrive in Shanghai in about three weeks' time, and although a part of the trip is made through the tropics, they appear to stand the journey reasonably well. Temporary stalls, each of which accommodates one horse, are erected on board ship. Wooden bars are so arranged as to prevent the animal from leaving his quarters, and cleats or cross pieces are fastened to the deck of the ship that a foothold may be retained in the event of rough weather. The freight rate from Sydney to Shanghai is approximately \$50 a head, which includes a return trip fare for the man in charge of the consignment. On their arrival here the horses are immediately taken to the sales stables and gradually accustomed to the Chinese feed of bran, barley and rice straw. In a few weeks, the time depending on the condition of the horses, they are sold at public auction and the proceeds, after deducting expenses, are transmitted to the Australian owner.

In order that imported horses may become thoroughly acclimatized before the hard work of the winter begins, dealers prefer that they should arrive here in the summer months, and, as the seasons here correspond with those in the United States, it is suggested that the months of June and July would be the best time for shipment. A few Canadian horses have been imported both for riding and driving purposes and have invariably shown greater adaptability to climatic conditions than have the Australian horses. These horses, however, were not sent on consignment, but purchased direct for private use.

There were 1900 horses licensed in Shanghai in 1904, and probably 1000 more would cover the whole number licensed in the Chinese empire. These figures include the Chinese ponies, which greatly outnumber the Australian horses, and these two classes are the only animals used for riding and driving in Shanghai. The ponies are all raised in the province of Mongolia and are hardy, wiry little animals, standing from 12 to 13.2 hands high. They pull a heavy victoria or brougham with as much ease apparently as the horse, and will keep going until they drop from exhaustion. They, however, would in no way compete in or interfere with the market for American horses if it were decided to make an effort to introduce them.

There are a few mules here which were imported from the United States which are used for heavy trucking, of which there is comparatively little in Northern China. Coolie labor is utilized for this purpose. As he is the cheapest and most docile carrier of burdens, strong, and able to live on little, taking up little space, and requiring no comforts or attention beyond supervising his work, he is made use of for transporting goods which, outside of the Orient, would call for the services of strong truck animals. For these reasons practically no demand exists for horses or mules ordinarily used for hauling heavy loads.

If an American shipper should desire to enter the field in competition with the Australian horses it would be necessary to arrange with a Shanghai dealer to receive and handle a consignment in the way that is now customary in this market. By communicating with the general manager of the Shanghai Horse Bazaar Company (Limited), such information as would be necessary for guidance in properly transporting the horses could be obtained and the commissions, incidental expenses, and the terms of settlement explained. While the market is not a large one it is of sufficient size, in the judgment of those whose opinion may be relied on, to justify a trial with conditions favorable to the establishment of a paying industry.

GOOD HORSES SCARCE.

Good horses are very scarce throughout all the states, says the Live Stock Journal. True, there is some increase of young geldings and shippers are buying three-year-olds to develop them rather than leave them for some other buyer. There never was such a demand for good draft geldings. The Chicago merchants and packers have orders with all the horse commission men to buy horses up to their standard and some put no limit of price. Swift has had a man traveling from Ohio to the west looking for high class draft geldings, dapple grays, but he could find only a few up to their standard and he paid \$400 to \$500. Pabst recently paid \$1300 for a pair of gray Percheron geldings. The Chicago horse buyers who travel all over the middle west are buying all of the best draft geldings they can find and the tops are culled out of every carload as quick as they arrive. The demand everywhere is greater than the supply for the best class of horses even at the high prices, which is highly encouraging to farmers to get the best grade draft mares regardless of price and breed to the very best draft stallion.

LOS ANGELES MEETING.

By HIDALGO.

The Los Angeles trotting meeting opened on Tuesday, November 21st, under a clear sky, but with a wind blowing from the north that had already wrecked a big coaster at Redondo. The track was in perfect order and very fast under foot, but the bleak wind was a big handicap for the horses to face as they swung into the stretch on their homeward journey. No pains had been spared to render the races brilliant, and between every heat and the next one, the "planer" was sent clear around the track to smooth it off and fill up all the hoof-prints of the previous heat. Secretary A. W. Bruner was a host in himself, for he not only discharged the arduous duties of his regular position, but also acted as presiding judge and announcer, giving the relative positions of the horses in each heat and the fractional time in a clear tone of voice that could easily be heard all over the grandstand. "Pull back, there, Mr. Durfee, you are too anxious," "Bring up your horse now, Mr. Springer, you shall not get left," "Don't come up ahead of the pole horse, Mr. Ward," "Don't go so far up the stretch, Mr. Lindsay, you can't expect to get any sort of a start in that way." I never saw a more vigilant or painstaking man placed in that position. The crowd was small, owing to the inclement weather, but the few that were there, saw a regular "hoss race" in the 2:09 pacing race, the second event of the day.

The first was a trotting race for the 2:11 class, for which there were five nominations, but Willard Zihbell's Adam G., by McKinney, was scratched, leaving Jupiter B., Morone, Ole and The Commonwealth to contend for the purse of \$1000. The pool selling was handled by the veteran George Common, who promised that his pools should be as refreshing (to the winners, of course) as were the pools of Siloam to the weary Hebrew pilgrims of old. There were also mutuals sold on each heat. Jupiter B. was a hot favorite, as will be seen below:

Jupiter B.	20	10	10	10
Field	10	7	6	5

The race scarcely deserves any description, for Jupiter B., splendidly driven by W. G. Durfee, took the lead at the start in each heat and held it every foot of the way, Monroe taking second money, Ole third and The Commonwealth fourth. Then came on the 2:09 pacing race, for which Mr. Ottinger's Daedalion (the stable hands called him "Dandelion") was a most pronounced favorite, as shown below:

Daedalion	20	20	15	15	10	10
Field	12	10	8	7	6	5

There were ten horses carded for this race but Robert I was declared out before the start. There was a good deal of scoring in each heat owing to the large number of starters, but Mr. Bruner finally sent them away with Miss Idaho in the lead. Rounding the bend Daedalion got the lead and held it throughout the heat with Miss Idaho second, Vinnie Mann third and Vision fourth, while Kelly Briggs, tooled by Durfee, had to be contented with seventh place and Steve Bailey's handsome stallion, Tidal Wave, was distanced. Time 2:08½.

Before the start for the second heat was had the dulcet voice of Common was hushed, for Daedalion looked to have an easier task than did Jupiter B. in the trot. The Diablo horse had an easier journey than in the preceding heat and won in 2:09½, with Kelly Briggs second, Miss Idaho third, Vision fourth and Miss Georgia fifth. After this heat Miss Georgia was withdrawn by consent of the judges.

In the third heat Virginia got off with the lead which she retained to the quarter, where Daedalion came up on her and was in front before he had gone sixty yards more. Vision began to move along and passed Virginia, and then up came Miss Idaho, followed by Kelly Briggs, these last two being noses apart to the head of the stretch, where Durfee came with a whirlwind rush and lapping Daedalion at the drawgates, came on amid deafening cheers and won the heat, by the shortest of necks in 2:09. The pools were opened again with Daedalion at \$10 and the same for the field.

Kelly Briggs now had the track and got off well in front with Daedalion second and Vision third. There was no great change in positions until passing the half mile, where Springer began to move up with the daughter of Nutwood Wilkes; and, when the stretch was reached there was evidence of a "hoss race" in sight. Daedalion had gotten a short lead from Kelly Briggs and the whips were popping like firecrackers. Briggs got his head in front of the Diablo horse but Miss Idaho was coming with a Niagara rush on the outside and beat Kelly out by a nose with the latter a good neck in front of Daedalion in 2:10. A rush was made for the pool box with the following results:

Field	20	15	10	10
Daedalion	12	9	6	5

It was growing dusk when they were called up for the fifth heat, the chestnut mare next to the rail. She got off in front and led all the way for three-quarters, Kelly Briggs forcing her every inch of the way. Ward saw he had no chance to beat any of them that night so he took his horse back to seventh place for a while, but Ira and Virginia were going so slow that he passed them without any exertion, but contented himself with fifth place, while a strong battle was going on between Miss Idaho, Kelly Briggs and Vision, the latter coming very fast from the three-quarters. About 120 yards above the stand it was a battle royal between the two leaders, but Durfee finally out drove Springer and won by three

parts of a length, with Vision a good third, in 2:12½. The judges then ordered the race postponed to Wednesday at 1 p. m.

Summaries.

Trotting, 2:11 class, purse \$1000.				
Jupiter B., b. g. by Gen. Beverley... (Durfee)	1	1	1	
Morone, b. g. by Cicerone... (Gerrity)	2	2	2	
Ole, b. g. by Silas Skinner... (Maben)	3	3	3	
The Commonwealth, b. s. by Shadeland Onward... (Lindsay)	4	4	4	
Time—2:12½, 2:14, 2:13.				

Trotting against time to beat 2:30.

Andy McKinney by Geo. W. McKinney (Maben)	2:28
Jessie, b. m. by ——— (Maben)	2:22

Second Day.

The chill weather of Tuesday had abated to a great extent, whereupon a much larger attendance was noticeable than on the opening day. The first thing was to close up the unfinished pacing race for the 2:09 class, for which only Kelly Briggs, Miss Idaho and Daedalion appeared, all the rest of the field having been sent to their stables for not winning one heat in five. In the pools Daedalion opened favorite, but the money offered on the chestnut daughter of Nutwood Wilkes soon brought her up on even terms with him. They sold as follows:

Daedalion	10	10	10	10
Miss Idaho	5	6	7	8
Kelly Briggs	6	5	5	4
	21	21	22	25

It was evident that Springer's friends had been told that the mare was fresher than on the preceding day; and that this was the card that they had up their sleeves. A capital start was effected, Daedalion going off with the lead, closely followed by Kelly Briggs, and the mare trailing to the half mile, when Springer got her down to hard work and ate up the distance, inch by inch, till the three horses entered the stretch less than good necks apart. Everybody said, "Idaho has got the heat if she don't break," and she did not break, winning the heat in 2:09. Then a rush to get even was made, the mare bringing \$20 as against \$12 for the field; and only a few pools were sold at these rates. Once on the inside track she got off strong and led by a neck to the quarter, Kelly Briggs going at her with unflinching gameness till the stretch was reached, where Ward brought Daedalion up and made a bold bid for the heat, Miss Idaho winning by a length from Daedalion in 2:12½, with game old Kelly Briggs two lengths away. No such race had been paced over this track since 1892, when Our Dick beat W. Wood, Silkwood and Tom Ryder in five obstinately contested heats. The advocates of harness racing certainly could not have been better pleased than everybody was with this race. Faster time had been made on several occasions, but no such spectacular finishes had characterized them.

The second race was the first regular race of the day's program, the trot for the 2:17 class, which had originally eight nominations, but three were scratched and the other five on the card were George W. Ford's Burnut, driven by Wallace; S. S. Bailey's Red Skin, driven by Mosher; J. L. Smith's b. g. Hank, himself driving; F. J. Ruhstaller's br. g. Wild Bell, driven by Freeman, and W. G. Durfee's br. m. Bellemont, with Durfee in the sulky. The latter won in straight heats, so easily that it would be a waste of time to describe the heats. Wild Bell trotted the best race of the others, being second in the deciding heat, with Burnut third and Hank fourth. As will be seen by the summary, the three beaten contestants figured "9" each, so the judges ordered the first money to Bellemont, with the second, third and fourth moneys equally divided between the three other contestants. Time, 2:16, 2:17, 2:15½. It looked to me as if a heat in 2:12 would not have beaten Durfee's mare, for she was going well within herself at all parts of the race. Red Skin was drawn after the second heat, having no chance whatever; and great sympathy was felt for Mr. Bailey, who had traveled his stable twice as far as any other contestant in order to participate in this meeting.

The matinee cup for amateur drivers, members of the association, came next, the horses being in the 2:30 class. There were four entries, Kimmont, driven by Dr. Ralph Hagan; General Boodle, by Godfrey Fritz; California Poppy, Mr. H. G. Garland, and El-mond S., by William Morgan, but the latter was withdrawn and the race was won by Kimmont in straight heats, with Fritz Boodle (as he was called) second, and the Poppy third, in 2:31 and 2:30.

The third regular race of the day was a broken heat affair like the one of the preceding day; and like that one it was a most bitter fight. Nine horses were on the card, pacers of the 2:20 class, and four savagely contested heats, with one dead heat and two eyebrow finishes, was the condition of things up to dusk, when the judges postponed the race till Thursday. Welcome Mack, being a local horse, had a great many more friends than any of the others and brought \$20 in pools, against \$10 for Victor Platte (who had a strong following from San Diego), and \$8 for the field. He beat Victor Platte so easily in the first heat that there was no more betting, except in the mutuals, which were sold exclusively on heats. The time was 2:13½ and the San Diego men said that no such time as that would take Victor's measure after he had once got warmed up to his work. The second heat was as spirited a contest as ever was seen in this State, Birdal, a big roan mare, getting away in the lead and holding it by two lengths to the quarter in 33½, to the half in 1:06, with Welcome Mac coming on at a furious clip. He cut her lead down to a single length at the three-quarters in 1:40, and then Panning brought Victor up like a whirlwind. Cries of "Come on, Fred," "Hurry up, Ward," and "Give it to her, Kelly," resounded from all parts of the grandstand. Each driver was straining every effort to win, but

the judges were unable to separate them and declared it a dead heat between Welcome Mac and Birdal, with Victor Platte less than a length behind the leaders. Fear Not was fourth, J. A. C. fifth, Norda sixth, Henry N. Seventh and Connors eighth. Time, 2:12.

The third heat was Welcome Mac's, for he got off well in his stride and led by a length to the quarter, where Birdal joined him and lay on his wheel all the way, Victor Platte dropping back and allowing Fear-not to work into the third place. The quarter was faster than in any previous heat (32½), and the half was done in 1:05, but the pace seemed to flag around the turn, as they were at the three-quarters in 1:38½, but there came a severe rally from there on, Welcome Mac winning by two lengths from Birdal with Fear-not a good third, J. A. C. and Connors being distanced. Pools were now resumed, the field bringing \$8 to Welcome Mac's \$10.

There was a straggling start for the fourth heat, of which Birdal got decidedly the best and went to the quarter in 32½, where Welcome Mac began to move up. At the half they were going great guns and Birdal was already in trouble, for Fearnot had passed her as they swung into the lower turn. Just then Fred Panning made a spectacular drive and passed Birdal, then Fearnot, and set sail for the big brown son of grand old McKinney. On he came like a maelstrom on the rugged Norway coast, getting on even terms with Mac at the draw-gates and beating him home a scant length in 2:11½, the fastest heat of the race, amid deafening cheers. The judges, after announcing the heat, declared the race postponed to Thursday at 1 p. m.

Pacing, 2:09 class, purse \$1000. Five heats Tuesday.						
Miss Idaho, ch. m. by Nutwood Wilkes						
..... (Springer)	3	3	5	1	2	1
Kelly Briggs, br. g. by Bayswater						
Wilkes	7	2	1	2	1	2

California Poppy, ch. m.	dr	
Time—2:30½, 2:31½.		

HIDALGO.

The widely advertised match race between Hazel Patch 2:02½, the sensation of this year's Eastern circuit, and Zolock 2:05½, the California pacer, was the feature of Thursday's program. The race was best three in five heats. Three heats were paced, Zolock winning the first heat in 2:05½, and Hazel Patch taking the next two in 2:07½ and 2:08½. The track at Agricultural Park was fast, but a strong wind blew from the southwest and the air was decidedly cold.

Welcome Mac won the fifth heat of the 2:20 pace, continued from Wednesday, giving him the race. The 2:14 trot was taken by Cuete, who reduced his record to 2:13½, after Morone had won two heats. The 2:12 pace was undecided, Glenn and Vinnie Mann winning two heats each. Hidalgo's letter, giving full accounts of Thursday's races, will not reach us in time for this issue.

NEW THREE MILE WAGON RECORD.

Ed Bryan 2:16¼, the son of Little Corporal, that a short time since reduced the two mile wagon record for trotters to 4:45, captured another world's record week before last at Philadelphia, when he pulled a wagon three miles in 7:30½, beating the former record of 7:53½, made in 1857, by Prince, by just 20 seconds. The horse's driver drove on a set schedule. The fastest quarter was in 36½ seconds, and the slowest in 39½, averaging 37½ seconds. Ed Bryan trotted the first mile in 2:32½, the second in 2:30½, and the third in 2:27½, and finished strong without being in the least distressed. Ed Bryan is a 10-year-old bay gelding and was sired by Little Corporal 2:19¼, a son of Onward, dam by Almontell, son of Almont. He was purchased three years ago by Markoe & Robinson of Philadelphia from William MacFarland, the latter having secured the horse in the West. Robinson campaigned him the last two seasons over the half-mile tracks. In 1904 at Lancaster, Pa., he marked him in 2:21½ in an eight-heat race, and this season at Mt. Holly he earned a record of 2:16¼.

Ezra Tilden, a young trainer from Portland, Oregon, and son of the well known trainer and driver, John Tilden, recently reached Los Angeles with a string of young horses. He has twelve head, eight of them by Zombro, all very promising and good gaited, showing plenty of speed. Of the eight Zombros but one is a pacer and that is a "peacherino," as she was only two years old in October, has had but three weeks' work, but paced a quarter in 38 seconds for Mr. Tilden the other day. She has been named Ziholcin. Her dam is by the old Oregon hero, Altamont, and she is owned by Mr. George Crossfield of Wasco, Oregon.

WOODLAND STOCK FARM SALE.

A crowd of a thousand people or more filled the sale pavilion of Fred H. Chase & Co at 1732 Market street on Tuesday evening of this week, when eighteen horses from Mr. Alex. Brown's Woodland Stock Farm were sold. Superintendent Chas. S. Spencer had shipped them in good shape and all were brought into the ring looking well. The consignment consisted of seven three-year-olds, two two-year-olds, four yearlings, three old brood mares and two aged geldings. The bidding was not very spirited, but the stock brought fairly good prices, a total of \$2585 being received for the eighteen head. The three-year-olds averaged \$172, the two-year-olds \$105 and the yearlings \$102.50. An eighteen-year-old brood mare that had not produced a standard performer fetched \$125, a good price. The summary of the sale follows:

Chamois, blk. m., foaled 1888, by Shamrock 2:25, dam by Marion, \$125.

Boydella, ch. m. foaled 1893, by Boydell, dam said to be by Geo. M. Patchen Jr., \$82.50.

Hattie, b. m. foaled 1890, by Robert Steel, dam said to be by Sargent's Patchen, \$37.50.

Bay filly, foaled 1902, by Prince Ausel, dam Hattie by Robert Steel, \$105.

Black filly, foaled 1902, by Nushagak, dam Chamois by Shamrock, \$150.

Bay filly, foaled 1902, by Nushagak, dam Viola by Gen. Benton, \$140.

Jessie Shirley, b. f., foaled 1902 by Nushagak, dam Hattie W. by Alaska, \$235.

Beauty, blk. f., foaled 1902, by Nushagak, dam Addie W. by Whips, \$255.

Black filly, foaled 1902, by Bayswater Wilkes, dam by Falrose, \$100.

Bay gelding, foaled 1902, by Nushagak, dam Hilda Rose by Dawn, \$220.

Black gelding, foaled 1903, by Nushagak, dam Bonnie Derby by Chas. Derby, \$100.

Black gelding, foaled 1903, by Nushagak, dam Chamois by Shamrock, \$110.

Brown colt, foaled 1904, by Nushagak, dam Addie B. by Dexter Prince, \$210.

Black colt, foaled 1904, by Nushagak, dam Addie W. by Whips, \$90.

Bay filly, foaled 1904, by Prince Ausel, dam Hattie by Robert Steel, \$45.

Chestnut colt, foaled 1904, by Prince Ausel, dam Boydella by Boydell, \$65.

La Correcta, b. g., foaled 1900, by Arthur B., dam Nougay by Langton, \$290.

Black Jack 2:28½, blk. g. foaled 1899, by Nushagak, dam Addie W. by Whips, \$2.25.

SALE OF MACKEY YEARLINGS.

The first sale of thoroughbred yearlings bred by John Mackey and raised at the Langenour Ranch, in Yolo county, took place at Fred H. Chase & Co.'s salesyard in this city Friday evening of last week and was quite successful. The sales were as follows:

Bal colt by imp. Canopus, dam Angeliue by imp. Darebin, to James Touhey for \$200.

Chestnut colt by imp. Paladin, dam Atlantis by imp. Midlothian, to J. J. Moran for \$125.

Bay colt by Bedeck, dam Calora by imp. Calvados, to T. W. Graffort for \$275.

Bay colt by Vesuvian, dam Hemera by imp. Goldfinch, to W. P. Fine for \$275.

Chestnut filly by Bedeck, dam Hinda Dwyer by Reform, to W. O'B. Macdonough for \$650.

Gray colt by imp. Canopus, dam La Reina by Hidalgo, to Jas. Touhey for \$550.

Bay filly by imp. Canopus, dam Lillie Simpson by imp. Artillery, to P. Wilkerson for \$125.

Chestnut colt by imp. Canopus, dam Location by imp. Prospector, to James Touhey for \$500.

Bay colt by Vesuvian, dam Peril by imp. Darebin, to H. Schwartz for \$200.

Chestnut filly by Bedeck, dam Sunol by imp. St. Andrew, to J. Painter for \$425.

Bay colt by imp. Canopus, dam Temblor by imp. Cheviot, to C. Pink for \$750.

Bay colt by Vesuvian, dam Tillie S. by Major Ban, to Hearst Estate for \$125.

Bay colt by imp. Canopus, dam Venezia by Florentin, to D. McCarty for \$100.

Bay colt by Vesuvian, dam Wilda by imp. Brutus, to Grant Edson for \$150.

Total for fourteen head, \$4450, an average of nearly \$318.

A VALUABLE HORSE REMEDY.

Every horse owner is interested in knowing how to cure and prevent the spread of distemper, epizootic, pink eye and similar ailments among their stock. Therefore this publication takes great pleasure in publishing a few unsolicited words of recommendation concerning Craft's Distemper Cure, which is prepared by the Wells Medicine Co., Lafayette, Ind. This remedy has so clearly established its efficiency and reliability that it is justly entitled to all that can be said in its favor. It probably has no equal as a remedy for the prevention and spread of the various forms of distemper. It gives positive and quick results, as thousands of veterinary surgeons, breeders, trainers and others testify. We are informed that the remedy may be obtained from most all druggists throughout the country; but when it can not be obtained from dealers it will be sent direct, prepaid, by the Wells Medicine Co., from whom can also be had free of charge a valuable 32 page booklet entitled "Veterinary Pointers," which we would advise all our readers to send for. It contains much valuable information concerning some of the most prevalent and most dreaded diseases of horses and colts.

The pacing gelding, Frank Yoakum 2:04¾, met with a bad accident on the Pennsylvania railroad while being shipped from Hartford, Conn., to Philadelphia, on Nov. 8. At New Brunswick, N. J., the boiler of the engine exploded, killing the engineer and the brakeman and injuring the fireman. The train buckled and threw the pacer on his head, he turning a complete somersault, injuring his back and, it is said, throwing out two very large curbs, which may end his career as a race horse.

MILLARD SANDERS TO WINTER IN CALIFORNIA.

Chicago Horseman: Millard Sanders, the man who made Lou Dillon 1:58½ the queen of the turf, last week stopped over in Chicago for a few days on his way to Pleasanton, Cal. Mr. Sanders has resigned as trainer for John H. Shults. For two years he trained the youngsters by Axworthy and in 1904 he made them the most talked of lot of colts in the country, with the result that they brought the highest average when sold in Madison Square Garden last winter. During his connection with Mr. Shults he started sons and daughters of Axworthy in ten races, won seven of them and was second once. This year he trained a large number of two and three-year-olds at Memphis, and later at Cleveland. On August 15 he received several yearlings, and before he sent them home to New York he had educated two of them to the point where he was confident that he could put both of them in the list. He was ambitious to do so as he has put eight yearlings in the list and these two would have made an even ten.

The two and three-year-olds were not engaged in the futurities, as at the time they were bred Mr. Shults had decided to quit the trotters and race a stable of runners. Consequently there was no chance to show what the youngsters could accomplish in company. He devoted the entire season to their education, however, and refused to take a stable of aged race horses, because of an understanding that the colts would be raced in 1906. When Mr. Shults recently decided to sell all the colts and not campaign any next year Mr. Sanders promptly resigned. He is a marvel at making speed with youngsters but he does not care to develop them exclusively for the sales ring.

It is rumored, although Mr. Sanders would not confirm it, that he has an eye on several of the get of Sidney Dillon that are now owned in California, and it is probable that he will have a number of them to train at the Pleasanton track. It is not to be wondered that Sanders is sweet on them for he developed and marked Lou Dillon in 1:58½ behind a dirt shield, and last year he drove her without the pacemaker in front a mile in 2:01. There was an impression that the queen of the turf was not as good last season as the year previous, but when one compares her performances with that of Dan Patch with and without the runner in front, there seems to be little on which to base an argument. Dan Patch has paced a mile in 1:55 with the pacemaker in front and one in 1:58 without, a difference of three seconds. The difference between Lou Dillon's two records is 2½ seconds, so that the queen must have had as much speed in 1904 as in 1903.

CONCORD RACE TRACK ITEMS.

The new owners and others interested in the race track met last Saturday afternoon and formulated plans for the improvement of the property. It was decided to improve the old buildings, put up a high fence along the county road, pipe water to the buildings and build sixty new stalls. There was some talk of covering about one-quarter of a mile, which had been cut down to clay, with red loam the same as the other portion of the track. This will make the track the same all the way around and will be a good winter track.

Sid Roach, the two year old, looks like a race horse coming up the stretch.

M. Perry has tried his new Sidmoor colt for a quarter. He says he has a future race winner.

Mr. Curry and his son Ruben were out to see S. R. Curry's two year old Sidmoor filly speed. She showed a 2:48 gait for one-eighth and a 3:00 gait for one-half mile. Pretty good for two-weeks' work in the speed cart.

It is said that a horseman's love for a certain breed of horses that he has owned will extend to the third and fourth generations. There must be something in this, for Nelson Clanton drove out to the track last week to see Mr. Durham work Flyaway for the best mile ever trotted over the track by any horse. He was also greatly pleased with the two-year-old colt Sid Roach, when he went the mile out in 2:57¾, the last eighth in 20¼ seconds. Both these horses' dams are by Conductor, and Mr. Clanton could see the good staying qualities of the Conductor blood come to the surface as they came up the homestretch.

What is the matter with having a two-year-old race for a Christmas dinner—so many nice two-year-olds. There is M. Perry, David Roach, Williams Brothers, J. E. Durham, Pat Roach and others, each of whom could enter a speedy animal for an interesting race.

The Horgan Futurity Stake, foals of 1905, to be held over the Concord race track next year, promises to have many entries. Entry blanks have been sent out and nominations will close January 1st.

Among the entries for the Pacific Breeders' Futurity, valued at \$7000, from Contra Costa county are Dr. J. Wallace DeWitt and E. B. Whelehan of Antioch and G. O. Meese of Danville. (Concord Transcript.)

MORE THAN PLEASED.

Dr. Wright J. Smith, prominent veterinarian at Kingston, N. Y., writes as follows: "Please find enclosed check, for which send five bottles of Quinn's Ointment. I received the first bottle and have been waiting to give it a fair trial, and must say I am more than pleased with results." Quinn's Ointment is being used by a large number of the prominent veterinarians throughout the country, and also by the leading breeders and horsemen everywhere. For curbs, splints, spavins, windpuffs and all bunches there is nothing better. Price one dollar per bottle, delivered. Address W. B. EDDY & CO., Whitehall, N. Y., if you cannot obtain from druggist.

Secretary Knight of the American Trotting Association has done good work this year in hunting out several ringers and preventing their owners getting the money.

RESULTS AT TULARE.

The official summaries of the October race meeting at the Tulare kite-shaped track are just at hand. The meeting was held from October 17th to 21st inclusive:

Pacing, 2:09 class, purse \$500.
Daedalion, b. s. by Diablo.....1 1 1
Lady R., b. m. by Col. K. R.....2 2 2
Jonesa Basler, blk. s. by Robt. Basler.....3 3 3
Time, 2:10¼, 2:12, 2:12¼.

Pacing, 2:17 class, purse \$400.
Hattie Croner, b. m. by Bay Bird.....2 1 1 1
Stonelita, b. m. by Stoneway.....1 4 4 5
Fearnot, b. h. by Lynmont.....3 2 3 2
Molly Button, br. m. by Alex. Button.....5 3 2 3
Prince Charles, ch. h. by Chas. Derby.....4 5 5 4
Time, 2:15¼, 2:17¼, 2:17¼, 2:17¼.

Trotting, 2:20 class, purse \$400.
Lady Jones, blk. m. by Capt. Jones.....4 1 1 1
Hank, b. g. by Vasto.....1 2 3 4
Billy Dooley, b. g. by Bay Bird.....2 3 2 2
Homeway, b. g. by Strathway.....5 4 4 3
Miss Gordon, blk. m. by McKinney.....3 dis
Time, 2:18½, 2:16½, 2:17¼, 2:18.

Trot or pace, purse \$80.
Billy H.1 1 1
Lucy Woodward3 3 2
Mayola4 2 3
Milton Gear2 4 4
Time, 2:32, 2:28, 2:26½.

Pacing, 2:17 class, purse \$80
El Morino, b. g. by Iris1 1 1
King Athby, b. g. by Athby.....2 2 2
Sweetheart3 3 3
Jene Madison, b. m. by Jas. Madison.....4 4 1
Time, 2:21, 2:26, 2:17.

Pacing, 2:20 class, purse \$400.
Fearnot, b. h. by Lynmont.....2 1 1 1
Dot, h. m. by Falrose.....1 4 5 4
Lady Snider3 2 2 3
Rhody Fay, b. m. by Gen. Logan.....4 3 4 2
Jene Madison, b. m. by Jas. Madison.....5 3 3 5
Time, 2:17¼, 2:19¼, 2:19¼, 2:19¼.

Pacing, 2:17 class, purse \$80.
Hattie Croner, b. m. by Bay Bird.....1 1 1
Molly Button, b. m. by Alex. Button.....4 2 2
Stonelita, b. m. by Stoneway.....2 3 4
Princes Charles, ch. h. by Chas. Derby.....3 4 3
Time, 2:16¼, 2:16¼, 2:16¼.

Pacing, yearlings, purse \$75; one-half mile heats.
Andy Direct, br. g. by Robt. Direct.....1 1
Little George, b. c. by Stoneway.....3 2
Radium, blk. c. by Stoneway.....2 3
Time, 1:14½, 1:13.

Trotting, 2:17 class, purse \$400.
Lady Jones, blk. m. by Capt. Jones.....3 1 1 1
Hank, b. g. by Vasto.....1 2 4 2
Homeway, h. g. by Strathway.....2 3 3 4
Wild Bell, br. g. by Wildnut.....4 2 3
Time, 2:20, 2:19¼, 2:17½, 2:18.

FERNDALE FAIR HARNESS RACES.

Following is a summary of the harness races held at the meeting of the Ferndale (Humboldt county Fair Association from September 6th to 9th, inclusive:

Trot or pace, 2:25 class:
Young Monterey, ch. s., pacer, by Monterey.. 1 1 1
McDudley, blk. g., pacer, by Dudley..... 2 2 2
Bonita Wilkes, br. m., trotter, by Wayland W. 3 3 3
Time—2:22, 2:21, 2:22.

Trot or pace, two year old stake.
Evelyn E., blk. m., pacer, by Cassian..... 1 1
Ulilla, rn. m., trotter, by McKinney..... 2 2
Time—2:54, 2:39.

Trotting, yearlings, mile dash.
Abe G., br. c. by Greco..... 1
Ada G., b. f. by Greco..... 2
Time—1:36.

Trot or pace, named horses.
Electo, ch. g., pacer, by Dudley..... 1 1
Ameda Waldstein, br. m., pacer, by Waldstein 2 2
Time—2:26½, 2:25.

Trot or pace, three year old stake.
Rey Monte, b. g., pacer, by Young Monterey.. 1 1
Electo, ch. g., pacer, by Dudley..... 2 2
Rosebud, ch. m., trotter, by Ira..... 3 3
Time—2:23¼, 2:23¼.

Trot or pace, named horses.
Bonita Wilkes, br. m., trotter, by Wayland W.2 1 1 1
Lixie, ch. m., pacer, by Red Wilkes.... 1 3 3 3
Buncomb, b. s., pacer, by Dudley..... 3 2 2 2
Juanita, gr. m., pacer, by Secretary..... 4 d
Time—2:27½, 2:26¼, 2:27½, 2:28.

Exhibition trot, half mile.
Dr. Lane's colt Humboldt Dillon by Sidney Dillon, paced by Mr. Brace's Greco. Time 1:14.

Trot or pace, free for all.
Young Monterey, ch. s., pacer, by Monterey 1 1 1
McDudley, blk. g., pacer, by Dudley..... 2 2 2
Uno, b. g., pacer, by Aptos Wilkes..... 3 3 3
Time—2:21, 2:21¼, 2:24.

Mr. J. R. Springer's mare, Miss Idaho by Nutwood Wilkes, won a seven heat race over a high class field at Los Angeles this week and paced into the 2:10 list at the same time. She beat such horses as Kelly Briggs 2:09¼, Daedalion 2:08½, Vision 2:09¼, Virginia 2:09, Miss Georgia 2:10½, Tidal Wave 2:09 and Ira 2:10½.

Russell Mc. by McKinney 2:11¼, took a record of 2:23¾ at Phoenix, Ariz.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

April 1-Sept. 1. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-April 1—Closed season for taking steelhead above the water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and age hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Closed season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Nov. 21, 22—Brocton District Kennel Club Brockton, Mass. J. W. Sullivan, Secretary.
Nov. 30-Dec. 2—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.
Dec. 13, 14—Southwestern Kennel Club's bench show at Pasadena. Entries close—.

1906.

Jan. 17, 23—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emory, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. N. J. Matthews, Secretary.
March 21, 24—Wolverino Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
June 9—Wissabickon Kennel Club. Wissabickon, Pa. J. Sergeant Price, Secretary.

Field Trials.

Nov. 21—International Field Trial Club. Rutben, Ont. W. B. Wells, Honorary Secretary, Cbatam, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary, Richmond, Va.
Dec. —Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 126 Malden Lane, New York.
Dec. 2—Continental Field Trial Club, 11th annual trials, —. John White, Secretary, Hempstead, Long Island.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan. —Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

THE QUAILS OF THE UNITED STATES.

By Sylvester D. Judd, Assistant United States Biological Survey.

(Continued from last week)

California Quail.

The California quail is generally dispersed over California below an altitude of 8,000 feet and extends into southern Oregon and western Nevada. This name is used here to cover both the typical California quail—*Lophortyx californicus*—and the paler, more southerly form, called the valley quail—*L. c. vallicola*. It has been introduced into Washington and British Columbia, and efforts to introduce it into the Hawaiian Islands also have proved very successful, although of late years its numbers there have been much reduced by the mongoose, by which in time it is likely to be exterminated. Two geographic forms of the bird are recognized, a dark form and a light one, but as they do not differ in habits there are not distinguished in the following account. It is a beautiful bird with a most pleasing combination of colors and markings, its head being adorned by a glossy black crest, narrow at the base and gradually widening into gracefully recurring plumes, and the markings on the underparts resembling scales. It frequents brush-covered hillsides, canyons, thickets along water courses and the borders of roads, as well as vineyards and other cultivated fields. The nesting time of the species varies considerably according to locality and conditions. According to E. A. Mearns it nests in March and April in Ventura county, Cal. Nests containing eggs were found during the last week of May in Tulare county, Cal., by J. E. McLellan. The eggs usually number 12 to 15, and are white or buff with spots.

These birds take kindly to civilization, and flocks are not rarely seen in the suburbs of large towns, where they range through the gardens and orchards. They often nest close to farm buildings, and W. Otto Emerson states that a pair nested within a rod of his front door, though nearly every hour people and vehicles were passing within four feet of the nest.

Instead of spending the night in a circle on the ground, like the bobwhite, the California quail

chooses much safer places and roosts in bushes or low thickly foliaged trees. This quail is even more confiding than the bobwhite, and frequently comes about farm buildings to eat with the chickens. It has been known to lay in confinement, and appears to yield readily to semidomestication.

The valley quail has acquired the interesting habit of posting sentinels when feeding, which is described in detail by John J. Williams. Mr. Williams observed a flock enter a field and begin to feed, while a sentinel took his station in a peach tree and scanned the country about for danger. Presently he was relieved by a second bird, who took up a position on a brush pile and a little later was relieved by a third, who kept guard while the other two fed with the flock. (Condor, vol. 5, pp. 146-148, 1903.)

Writing in 1891 Clark P. Streater says that about 100,000 are sold each year in the San Francisco market. [Their sale is now prohibited.—Ed.] It is not a perfect game bird, for it does not lie well to a dog, and when once flushed has a habit of running that is exasperating to the sportsman. The best way to hunt these quail is to keep the dog at heel and to run down the birds. This is likely to make them take wing and to break up the covey. The same result may be accomplished also by discharging the gun in the air. When a covey has been scattered in suitable cover they will lie well enough to a trained dog to give the hunter considerable sport, though it is poor in comparison with that afforded by the bobwhite. The beauty of this quail, its pleasant call notes, and its confidence in man make it a favorite, except where it damages the grape crop. In fall and winter where it is abundant hundreds of birds unite in great packs. Bendire, writing in 1892, says that within a decade packs of 500 were often found, but that at that time coveys even of fifty were rare in most places. (Life Hist. N. Am. Birds [I], p. 24, 1892.) In the fall of 1891 they were still very abundant on the west side of the San Joaquin Valley, where E. W. Nelson, of the Biological Survey, records their slaughter by pot hunters. The hunters stationed themselves behind a brush blind near the one spring where the birds came to drink.

Thousands of them flocked thither for water during the day, and by waiting until many birds were bunched the hunters killed at least a score at each discharge of the gun. In a week of this butchery 8,400 quails were killed. A record of 525 birds to four guns in a day in February, 1903, near San Diego, Cal., shows that birds are still abundant there, though far less numerous in most places than formerly. (Recreation, vol. 18, p. 368, 1893.)

The California quail might be introduced successfully in many sections between California and Texas where it does not occur at present. It already has been introduced into Colorado, where it will be protected by law at all seasons until 1920. Laws to prevent trapping and to limit the day's bag, together with absolute protection in sections where necessary, should suffice to preserve this beautiful species.

Food Habits.

The general food habits of this quail have been ascertained by the examination of 601 stomachs, and it proves to be one of the most largely vegetarian of game birds. The material for investigation was collected in California, and represents every month of the year except May. Insects furnished but 2.15 per cent of the food, and leaves, seeds, and fruit 97.85 per cent.

Insect and Other Animal Food.

The 2.15 per cent of animal food eaten by this quail is distributed as follows: Spiders, 0.03 per cent; beetles, 0.22 per cent; grasshoppers and crickets, 0.24 per cent; ants and other Hymenoptera, 0.67 per cent; miscellaneous insects, 0.99 per cent. The beetles are both adults and larvae, and belong to the following families: Chrysomelidae (leaf-eating beetles), Tenebrionidae (darkening beetles), Elateridae (wire-worms), Carabidae (ground beetles), Dermestidae (dermestids), Coccinellidae (ladybirds), and snout beetles (suborder Rhynchophora). The leaf-eating beetles include *Diabrotica* sors, a western representative of the destructive twelve-spotted cucumber beetle. Flea beetles also are eaten, including species of the genus *Ialtica*. Among the miscellaneous leaf-eating beetles may be mentioned the brilliant *Gastroides coesia*. Conspicuous among the ground beetles eaten is the common *Agonoderus pallipes*, and among the useful predaceous lady-birds the species *Hippodamia convergens*. Like the eastern bobwhite, the California quail feeds on ants of the families Formicidae and Myrmecidae. Sometimes twenty to thirty-five ants are taken at a meal. Of the other Hymenoptera, gall insects (Cynipidae) and their galls make a significant proportion. Caterpillars and their pupae are eaten. Cut-worms (*Agrotie*), measuring worms (*Geometridae*), sphinx caterpillars (including *Deilephila*), and the cotton bollworm (*Heliothis obseleta*) make up the greater part of this food. Like the bobwhite again, this bird shows a relish for bugs. It eats leaf bugs (*Capsidae*), bugs of the chinch bug family, such as *Lygopus tricoloratus* and *L. bitriangularis*, and stink bugs (*Pentatomidae*), assassin bugs (*Reduviidae*), flat bugs (*Aradidae*), burrower bugs (*Cryptomenus*), leaf hoppers (*Jassidae*), tree hoppers (*Membracidae*), plant lice, and bugs of the genus *Scolops* (*Fulgoroidea*). The miscellaneous animal matter taken includes flies (*Lucilia capesari*), spiders, and snails.

Vegetable Food—Fruit.

The vegetable food of this quail amounts to 97.85 per cent of its diet. The bird has an unsavory reputation among fruit growers, especially the owners of vineyards. Relative to this subject, Miss Florence A. Merriam, writing from San Diego county, Cal., says:

"In fact, the quail were so abundant as to be a pest. For several years great flocks of them came down the canyons to Major Merriam's vineyard, where they destroyed annually from twenty to thirty tons of fruit. In one season—July to October, 1881—one hundred and thirty dozen (1,560) were trapped on his ranch. The result of this wholesale destruction was manifest when I returned to the valley in 1894. The birds were then rarely seen on the roads and seldom flushed in riding about the valley." (Auk, XIII, p. 116, 1896.)

When this species becomes superabundant and plays havoc with crops it is well to remember that it can be so easily checked. W. H. Osgood, of the Biological Survey, has furnished the writer data on the frugivorous habits of the quail in central California. In one vineyard he saw a flock of about a thousand eating zinfandel grapes. The birds do much damage in September, when the young are molting and they have collected in packs, as before described.

Walter E. Bryant, writing of the damage to fruit, offers testimony on the other side:

In some parts of California there is a strong prejudice against the quail, owing to alleged damage to the grape. The evidence which I have thus far gathered shows that the quail do pick at the bunches of grapes, and not alone those bunches which are near or on the ground; but the damage which they cause seems overestimated. Too often mutilated bunches of grapes are supposed to be due to the presence of quail in the vineyard; but there are other birds and mammals, also, which vary their diet with grapes. I have examined a number of quail's crops and gizzards without finding the presence of grapes, although the birds had been shot near and in vineyards. A quail's crop sent to me from Los Gatos, by Mr. A. H. Hawley, contained twenty-five small grapes; others had a few grapes, seeds, and poison-oak berries (Zoe, IV, p. 56, 1893.)

In the 601 stomachs of the valley quail examined by the Biological Survey grapes formed only 0.01 per cent of the annual food. This small quantity is due, no doubt, to the fact that many of the birds were shot in regions remote from vineyards and many of them during the time when grapes were not in fruit. The total proportion of all kinds of fruit was only 7.60 per cent, an amount so insignificant as to preclude the idea of serious damage. Where the birds are over-abundant and the consequent damage great, trapping or advertising the conditions in sporting papers will probably result in reducing the numbers to normal. Of the 7.60 per cent of fruits, grapes, as before stated, contribute 0.01 per cent; plants of the genus *Rhus*, mainly *Rhus diversiloba*, 4.74 per cent, and miscellaneous fruit, prunes, and vaccinium, 2.85 per cent. The maximum quantity of fruit, amounting to 32.40 per cent for the month, was taken in December, after the grapes had been picked.

Grain.

The relations of the California quail to grain are of considerable economic importance. W. T. Craig, of San Francisco, writes to the Department of Agriculture: "I have observed the quail enter a field of wheat to the number of thousands, and had they not been driven away they would have destroyed the whole crop." No other reports to the Biological Survey show the danger to grain from this quail to be so serious, but data at hand show that it does more or less damage to germinating grain. Two quail shot by Walter E. Bryant on a newly-sown grain field had eaten, respectively, 185 kernels and 210 kernels of barley. (Zoe, IV, p. 55, 1893.) Barley is important in California, where it is grown for hay, for grain feed, and for beer making. There is, however, much volunteer barley, which many species of birds feed on and thus do good rather than harm. It is probable that quail do little or no harm to barley at harvest time, and the waste grain that they subsequently gather in stubble fields has no positive value. Of the yearly food of the 601 quail examined 6.18 per cent was grain, divided as follows: Barley, 4.58 per cent; wheat, 0.44 per cent; corn and oats, 1.16 per cent.

Leaves.

In its habit of feeding on foliage the California quail differs from the bobwhite and resembles the ruffed grouse. Such food forms 22.73 per cent of the vegetable matter eaten. In February, when the bobwhite is weathering blizzards, the California quail is enjoying balmy weather and feeding on browse to the extent of 80 per cent of its food. Most of this browse consists of leaves of leguminous plants, principally clovers. Bur clover (*Medicago denticulata*), a weed that grows in cultivated land and along irrigation ditches, appears to supply most of the forage. Alfalfa and clovers of the genus *alfalfa* form most of the remaining leguminous green food. Next to legumes the finely divided leaves of alfalfa, or "filaree" (*Erodium*), are important. Grass, chickweed (*Alsine media*), the leaves of fern, geranium, oxalis, and groundsel-bush (*Baccharis*) also furnish forage for the quail. W. W. Cooke reports that near Grand Junction, Colo., where the California coast quail has been introduced and thrives wonderfully, market gardeners regard it as a nuisance. (Birds of Colorado, App. 2, p. 202, 1900.)

Weed Seeds.

Different seeds, largely of weeds, furnish the California quail 59.77 per cent of its year's diet. Legumes contribute 17.87 per cent; alfalfa, 13.38 per cent; compositae, 5.55 per cent; the spurge family (*Euphorbiaceae*), 5.85 per cent, and miscellaneous plants, 17.12 per cent. Leguminous seeds are liked best by the bird, and make up 17.87 per cent of the seed diet.

for the year and 46.1 per cent of its food for June. Bur clover yields abundance of seeds as well as forage. Its seed pod is peculiar, much elongated, beset with long, sharp spines, and spirally coiled into a roundish bur. The quail swallows it whole, regardless of spines. This food is highly nutritious and is relished by stock as well as by birds and wild mammals. Seeds of closely allied plants, such as alfalfa, vetch, cassias, cultivated beans and peas, and clovers of the genera *Trifolium*, *Lespedeza*, and *Melilotus* also are in the quail's list, as well as locust (*Robinia*) and lupines, the latter taken in large quantities. They include the seeds of *Lupinus nanus*, *L. micranthus*, and *L. sparsiflorus*. Other leguminous seeds are eaten in great numbers, including a small beanlike seed, *Lotus glaber*, which looks much like a miniature Frankfurt sausage, and an unidentified, almost microscopic square seed, with a notch in its edge, possibly some species of birdsfoot trefoil (*Lotus*). Nearly all of the leguminous plants that furnish the quail with seeds belong in the category of weeds.

Seeds of weeds from other families of plants make up no less than 41.89 per cent of the annual food. Seeds of compositae yield 5.55 per cent, such injurious weeds as thistles making up the largest part of this percentage. The thistles most often eaten are *Centaurea melitensis*, *C. americana*, *C. solstitialis*, *Mariania marianiana*, *Conchus* sp., and *Carduus* sp. *M. marianiana* has the largest seeds. Ninety of these had been eaten by a quail shot by F. E. Le Beal at Haywards, Cal., August 15, 1903. The seeds of the bur thistle (*Centaurea melitensis*) are smaller and have a hook at one end and a set of spines like a paint brush at the other. They are, perhaps, most liked of all composite seeds. From 500 to 800 are often eaten at a meal. The destruction of this seed is highly beneficial, for the bur thistle is troublesome to farmers. Wild carrot (*Daucus carota*), tar weed (*Madia sativa*), wild lettuce (*Lactuca* sp.), mayweed (*Anthemis cotula*), and marsh elder (*Iva xanthifolia*) furnish most of the remaining seeds of composite plants. Tar weed is a favorite source of food, and one stomach, collected at Wastonville, Cal., by J. S. Hunter, contained 700 of these seeds. Another stomach, from the same place, held 2,000 tiny seeds of dog fennel, or mayweed.

From seeds of plants belonging to the spurge family (*Euphorbiaceae*) come 5.85 per cent of the annual food. Spurges, particularly *Croton setigerus*, commonly known as turkey mullein, are a staple with the California quail as with most other seed-eating birds. So fond are the quail of turkey mullein that their crops are often completely distended with the seeds, sometimes from 500 to 900 to a bird. Turkey mullein is a prostrate plant covered with a whitish, woolly pubescence, and often used by the Indians to poison fish. Seeds of alfalfa (*Erodium cicutarium* and other species), which is both a weed and a forage plant, are eagerly sought. They are lance-shaped, furnished with a long, elaborate, corkscrew awn ending in a thin spine. They burrow into sheep's wool and even pierce the skin. The alfalfa is one of the few seeds of the West that all seed-eating birds consume. The plant is very abundant in California, and the quail often eats from 1,000 to 1,600 of the little corkscrew seeds at a meal. It affords 13.38 per cent of the year's food, and 26.70 per cent of the June diet.

Seeds of miscellaneous weeds comprise 17.11 per cent of the annual food. Among the species included are pigweed (*Chenopodium album*), rough pigweed (*Amaranthus retroflexus*), and black mustard (*Brassica nigra*)—especially obnoxious in grain fields—and the closely related weed, wild radish (*Raphanus sativus*). Seeds of shepherd's purse (*Bursa bursa-pastoris*) and of other cruciferous plants are included in common with silene and the chickweeds (*Cerastium* sp. and *Alsine media*). Geranium seeds are so much relished that often 300 or 400 are eaten at a time. Two closely related plants, m'n's lettuce (*Montia perfoliata*) and red maids (*Calandrinia menziesii*), bear minute shiny black seeds that often are eaten by the thousand. The little seeds of red sorrel (*Rumex acetosella*) and curled dock (*Rumex crispus*) are occasionally taken in almost as large numbers. Seeds of chess (*Bromus secalinus* and *Bromus hordeaceus*), a serious grain pest, are relished, and hundreds of the grain-like seeds of the grass known as "poison darnel" (*Lolium temulentum*) appear in crops examined. Macoun, quoting Spreadborough, states that in British Columbia, where it winters successfully, the quail finds shelter in severe weather under the broom (*Cytisus scoparius*), which in places grows abundantly and yields seed for subsistence. (Cat. Can. Birds, Part I, p. 198, 1900.)

The quail feeds also at times on mast. A. K. Fisher, in the western foothills of the Sierra Nevada, the last of July, found both young and adult quail eating young acorns. (N. A. Fauna, No. 7, p. 28, 1893.) Small quantities of sedge seeds (*Carex* and *Scirpus*) and of dodder (*Cuscuta*) are eaten, the latter plant being a destructive parasite on leguminous forage crops. The miscellaneous seed list includes also stick seeds (*Lappula* sp.), buttercup (*Ranunculus* sp.), bind weed (*Convolvulus* sp.), Am-sinkia sp., *Anagallis arvensis*, plantain (*Plantago major*), ribgrass (*Plantago lanceolata*), painted cup (*Castilleja* sp.), mountain lilac (*Ceanothus* sp.), and black wattle (*Callicoma serratifolia*). In the mountains of Lower California the food supply determines the breeding time of birds. If there is not enough rain for a good supply of seeds the coveys of quail do not break up into nesting pairs but remain in coveys throughout the summer. If the season is wet and the winter rains promise abundant food the birds mate in March and begin nesting immediately. (Life Hist. N. A. Birds [I], p. 27, 1892.)

(To be continued.)

Strike—if they don't give you Jackson's Napa Soda when you ask for it.

OUT-CROSSING AND ITS METHODS.

The subject of cross-breeding, or, more correctly, the out-breeding of dogs, is of great interest, and may soon be also one of great importance to the kennel world, writes J. Sidney Turner, in The Illustrated Kennel News. To establish a new breed of dogs by cross-breeding, unless carried out with some knowledge of the laws of breeding, would be a difficult task, and require long time to secure anything like stability of type. No doubt this has been accomplished to a certain extent—e. g., in Retrievers, which are popularly supposed to be a cross between our old Setter and a New foundland, or more probably a Labrador, at least in the case of the flat coated variety. Poodle or Irish Water Spaniel blood may have been used in the curly coated breed. The Retriever, however, is not merely the result of a cross between the varieties, but the breed has been established in its present form by careful selections of specimens and by again infusing some of the parent blood. It becomes, then, a very important matter, in the first instance, how any particular outcross is made, and, in the second, whether the progeny of this outcross is bred back with one or other of the parent factors, or the progeny is bred "inter se." The terms "outbred," "crossbred" and "hybrid" should be used quite differently, and really imply three different degrees.

By "outbred" it should be understood that an outcross with another variety has been made, the progeny of which has been bred back again to an individual of the same breed as one of the parent factors. Now, one of the parent factors, which we will call A, will probably be dominant in some leading character; and the other parent factor, called B, recessive in that character; their mongrel progeny will show the dominant character, but will contain the recessive and dominant gametes in equal proportions. If the mongrels be bred "inter se," one-quarter, 25 per cent, will resemble the dominant parent factor; one-half, 50 per cent, will still be mongrels, indistinguishable, or nearly so, from the former, and one-quarter, or 25 per cent, will resemble the recessive parent factor; if the recesses be made with the other original factor (or a similarly bred factor), which, not being the dominant, is called the recessive, then the result will be, on the average, that half the progeny will resemble the original (the recessive parent, and half the other parent or the mongrel half-bred. Let A be the dominant, B the recessive and Aa the mongrel taking the dominant character.

So that, if we desire to get the character of B maintained in the next, or third, generation, when mated back to another B, we shall have what is virtual purity; at all events, the breeding will be true.

It is not to be supposed that this will be an invariable result, especially if the breeding be carried out on a small scale; but, if a sufficiently large number of experiments be taken into account (say a few hundreds, or, better still, a few thousands), the same ratio will be found to exist. This is the theory. It would be difficult to lay down a strictly definite rule as to what outcross might or might not be allowed. It would be absurd, for instance, to cross a Fox with a Skye Terrier, or an Irish Water Spaniel and a Cocker. It would be much less absurd to cross a Greyhound with Bulldog (less so had Bull Terrier been used), as was done in the beginning of the last century. It is difficult, therefore, to define any hard and fast line; any outcross, however, must be made with careful consideration as to its utility. The above will serve to define what I mean by outbreeding. Cross breeding may be defined simply as the breeding between any two breeds of the species of "Canis domesticus"; hybridism as the result of a cross between two distinct species of the dog family ("Canidae")—e. g., the dog and wolf cross. As the progeny of this cross will breed again, it can hardly be looked upon as true hybrid, as it is generally accepted by naturalists that true hybrids never breed. The wolf would thus appear to be more nearly allied to the domestic dog than is generally recognized.

The offspring of an outcross is likely to exceed in size and weight those of the mean of its two parents, but as a general rule it also strengthens the constitution and confers a greater power of resistance to disease. Great care, however, should be taken that the outcross should possess strength and vitality, as the result of breeding two weakly specimens together (especially if their weak points are similar) will probably be of no advantage. The first result of any outcross will be that one variety will be dominant over the other as regards some outward character, and it by no means follows that the parent possessing the most marked characters—e. g., color and coat—will be the most potent to produce these in the offspring. The probability is that the dominant character of that parent which is nearest to the original wild, or the normal, will be found to be reproduced; but I believe it is impossible, a priori, to be in any degree certain. We, however, found this to be the case in the rabbits, where the short brown fur was dominant over the long white, and the normal black eyes were dominant over the pink. Results were also similar in the case of the mice. To take another example in dogs (though it is not right to judge by an isolated example), we notice the effect of the cross

between a long-faced Greyhound and short-faced Bulldog, where the offspring, "Half-and-Half," depicted in Stonehenge's book, was long-faced, though not so long as the Greyhound parent probably, still much longer than the mean of the two parents. The Greyhound's head exceeds the normal length while the Bulldog's is much below it, the result being that the normal wild or feral type, as seen in the dingo, is reverted to.

However, I wish to show that, no matter what the dominant type in the offspring may be, the offspring contains in its germinal cells (its breeding capacities) the elements which are inherent in both of the parents—recessive though they may be—and which was enunciated by George Mendel, an Austrian monk, who first published it in the journal of the Brunn Scientific Society in 1865. No biologist appears to have paid much attention to this brilliant discovery until 1900, but since that time the celebrated botanists, De Vries, Correns and Tschermak, and equally well known zoologists like Professor Bateson, of Cambridge; A. D. Darbishire, of Oxford; Dr. Allen, Miss Durham, C. C. Hunt, F. L. S., and W. E. Castle, in America, have carried out an enormous number of experiments on plants, white and other mice and Angora and Belgian hare (so-called) rabbits, with the most interesting results. In the case of the mice, white albino mice and the yellow and white, but black eyed, Japanese waltzing mice were used. All the mongrel progeny were black eyed mice, as the black eye, being the normal, was dominant, and the pink eye recessive; but when the mongrels, or hybrids, were bred "inter se," one-fourth, or 25 per cent, again had pink eyes; and when the mongrels were mated back to a pink eyed mouse one-half had pink eyes and the other half the normal black.

When, however, in the third generation extracted white pink eyed mice (bred from the mongrels "inter se") were mated with a pure bred white mouse all had pink eyes; and they continued to breed purely, as though there had been no outcross. Similar results were obtained by Mr. Hurst in his experiments with white Angora long haired, pink eyed rabbits and the brown Belgians. All the first progeny—forty-two—had short brown coats. The crosses were made reciprocally—i. e., a white Angora buck and brown Belgian doe, and the reverse cross by a brown Belgian buck and white Angora doe; but the results were identically the same. This proves, as regards the coat, that sex of sire or dam had no effect. Similar results as with the mice followed the breeding in the second generation of the mongrel rabbits—that is to say, one-fourth of the progeny were Angoras and three-fourths had brown short coats. The exact numbers were seventeen and fifty-three, respectively. In all statistics dealing with limited numbers, the numbers cannot be quite exact, but if they are so near the mark as to show that the law is operative, and the same result is always repeated, the law must be accepted as established.

The sub-committee appointed by the Kennel Club to deal with this will doubtless take into consideration the amount of outcrossing and how that has been neutralized by subsequent breeding, so that the requisite amount of purity of any breed of dogs in question has been maintained. Into the question of desirability for an outcross I do not propose to enter, as it is sufficiently obvious in many of the breeds of dogs which could be readily enumerated.

It has been said above that the outcross should be defined as one made "with another variety." Strictly speaking, it should be with another variety of the same breed—e. g., in the Spaniel group or the Setter group. There may, however, arise cases where the groups as defined in the K. C. Index of Breeds may be too limited and specialized. Roughly speaking, there are groups comprising Hounds, hunting by scent; Greyhound type of dog, hunting by sight; Setter, Spaniel, Retriever, Terrier, Molossus, Sheep-dog, Bulldog and Spitz groups, besides others which cannot be classed under any of the above head—can again be made to manifest themselves in future offspring. This can be done in two ways; either by inter-breeding of the mongrels, when, according to Mendel's law, one-fourth of their progeny will re-assume the recessive character (which had apparently disappeared), and then using this one-fourth to recross to the desired strain, when something very near approaching real purity will have been attained; or the more direct method of breeding the mongrel first generation back to the desired strain, when one-half of the offspring will be virtually pure, and this half bred again into the desired strain will give the purity desired, and which will continue, and which will continue. Anyway, we see that it takes three generations of correct breeding to re-establish the purity of the breed from which the outcross was made; and anything which does not come within these or similar conditions should be suspected and be marked by a "bar sinister," which ought not to be removed from the family escutcheon at earliest before the third generation has been established. Much more might be written upon this subject, but for the purpose of defining what is meant by an outcross the above will be sufficient. I have not mentioned some curious and altogether unexpected results in the later experiments of Mr. Hurst with his rabbits, nor how colors and markings altogether differing from either original parent arose in subsequent offspring, such as black, silver-grey, and dachshund-marked specimens. A description of how these colors arose would only confuse the issues, and they are, indeed, still subjects of investigation. For those readers who may be still further interested in the subject I would recommend the perusal of Mr. Hurst's paper in the Zoological Journal of the Linnean Society (April, 1905, Vol. xxix., No. 191); G. M. Allen, "The Heredity of Coat-color in Mice," Proc. Amer. Acad. Arts and Sci. (1904), and W. Bateson, Proc. Zool. Soc., Lond. (ii., 1903); A. R. Darbishire, "Biometrika" (iii., 1904).

DOINGS IN DOGDOM.

Collies Strong on the Coast.

The fancy for Collies seems to have had a strong impetus with Coast dogdom followers during the past year.

Among the big kennels recently coming to the front is the establishment of Dr. J. C. Kloeber of Green River Hot Springs, Wash., and of which a Seattle correspondent has the following to say:

King county is rapidly coming into Western prominence as one of the leading kennel counties of the whole Pacific coast. The great Cocker of Dr. Sharpless and splendid field dogs of John W. Riplinger are the blue ribbon winners of a dozen other breeds, and as many owners have already brought much reputation to this neck of the woods, and now Dr. J. C. Kloeber, of Green River Hot Springs, has completed the importation from the East, England and Scotland, of a string of world beating Collies.

Already the owner of a large kennel of Collies that had won Western and Middle West championships, Dr. Kloeber has now acquired Collies of international championship class, one of which he benched in Boston an hour after it was taken from the steamer, where it won blue ribbons in every class in which it was entered.

Of these the most noted is the bitch Rippowam's Bo-Peep. Champion Bo-Peep was whelped near Glasgow, Scotland, winning her championship in England, and again in this country. She has won about 100 first prizes and special trophies and has never been defeated for first place. She is a wonderfully fine bitch, with the reputation of having one of the longest and best heads of any Collie bitch in America.

Winnetka Countess is every bit a Collie. She has every trait and expression of the breed. Countess is a perfect golden sable and white, with white collar, white breast, legs, and tip of tail. She was sired by the famous Champion Ballyarnett Eclipse, and has the characteristics of her great sire. When only nine months old she was benched at Portland, where she won entirely through the Collie class, besides winning five special trophies. She repeated this at Spokane in October last, where she ran up to seven of her ten necessary points for an A. K. C. championship.

Before coming to Dr. Kloeber's kennels, Countess won largely in the Eastern shows.

Bo-Peep, the first named, is a full sister of Mr. J. Pierpont Morgan's famous Collie, Champion Wls-haw Clinker, who won the trophy for best dog of any breed in the show of the Westminster Kennel Club show last year.

Brookmere Hazel is a beautiful young bitch with perfect markings and a head of rare type. She won three trophies at the Collie Breeders' Association show at Chicago last spring, and first novice at Spokane. She promises to develop into a great winner.

Glen Tana Mollie comes, prior to her advent on the Coast, from Mr. Palmer's kennels near New York City, and is a daughter of the famous Champion Rightaway. Mollie has always stood second to the other dogs in Dr. Kloeber's kennels in the bench shows.

Winnetka Wallace, and Winnetka Wildfire are both sons of Champion Christopher and are the most promising pair of Collie puppies in the West. They are perfect sable and white dogs, with heads of rare perfection, perfect ear carriage and splendidly coated. Experts look for these puppies to develop something that will make history in the Collie world.

Craigmore Councillor is a son of Champion Parkhill Perfection and is a remarkably fine specimen of the breed.

The dogs are immensely popular with the guests of the Green River Hot Springs, and are a never ending source of amusement for those living at the hotel. They make friends with every guest and the different dogs always have some favorite among the guests. They know the regular patrons of the place as they come from time to time, and always extend their welcome.

Great Dane Puppies.

O. Bergsten, the well known Oakland Great Dane fancier, offers, in our kennel advertisements, some well bred puppies for sale. Ch. Bluehead and Maud S. are about two of the best Great Danes on the Coast. Blue is a producing sire and Maud S., besides being a big winner herself has whelped winning progeny.

Gordon Setters.

George H. Stone, a popular Fresno sportsman and well known trap shooter, offers, on page 15, Gordon Setters—broken dogs and puppies for sale.

Mr. Stone's kennels are stocked with the best bred dogs of the breed to be found to-day on the Coast. Gordons are a good upland or marsh dog—in this climate, hardy and intelligent. Recent inquiries for them would indicate a growing demand for this variety of the Setter.

"The Dog Book."

Part five of James Watson's practical serial work, "The Dog Book," is now out. This part includes chapters on the Retriever, the Chesapeake Bay dog, Dalmatians, rough-coated Collie, the smooth Sheep Dog, and the bob-tailed Sheep Dog, with life-like illustrations representing typical specimens of each breed. Mr. Watson's treatment of the subject is very interesting, and in addition to his description of the various species of dogs referred to, he gives quotations from some of the early writers, thus adding materially to the general interest of the work, which will be complete in ten parts, with three hundred photographic illustrations. The book is published by the Doubleday Page Company, New York City, and is worthy a place in every fancier's library.

Bad Faith in a Dog Sale.

C. W. Buttles, of Kansas City, who was suspended for misrepresentation in selling a dog, by the Pacific Advisory Board, has appealed to the A. K. C. It is claimed Mr. Buttles proposes to secure favorable testimony, for his side of the case, from Mr. Jas. Cole of Kansas City.

From what is known of this phase of the matter—prior to Mr. Buttles' appeal—we are inclined to believe the appellant, who is now over his knees in the mire, will sink completely out of sight in a bog of his own creation. If what we have heard of the matter is true, permanent disqualification will probably be Mr. Buttles' reward.

Pasadena Show.

Entries for the Southwestern Kennel Club show at Pasadena, December 13th and 14th, may be made with Secretary R. C. Halstead, P. O. Box 902. Prospects are good for a large entry.

GOSSIP FOR SPORTSMEN.

Hunting Notes.

H. W. Buehne of Eureka, Humboldt county, appeared on Sportsmen's Row Thursday. He stated that the Eureka sportsmen have had much sport shooting sea or black brant recently. The birds were more numerous than for years past.

Early this week several of his fellow sportsmen were on Buehne's shooting ground, at the southern part of Humboldt bay, and had the duck shoot of their lives. Ducks were never so plentiful as they have been for the past week or two.

Duck hunting on the Suisun marshes this week has been generally excellent. The norther prevailing early this week was accountable for the flight of ducks in that section.

General results on the Alameda marshes last Sunday were better at Mt Eden than in most other sections of the marsh.

The rain this week should make duck shooting generally good about the bay marshes today and tomorrow.

Quail hunters will no doubt appreciate the favorable change in ground and cover conditions brought about by the rains.

PETERS CARTRIDGE CO'S CALENDAR

Striped Bass Notes.

Between forty and fifty rods were at work on San Antonio slough last Sunday. The best catch was made by J. G. Bliss; a twenty-five pounder and a twelve and one-half pound fish were his catch. Not more than fifteen fish summed up the total catch.

A large number of anglers were also at Schell slough. Results were also fair.

Numbers of striped bass, fairly good sized ones, are being caught at Vallejo. Trolling from the Star Mills, South Vallejo, up stream to the "graveyard," is the best fishing ground.

The San Francisco Striped Bass Club held an enjoyable outing at Vallejo Junction. The best catch of the day was made by Chef Breidenstein—a savory clam chowder, which was put away in regulation order by the anglers present.

The San Francisco Striped Bass Club are contemplating the purchase of a fine, large ark. If acquired by the club, the ark will be located in San Antonio slough.

On a hot day drink Jackson's Napa Soda lemonades and be refreshed.

SPORTSMEN'S CALENDARS FOR 1906.

Two Art Works.

Two elegant calendars for next year issued by the DuPont Powder Company and the Laffin & Rand Powder Company will be issued and ready for distribution next month. The regular size of these calendars is 15 by 29½ inches. They are lithographed in from twelve to fourteen colors.

The cuts received originally were too large for our columns and pending the arrival of smaller cuts we call the attention of sportsmen to their publication.

The DuPont calendar is a strikingly good representation of a duck shooting incident, the Laffin & Rand calendar illustrates an episode in big game hunting—a hunter surprised in camp, under his birch bark canoe, by a big bull moose.

Both subjects are beautifully treated and the calendars are such as we presume every sportsman would like to possess.

Peters Cartridge Company.

The calendar for 1906 issued by the Peters Cartridge Company is fully up to the high standard set by this company in past years. It is of the usual size, and depicts that proud moment in the experience of a big game hunter, when he emerges from the forest depths, bringing the much prized moose head, borne on the back of his guide. The calendar is handsomely lithographed in twelve colors, and embossed, and will doubtless be much sought for by dealers and sportsmen generally. It will be sent to any address upon application to the Peters Cartridge Company, Cincinnati, Ohio, with enclosure of 10c in stamps or coin to cover the cost of mailing.

For the small cost and slight expense the above noted artistic publications should be written for, at once, by every sportsman.

To insure a quick response, in the face of an extra large demand, we will suggest to those sending for either, or all, of the above calendars, a mention that the request is through the Breeder and Sportsman.

TRADE NOTES.

A New Self-Loading Rifle.

The Winchester Model 1905 self-loading rifle is a hammerless take-down, made in .32 and .35 calibers. It is the first rifle of the self-loading type made for center fire ammunition, the cartridges it handles being of the modern smokeless powder type, using metal patched bullets. The .32 caliber shoots a 165-grain bullet and gives a velocity of 1400 feet seconds and a penetration of 11½ inch dry pine boards with a metal patched soft point bullet. The .35 caliber shoots a 180-grain bullet and gives a velocity of 1400 foot seconds and a penetration of 10½ inch dry pine boards with a metal soft point patched bullet. As these figures show, both cartridges give excellent penetration, and with metal patched soft point bullets they have great shocking effect on animal tissue. As its name indicates, this rifle is self-loading. The recoil of the exploded cartridge ejects the empty shell, cocks the hammer and feeds a fresh cartridge from the magazine into the chamber, leaving the rifle ready to be shot upon the operators pulling the trigger. The magazine is of the box type and holds five cartridges. By inserting a cartridge in the chamber before placing the loaded magazine in the gun, the operator has six shots at his disposal. The stock is 14 inches long and finished with a rubber butt-plate; drop at comb 1¾ inches; drop at heel, 2¼ inches; length of gun over all, 40 inches.

A Word to the Wise.

The following instances show some good records which speak volumes for the "Old Reliable" Parker gun:

At Waco, Texas, on October 12 and 13, M. E. Atchison, shooting the Parker gun, was high man, having broken 353 out of 400, at 19 yards, in a gale of wind.

On August 3, at South Tacoma, Wash., Mr. E. W. Cooper won the championship at the amateur contest, having scored 25 straight, against 54 other shooters. Mr. Cooper was also third high average. On the second day Mr. Sam Wray was third high average. Both of these gentlemen shoot the "Old Reliable" Parker gun.

On October 27 and 28, at Columbus, Ohio, Mr. R. S. Rhoads, shooting the Parker gun, won first general average, breaking 194 out of 200 on the first day, and 169 out of 200 on the second day. Mr. Rhoads was high average on the first day and second high average on the second day, making high general average for both days. At the Cincinnati tournament, Mr. Rhoads was high amateur and third general average, and was the only amateur who stood at 20 yards, he shooting at 20 yards two days, and at 19 yards one day.

All of the above are exceedingly good scores, and speak well for the "Old Reliable" Parker gun.

Averages Reported.

De Soto, Ill., October 20th, Lon Fisher of Millersport, O., first amateur average, shooting DuPont, and tied with F. C. Rehl, shooting New E. C. (Improved), for first general average, 185 out of 200. W. D. Stannard and Geo. Steenburg, shooting DuPont, tied for second general average, 173 out of 200.

Harrisburg, Ill., October 11th and 12th, Lon Fisher of Millersport, Ohio, first amateur and first general average, 320 out of 365, shooting DuPont. C. O. Le Compte, second general average, 307 out of 365, shooting Infalible. Chas. F. Driebs, third general average, 302 out of 365, shooting DuPont. J. T. Gaskins of Harrisburg, Ill., second amateur average, 258 out of 365, shooting DuPont. J. Z. Scott of Jacksonville, Ill., third amateur average, 257 out of 365, shooting DuPont.

PHOTOGRAPH OF DAN PATCH FINISHING HIS MILE IN 1:55 1/4 AT LEXINGTON

This photograph was taken under instructions of M. W. Savage at Lexington, Ky., Oct. 14, 1905, and shows Dan Patch finishing his world famous mile in 1:55 1/4. The picture was taken just before the wire was reached and shows two well known trainers driving the runners. Scott Hudson is in front and Charley Dean on the side with Harry Hersey driving Dan. Many false statements have been circulated this year that Dan made his record behind a wind shield. All intelligent horsemen know that it was ruled, two years ago, that wind shield records would not be allowed and this photograph proves that these statements about Dan Patch were made by people who were ignorant or malicious. The small dirt shield can be seen and this was ruled allowable as a protection from the large amount of dirt thrown back by the runner.

THE FASTEST HARNESS HORSE THE WORLD HAS EVER SEEN

FACTS ARE STUBBORN THINGS

Dan Patch Has Paced 36 Miles in 2:01 1/2 to 1:55 1/4 and has Paced 9 Miles That Averaged 1:57 1/4. Dan Paced 6 Miles This Year That Averaged 1:58. In 30 Days This Fall Dan Drew 250,000 People in 4 Exhibitions Which is Another World Record.

A 66-DAY RECORD FOR DAN

EXHIBITION MILES COMMENCING IN SEPT. 1905

1st Mile - - - - -	1:59 1/2	6th Mile, half-mile track - - - - -	2:01 1/2	11th Mile, unpaced - - - - -	2:00
2nd Mile - - - - -	1:57 1/2	7th Mile - - - - -	1:56	12th Mile, unpaced - - - - -	1:59 1/4
3rd Mile, unpaced - - - - -	2:00 1/2	8th Mile - - - - -	1:55 1/4	13th Mile, unpaced - - - - -	2:00
4th Mile, half-mile track - - - - -	2:01	9th Mile, unpaced - - - - -	1:59 1/4	14th Mile, unpaced - - - - -	1:58
5th Mile, half-mile track to wagon - - - - -	2:05	10th Mile, 1/2 track at Toronto, cold, track heavy, 2:06			

Dan left a stud service of 52 mares June 15 and made his first exhibition in September. He broke 4 World Records and the Canadian half-mile track record, traveled 6000 miles in 66 days and finished the season strong, vigorous, in perfect condition and very promising for speed exhibitions next year. He will be driven to sleigh on the streets of Minneapolis this winter, as usual, and will make a spring stud season at International Stock Food Farm, 10 miles from Minneapolis, closing June 1st, 1906. His book is rapidly filling.

DAN IS NOT ONLY THE GREATEST RACE AND EXHIBITION HORSE BUT ALSO A GREAT SIRE.

1905 was the first season for his colts to race and six of them entered the list and five others have been miles below 2:20 this year. Ed Patch 2:08 1/4 leads the list by starting in 11 races and winning 7. He was second in 2 and third in 2 and has paced below 2:07. All of Dan's colts are extremely speedy and there is no question but what Dan Patch will be one of the greatest sires that has ever lived.

Dan Patch Has More Miles To His Credit In 2:00 Or Better Than All Of The Pacers And Trotters That Ever Lived

DAN PATCH 1:55 1/4 EATS

"INTERNATIONAL STOCK FOOD"

3 FEEDS FOR ONE CENT
EVERY DAY OF HIS LIFE

Dan broke six world records after eating "International Stock Food" eight months. It always gives Better Digestion and Assimilation, A Good Appetite, Pure Blood, Extra Strength, Endurance, Courage and Nerve Force which is sure to give your horse more speed. We feed it every day to our stallions Dan Patch 1:55 1/4, Directum 2:05 1/4, Arion 2:07 1/4, Roy Wilks 2:06 1/2, Ed Patch 2:08 1/4, Buttonwood 2:17 and to our one hundred high class brood mares and their colts. "International Stock Food" is prepared from Medicinal Roots, Barks, Seeds and Herbs. It is absolutely harmless for stock in any condition and can be taken into the human system in perfect safety.

DAN IN HIS RACES

Dan Patch Never Lost A Race. In all his races it was invariably Dan first and the rest nowhere and it made no difference to Dan how fast they could race. He always had a large reserve of speed that could be depended on for a race of any speed. He met and defeated Harold H. 2:04, Searchlight 2:03 1/4, Connor 2:03 1/4, Indiaua 2:04 1/4 and Riley B. 2:06 1/2 just as easily as he had defeated 2:15 horses in former races. These horses were acknowledged to be the very cream of the pacing division. The truth is, Dan was so immeasurably superior in speed and stamina that the very best horses were commonplace in comparison. In his racing career he paced fifty-six contested heats, losing only two. In one of these he hit the wheel and in the other was held back in order to size up a field of very fast horses. His last race was his best, because with the fastest field ever opposed to him he let them do the leading and only extended himself in the last half of both miles. Having Out-Classed Himself by a Superabundance of Speed Dan was forced to become an exhibition horse. No other race horse ever left such a wonderful record.

\$180,000 OFFERED FOR DAN

Dan Patch 1:55 1/4 is not only the world's champion race and exhibition horse but he is the only harness horse in the history of the world to command an offer of \$180,000 cash which we refused at Lexington, Ky., in 1905. Dan broke 6 world records within 8 months from the time he commenced to eat our world famous "International Stock Food" 3 Feeds for One Cent, and before this he did not hold any world record. It certainly gave him better digestion and assimilation, purer and richer blood and permanently strengthened and toned up his entire system so that he had more strength, endurance and speed. His remarkable physical condition has been a wonder to the horse world. It is a money maker for any owner of live stock and only costs 3 Feeds for One Cent.

VOLUNTEER IN "THE HORSE REVIEW."
"Every good horseman who knows Dan Patch, knows what the result of a race between Dan and any other horse ever before the public would be—the same result that has attended all of his races, until he has placed himself so far beyond rivalry as to be quit of it entirely. I have spent hours watching Dan in harness and studying him out of it and he is in every sense a royal horse—royal in part, royal in performance, royal in himself. There has never been another like him and to know him is a liberal education."

POULTRY NOTES.

Comfortable shelter, variety of food, cleanliness, pure air, light, agreeable exercise and regularity of feeding and watering go a great way toward inducing fowls to lay even in winter.

At this time the advice may be repeated to market all fowls but those needed for laying or for breeding. Fatten and sell before cold weather sets in. Keeping useless fowls during the winter cuts materially into the profits.

The hens in their natural condition simply seek a variety of food in order to derive those elements that are essential to the production of eggs and to supply bodily wastes, and the best tonics consist of wholesome food.

While feeding fowls with a good variety of food is quite essential to egg production, no amount of good feeding will compensate for bad quarters. Keep the quarters dry and clean and not only will less food be required but better results in egg production be secured.

To have poultry tender and juicy, it should be fattened quickly. The better plan is to keep in a good thrifty condition, then feed liberally for two weeks before marketing. Give all that they will eat five times a day after once commencing to fatten.

It is never a good plan, when it can be avoided, to keep turkeys confined for any length of time. By far the better plan is to feel liberally while they have a free run and get into a good condition and then ten days of liberal feeding with a good fattening ration will properly finish for market.

When egg foods and condition powders are given, the benefits from such is due more to the fact that they supply something that the poultryman fails to give rather than because of any sustenance contained that induces laying. The hen only lays when she is capable of supplying the materials for producing an egg, and condiments as a rule constitute but a small proportion of any substance that is really necessary.—Kansas Farmer.

POSITION WANTED.

MIDDLE-AGED MAN WANTS JOB, BREAK-
ing and handling Colts. Has had years of
experience on large Kentucky stock farms; first-
class references. CHAS. LEWIS,
22 Sacramento St., San Francisco.

McKINNEY STALLION FOR SALE.

ONE OF THE GRANDEST LOOKING AND
best bred McKinney stallions ever foaled is
offered for sale. He is five years old, sired by the
great McKinney 2:11½, dam by Dexter Prince,
that sired the dam of Nora McKinney 2:12½ (trial
to wagon 2:09); second dam by a son of Election-
eer; third dam by McDonald Chief, sire of the
dams of Tom Smith 2:13½ and Stella 2:15½.
This stallion has never raced and has not been
trained, but has trotted miles better than 2:30
and quarters in 35 seconds. Stands 15.3 weights
and is a beautiful bay with black points
and without a pimple. Is an exceptionally hand-
some horse, fine disposition and has marvelous
endurance. No horse living has cleaner,
straighter or more perfect legs. A grand pros-
pect to train, and a sure money-maker in the
stud. Would make one of the grandest roadsters
in America. For further particulars address
BREEDER AND SPORTSMAN,
36 Geary St., San Francisco.

JACK FOR SALE.

A BLACK JACK WITH LIGHT POINTS;
large, heavy boned, prompt and a good han-
dler. Is a good foal getter and his foals are
excellent individuals. Price very reasonable for
prompt sale. Address for further particulars,
S. B. WRIGHT, Santa Rosa.

FOR SALE.

THE HANDSOMEST TWO-YEAR-OLD Di-
ablo colt in California. First dam, Babe by
Dawnlight 2:14½, he a son of Dawn and his dam
Alida (dam of Directa 2:28) by Admiral Babe is
a half sister to the good colt McFadyen, being
out of Bee. Paced a mile in June in 2:27, and
is paid up in the Breeders Futurity. For partic-
ulars address

E. D. DUDLEY, Dixon, Cal.

Registered Shire Stallion
FOR SALE.

The Perfectly Gaited Trotting Stallion

ALTA VELA 2:11 1-4

(Reg. No. 22449)

Sire, ELECTIONEER, sire of 166 in 2:30 and
 grandsire of Major Delmar 1:59½.

Dam, LORITA 2:18½ (dam of Alta Vela 2:11½
and Palori 2:24½) by Piedmont 2:17½; second
 dam, Lady Lowell (dam of Ladywell 2:16½
and Loria 2:18½) by St. Clair; third dam,
 Laura, dam of Doc, sire of Occident 2:16½.

Address all communications to BREEDER
AND SPORTSMAN, 36 Geary St., San Francisco.

Good Ones For Sale.

Dopella by Charles Derby; standard and reg-
 istered; bay filly 4 years old, about
 15.3 hands, weighs about 1000 lbs.; handsome and
 in every respect a first class road horse. A lady
 can drive her. She has speed and is not only a
 valuable horse for the road but a high-class
 brood mare.

ALSO
A few other fast roadsters for sale at reasonable
 prices. For particulars and to see the horses
 apply to DEXTER PRINCE STABLES, 1509
 Grove street, corner Baker street, San Francisco.

MERIDIAN 2:12½
FOR SALE.

MERIDIAN 2:12½ IS A STANDARD-BRED
 dark brown Stallion, foaled 1892. Excellent
 disposition; perfect conformation; sure foal
 getter. His oldest colts are four years old and
 all his get have style, good action, good size and
 speed. He is by Simmocolon 2:13½ (sire of Dan
 Q. 2:07½ and 12 in 2:30 list); dam Sidane 2:23½ by
 Sidney 2:19½; next dam Addie S by Steinway.
 Started seven times in races, won four first mon-
 ies and was never outside of the money. He is
 sound, in good condition, will be sold cheap. For
 further particulars address

R. S. BROWN, Petaluma.

Three-Year-Old Trotter For Sale.

I OFFER FOR SALE A THREE-YEAR OLD
 Gelding by Nutwood Wilkes 2:16½, dam by
 Gen. McClellan that is one of the best prospects
 in California. He is a square trotter with 2:20
 speed sound as a dollar, requires no boots, is a
 fast walker and will make an ideal roadster and
 a race winning trotter. He is a golden chestnut
 with small star. Inspection of this young Geld-
 ing is invited. He is in charge of Hans Freilson
 on 24th avenue, close to the Casino, and will be
 shown by appointment.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

KINNEY & SON,
MANUFACTURERS OF
Hard Wood Lumber and Sawed
Colled Elm Hoops.

Orrville, Ohio, Feb. 9, 1905.
TROY CHEMICAL CO., Binghamton, N. Y.:
Nearly two years ago we had a horse with a
ringbone, so lame that we could not work him.
We tried "Save-the-Horse" on him and he has
worked every day since and does not go lame at
all. Now we have a horse we think is getting a
spavin and we wish to try it on him; so you will
please send us another bottle and an 8-oz. box of
"Save-the-Horse" Ointment. Enclosed find check
for \$5.50 in payment of same. Yours truly,
KINNEY & SON.

REDBURN STORE CO.

Redburn, Pa., Dec. 19, 1904
After using "Save-the-Horse" on my driving
horse, on what you pronounced blind spavin I
have today a sound horse. When I started he
could not get over an 8x8 in the doorway without
jumping, and it was misery to ride behind him.
I can most highly recommend it. Trusting this
information will be of service to you, I remain
respectfully yours,
M. A. PERCY.

Horse can be worked as usual. "Save-the-Horse" cures without scar, hlemish or loss of hair.
Can be used in all extremes of weather. Positively and Permanently cures Bone and Bog
Spavin, Ringbone (except Low Ringbone), Curb, Thoroughpin, Splint, Capped Hock, Shoe Boil,
Windpuff, Weak and Sprained Tendons and all Lameness.

\$5.00 per bottle. Written guarantee—as binding to protect you as the best legal talent
could make it. Send for a copy and booklet At drug lists and dealers, or express paid

TROY CHEMICAL COMPANY.

Binghamton, N. Y.
Dear Sirs:—"Save-the-Horse" completely cured
my mare of the very worst kind of Wind Galls
and Bowed Tendons, and she is now clean and
perfectly sound. I used four bottles on all four
legs. You would never know she ever had any-
thing the matter with her. A veterinary surgeon
saw her one day when her legs were swollen up
to twice their natural size, and he laughed at me
and said it would never take them off, but I have
had the laugh on him since I will admit at one
time my faith was very weak, but the fourth
bottle finished the job completely, and I thank
you again for the kind way you treated me.
I remain yours very truly,
M. G. BYARN, 468 West 150th St.

HOWE & CO.

Real Estate, Estates Cared For, and
Business Opportunities.

247 Washington St., Room 2.

Boston, Mass., Jan. 21.
Dear Sirs:—I have used a bottle of "Save-the-
Horse," and I consider it the best thing that as
yet I have been able to obtain for what it was
intended, it having entirely cured a very valuable
mare which has been lame since last September
with a sprained ankle. We had her blistered
twice and laid up for two months, but it did no
good. I was just about ready to breed her when I
gave it a trial; she is now entirely sound.
Yours respectfully,
ALBERT E. BAKER.

Chatham, Mass.
Gentlemen:—Three years ago a spavin ap-
peared on one of my horses. I spent considerable
time treating it, but it began to grow and finally
developed into a bog spavin as big as a hen's egg.
Last May I gave the mare a long, hard drive, and
the following day she refused to rest any weight
upon the leg. I about decided her working days
were over, when I saw your advertisement and
sent for a bottle of "Save-the-Horse." In a few
days I saw marked improvement, and in less than
three months the mare traveled squarely as ever
and ceased to favor leg in any way; and now,
after using about four-fifths of bottle, the swell-
ing is all gone and the cure is complete, and I
most sincerely recommend your treatment for
such cases. Very truly yours,
GEO. H. ADAMS.

IT MAKES NO DIFFERENCE

what particular kind of shooting you are interested in—sportsmen differ as to make of guns, advantages of various loads etc., but sooner or later most of them come to the same opinion about ammunition—that

Peters Shells and Cartridges

have all the other makes beaten in the race for quality and results. See what they have recently accomplished in the three chief departments of "the game":

RIFLE

At Sea Girt, N. J., Aug. 24-Sept. 9, LIEUT. TEWES won the Wimbledon Cup Match, the Grand Ladin & Rand Aggregate, the Seabury and N. J. Members' Matches; LIEUT. CASEY won the Inspector's Match, and LIEUT. SMITH the Reading Match—all using Peters .30 U. S. Govt. ammunition. In the Spencer and Seabury Matches LIEUT. CASEY made a total of 20 consecutive bull's-eyes. In the Wimbledon Match seven of the first ten places were won with Peters Cartridges.

PISTOL

The Pistol Championship of the United States, competed for Sept. 1-11, was won by J. A. DIETZ of New York, scoring 465 out of a possible 500 with Peters 22 Stevens-Pope Armory Cartridges, Standard American Target, 8-in. Bull's-eye, distance 50 yards. At Sea Girt, N. J., Aug. 24-Sept. 9, THOMAS ANDERTON won the All-Comers, Any Revolver, and Jones Matches, and LIEUT. STEDJE the Disappearing Target Match, all with Peters Cartridges.

SHOTGUN

The Consolation Handicap at the Grand American, June 30, was won by JAS. T. ATKINSON, score 99 out of 100, using Peters Ideal Shells. First Amateur Average at the Cincinnati Tournament, Sept. 19-21, won by R. S. RHOADS, using Peters Shells. First General Average at the Indianapolis Tournament, October 9-10, won by L. H. REID with the phenomenal score of 392 out of 400, using Peters Factory Loads.

THESE RECORDS SPEAK FOR THEMSELVES. COMMENT IS UNNECESSARY.

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1905.

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES TO CLOSE MONDAY, DEC. 4, 1905.

ONLY \$2 TO NOMINATE MARE.

\$4250 for Trotting Foals. \$1750 for Pacing Foals. \$300 to Nominators of Dams of Winners and \$200 to Owners of Stallions. Money Divided as Follows:

\$3000 for Three-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Trot.

1250 for Two-Year-Old Trotters.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Trot.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

\$1000 for Three-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Three-Year-Old Pace.

750 for Two-Year-Old Pacers.

200 for Nominator on whose Entry is Named the Dam of Winner of Two-Year-Old Pace.

100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—\$2 to nominate Mare on December 1, 1905, when name, color, description of Mare and Stallion bred to must be given. \$5 May 1, 1906. \$5 October 1, 1906. \$10 on Yearlings January 2, 1907. \$10 on Two-Year-Olds January 2, 1908. \$10 on Three-Year-Olds January 2, 1909.

STARTING PAYMENTS—\$25 to start in the Two-Year-Old Pace. \$35 to start in the Two-Year-Old Trot. \$35 to start in the Three-Year-Old Pace. \$50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.

Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3) and for Three-Year-Olds 3 in 5. Distance Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before January 2, 1907, her nominator may sell or transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1905. Entries must be accompanied by the entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. The Association is liable for \$7000, the amount of the guarantee only. Hoppies will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more monies in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse, wherever owned, will be allowed to start until the owner has become a member.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

Our Written Guarantee is a Legal, Absolutely Binding, Contract.
Read the Following and You will Understand and Appreciate Why.

NOTE THE DIFFERENCE IN DATES OF THESE TWO LETTERS.

PLANTERS HOTEL.

C. M. DAVIS, Proprietor.

Steam Heat. Rates, \$2 Per Day.
New Sample Rooms.

LOUISIANA, Mo., Nov. 2.

TROY CHEMICAL CO.
DEAR SIR:—Inclosed find draft for \$5, for which please send me at once a bottle of ("Save The Horse"). It has done good work on my horses' Tendons, also Splints. But on a horse that has a Curb, I can't see that it has reduced or removed that much. Send medicine "Save The Horse" at once.
Yours,
C. M. DAVIS.

PLANTERS HOTEL.

C. M. DAVIS, Proprietor.

Steam Heat. Rates, \$2 Per Day.
New Sample Rooms.

LOUISIANA, Mo., Nov. 6.

TROY CHEMICAL CO.
GENTLEMEN:—The Curb on my horse that I was complaining about your medicine, "Save The Horse," not removing, has disappeared, as if by magic. It was of two years' standing. You can't tell he was ever curbed. Only used one bottle.
Yours truly,
C. M. DAVIS.

Positively and permanently cures Bone and Hog Spavin, Thoroughpin, Ringbone (except low Ringbone), Curb, Splint, Capped Hock, Wind Puff, Shoe Ball, Weak and Sprained and Ruptured Tendons, and all lameness.

"SAVE-THE-HORSE" is indicated for any enlargement, the result of an injury which leaves a thickened condition of the skin or tissues.

Cures without scar, blemish or loss of hair. Horse can be worked as usual.

Copy of guarantee, valuable booklet on diseases and injuries affecting horses, and copies of personal letters from bankers, noted trainers, manufacturers and business men of prominence the world over, telling of the wonderful cures it made for them sent upon application.

We advise frankly of possibility of remedy in any specific case. Give explicit particulars; state age, location of swellings, lameness and the way horse holds and carries the leg.

\$5.00 per bottle at all druggists and dealers, or express paid.

TROY CHEMICAL COMPANY, BINGHAMPTON, NEW YORK. Formerly TROY, N.Y.

Stock at Yard, Saturday, December 9th Send for Catalogue.

BOOKS FOR STALLION OWNERS

1. Hoover's Stallion Service Record.

The most complete book for recording stallion service ever placed before breeders. Not a pocket edition. No more disputing of sires. No more mixing of dams where this book is used. There is space for entering 100 mares, giving their full breeding, description, dates of service, dates of foaling, etc., with index, complete, size 10x7½. Each book is handsomely and substantially bound.....\$2.00

2. The Standard Stallion Service Book.

The neatest Service Book published, containing space for entering 100 mares, giving space for full description, pedigree, date of services and refusals, date of foaling, etc., with index complete, neatly bound in leatherine, suitable for pocket use.....\$1.00

3. Breeder's Note and Certificate Book and Stallion Service Book Combined.

This book contains 75 blank certificates to be given to owners of mares, certifying that said mare has been bred to a certain stallion. Also 75 notes suitable for owner of mare giving to owner of stallion on account of stallion service fee. This book is well bound, and makes a book like No. 2, after certificates and notes have been removed.....\$1.00

San Francisco, Saturday, December 2, 1905

"EXCELLENT RACING, and a well conducted meeting" is the report made by every returning horseman who attended the harness meeting given at Los Angeles last week. The Los Angeles Harness Horse Association, of which Mr. A. W. Bruner is secretary and manager, deserved a better fate than to run the meeting at a loss, and we hope the gentlemen who organized the association, and subscribed the money which made the meeting possible will not be discouraged over the financial loss which they sustained, but will try it again next year and, profiting by this year's experiences, will be enabled to give a meeting in 1906 that will make good all their losses and leave them a nice profit beside. We do not share with our correspondent "Hidalgo" the opinion that Los Angeles is not now a good harness racing town because in former years there was cheating in harness races there. Many turf writers, and especially those who have in late years devoted the most of their attention to the literature of the running turf are very prone, when writing of "the decadence of trotting," to make a summer out of one swallow. That the harness racing at Los Angeles was any less honest than the running racing held there then and now, we do not believe. The summaries of the harness meetings formerly held in Los Angeles, even during the time when the old association was interested in the booking privilege, do not carry out Hidalgo's insinuation that the harness horsemen were racing dishonestly as a rule. Los Angeles has been made a poor harness racing city for the same reason that San Francisco, New York, Chicago and St. Louis are not considered good points for the holding of harness meetings. Long continued running meetings have turned nearly all the strictly sporting portion of the American public to "the ponies," and those who do not care to bet on the races can not be depended upon to attend a four or five days' meeting of any sort. That there are a very large number of people in Los Angeles who enjoy contests between harness horses is proven by the fact that the matinees given by the Los Angeles Driving Club on Saturdays and holidays draw from four to eight thousand people, even though the big running meeting is on at Ascot Park at the same time. True, these matinee races are not for money, no betting is done and no admission fee charged at the gate, but several thousand people would not attend them did they not enjoy speed contents between horses in harness. That those whose principal love for a horse race is the opportunity it affords to win or lose money, much prefer running to trotting races, is not disputed by anyone who has any knowledge of the two varieties of sport. The gambling element has gone over en masse to the runners, and associations that give harness meetings cannot expect to win them back. As a gambling proposition the harness racing is no more to be compared to running racing than a game of whist is to draw poker. Because the meeting held last week at Los Angeles resulted in a financial loss is not to be laid at the door of a few bad races years ago. The Los Angeles Association probably tried to be a little too generous to the horsemen. It gave too many \$1000 purses. A saving of \$2000 in the amount given for races would have saved them from loss and attracted just as many entries. The desire to give good liberal purses is commendable in the extreme, but does not always pay. In the palmy days of harness racing at Los Angeles, when one or two weeks sport was all the people had during the year, the majority of purses were only \$500, with an occasional one of \$1000 or perhaps \$2000 for a big event in which the champions of the State started.

At that famous meeting in Los Angeles in 1891, when McKinney, Frank M., Silas Skinner and Wanda competed in the race that is still talked about, and which was for a purse of \$1500, the aggregate of all the purses trotted and paced for during the week was less than \$8000, or five thousand less than the amount distributed at the meeting last week. Had the Los Angeles meeting been a financial success, our esteemed correspondent would in all probability have refrained from saying that harness racing is dead there, a statement which the Breeder and Sportsman believes is unwarranted by the facts, and which we believe Hidalgo arrived at by comparison with the running meetings held at Ascot Park during the winter. From the prices paid at the sale of harness horses held during the meeting we should say the trotter is still a very popular animal with the Los Angelenos, and we sincerely hope and confidently believe that the Harness Horse Association of the southern metropolis will be a prominent member of the California harness racing circuit of 1906, and that it will give one or more meetings during the year that will not only be as successful from a racing standpoint as the excellent one just held, but will wipe out all the losses of this year's meeting and leave a balance of profit in the treasury.

THE LAST CALL for nominations in the \$7000 Pacific Breeders' Futurity for foals of mares bred in 1905. The stake closes for nominations of mares next Monday, December 4th. Do you want to race your colt when he is two or three years old? If so, just remember that a colt that is not entered in stakes, no matter how fast he may be, cannot earn enough to pay his car fare from one track to another, while the one that is staked and can win, generally puts enough money in the bank to keep himself and his owner comfortably for several years. If your mare looks as if you were going to get something in the spring for the money you paid out this year for service fee, better send her name and breeding and \$2 (don't forget the \$2) to Secretary F. W. Kelley at 36 Geary street, San Francisco, on or before Monday next. After that time it will be too late.

TWO BIG STAKES offered by the Westchester Racing Association, to close and name at midnight of Friday, December 15th, are advertised in our columns this week. The National Stallion Race has \$5000 added, and is for then two-year-olds to run during the spring meeting of 1907. The Matron, with \$10,000, is for foals of 1906 to run at the autumn meeting of 1908. The full conditions governing these two rich events will be found in the advertisement.

THE DUFFEE SALE at Los Angeles came off during the meeting there last week as advertised, but the full report of the same has not reached us. Jupiter B. 2:12 and Cuarte 2:13½ were sold together and brought \$2500. Bellemont 2:17½, by Zombro, brought \$2500. The pacing mare Virginia fetched \$750. The sale was a big success. A full summary will be printed next week.

CATALOGUES ARE OUT for the dispersal sale of the horses owned by Mr. Geo. A. Davis of Pleasanton, one of the most successful breeders in California. There are many splendid young trotters and pacers, royally bred brood mares and several thoroughbreds. The sale will take place Tuesday evening, December 12th, at Fred H. Chase & Co.'s salesyard, 1732 Market street. Look for further notice of this sale next week and in the meantime send for a catalogue.

Money lost in a gambling house in some States may be recovered if the loser or his wife sues the owner of the building for it. This was established in a decision rendered by Justice Peckham of the United States Supreme Court recently in a test case referring to the constitutionality of the State law of Ohio against gambling. The judge decided not only that the law is constitutional, but that the owner of the house where gambling is carried on, with his knowledge, is responsible for losses sustained in the games. This decision reaches every State in the Union which has a gambling law. The Ohio case, which has brought home this responsibility to the owners of buildings rented by gamblers, was carried to the Supreme Court of the United States by William Marvin, the owner of a building in Findlay, O., in which Frank H. Trout had lost large sums of money. Trout's wife brought suit and secured judgment, and Marvin's appeal from the judgment finally reached the United States Supreme Court. Lawyers expressed the opinion that this decision will go far toward restraining gambling in this country and that owners of buildings will think twice hereafter before they lease them for gambling purposes.

Strike—if they don't give you Jackson's Napa Soda when you ask for it.

THOROUGHBRED DEPARTMENT.

The New California Jockey Club officers ought to take up the matter of how horses should be started at a very early date. I say this for the reason that too many heavily-backed animals are being left under the present plan, and it entails dissatisfaction that could be avoided if the club adopted some other plan than the one now in vogue. To give an idea of the heartaches felt during this meeting by backers of horses that had no chance after the barrier was raised, to say nothing of the imprecations hurled at the starter over these affairs, I will give a list of horses, from November 11th on, that were either left outright or nearly so, all heavily backed: Bearcatcher on the first day, Aronalis and Bearcatcher on November 16, Silver Sue and Possart on November 17, Rey Dare on November 18, Royal Rogue on November 20, Confederate and Corn Blossom on November 22, Rightful and Reservation on November 24, Silver Sue and Comiflo on November 25, and Haviland on November 27. Here were fourteen well-played horses that did not receive a fair start in as many days of racing, or an average of, I will say, \$4000 per afternoon "burnt up" by the barrier wielder under the present plan of starting horses. The time is certainly ripe to take up the matter, and I would suggest that the Mars Cassidy plan of walking the gallopers up slowly like a lot of cavalry horses be tested. The standing start has been tried and found wanting and as the jockey club's aim doubtless is at all times to give its patrons a fair run for its money, change the present obnoxious system, do away with the bull whips and the "hold-on" boys and make the starting even more spectacular than at present. If horses were trained to face the barrier as in Australia it would be another proposition, but they are not, and riders turn and twist and try to get the better of the starter in so many ways that that official would doubtless be as pleased to change the method as would the public. In England agitation is going on over the present plan of starting horses, and The Jockey Club was expected to discuss new plans at its November meeting, but it didn't.

The forty heaviest money winners in the East this year were as follows, those marked with a star being bred in California: Sysonby, \$144,380; Cairngorn,* \$42,245; Burgomaster, \$39,500; Ormondale,* \$35,660; Mowhawk II, \$33,540; Beldame, \$26,850; Perverse, \$23,990; Artful, \$23,320; Tiptoe, \$22,484; Oiseau, \$21,705; Running Water, \$17,290; Agile, \$17,150; Delhi, \$16,125; First Water,* \$115,760; George C. Bennett,* \$15,760; Vendor, \$15,640; Accountant, \$15,420; Hamburg Belle, \$15,290; Yankee Consul, \$14,780; Pegasus, \$14,625; Wild Mint, \$21,070; Jacobite,* \$20,960; Security, \$20,250; Roseben, \$20,190; Proper,* \$19,725; Hylas, \$19,290; Tanya, \$18,372; Edna Jackson,* \$17,975; \$17,975; Caughnawaga, \$17,975; Tradition,* \$17,970; Merry Lark, \$14,285; Dandelion, \$13,400; Whimsical, \$13,260; Koruki, \$12,729; Santa Catalina, \$12,510; Blandy, \$12,440; Bohemian, \$12,505; Broomstick, \$11,710; Good and Plenty, \$11,570; Battle Ax, \$11,560. Of the above forty it will be observed that eight, or one-fifth of the total, were bred in the Golden State.

H. T. Griffin's big string arrived early in the week from Bennings.

SUCCESSFUL SALE OF THOROUGHBREDS.

There was a large crowd at the salesyard of Fred H. Chase & Co., 1732 Market street, last Tuesday evening, when the yearlings from W. O. B. Macdonough's Ormondale Farm, and the horses belonging to the late Don Cameron were sold. The star of the sale was the good two year old Sir Wilfred, that went to the bid of C. E. Durnell, who was probably acting for John W. Gates, for \$6000. The highest price for any of the Macdonough yearlings was the chestnut colt St. Carlo, out of Lovelight, that was sold to W. H. Hammond for \$2100. The summary of the sales follows:

Macdonough Yearlings.

Chestnut colt by St. Carlo-Lovelight, W. H. Hammond; \$2100.

Bay filly by Orsini-Rose of China, J. McGee; \$325.

Bay filly by Ossary-Carmen Sylvia, G. Wentworth; \$450.

Bay filly by Ossary-Spinach, F. J. O'Rourke; \$650.

Bay filly by St. Avonius-Orbana, Dr. Fitzgerald; \$350.

Bay filly by St. Avonius-Orellana, W. Mendenhall; \$350.

Bay filly by St. Avonius-Goldenlocks, John McGee; \$250.

Bay filly by St. Carlo-Gold Lace, Albert Joseph; \$1500.

Chestnut filly by St. Avonius-Middle Dunhar, C. Earl; \$300.

Bay filly by Orsini-Schtiltate, F. J. O'Rourke; \$550.

Cameron Consignment.

Plumeria bay mare by Eagle's Plume-Froila, W. O. B. Macdonough; \$700.

May W., bay mare by Eagle's Plume-Froila, W. O. B. Macdonough; \$700.

Maud Sherwood, chestnut mare by Tom Cromwell-Plumeria, W. O. B. Macdonough; \$300.

Bay gelding, foaled 1904, by Rubicon-La Salinas, D. McCarthy; \$275.

Sir Wilfred, bay colt, foaled 1903, by Ossary-Plumeria, C. E. Durnell; \$6000.

Bay filly, foaled 1904, by Ossary-Plumeria, D. A. Ross; \$2100.

Lady King, bay filly, foaled 1903, by King Eris-Ivy Benjamin, F. Israel; \$600.

James A. Murray, chestnut gelding, by Rubicon-Plumeria, D. A. Ross; \$250.

Hagerdon, bay gelding, by Escher-Lady Richmond, Harry Stover; \$500.

LOS ANGELES MEETING.

By HIDALGO.

Thursday furnished the most attractive bill of the whole week and should have drawn a big crowd, for the bleak north wind of the first two days had drifted around to the southward, but just before noon heavy black clouds began to heave in sight and a great many stayed away through fear of a rain. The track was in perfect condition and the prediction that a heat would be paced in 2:05 or better in the race between Zolock and Hazel Patch did not seem like such a wild one. The first race of the day was the unfinished pacing race for the 2:20 class, which had been resumed from Wednesday when four heats had been paced, Welcome Mac taking the first and fourth with a dead heat between him and Birdal in the second, and the third heat going to the San Diego horse, Victor Platte, being the fastest in the race except the second. J. A. C. and Connors being distanced, reduced the field down to six and Welcome Mac was quoted at 20 to 12, 15 to 10 and 10 to 7 for the field. Fred Ward drove him in a masterly manner and won by nearly three lengths, which gave him the first money. Victor Platte the second, Birdal third and Fearnot fourth.

The next race was the first regular race of the day, for which Morone, from the Clark stable, was a well pronounced choice, at \$20 against \$15 for the field, consisting of Durfee's Cuate, Bonnell's Ambush and West's Commonwealth. A most critical judge would have predicted that the Montana horse would have taken the first money in straight heats, from the seemingly easy way that he landed the first and second, which he probably did upon sufferance, as they were the slowest of the five, Cuate being the contender in each. In the third heat Morone got off in front again and led to the quarter and then to the half, with Ambush in close attendance. But Cuate was well within striking distance and had passed Ambush just after passing the three-quarters. From there to the wire it was a desperate battle and young Durfee drove like a demon to win the heat. About fifty yards above the wire he had gotten on even terms with Morone, who went into the air twice but was promptly rallied by Old Man Garrity. He crossed the line ahead of Cuate by the shortest of heads, but as the latter had never left his feet the judges gave him the heat and placed the Montana horse second. There was some little grumbling over this decision but I don't see how they could have decided otherwise, although it is doubtful if Morone gained by either of his breaks. Yet where one horse breaks and the other trots (or paces) steadily all the way, the breaker cannot consistently be given the heat. I like young Mr. Clark as well as any man I know and I believe Garrity as straight a man as there is in the business, but I should have given the heat to Cuate had I been a judge of the race. The next two heats showed Billy Durfee's gelding to be the staidier horse of the two for he won both the last two heats in faster time than the two first, which he lost. In fact, the fifth heat was the fastest in the entire race and I made it 2:13 flat.

The 2:12 pace was the next event, with twelve nags on the card, of which four—El Diablo, Richard B., Prince Charles and Delilah—were scratched. Oma A., owned by Stephen S. Bailey of Seattle, was made a favorite at 10 to 4 for the field, despite the assertions of her owner that it was a false price and he did not believe she could get better than third money. But the public thought the old steamboatman was "kidding" then and poured in their money on her as though the race was over. Even after three heats had been paced, Glenn taking two and Vinnie Mann (an added starter) the other, she brought \$10 and the field \$5; and things went on in this way until the track was cleared for the event of the day, the great special between Zolock and Hazel Patch. As Hazel Patch had previously beaten the pride of San Berdoos, he was made a favorite naturally enough at 15 to 10. The fact that he had drawn the inside position seemed to strengthen public confidence in the Eastern horse.

I stood at the paddock gate as they came out and thought Zolock a trifle heavy for a long and bruising race; and on the other hand Patch looked so low in flesh as to suggest a belief that, in order to make her last through a long-drawn race, they had trained some of the speed off him. This became more evident as he scored for the first heat, in which Zolock handily outfooted him every inch of the way. Hazel Patch tried to get up to him just after leaving the quarter in 31, and then again at the half in 1:00½, where the severity of the pace told on both of them; and it was a question which would "back up" first. Patch tried it again in the stretch Delaney stalled off his rush and won by two lengths in 2:05½, which was, if I am not mistaken, the fastest heat ever paced here by a California-bred horse, though not the track record, which was made here by John R. Gentry in 2:03¼ in 1899.

I went down to the stables and saw both these great nags cooled out; and it was evident to me that the first half-mile had done the business for the handsome brown horse from "the State of San Berdoos." He blew out very hard and had evidently taken that 1:00½ to heart. Hazel Patch seemed to have brightened up a good deal and I predicted he would pace still faster in the coming heat.

"It won't be necessary," said Mr. Flack, "I've got it now and in slower time."

The cool-headed and experienced driver of the horse

from the far East had prognosticated truly. He got him off evenly with Zolock who led to the quarter in 0:31½ and, when he got straightened in the back stretch, carried Zolock along at such a furious clip that the handsome brown broke and fell back at the half-mile in 1:01. From that point onward it was all Hazel Patch, he being first to the three-quarters in 1:33½ and winning the heat in 2:07½ by six good lengths. The third heat saw an end to all betting on this event. George Common begged for \$2.50 on Zolock against \$10 for Hazel Patch, but there was no response that had a metallic ring. It was evident that nothing could save the race to Zolock but for the Eastern horse to fall dead in his tracks. The third heat was a splendid start, Zolock being about two feet in advance of the pole horse which, counting the long distance he would have to travel, made the start a good one. Hazel Patch took the lead with all possible ease and Zolock trailed along behind him, although Delaney kept him nicely on his feet and never once drove him to a break. They took the quarter in 0:31, the half in 1:01½, the three-quarters in 1:34 and the mile in 2:08½, the Eastern horse coming in on what was but little better than a whole-some jog. The race then went over till Friday.

The 2:12 pace had twelve nominations but only seven took part in the race, the absentees being El Diablo, Richard B., Prince Charles and Delilah. By some unaccountable blunder, Charley Smith had omitted from the program the name of the Oregon mare, Vinnie Mann, who won two heats in the race and got second money. The pooling showed Mr. Bailey's Oma A. a favorite over the field at even money before the race, at 10 to 7 after the first heat, 10 to 6 after the second heat and 10 to 4 after the third heat.

Jim Thompson was behind Kirkpatrick's Albuta and made a very strong bid for the first heat, being second to Glenn in the fast time of 1:39 to the three-quarters and holding all others safe to the end of the heat in 2:12½. Still, the public were hot for Oma A. and would have nothing else. Vinnie Mann now came to life, as also did Lady R., who had finished eighth in the first heat, and while Glenn held the lead for the first half-mile, these two mares trailed him to the stretch, where they came on and finished first and second, Glenn being third, in the fastest heat of the race. Glenn got off well in the third heat and made every post a winning one, in 2:12½, with Vinnie Mann second, Lady R. third, Oma A. fourth and Albuta distance. The next was a savage battle between Glenn and Lady R. to the three-quarters, where young Lindsay came up at a marvellous pace, gaining on the two leaders at every stride, and finally won the heat with Vinnie Mann in 2:12½, with Glenn second, Lady R. third and the fourth horse, Oma A., beaten less than two open lengths. This race then went over to the next day:

Summaries:

Pacing 2:20 class; purse \$1000.

Welcome Mac, b.g. by McKinney (F. Ward) 1 0 1 2 1
Victor Platte, b.g. by Platte (Fanning) 2 3 4 1 2
Birdal, r.m., by Birdalex (Springer) 3 0 2 4 3
Fearnot, b.h. by Lynmont (Stewart) 5 4 3 3 4
Time—2:13, 2:12½, 2:11½, 2:12½, 2:12.

Trotting, 2:14 class; purse \$1000.

Cuate, b.g. by McKinney (Durfee) 2 2 1 1 1
Morone, blk.g. by Cleone (Gerrity) 1 1 2 2 2
R. Ambush, br.c. by Zolock (Bonnell) 4 3 3 3 3
The Commonwealth, b.h. by Shadeland Onward (Lindsay) 3 4 4 4 4
Time—2:15½, 2:15½, 2:13½, 2:14, 2:13½.

FOURTH DAY.

Friday was a bright and pleasant day with warm sun and balmy air, but the crowd was not commensurate with either the sport or the weather. Twelve years ago such cards as these have been would have drawn from six to ten thousand paid admissions, on any day of the five, but there have been, in the meantime, so many races jobbed and people robbed that people grew leary of it and kept away from the tracks. The present association, composed of gentlemen of great liberality and unquestioned integrity, is suffering from the misdeeds of others in the days that have flown. I shall give the summaries of the postponed races from Thursday:

Pacing, 2:12 class; purse \$1000.

Lady R., b.m. by Col. K. R. (Sweeney) 8 2 3 3 1 1 1
Vinnie Mann, b.m. by Alexis (Lindsay) 6 1 2 1 2 2 3
Glenn, ch.g. by Glenwood (Pounder) 1 3 1 2 4 3 2
Oma A., b.m. by Dietatus (Mosher) 5 7 4 4 3 ro
Byron Lace, br.s. by Lovelace (Stetson) 3 5 7 5 6 ro
Blattie Croner, b.m. by Bay Bird (Bunch) 7 4 5 7 5 ro
Mistake, br.g. by Trouble (Kent) 4 8 6 6 dis
Albuta, br.g. by Altivo (Thompson) 2 6 dis
Time—2:12½, 2:11½, 2:12½, 2:12½, 2:11½, 2:12½.

Pacing, match for \$1000, divided \$700 and \$300.

Hazel Patch, br.s., by Hard Patch (Flack) 2 1 1 1
Zolock, br. s by McKinney (Delaney) 1 2 2 2
Time—2:05½, 2:07½, 2:08½, 2:05½.

The next thing was the first regular race of the day, a \$1000 purse for the 2:24 class for which there were nine on the card, but Levletta and Glenetta were erased from the list of starters. F. Connell's b. g. Homeway was the first choice at \$10. Lady Jones \$7 and the field \$5. The surprise of the occasion was a hay gelding called Billy Dooley, owned by the Sacramento brewer Ruhstaller, who went out at a furious clip as though he intended to shut out everything in the field. He won the heat by nearly sixty yards in 2:16½ with Homeway, the future winner, in second place, Ida Millerton third, Zombretta fourth, Bonita fifth, Lady Jones sixth and Kirkpatrick's Judge last. "Never mind, my son, I've seen sicker children than this cured," said Dan Misner, as old Homeway was led off to the stable. He spoke truly, for he went out and won the next three heats

with something to spare, the second being in 2:14½, the fastest in the entire race.

Third race, 2:24 trot; \$1000 purse.

Homeway, b.g. by Strathway (Misner) 2 1 1 1
Lady Jones c.m. by Capt. Jones (Green) 6 7 2 2
Bonita, br.m. by Knight (Durfee) 5 2 3 3
Ida Millerton, blk.m. (Maben) 3 4 5 5
Zombretta, b.m. by Zombro (P. Ward) 4 5 7 4
Billy Dooley, b.g. by Bay Bird (Freeman) 1 3 4 d
Judge, b.g. by Silver Bow (Thompson) 7 6 6 6
Time—2:16½, 2:14½, 2:16, 2:17.

Then came the 2:27 pace for which nine were carded but two—Birdal and Sweetheart—were scratched. Fred Fanning's horse, Victor Platte, was made a hot favorite and took the first two heats in 2:13 and 2:13½, but seemed to tire very badly after that and Stewart's Fearnot took the third in 2:14 flat. On the following day this race was resumed with the following result:

Victor Platte, b.g. by Platte (Fanning) 1 1 6 1
Jennie A., blk.m., by Neernut (McCoy) 2 2 2 2
Molly Button, b.m. by Alex Button (Misner) 3 3 3 3
Henry N., gr.g. by Raymond (Maben) 6 6 5 4
Fearnot, b.h. by Lynmont (Stewart) 7 4 1 dr
J. I. C., ch.h. (Washington) 4 5 4 dis
Dot, b.m., by Falrose (Bunch) 5 7 7 dis
Time—2:13, 2:13½, 2:14.

FIFTH DAY.

The 2:09 trot saw three horses carded but Jupiter B's owner evidently concluded he could not beat a horse that had trotted in 2:09 over east against the very pick of the country. Billy Durfee is as good a hand at placing horses as he is in driving, so he said, "Excuse me." The race then became a virtual walk-over for John Caldwell but the Walla Walla mare, Helen Norte, made it tropical for the great son of Strathway in the first half-mile of each of the two first heats, for she stuck to him like "Aunt Jemima's plaster" that Billy Birch used to tell about a half century ago. After leaving the three-quarters, Caldwell could leave her at almost any time, and in the last heat Mr. Thompson (with a p. if you please) had to pull John Caldwell almost into a walk to avoid distancing her.

Second race, 2:09 trot; purse \$1000.

John Caldwell, b.g. by Strathway (J. H. Thompson) 1 1 1
Helen Norte, b.m. by Del Norte (H. B. Rutherford) 2 2 2
Time—2:08½, 2:08½, 2:11½.

Then came the free-for-all pace, for which there were four starters carded but one of them was excused and Daedalion was put in to get third money. Hazel Patch sold for \$10 to \$5 for the field and about a half-dozen pools went at that price and then all betting stopped for the more intelligent spectators could see that Hazel Patch could take the lead and keep it whenever he so desired. He was on the outside at the start for the opening heat but flew around the turn fast enough to pass Daedalion who had gotten off in the lead. Delaney seemed in no hurry and led the Diablo horse fight with Hazel Patch for the lead, and for three-quarters it was certainly a very beautiful sight, Patch leading by less than a good length to that point in 1:34½. In the stretch Delaney moved up with Zolock but was never able to reach the leader, who won in 2:05½. This heat took the shine out of Daedalion and Zolock beat him for second money in the two next heats, Hazel Patch winning the second heat by over three lengths and the third by over six. I append the summary:

Free-for-all pace; purse \$1000.

Hazel Patch, hr.h. by Hard Patch (J. W. Flack) 1 1 1
Zolock, hr.h. by Hard Patch (H. Delaney) 3 2 2
Daedalion, b.h. by Diablo (H. R. Ward) 2 3 3
Time—2:05½, 2:07, 2:08½.

The next race was a mile and repeat for a matinee cup, club members to drive. California Poppy, Jessica and Kinmont were scratched, leaving only Lona and General Booth as contestants. The result was as follows:

Trotting Cup Race for club members.

Lona, b.m. (William Morgan) 1 1
Gen. Boodle, blk.g. (G. F. Fritz) 2 2
Time—2:21½, 2:20.

Then came the wind-up of the day and the meeting. Henry Berry's road horse, Briny K., was matched to trot to wagon and heat 2:20. Henry started to drive himself but finally concluded to put up Bob Smith, who campaigned Sweet Marie. Of course Mr. Berry was some forty-five pounds over weight, which might result in disaster when taken in connection with an extra pair of wheels. But really from the way the horse executed his task, I am quite confident Mr. Berry could have driven him fast enough to win the wager, although he might not have gotten down as low as he did under the pilotage of Mr. Smith. I had my field glasses on him all the way and he was never touched with the whip. He made the journey in 33, 1:06½, 1:42, 2:15, official time, and I made the half in 1:06½ and the three-quarters in 1:41½, the first quarter and the full mile being the same by my watch. I make more than usual mention of this event because it constitutes a wagon record for the Pacific coast. I would like to see a wagon race for 2:30 class and one for 2:40 class at each meeting. It might help a fellow to pick out a good road horse.

I regret that this meeting should have added at least \$2000 of further deficit to the one of last July which was at the lowest estimate, over \$1800. The men who put up the needful for these two meetings are amply able to lose the money and not feel it, but the general inclination of mankind is to make money and not lose it. Hence I think Los Angeles has seen its last harness meeting for many years to come. There has been an awful lot of jobbing done here

between 1894 and the present date, and after the grangers have gone home two or three times with empty pockets and kicking the splinters off the railroad ties, they get very sore and don't feel much like coming back again. Six years ago I got three drivers together in the parlor of the club house at Agricultural Park and said to them, "Now, you fellows know just what you have been doing all through this meeting, and I can only say that you're bigger suckers than the men you have been robbing through the mutual boxes. Don't you know this is the only town in the state where people will turn out to see a trotting race. Don't you know it is easier to get 2000 people to a harness race here than to get 200 to one at San Francisco? And for all that you will go on and get in your dirty work here as if this were a jay town. You will all want to come down here next year and get some purses—where do you expect the money to come from to make up those purses?" For all that they have kept a jobbing right along and the new driving association, which has this year given two of the best harness race meetings I have seen in twelve years, is the sufferer for their misdeeds.

Some men have no sense, anyhow. I heard an alleged trainer of trotters and pacers making a howl yesterday about the charge of 5 per cent. commission on mutual tickets. Now who furnishes the money for those mutuals? The noble army of "pikers," of course, for not one man in twenty who goes to the mutual boxes has the money to pay for the fourth choice in an auction pool if the betting is at all lively. The horsemen's money is in the stakes and purses, and the coin of the "hoi polloi" is what makes the mutual game and the profits of the mutuals are what help to make up the purses and added money for the next year's meeting. Now, "advance ass, and give the countersign."

HIDALGO.

NOTES FROM THE OLD DOMINION.

RICHMOND, Va., Nov. 20.—Greater interest has been manifested in horse breeding by farmers and others in this state during the present year than since the boom was at its height back in the early nineties. California bred stallions were the most extensively patronized, too. The Palo Alto bred horse, Kelly 2:27, full brother to Expressive 3, 2:12½, was kept very busy. Under lease by W. J. Carter from his owner, James Cox, Mt. Jackson, Va., the bay stallion served eighty-one mares in 1904 and during 1905 an even hundred visited the court of this son of Electioneer and thoroughbred Esther and were mated with him. No less than 120 were booked, but for various reasons not all were bred. The horse finished strong and hearty, too, certainly an evidence of a hardy constitution and the possession of more than ordinary vigour. Among the mares bred to Kelly was Telka, the daughter of Arion 2:07¾, from La Jolla by Advertiser 2:15¼, second dam famous old Sally Benton 2:17¾, the dam of Serpol 2:10, etc. She is owned by W. J. Carter at Richmond and the prospective foal will carry three top trosses to Electioneer, as Kelly, Arion and Advertiser are all sons of the famous dead monarch of Palo Alto.

The Floyd Brothers of Bridgeton, Va., who are the largest breeders on the eastern shore of the state, have five stallions in service and report a most prosperous season. Their premier sire is Sidney Prince 2:21¼, whose name indicates his paternity, seeing that he is a son of Sidney, while his stud companion is Colonel Sidney, who bears a like relationship to the stallion whose career was so closely entwined with that of the dead Count Valensin. One of the stud companions of these two sons of Sidney is Rod Oliver, by Col Henry Exall's noted Texas sire Electrice, another product of your Golden State. Rod Oliver is from Lady May, the dam of six, by Port Leonard. Sidney has served 102 mares this season, as against some 118 or 120 in 1904, but in favor of the stallion it may be said that his fee was increased this season and six mares from a breeder in a neighboring state were refused in October. The Messrs. Floyd have ten highly bred mares, all by sires of note and from great producing dams, in foal by Sidney Prince. Ten of the get of the two Sidney stallions, eight by Sidney Prince and two by Colonel Sidney, were sold from the Floyd farm this year for an average of close to \$1000 each.

The big chesnut stallion Bedworth 2:22¼, by Wildnut, dam Julia Benton, by General Benton, owned for several seasons past by Christian and James of Blakes, Va., has been mated with some good mares and his get are being trained and raced by breeders in that section. Bred at Palo Alto, he was brought east and sold, after which he was raced and between seasons did stud service in both Maryland and Virginia, in the former for E. B. Emory of Centreville, and in this state for Fred. Downing, Sharpe's Wharf. By the latter he was traded to parties in Ohio, but after his get began to show up well the son of Wildnut was purchased and brought to Blakes by his present owners. The fastest of Bedworth's get in Bedworth, Jr. 2:06¾, pacing, and a good race horse. In fact, I think that the speedy gelding holds the record for Maryland bred harness horses.

Another California bred stallion that is exercising a refining influence upon the stock of the section in which he is kept is Planeteer, a Palo Alto bred son of Electioneer and Planetia, thoroughbred daughter of Planet. Planetia, as you know, of course, figures as the grand dam of Peko 2:11, Pedlar 2:18¼, etc. He is owned by W. E. Graves of the wholesale lumber firm of Woodson & Graves, Lynchburg, Va. With the possible exception of a short while in his two-year-old form at Palo Alto no attempt was ever made to train Planeteer, as he was brought east that season and sold, or has any effort been expended in handling his get for speed, yet they show up well in size, uni-

formity of color and partake of their sires' even temper, mild disposition and good manners.

W. J. CARTER.

MECHANICAL TRACTION AND HORSE PRODUCTION.

The Scientific American is an article on the bicycle and the automobile refers to the rise and sudden collapse of the bicycle and asks this pertinent question: "Shall we see repeated the history of the bicycle in the booming of the automobile?" The large numbers of cheap autos that will soon make them a cheap machine.

The distinction of the automobile by the high prices has given distinction to the enthusiastic owners, but when everybody gets to riding in the auto as they did with the bicycle, there will be a mechanical collapse and mechanical traction will assume normal position along with the electric car and the locomotive; a help to the horse which elevates him to a higher sphere; that requires better and larger draft horses for work and finer, handsomer carriage horses for driving at higher prices; more profit to the farmer who can raise these high class horses to suit the market demands for special class horses, while the all-purpose horse, the street car class, and the small, cheap horses have already given place to the draft and coach horses at three times the price.

The editor does not refer to the Horseless Age so flippantly used a few years ago by the auto enthusiasts, but says, "the automobile will rival the trolley car and the locomotive." And we all know that these increased the demand for horses, and if history repeats itself, mechanical traction will increase the use and demand for more horses and better horses.

The editor says: "The history of sports and pastimes in this country furnishes no parallel to the rapid growth in popularity of the bicycle, and its even more sudden decline as a means of recreation. Its decline is rendered the more puzzling when we remember that the medical profession indorsed bicycle riding as being, when followed in moderation, of valuable assistance in keeping the body in good condition, and in the cure and prevention of certain ailments that arise from sedentary habits and the lack of a proper amount of outdoor exercise. So true is this that if it were possible to gather the testimony of the hundreds of thousands of people in this country, whose "wheels" are today rusting in the cellar or stored ingloriously among the top attic lumber, it would be found they readily admit they have never enjoyed the perfect health which was theirs when the Sunday trip into the country or the evening ride on the boulevards or cycle paths formed an important and pleasurable item in the routine of their lives.

The causes for the decline were many. The chief trouble was the very one that is threatening the automobile today—people rode too fast and too far; and those who were not gifted with the muscular and constitutional equipment necessary for riding centuries, or even half-centuries, without distress began to associate the bicycle with aching limbs and an exhausted body. Another and scarcely less active cause of the decline was the introduction of cheap bicycles, and the placing of the wheel within reach of everybody who could find the necessary forty or fifty dollars for its purchase. Bicycling became unfashionable; and in this respect the decline of wheeling is one of the most startling signs of the fact that the American people are fast losing that independent, democratic spirit which for three centuries has been one of the distinguished characteristics of the race. When the fad became unfashionable its death-knell as a pastime of universal popularity was sounded. The bicycle was relegated to uses purely utilitarian. As a means of transportation it will always fill a useful place in the economy of everyday life; but that bicycling will ever win back anything of its former position as one of the most fashionable and popular means of recreation is most improbable.

But what of the automobile? Will like causes produce like effects? The introduction of cheap and reliable automobiles (and if the plans of certain firms do not miscarry the market will within the next two or three years be flooded with such) will bring the automobile within reach of the pocketbook of ten times as many people as can afford a machine under existing conditions. Shall we see repeated the history of the bicycle? Will it become unfashionable? Possibly in a limited degree it will; although it must remain one of the most useful means of transportation, both for freight and passengers, that invention has placed at the service of man, rivaling, if not surpassing, the locomotive and the trolley car.

SKIN DISEASES OF HORSES.

It would be difficult to decide which form of parasites, animals or plants, do most damage to the skin which they infest, says W. R. Gilbert, in the "Stock Farm." Undoubtedly in the aggregate, parasite insects are more injurious than parasite plants because they are more numerous, and some of them bury themselves in the skin, out of reach of remedies, very much as parasites are far more common than parasitic plants, though ringworm, it is true, attacks horses, though comparatively rarely, although when it does occur it is difficult to cure, and if allowed to become diffused over a large extent of surface before remedies are applied it may prove to be incurable. Two closely allied species only of fungi attack horses. The most common is the Trypophyton Tonsurans, so called from the large spores, which causes ordinary ringworm; and the Achiorion Schoenleinii, which is found in the peculiar scabs of honey-comb ringworm; but insect parasites are very numerous, and several varieties of them find a temporary or permanent residence in the skin.

Some kind of insects are content to remain on the surface of the body and even do some indirect service by eating the waste materials which would accumulate if not got rid of in some way; but even then, in the pursuit of their natural function of life set up a considerable amount of irritation.

Others burrow into the skin and do more mischief than the first, besides being more difficult to detect and destroy. Acari or mange mites are the most injurious of the parasitic insects which infest the skin. The family is familiarly represented in the form of the common cheese mite which is visible to the unaided eye, but can be more conveniently examined with a pocket lens. A very strong family likeness connects the different varieties of the acari, but there are certain anatomical peculiarities which can be recognized under the microscope and indicate the class to which the insect belongs. Sarcopites, or flesh strikers, as the same implies, bite their way into the skin and make long galleries in which the eggs are laid, and the young mites hatched in about eight days, or longer in cold weather. The acari are provided with strong cutting jaws, not unlike the large claws of the lobster; they have also short legs which extend very little beyond the outline of the body.

Dermatodectes differ from sarcopites in their forms and habits. They possess long, pointed mouths, suitable for taking up the secretions of the skin, and long legs which enable them to wander freely over the body and cling tightly to the skin when necessary. A third variety of acari are known by the term symbiotes because they cluster together in a manner suggestive of good fellowship. They are less common than the other two, and usually infest the legs, especially in the cases of chronic disease. All forms of mites cause eruptions and intense itching.

Sarcopic Mange.—At one time it was generally believed that burrowing mites were confined to the skin of the human subject, causing a disease known as the itch; but for many years past, cases of sarcopic mange, sometimes of a very virulent form, have been met with in horses.

In the Shetland Isles sarcopic mange in certain seasons causes serious loss among the ponies. The animals living in a half wild state are out of the way of observation and treatment, and the disease consequently rages unchecked, and numbers of the animals die from the intense irritation which prevents them from resting or obtaining sustenance.

Some years since the English Privy Council was urged to pass an order to enable the local authorities to slaughter horses affected with sarcopic mange, and to pay compensation. It was found on inquiry that the owners of diseased animals would be extremely glad to have the ponies killed if compensation to the amount of about \$20 were paid. The order was passed, and by the energetic action of the inspector the disease was nearly extinguished; a few cases occur each season, but the malady in the epizootic form has been stamped out.

Most probably sarcopic mange is much more common among horses than is supposed to be. It is in occasional cases only that any search is made for the acari. Symptoms of mange may be apparent, and the ordinary remedies are often applied with success, as most of the cases of mange are in the common form in which the dermatodectes are present, but in the case of the disease not proving amenable to treatment it would be worth while to ascertain whether the cause of failure was to be found in the character and habits of the parasites which had induced the disease.

REX BOOK.

Without doubt, no question is of more vital importance to owners of horses, cattle, hogs, sheep and poultry than the proper care of their stock and an adequate and immediate method of treatment in case of sickness. Numerous books along these lines have been published with varying degrees of value.

One of the most complete publications ever attempted is the "Rex Book—The Veterinary Guide," recently issued by The Rex Company, 800 South 16th street, Omaha, Nebraska.

This book contains over 160 pages with more than 150 illustrations, well bound in attractive covers. The book weighs nearly a pound.

It treats upon every subject known to veterinary science and embraces the results of the most successful veterinary surgeons the world over.

A copy of the book will be sent to all readers of The Breeder and Sportsman free by addressing The Rex Company, 800 South 16th street, Omaha, Nebr. We cordially advise our readers to send for a copy of this book today as it will prove of great and lasting value to everyone owning stock or poultry. Mention The Breeder and Sportsman and the book will not cost you a cent.

A sale of twenty-five head of horses from Mr. A. B. Spreckels' Aptos Ranch will be held some time in February next by Fred H. Chase & Co. Sandy Smith has them all up now and is putting them in shape at the farm track. They are all young horses by Cupid 2:18 (own brother to Sidney Dillon), Dexter Prince and Aptos Wilkes, and are as fine a lot as this well known breeding farm has ever turned out. There is a full brother to Psyche 2:11¼ among them. Chas. De Ryder visited the farm last week and speaks very highly of the horses and their condition.

The handsome bay stallion Direct View 2:08¾ as a five-year-old, was sold for \$2,750 at the Old Glory Sale last week. He took his record at Readville last year in the first heat of a race in which he beat Sweet Marie the first two heats. He is by Direct 2:05½ out of Formosa by Mansfield 2:26.

NOTES AND NEWS.

Breeders' Futurity for foals of mares bred this year will close for entries on Monday next.

Zephyr 2:07½ brought \$1600 at the Old Glory sale, and her two-year-old daughter Zelma by Beauseant 2:06½ brought \$1000.

Bert Webster has returned to California after an absence of nearly two years, and has located at Pleasanton.

Miss Idaho 2:09¼, by Nutwood Wilkes, has won two seven heat races. Her first start in a regular race was at Pleasanton in 1904, where she met Cavaliero, Tom Carneal, Dr. W. and other fast ones, and won after seven heats had been paced. She took a record of 2:16½ in that race, which she reduced to 2:11¼ later in the season. Her present record is not the limit of her speed by a good deal. Her dam is a mare said to be by Forest Clay Jr.

The Salinas Driving Club, that was organized two years ago and gave a successful race meeting in 1904, is about to be reorganized for the purpose of giving a meeting at the Salinas race track next fall.

Mr. J. B. Iverson, of Salinas, who won all the three-year-old stakes on the California circuit this year with North Star 2:13¼, by Nutwood Wilkes, has another very promising trotting colt in a two-year-old by Barondale 2:11¼, out of Wilhelmina II. by Eugeneer, sire of North Star's dam. Chas. Whitehead is teaching it the way it should go.

Colonel Delmar 2:14¼, a brother in blood to Major Delmar 1:59¾, was consigned to the Old Glory sale by Dan Mahaney and brought \$4600. Charles Duval of New Jersey was the buyer.

Sports of the Times, printed in New York, issued a very handsome horse show number. The cover picture by Diekey was especially good.

Chas. De Ryder may remain in California all next year and if so he will be seen on the California circuit, as it would be almost impossible for him to keep out of the game when the racing began. He is now engaged in buying and selling good prospects. He will purchase a likely horse at a fair price and after putting him in shape, sell at a small profit. By keeping his money turning over this way he figures on making a fair profit on his investments and allowing the buyer margin for further profit. He has on hand at the present time several horses that are without records but good enough to race on most any circuit next season. Among them is a pacer by Don Derby 2:04½, dam by Guide 2:16, that worked a mile in 2:11 last year and was then turned out when Mr. De Ryder went East. He took him up when he came back and a week ago last Saturday let him step an eighth at speed, and he stepped it in 1¼ seconds. This pacer is a sure race horse, and Mr. De Ryder asks a very reasonable price for him.

William Morgan of Pasadena, W. G. Durfee and J. W. Flack of Los Angeles, E. T. Lutz of Santa Rosa, Chas. Wheeler of Sacramento, J. L. Smith of Vallejo, B. Croner, I. Lichtenstein, Jos. Herrscher and A. Ottinger, of San Francisco, are among the Californians who have made entries for the races at the Arizona Fair, which opens at Phoenix on Monday.

Tommy Waugh, who cared for Lou Dillon 1:58½ during her phenomenal campaign of 1903, is now looking after Ed Patch 2:08¾.

Get your advertisement in the Christmas Breeder & Sportsman which will be issued December 23d. It will be a very handsome number and have a larger circulation than any journal of its character published on the Coast.

The East View Farm consignment to the Blair Baker sale averaged \$330 for nineteen head.

Ed Parker is training at Pleasanton track a four-year-old gelding by Montana Director that acts like a fast pacer and will be one before many weeks. He is owned by Mr. C. A. Harrison of the Hotel Driad, Victorla, B. C. Mr. Harrison has another pacing prospect in Parker's care that is as fast as the proverbial ghost. She is called Maid of Del Norte and is by Del Norte 2:08, and can pace a half better than 1:03 right now.

Sam Casto arrived in Los Angeles last week with a bunch of nice looking Zombros that he has been handling at the Fair Grounds track at Salem, Oregon. Mr. Casto says he expects to have them stepping some by spring. They all landed in fine shape and there are some high class ones among them. Sam's many friends in Los Angeles extended him a hearty welcome to the land of fast horses and oranges.

The eighteen horses consigned to the Old Glory sale by Mr. C. K. G. Billings brought a total of \$46,270. Morning Star 2:04¾ brought the highest price, \$10,500. Angus Pointer 2:04½ went for \$7500, Prince of Orange 2:06½ fetched \$6000, Alexander 2:09½, \$5800, The Monk 2:05¾, \$2000; Prince Direct 2:07, \$2000; Babe Allerton 2:17½, \$3100; Equity 2:12¼, \$1750, and the others at lower prices.

Montana Director, a son of Director 2:17, died recently at Seattle, the property of Mr. A. T. Van D. Vanter.

The two miles trotted by Mr. J. C. Kirkpatrick's Strathway gelding, John Caldwell, at Los Angeles, in 2:08½, was the fastest two heats ever trotted in a race in California.

Nutwood Wilkes now has ten 2:15 performers evenly divided between trotters and pacers, and headed by the champion John A. McKerron 2:04½. Six of the ten have records below 2:11.

The Arizona Fair meeting opens on Monday next, December 4th. The stalls are filled with high class horses and fast time will be made if the weather is good.

It is said that Billy Buch 2:07¼ is all right again; his ailing leg is pronounced as being sound again, and if this turns out to be the case he will be raced again next year.

William Simpson, owner of McKinney 2:11¼, was the purchaser of Gazelle 2:11½ at the Old Glory sale last week, for \$4000. She is the dam of Zolock 2:05¼ by McKinney and Zephyr 2:07¼ by Zombro. Mr. Simpson will mate her with McKinney in the spring and the foal will be a full brother or sister to Zolock.

If you want to start a little stock farm go to the sale of Geo. A. Davis' stock which will be held at Fred H. Chase & Co.'s salesyard, 1732 Market street, December 12th, and buy the seven-year-old black mare Mary Medium. She is by James Madison 2:17¼, dam the registered mare Missie Medium by Rampart, second dam Belle Medium 2:20, the dam of Stam B. 2:11¼. This is as richly bred a mare as there is in California, and she is in foal to Bonnie McK., a son of McKinney 2:11¼, that is out of Bon-silene 2:14¼, by Stamboul 2:07½, sire of Stam B. 2:11¼, second dam Bon Bon 2:26, the dam of Bonnie Direct 2:05¼, etc., by Simmons. Just study the blood lines that will be in the pedigree of this foal.

Mr. L. V. Harkness, owner of the Walnut Hall Stock Farm, will spend the winter in California.

Frank Walker, America's foremost starter, is now "nine host" at the Gilsey House in New York, having lately acquired an interest in that famous tavern.

J. W. Daly, Mt. Kisco, N. J., has turned over to John Kelly to train, three fillies by Oro Wilkes 2:11, one of them out of a Stamboul mare that Kelly says is the greatest three-year-old he has ever handled.

Isaac Smith, secretary of the Kentucky Trotting Horse Breeders' Association in its early years, died November 8, at Winchester, Ky., aged 68 years. Mr. Smith bred the famous campaigner Jewett 2:20 trotting, 2:14 pacing, and other horses of note.

Poor Old Ben F. 2:07¾. After winning a big bunch of money and racing consistently for three seasons, he is considered not quite good enough for the 2:08 class and was knocked down for \$650 at the Old Glory sale.

Payne Shafter writes us that his Futurity candidate Homespun for foals of 1905 is already 13.1 hands high forward and 12.1½ behind and is a strong robust colt. Here's hoping that Payne will get first money with Homespun, and that he beats North Star's record.

Mr. M. Henry of Haywards has quite a string of trotters and pacers at the Pleasanton track. Among those he has just commenced work on are three full brothers by Gossiper 2:14¾, dam a mare by Algona. There are two geldings five and four years old, and a three-year-old stud colt. The geldings are both trotters and Mr. Henry has been handling them but six weeks at the Pleasanton track. The five-year-old is called one of the purest and best gaited trotters ever seen on that famous training oval. Mr. Henry worked him an easy mile in 2:35½ last week, the last half in 1:13½ and the last quarter in 34 seconds. The four-year-old is trotting quarters in 40 seconds already, and the three-year-old, which is a good gaited pacer, reeled off a quarter in 35 seconds the other day. This promising family of brothers are owned by Mr. Frank D. Colburn of Boston, Mass.

Josie 2:08¾, sister to Billy Red 2:10, sold for \$700 at the Old Glory sale last week.

Stanley Dillon 2:07¾ was purchased by C. A. Niles of Terra Haute at the Old Glory sale last week for \$1885.

Two fine stallions by Prince Airlie 2:10 are offered for sale by Mr. P. H. McEroy of Menlo Park. Prince Airlie is the son of Guy Wilkes that was selected by the late William Corbett to head his stock farm when he sold Guy Wilkes. At the dispersal sale of the farm Prince Airlie was sold to a gentleman who shipped him to South Africa.

The telegram printed in nearly all the daily papers, stating that the mare Miss Kinney 2:10¾ sold for \$2050 at the Old Glory sale last Monday was sold in the same ring a year ago for \$41,850, is absurdly incorrect. At the Old Glory sale of 1904, Miss Kinney, at that time having a record of 2:17¼, was sold for \$1650. Consequently her price this year was an advance of just \$400 on the price paid for her in 1904.

The identity of the trotter Advancer has been fully established by Secretary Knight of the American Trotting Association, who has ordered that payment be made of the two \$5000 stakes won by the horse at Milwaukee and Libertyville last summer. The horse was not a "ringer."

Bob Sparks, who is training a string of horses at Pleasanton for Mr. Lewis Pierce of Suisun, has among them a five-year-old bay gelding by Diablo 2:09¼, out of Hazel Mac by Director, that looks like one worth going to the races with next summer. Bob has only worked him two weeks, yet stepped him a quarter in 33¾ seconds one day last week.

Of the nine sons produced by Beautiful Bells, but two are alive—Chimes and Belsire.

How about your mare bred this year. Have you nominated her in the \$7000 Breeders' Futurity? If not, why not? Nominations close next Monday.

Jacob Broliar writes from Tulare that the very fast green mare Princess Chehalis by Chehalis is in his charge at the track there. She is owned by Mr. J. A. McNeill. Mr. Broliar states that his own mare My Way 2:22 slipped twin foals by Ilambletonian Wilkes last week, and on the first of February he will commence conditioning her to race through the California circuit of 1906. She is a daughter of Stoneway and is now four years old. Another very fast Stoneway that he will race against aged horses next year is the green three-year-old pacing filly Sweetway. He begun on her in September this year, up to which time she had never been driven as fast as a three-minute gait, and three weeks ago she paced an easy mile in 2:18½ and a few days after, just to see something of her speed abilities, he drove her an eighth in 14¼ seconds hitched to a cart. Sweetway is owned by Mr. Kirkham, who bred and sold the fast two-year-old Rockaway 2:15¼.

Thornway 2:12¼ by Steinway, has been through several sales. He brought \$600 at New York last week.

The black four-year-old mare Flyaway by McKinney out of Flewey Flewey by Memo, sold for \$350 at the New York sale.

On and after January 1, 1906, the soundness of public service stallions in Wisconsin will have to be certified to by affidavit of owner, or certificate of a graduated veterinarian. Blemishes and deformities due to accident will not disqualify.

EUREKA RACES.

Following are the official summaries of the harness races held at the fair and race meeting of the Eureka, Humboldt County, Fair Association, held at the South Park race course, from September 13th to 16th, 1905:

Trot or pace, 2:25 class, purse \$135.
Mac Dudley, blk. g., pacer, by Dudley (Noble) 1 1 1
Bonita Wilkes, blk. m., trotter, by Wayland W. (Hill) 2 2 2
Elector, ch. g., pacer, by Dudley.... (Gallup) 3 3 3
Time—2:23, 2:25½, 2:26.

Trot or pace, 2:40 class; purse \$135.
Ray Monte, b. g., pacer, by Young Monterey (Hill) 1 1 1
Blackstone, blk. g., pacer, by Steinway (Cochran) 2 2 2
Buncombe, b. s., pacer, by Dudley.... (Patrick) 3 3 3
Time—2:30½, 2:23½.

Trot or pace, two-year-olds; purse \$100.
Evelyn E., blk. m., pacer, by Cassiar .. (Patrick) 1 1 1
U'illa, r. m., trotter, by McKinney.... (Alford) 2 2 2
Time—2:49, 2:49½.

Trot or pace, special; purse \$100.
Trixie, ch. m., pacer, by Red Cloak.... (Hunt) 1 1 1
Cassiar, blk. s., pacer by Soudan.... (East) 2 2 2
Electo, ch. g., pacer, by Dudley.... (Noble) 3 3 3
Time—2:23½, 2:26½.

Trot or pace, free for all; purse \$320.
Uno, b. g., pacer, by Aptos Wilkes.... (Hunt) 1 1 1
Charley J., blk. g., (Lecarl) 2 2 2
Time—2:18, 2:21¼, 2:27½.

Trot or pace, buggy horses; purse \$75.
Mr. Hinch's Billy 1 1 1
Mr. Short's Benn 2 2 2
Mr. Bartlett's Gertrude D. 3 3 3
Mr. Christie's Jack 4 4 4
Time—3:17¼, 3:06½.

SANTA ANA RACES.

The official summary of the races held at Santa Ana on the opening day of its meeting, November 14th, are here given. The heavy rainstorm that fell during the following night necessitated the meeting being declared off as stated last week.

Pacing, 2:12 class; purse \$600.
Oma A. b. m., by Dictatus (Jeffries) 1 2 2 1 1
Glenn, ch. g., by Glenwood.... (Pounder) 2 1 1 2 2
Hattie Croner, b. m., by Bay Bird.... (Bunch) 5 4 3 4 3
Vinnie Mann, b. m., by Alexis.... (Lindsay) 3 3 6 5 4
Mistake, br. g., by Trouble.... (Kent) 7 6 5 3 7
Lady R. b. m., by Col. K. R.... (Sweeney) 4 5 4 7 5
Albuta, br. g., by Altivo.... (Thompson) 6 7 7 6 6
Byron Lacc, br. s., by Lovelace.... (Stetson) 5 dr
Time—2:10½, 2:10½, 2:11¼, 2:14, 2:17.

Trotting, 2:14 class; purse \$600.
Cuato, b. g., by McKinney.... (Durfee) 1 6 1 1 1
Electric Maiden, b. m., by Electrite.... (Gerrity) 6 2 2 2 2
The Commonwealth, b. h. by Shadeland On-ward (Lindsay) 2 3 5 5 5
Wild Bell, br. g., by Wildnut.... (Freeman) 3 4 4 3 3
Red Skin, ch. g., by Red Cloak.... (Jeffries) 4 5 3 4 4
Rozelle, gr. g., by Bob Mason.... (Maben) 5 1 dr
Time—2:15½, 2:16½, 2:16½, 2:18.

OLD GLORY SALE.

A large gathering of horsemen from all sections of the country comfortably filled Madison Square Garden during the opening day of the "Old Glory" sale. The bidding in general was not as lively as had been expected, but fair average prices were realized on the stock offered.

The highest price for the day was paid for the famous broodmare Gazelle 2:11½, dam of Zolock 2:05½ (1905), and Zephyr 2:07½, also made last season. She is now over 14 years old, but her record as a race-mare and producer of extreme speed made her one of the most valuable brood mares of the entire sale.

Mr. William Simpson, proprietor of the Empire City Stud, purchased her for \$4000.

The bidding on Zephyr 2:07½, one of Ed Geers' best breadwinners last season, was quite spirited at the start, the first bid being made by Al Thomas at \$1000. After carefully looking the mare over Mr. Nathan Straus bid \$50 at a time until the price reached to \$1550, his last bid, which was raised to \$1600 and the horse was knocked down to C. T. Barrett of Akron, O. Beauseant 2:06½, also from the Terrace Farm consignment, sold for \$1950, while Zelma, a daughter of Zephyr, brought \$1000. The total of fifty-nine horses in this consignment sold for \$23,285, or an average of nearly \$400 per head.

The list of horses announced for sale on the second day was attractive enough to draw big crowds to the Garden. There was no disposition on the part of horsemen to hold off for future chances, and so fair Colonel Delmar 2:14½ by Del Mar, took the place of the star of the sale by bringing the highest figure of the day, \$4600, paid by Charles Duvall of Raritan, N. J. The next best price was \$3000, paid by Thomas W. Murphy of Glen Cove, L. I., for the seven-year-old pacer Reliance.

A change in the plans of Mr. Butler, proprietor of East View Farm, caused the withdrawal of the greater part of his consignment.

The sale of Cresceus 2:02½ brought to the Garden Wednesday afternoon the largest crowd seen at any day of the sale. The champion was brought to the ring in fine condition and received hearty applause. The expected lively bidding which has characterized every sale of prominent stallions did not take place, as Cresceus was knocked down to his new owner at the second bid.

After the usual talk Auctioneer Bain asked for a bid, but nearly two minutes elapsed and no one answered. More coaxing brought out a low-voiced bid of \$20,000, which caused some comment, as the crowd thought some one was joking. When asked to come forward, a tall gentleman raised his hand and was at once recognized as P. H. McGuire, of New York, who had previously purchased Direct View. All was silent again, and no bidding, and when the auctioneer threatened to sell the horse on one bid, calling for the third and last time, some one said \$21,000.

The bidder was M. W. Savage, of Minneapolis, owner of Dan Patch, to whom Cresceus was knocked down at that figure. The great majority of the spectators thought that the horse sold far below his real worth but knowing ones hardly ever guessed that the horse would bring that price. The world's champion trotting and pacing stallions are now stable mates, an instance unparalleled in the history of the harness turf.

The greatest feature of the sale was that of Baronmores' youngsters, which brought very satisfactory prices and were disposed of at lively bidding. Baron-gale, at \$2,900, was considered by horsemen and breeders as one of the best bargains of the sale. Unless all signs fail, this five-year-old son of Baronmore, 2:14½, is destined to make a name for himself as the progenitor of early speed. Every one of the youngsters of this consignment which had Futurity engagements sold at good figures, once more proving the oft-repeated assertion that horses of equal breeding and individual merit bring more satisfactory prices in public sales if they are entered in colt stakes.

The sales for the first three days that brought \$300 or over were as follows:

King Burdo, trotter, 2:26, br. h., 8 years, by Sternberg-Chirper by Wilkes Boy; C. J. Averill, Syracuse, N. Y.	\$810
Elegance, trotter, br. m., 6, by Dare Devil-American Belle by Rex Americus; Charles Tenner, Albany, N. Y.	350
American Belle, trotter, 2:12½, b. m., 11, by Rex Americus-Beautiful Chimes by Chimes; A. B. Cox, Paoli, Penn.	1,800
Sartorine, trotter, br. m., 11, by Mambrino King-Sartory by Almonarch; George S. Crouch, Charleston, West Va.	325
Velvet Rose, pacer, br. m., 9, by McKinney-Elta Wilkes by Billy Sayre; John D. King, Goshen, N. Y.	400
Lady-in-Waiting, trotter, b. m., 12, by Chimes-Maid of Honor by Mambrino King; J. W. Bailey, Gainesville, Texas	325
Nysa, trotter, b. m., 6, by Allerton-Cyprus by Strathmore; William Simpson, New York City.	650
Carolita, trotter, blk. m., 9, by Dexter Prince-Carrie C. by Electioneer; J. W. Bailey, Gainesville, Texas	500
Olga Chimes, trotter, b. m., 10, by Chimes-Daisy King by Mambrino King; H. S. Ladew, Glen-cove, L. I.	300
Zephyr, trotter, 2:07½, b. m., 7, by Zambro-Gazelle by Gossiper; E. T. Barnett, Akron, Ohio.	1,600
Zelma, trotter, b. f., 2, by Beauseant-Zephyr by Zambro; E. T. Barnett, Akron, Ohio.	1,000
Gazelle, trotter, 2:11½, blk. m., 4, by Gossiper-Gipse by Gen. Booth; William Simpson, New York City	4,000
Beausant, trotter, 2:06½, b. h., 8, by Bow Bells-Rosy Morn by Alcantara; W. H. Jones, Birmingham, Ala.	1,950
Vincible, pacer, ch. g., 3, by The Invincible-The Empress by Rex Americus; S. S. Blackburn, Philadelphia	370
The Invincible, trotter, b. h., 8, by Mambrino King-Mercedes by Chimes; Lawrence Jones, Louisville, Ky.	850
Cassie C., trotter, b. f., yearling, by Beauseant-Joan Chimes by Chimes; Peter Carroll, Cleveland, Ohio	725
Joan Chimes, trotter, b. m., 11, by Chimes-Joan by Almont Jr.; A. F. Bradley, Johnstown, N. Y.	325
King Metellas, trotter, 6, by Metellas-Flava by Mambrino King; H. Schreiber, Allegheny, Penn.	425

Gala Chimes, trotter, b. g., 8, by Chimes-Valley Queen by Mambrino King; M. Mark, Buffalo, N. Y.	
Frances, trotter, 2:26½, ch. m., 8, by Leonatus-Gypsey by Orphan Boy; George Watson, Baltimore, Md.	
Ela, trotter, 2:22, b. m., 9, by Altivo-Elaine by Messenger Duroc; J. Ross, Washington, D. C.	
Swago, trotter, 2:13½, b. g., 10, by Cecilian-Gertrude by Mambrino Startle; J. Cohen, New York City	
Larabie Bel, pacer, 2:22, br. m., 6, by Larabie the Great-Adebel by Advertiser; H. Burnett, New York	
Chollie Downing, pacer, 2:11½, ch. m., 11, by Anderson Wilkes-Ira Downing by Stoner Boy; H. Jacobs, Chicago, Ill.	
Maze, trotter, b. m., by Allerton-Sport by Onward; J. P. Close, Poughkeepsie, N. Y.	
Lyndon, pacer, ch. g., 8 years, by Alexander-Lucy by Kent; J. H. White, Elmira, N. Y.	
Kentucky Frank, trotter, 2:14½, rn. g., 11 years, by Eagle Bird-Traitor by Confederate Chief; John Tilley, Glenwood Landing, L. I.	
Queen, trotter, 2:28½, b. m., 8 years, by Sir Galahad-Jenny C. and Grace H., trotter, 2:29½, b. m., 6 years, by Sir Charles II-Gladys B. by King Rene (pole team); W. A. Bradford, New York	
Jayson, trotter, b. g., 8 years, by Jayfoot-dam unknown; C. W. Watson, New Brunswick, N. J.	
Vado, trotter, yearling, b. c. by Austral-Phrase by Onward; D. C. Moran, New York	
Baron Silver, trotter, 2:28½, br. h., 4, by Baron Wilkes-Beleno by Eldorado; G. Horton, Cleveland, Ohio	
Erskine Reed, pacer, 2:12½, b. g., 9, by Chatter-ton-Lottie H. by Thomas K.; J. Ross, Wash- ington, D. C.	
The Sovereign, trotter, b. g., 4, by The Beau Ideal-Rhea, by Chimes; H. Titer, Readville, Mass.	
Coldeira, trotter, 2:28½, b. m., 9, by Arion-Jon-nita by Sultan; A. C. Thomas, New York	
Mokoma, trotter, b. f., 3, by Moko-Annie Lewis by Potential; Hugh Milan, New York	
Oakley Baron, trotter, 2:23, br. h., 5, by Baron Oaks-Katie King by Kingwood; W. S. McKee, Charleston, P. E. Island	
Merry-maker, trotter, blk. g., 5, by Gratton Boy-Merry Clay by Harry Clay; S. McClary, New York	
Auretto, trotter, 2:29½, blk. g., 4, by Bellini-Ar-rolia by Kentucky Prince C. H. Magin, New York	
Heathcote, trotter, 2:27½, br. g., 4, by Bellini-Monesta by Mendocino; J. H. Turney, New Brunswick, N. J.	
Carabina, trotter, 2:27½, b. f., 3, by Bellini-Carm-encita by Baron Wilkes; J. A. Gaffney, Brad- ford, Penn.	
Grace Hopkins, trotter, ch. m., 6, by Mambrino King-Nora Wilkes, by George Wilkes; C. W. Watson, New Brunswick, N. J.	
Algen, trotter, 2:21½, ch. h., 6, by Allerton-Ge-nevra by Barney Wilkes; G. D. Burnett, Gou- vernour, N. Y.	
Masetto, trotter, 2:08½, blk. g., 9, by Constane-Merry Clay by Harry Clay; J. F. Turney, New York	
Yearling, br. g., by Bingen-Peggy by Baron Wilkes; Weissinger Brothers, Mount Carmel, Penn.	
Kippewa, trotter, br. h., 4, by Kremlin-Mistippe by In Fact; S. T. Harrison, Lexington, Ky.	
Arta, trotter, b. m., 4, by Arbitrage-Eutaxia by Expedition; P. A. Snyder, Cherry Creek, N. Y.	
Acheen, trotter, b. c., 2, by Achille-Kavala by Kremlin; W. P. Biggs, Middletown, Del.	
Flycatcher, trotter, b. g., 3, by Bingen-Lichee by Arion; Dr. J. W. Day, Rochester, N. Y.	
Arena, trotter, 2:11½, b. h., 15, by Alcantara-Mar-tense by General Knox; Al Thomas, Benson, Neb.	
Wycomb, trotter, 2:27½, b. h., 5, by Arena-Em-blem by Empire; R. T. Mulhall, Morristown, N. J.	
Col. Delmar, trotter, 2:14½, br. h., 9, by Del Mar-Wilkes Maid by Autograph; Charles Duvall, Raritan, N. J.	
The Idol, trotter, b. g., 3, by Idolita-Carrie Cas-well by Altivo; Dr. F. S. Whitney, Milledge- ville, Ga.	
Jessie C., trotter, b. f., 2, by Idolita-Miss Nutonia by Nutwood; John G. Gray, Olean, N. Y.	
Theodore Shelton, pacer, 2:09½, b. h., 13, by Ash-land Wilkes-Dame Wood by Wedgewood; C. G. Ward, Brooklyn	
Reliance, pacer, b. g., 7, by Queechy-Heather-bloom by Thorndale; Thomas W. Murphy, Glen Cove, L. I.	
Ben Axworthy, trotter, b. g., 5, by Axworthy-Neva Belle by Wake Bell; Al Thomas, Ben- son, Neb.	
Skip, pacer, 2:20, b. g., 6, by Clay King-mare by Empire Wilkes; R. J. Gaffney, Woodford, Penn.	
Mary D., trotter, 2:10½, ch. m., 10, by Young Jim-Rosa Clay by American Clay; G. H. Sherman, Port Henry, N. Y.	
Wilderness, trotter, 2:29½, b. m., 5, by Wilton-Tennie G. by Robert McGregor; D. G. McDon- ald, Pittsburg, Penn.	
Ed. Winters, trotter, 2:12½, b. h., 9, by Jay Bird-Lady Ham by Hambrino; Nagle & Adams, Ho- boken, N. J.	
Point Dexter, trotter, blk. g., 9, by Mambrino King Jewell by Almont Jr. and Wild Minton, trotter, blk. g., 9, by Wilton-Sweet Violet by Wildbrino (pole team record 2:15½); James A. Lynch, New York	
Direct View, trotter, 2:08½, b. h., 6, by Direct-Formosa by Mansfield; P. H. McGuire, New York	
Josie, pacer, 2:08½, b. m., 6, by Glendg-Bunnella by Ingraham; F. Hunter, Newark, N. J.	
Minter, trotter, 2:14½, b. m., 6, by Expedition-Minna Wilkes by George Wilkes; H. Brower, New York	
Stanley Dillon, trotter, 2:07½, b. g., 10, by Sidney Dillon-Athenian by Steinway; C. A. Niles, Terra Haute, Ind.	
Johnny Smoker, pacer, br. g., 4, by Sentinel Wilkes-Cigarette by Madrid; S. R. Hustings, Boston, Mass.	
Doctor Madara, pacer, 2:08, ch. g., 8 years, by Simmons-Mary Glenn by Red Wilkes; Ed Hart, Richmond, Va.	
Kamita, trotter, b. g., 4, by Idolita-Oceitara by Dictator; Thomas O'Connell, New York	
Re-Elected, trotter, 2:11½, gr. h., 9, by Re-Elec-tion-Sister by Strathmore; George Henry, Brooklyn	
Ben F., pacer, 2:07½, b. g., 12, by Brandmoor-Carola by Steinway; J. T. Washburn, Ossin- ing, N. Y.	
Lady Irwin, trotter, b. m., 9, by Preceptor-mare by Billy Green; Clarence Ware, Mount Vernon, N. Y.	
Amelia Pearson, trotter, 2:29½, b. m., 9, by Nut-hurst-Delta by Mambrino Startle; W. C. Han- cock, Jamaica, N. Y.	
Miss Hibbard, trotter, 2:17, ch. m., 10, by Antonio-Barcena Wilkes by Alcantara; J. D. King, Goshen	
Sid Barnes, trotter, 2:29½, blk. g., 5, by High-land Sidney-Miss Barnes by Ryswood; A. J. Furbush, Brighton, Mass.	
Colonel Wallace, trotter, 2:13½, b. g., 8, by Sim-mons-May Queen by Dr. Herr; A. P. Hurd, Odln, Ill.	

Lilietta, trotter, b. f., 3, by Cecilian Chief-Lillian Eversole by C. F. Clay; H. Helman, New York	360
Lady Direct, pacer, 2:15½, b. m., 7, by Direct-Lulu F. by Christmas S.; G. W. Archer, New York	
Virginia Belle, trotter, 2:22, br. m., 9, by Chime-Bell-Virginia by Orchestra; John G. Moore, New York	900
Alice Dillon, b. f., 3, by Baron Dillon 2:12-Ban-ni-bel, 3, 2:36, by St. Bell 2:24½; Bither & Palmer, Readville, Mass.	275
Queen Royal, pacer, 3, 2:23½, b. m., 5, by Mam-brino King 1279-Princess Royal by Chimes 2:30½; John D. King, Goshen, N. Y.	510
Marcella Hal, pacer, 2:21½, b. m., 8, by Brown Hal 2:12½-Ietty by Dudley's Snow Heels; J. T. Walsh, Elmwood, L. I.	360
Bessie Crawford, blk. f., 2, by Allerton 2:09½-Min-nie Thornhill by Billy Thornhill 2:21½; J. Hingham, Buffalo, N. Y.	485
Little Queen 2:25½, b. m., 8, by Lord Jenkinson-Lilly Russell by Lord Russell; J. H. McAvoy, New York	320
Camillo 2:28½, blk. g., 6, by Bellini 2:13½-Correna C. by Alycane 2:27; A. J. Sales, Worcester, Mass.	310
Easter Morn 2:20½ (1905), b. g., 5, by Arion 2:07½-Kaloo by Princeton 2:19½; S. Dutsch, New York	500
Jennie Hale 2:18½ (T), 2:15½ (P), b. m., 13, by Bobbie Hale-Cricket by Redwood; George Bernhardt, New York	270
Baron Bingen, b. c., 3, by Bingen 2:06½; Linda by Baron Rogers 2:09½; John Alexander, New York	360
Chief Wilkie 2:12½ (1905), b. g., 5, by Earl Wilkes; A. J. Furbush, Brighton, Mass.	560
Ethelwyn 2:14½, br. m., 9, by Spurlock-Lady Glen-er by Glenarm; A. J. Furbush, Brighton, Mass.	540
Lina Prue 2:18½ (matinee), b. m., 9, by Grand Baron 2:12½-Alida Corbitt by Guy Corbitt; B. R. Cobb, Chelsea, Mass.	490
Eliska 2:20½, b. m., 8, by Arion 2:07½-Roxana by King Wilkes 2:22½; W. J. McRutt, city	320
Thornway 2:12½, pacer, b. h., 7, by Steinway, 3, 2:25½-Algerdella by Allandorf 2:19½; J. W. Barry, Lowell, Mass.	600
Billy Walters Jr. 2:11½, pacer, b. g., 7, by Whale-bone 2:18½-Flora H. by Victor Morgan; Dr. W. S. Hitman, Newark, N. J.	675
Susie W., pacer, 2:26½, blk. m., 5, by Refero 2:24½-Lerida by Alexandre; M. T. Lewis, Brook- lyn, N. Y.	385
Bo Lassie, b. m., 5, by Boreal 2:15½-Lucy Russell by Kentucky Wilkes; H. Roberts, Jersey City, N. J.	300
Brolla, pacer, b. m., 5, by Boreal 2:15½-Rosa B. by Cuyler; W. Dixon, Allentown, Pa.	400
Horton 2:30½, b. g., 7, by McRoberts-not given; H. Roberts, Jersey City, N. J.	330
Barongale, 4, 2:11½, br. h., 5, by Baronmore 2:14½-Nightingale 2:10½ by Osgood's Patchen; W. L. Elwood, DeKalb, Ill.	2,900
Charles H. Russell, 2, 2:22½, br. c., 2, by Baron-more 2:14½-Florence B. 2:21½ by Patener 2:27½; John R. McCune, Pittsburg, Pa.	1,400
Baron Medium, 2, 2:25½, br. g., by Baronmore 2:14½-Crystal Medium 2:24½ by Happy Me-dium; Charles Baker, New York	500
Moss Agate, 2, 2:29½, b. f., 2, by Baronmore 2:14½-Miss Ray by Don Wilkes 2:24½; Dr. J. W. Day, Rochester, N. Y.	400
Gracemore, 2, 2:24½, br. f., 3, by Baronmore 2:14½-Grace Wilkes 2:17½ by Adrian Wilkes; H. H. Longstreet, Matawan, N. J.	435
Rumsey, 2, 2:29, b. g., 3, by Baronmore 2:14½-Crystal Wilkes 2:21½ by Don Wilkes; T. L. Burke, Rowley, Mass.	385
Ongale, br. c., 2, by Baronmore 2:14½-Gale by Don Wilkes; C. Waters, city	800
Brown gelding, 2, by Baronmore 2:14½-Onessa by Don Wilkes; L. A. Patterson, Carbondale, Penn.	400

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

April 1-Sept. 15. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
June 1-Jan. 1—Open season for black bass.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for catching salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Nov. 1-April 1—Trout season closed.
Nov. 1-April 1—Closed season for taking steelhead above the water.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and age hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.
Oct. 15-April 1—Open season for English snipe.
Oct. 15-Aug 1—Deer season closed.

Bench Shows.

Nov. 21, 22—Brockton District Kennel Club Brockton, Mass. J. W. Sullivan, Secretary.
Nov. 30-Dec. 2—Philadelphia Dog Show Association. Philadelphia. J. Sergeant Price Jr., Secretary.
Dec. 13, 14—Southwestern Kennel Club's bench show at Pasadena. Entries close—.

1906.

Jan. 17, 20—Cincinnati Kennel Association. Cincinnati, O. John C. Schomaker, Secretary.
Feb. 12, 15—Westminster Kennel Club. New York. Robt. V. McKim, Secretary.
Feb. 20, 23—New England Kennel Club. Boston. Wm. B. Emery, Secretary.
Feb. 28-March 3—Washington Kennel Club. Washington, Pa. F. C. Thomas, Secretary.
March 7, 10—Duquesne Kennel Club. Pittsburg, Pa. F. S. Steadman, Secretary.
March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. N. J. Mathews, Secretary.
March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary.
June 9—Wissabickon Kennel Club. Wissabickon, Pa. J. Sergeant Price, Secretary.

Field Trials.

Nov. 21—International Field Trial Club. Rutbren, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.
Nov. 28—Virginia Field Trial Association. Martinsville, Va. Chas. B. Cooke, Secretary, Richmond, Va.
Dec. —Pointer Club of America (following the Continental trials). Barber, N. C. C. F. Lewis, Secretary, 126 Malden Lane, New York.
Dec. 2—Continental Field Trial Club, 11th annual trials. John White, Secretary, Hempstead, Long Island.
Dec. 12—Eastern Field Trial Club. Waynesboro, Ga. S. C. Bradley, Secretary, Fairfield, Conn.

1906.

Jan. 8—Georgia Field Trial Association. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.
Jan. —Pacific Coast Field Trials Club, 23d annual trials. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco.

THE QUAILS OF THE UNITED STATES.

By Sylvester D. Judd, Assistant United States Biological Survey.

(Continued from last week.)

Gambel Quail.

The Gambel quail (*Lophortyx gambeli*) in general appearance is much like the valley quail, but, among other differences, lacks the scalelike feathers of the lower parts and has considerable chestnut along the flanks. It lives in the Lower Sonoran zone, from western Texas to southeastern California and from southern Utah and Nevada south through central Sonora, Mexico. The desert is its home, but it is rarely found far from water. Its favorite haunts are patches of bushy vegetation, such as mesquite, mimosa, creosote, and patches of prickly pear. It frequently takes up its abode about cultivated land, living in alfalfa fields or nesting in vineyards.

An interesting account of the habits of the Gambel quail in the Pahrump Valley, Nevada, is given by E. W. Nelson:

"I noticed that when a flock of quail came to feed on grain left by the horses an old male usually mounted the top of a tall bush close by and remained on guard for ten or fifteen minutes; then, if everything was quiet, he would fly down among his companions. At the first alarm the flock would take to the bushes, running swiftly, or flying when hard pressed. They roosted in the dense bushes of willows and cottonwoods growing along the ditches. * * * When feeding they have a series of low clucking and cooing notes which are kept up almost continually."—(N. A. Fauna, No. 7, pp. 29, 30, 1893.)

The love note, according to Coues, may be represented in words as "killink, killink." Nesting takes place in April, sometimes not till May. About a dozen eggs usually constitute a clutch. In sections where this quail is still numerous the birds pack in bands of from 100 to 500 after the breeding season.

From the sportsman's point of view the Gambel

quail as a game bird does not approach the bobwhite. It will sometimes lie to a dog fairly well, but as a rule it takes to its legs with haste and leaves the dog on point, to the vexation of the hunter. It is, however, a useful species, which brightens the desert with its presence and contributes a welcome addition to the fare of the traveler. While less valuable than the bobwhite as a destroyer of noxious insects and as an object of sport, this bird well deserves protection for its food value and its beauty. It thrives under desert conditions and might be successfully introduced in the arid regions of Colorado, New Mexico and Texas.

Food Habits.

Stomachs of twenty-eight birds collected mainly in Arizona and Utah, from January to June, have been examined. Only 0.48 per cent of the food consisted of insects; the remaining 99.52 per cent was vegetable matter. Like the valley quail, this is one of our least insectivorous birds. Its insect diet includes ants, beetles, grasshoppers, leaf hoppers (*Membrividae*), and stink bugs (*Pentatomidae*). Among the beetles are the western twelve-spotted cucumber beetle (*Diabrotica soror*) and *D. tenella*. The young chicks, however, will doubtless be found highly insectivorous and therefore useful.

The vegetable food of Gambel quail was made up as follows: Grain, 3.89 per cent, miscellaneous seeds, 31.89 per cent, and leaves and plant shoots, 63.7 per cent. From the present investigation the bird appears less frugivorous than any of the other American quails, for not one of the twenty-eight stomachs contained fruit. Observers, however, say that the bird is somewhat frugivorous, and no doubt in a country well stocked with berries and fruit it would rapidly develop a frugivorous taste. Baird, Brewer, and Ridgeway, for instance, state that during summer it makes its home in patches of *Solanum* and feeds on the tolerably palatable fruit, and also that it is known to eat gooseberries. (Birds of Northwest, p. 434, 1874.) Coues says: "In the fall it gathers cherries and grapes. * * * It visits patches of prickly pear (*Opuntia*) to feed upon the soft juicy 'Tunas' that are eaten by everything in Arizona, from men and bears to beetles." (Hist. N. Am. Birds, III, p. 483, 1874.)

The grain eaten by the Gambel quail was corn, wheat, and oats. In flocks numbering from 50 to 100, it feeds about grain stacks with domestic poultry. It is even more industrious as a browser on foliage than the valley quail. Succulent foliage and shoots form 63.74 per cent of its food. Much of this comes from alfalfa, bur clover, and the foliage of other legumes. Vernon Bailey, of the Biological Survey, says that at St. Thomas, Ariz., in January, 1889, this quail fairly swarmed on alfalfa fields, feeding on the green leaves and pods. He found flocks of from 25 to 50 in such situations, and during a five minutes' walk often saw a hundred birds. The same observer, when in Mohave county, Arizona, found that the bird fed principally on juicy plants when it could not procure water. At times it eats grass and its inflorescence, and it has been known to devour showy flowers. In spring it shows a fondness for huds. Baird, Brewer, and Ridgeway note that then it feeds largely on the willow huds, which impart to its flesh a distinctly bitter taste. (Hist. N. Am. Birds, III, p. 485, 1874.)

The seed-eating habits of Gambel quail closely resemble those of the valley quail. Leguminous plants furnish the largest part of the seed food—21.17 per cent of the annual diet—alfalfa, bur clover, and kindred plants appearing to be preferred, but cassias, acacias, and lupines also are taken, as well as the beans of the mesquite, which in many places are a staple with birds and mammals. The seeds of alfalfa (*Erodium cicutarium*), another bird staple, furnish 2.28 per cent of the year's food. Miscellaneous seeds form 8.44 per cent. They are obtained from grasses, mallows (*Malva*), and such cruciferous plants as mustard (*Brassica*) and peppergrass (*Lepidium*); also from chickweed (*Cerastium*) and *Atriplex*.

Mountain Quail.

The mountain quail (*Oreortyx pictus*) occurs in the forested mountains of the humid Transition Zone of the Pacific Coast, from Santa Barbara, Cal., to Washington, and in the mountains of the more arid Transition Zone on the west side of the Cascade in northern Oregon and south over the Sierra Nevada to northern Lower California. The name is used here to cover both the typical dark birds of the humid coast forests (*Oreortyx pictus*) and the paler one (*O. p. plumiferus*) of the more arid Transition Zone in the Sierras and Cascades. The birds of the Sierra Nevada winter at lower altitudes than they nest, but those of the coast mountains do not make this vertical migration. This species is the largest and among the handsomest of American quail, with two long jet-black crest plumes and rich chestnut throat and flanks, the latter broadly banded transversely with spotless white.

The nests of the mountain quail are placed on the ground and usually contain 10 to 12 eggs, which vary from pale-cream color to a much darker hue. At Tillamook, Oregon, June 30 and July 4, 1897, A. K. Fisher found newly hatched chicks; and at Donner, Cal., July 11 and 19, at an altitude ranging from 6,100 to 8,000 feet, Vernon Bailey found nine broods, varying in age from newly hatched chicks to half-grown birds. Bendire, quoting L. W. Green, of the United States Fish Commission, says that the earliest

date of the nesting of the plumed mountain quail (*Oreortyx p. plumiferus*) known to him was April 15, and the latest August 15. He states also that the cock bird takes care of the young. (Life Hist. N. Am. Birds [I], p. 16, 1892.) Chester Barlow, in writing of the habits of the mountain quail, says that at Fayette, Cal., it begins to nest the last of May or early in June. All nests that he found were built in a growth of "mountain misery" (*Chamaebatia* sp.) 8 to 10 inches high. (Condor, 3, p. 158, 1901.) On Mount Tallac and the higher slopes of Pyramid Peak, W. W. Price found newly hatched young as late as August 15. He noted that by September 1 the quail became restless and soon began their peculiar migration from the east slope to the west slope of the Sierras. From four to six adults with their young form a small band of from ten to thirty individuals, and pursue their way almost wholly on foot to a more congenial winter climate; and by October 1 all had abandoned elevations above 5,000 feet. In spring they migrate back singly or in pairs. (Condor, 3, pp. 158, 160, 1901.)

There are many admirers of this bird because of its exquisite plumage, but most sportsmen prefer a game bird that lies better to the dog. Its flesh is excellent, and the bird sells well in the market. H. W. Henshaw reports that in the late fall of 1880 he found the markets of Portland, Oregon, well supplied with live mountain quails which had been trapped in the neighboring mountains, cooped, and sent to the city for sale. Nowhere is it so numerous as the California quail, or the bobwhite in the Southern States, and it is more of a forest-loving species than any other American quail. The mountain quail sometimes enters cleared fields, but so far as the records of the Biological Survey show it does no appreciable damage to cultivated fruits or other crops and it is a useful destroyer of weed seeds.

Food Habits.

No stomachs of the mountain quail of the humid regions were available for examination, but Sandy writes that the bird feeds on insects and various seeds, including grains (Upland Game Birds, p. 93, 1902), and Elliot says it sometimes approaches farm buildings in search of scattered kernels of grain. (Gallinaceous Game Birds N. A., p. 42, 1897.)

The food of the mountain quail of the arid regions has been studied in the laboratory of the Biological Survey. The stomachs examined, twenty-three in number, were collected in California. Five were collected in January, two in May, six in June, three in August, and six in November. The food consisted of animal matter (3 per cent, and vegetable matter, 97 per cent. The animal food was made up of grasshoppers, 0.65 per cent; beetles, 0.23 per cent; miscellaneous insects, including ants and lepidopterous pupae, 1.90 per cent; and centipedes and harvest spiders (*Hyalangirae*), 0.82 per cent. Among the beetles was a species of the firefly family (*Lampyridae*), a ground beetle (*Carabidae*), and a leaf beetle (*Haltica* sp.). Vernon Bailey informs the writer that the young eat many ants. The vegetable food consisted of grain, 18.20 per cent; seeds, practically all of weeds or other worthless plants, 46.61 per cent; fruit, 8.11 per cent; and miscellaneous vegetable matter, 24.08 per cent. The grain included wheat, corn, barley, and oats. Of the seed element the seeds of grasses formed 7.78 per cent; of legumes, 10.41 per cent; of weeds of the family *Euphorbiaceae*, 3.16 per cent; of alfalfa (*Erodium cicutarium*), 2.76 per cent; and of miscellaneous weeds, 22.50 per cent. The legume seeds include seeds of alfalfa, cissia, bush clover, vetch, and lupine. The miscellaneous seeds come from wild carrot (*Daucus carota*), tar weed (*Madia sativa*), *Collomia* sp., *Amsinckia* sp., labiate plants, dwarf oak, snowbush (*Ceanothus cordulatus*), and thistle.

Concerning the feeding habits of mountain quail of the dry country (*O. p. plumiferus*), J. E. McClellan says: "Their feeding hours are early in the morning and just before sundown in the evening, when they go to roost in the thick tops of the scrub live oaks. Their feeding habits are similar to those of the domestic hen. They are vigorous scratchers, and will jump a foot or more from the ground to nip off leaves. (MS. Records, Biological Survey.) This bird is especially fond of the leaves of clover and other leguminous plants. It feeds also on flowers, being known to select those of *Compositae* and blue-eyed grass (*Sisyrinchium*). Flowers, leaves, buds, and other kinds of vegetable matter form the 24.08 per cent marked miscellaneous. The birds probably eat more fruit than these stomach examinations indicate. Lyman Bendire says that this quail feeds on service berries, and that during certain seasons it lives almost entirely on grass bulbs (*Melica bulbosa*), which it gets by scratching, for which its large, powerful feet are well adapted. The fruit in its bill of fare includes gooseberries, service berries (*Amelanchier alnifolia*), and grapes (*Vitis californica*). The bird is probably fond also of manzanita berries, for it is often seen among these shrubs.

Scaled Quail.

The "cotton top," or scaled quail (*Callipepla squamata*), as it is commonly known, is bluish gray on the back, with black-edged feathers on the under parts, which appear like large scales. The name of the species is used here to include both the typical scaled quail (*Callipepla squamata*) and the more restricted chestnut-bellied quail of southern Texas (*C. s. castanogastris*). Its conspicuous white-tipped crest has given it the local name of cotton top. It is found in southern Colorado and in the Upper and Lower Sonoran zones from Arizona to western and southern Texas and south to the Valley of Mexico. The birds of the lower Rio Grande region are darker than those farther west. According to Bendire, this quail lives on open arid plains overgrown with yucca, cactus, and sagebrush, and often gathers in coveys numbering twenty-five to eighty. It lays about a dozen eggs,

and he believes that two or three broods are reared in a season. The cock assists in the care of the young, but not in incubation. (Life Hist. N. A. Birds [1], pp. 18-20, 1892.)

Food Habits.

The food habits of this game bird are of especial interest. Stomachs and crops of forty-seven specimens have been examined, most of which came from New Mexico, the others from Arizona and Texas. They were collected as follows. January, seven; May, one; June, two; July, three; September, thirteen; October, nineteen, and November, two. As with all other gallinaceous birds, more or less mineral matter is swallowed, usually small pieces of quartz. The food consisted of animal matter, 29.6 per cent, and vegetable matter, 70.4 per cent.

The food of the cotton top differs from that of all other American quails in that it contains a large proportion of insects. These comprise no less than 29.03 per cent of its food, a percentage almost twice as great as that of the bobwhite, although if more stomachs of the present species had been available for examination the ratio might have been different. However, the important fact is established that this bird is a large consumer of insects, instead of being, like most other western quail, practically graminivorous. Of the insect food, grasshoppers comprise 15.86 per cent; beetles, 10.43 per cent, and miscellaneous insects, largely ants, 3.27 per cent. A few spiders also are taken, but they constitute only 0.03 per cent of the food for the year. The beetles are in the larval as well as the adult forms. The family of ground beetles (Carabidae), a favorite one with terrestrial birds, is well represented. A single beetle with a featherlike antenna, of the family Pyrochroidae, had been eaten. Some longicorn beetles and plant-eating scarabaeid beetles also were eaten. A bird collected in June had consumed forty-four of the latter beetles, which were leaf chafers, apparently closely related to the genus *Serica*. The scaled quail destroys also weevils, such as the clover weevil, *Sitona*, and certain species of the family *Otiorynchidae*, or scarred snout beetles. It takes also leaf beetles, the very injurious twelve-spotted cucumber beetle (*Diabrotica 12-punctata*). Further studies of the beetle food undoubtedly will disclose a large number of pests. The bird will probably be found to be a useful consumer also of grasshoppers, since a third of its September food consisted of them. Their remains were so fragmentary, however, that identification of species was unsatisfactory. In one case a member of the genus *Trimerotropis* was recognized. Ants had been eaten by fifteen of the forty-seven birds examined. The other miscellaneous insects included small bugs (Heteroptera) and the chrysalis of a fly. One of the queerest objects found by the writer in birds' stomachs is the "gound pearl" (*Margaordes*), several hundred of which were contained in the stomach of a cotton top shot at Roswell, New Mexico, June 17, 1899. They are lustrous and look like pearls, but are merely scale insects that feed on the roots of plants.

Vegetable matter furnished 70 per cent of the food of the scaled quail. Grain contributed 0.57 per cent; seeds, mostly weed seeds, 52.85 per cent; fruit, 12.65 per cent, and leaves and other green tissue, 4.33 per cent. The species resembles the ruffed grouse in its habit of feeding on green leaves and tender shoots. It feeds upon budded twigs, but more often limits its choice to chlorophyll-bearing tissue, often picking green seed pods of various plants. Like domestic fowls, it eats grass blades. Fruit was eaten by only six of the forty-seven birds, and none was taken from cultivated varieties. As might be expected from inhabitants of arid plains, these birds like the fruit of cacti, and have been found feeding on the prickly pear (*Opuntia lindheimeri*). The fruit of *Ibervillea linheimeri* also is eaten. The blue berries of *Adelia angustifolia*, which furnish many desert birds and mammals with food, are often eaten by the scaled quail. Different kinds of *Rubus* fruits are relished, and the berries of *Koeberlinia spinosa* and *Momisia pallida* also are eaten. The fruit and succulent parts of plants no doubt serve in part in the parched desert as a substitute for water.

Seeds of various plants form a little more than half of the food. Legumes furnish 21.84 per cent, the mesquite (*Prosopis juliflora*), a staple with both man and beast, being utilized, as are the seeds of *mimosa* (*M. biuncifera*), besides various cassias and lupines. Seeds of vetch (*Vicia* sp.) are a favorite food, and *Morongia roemeriana* is eaten. The bird likes seeds of *Medicago*, and at times will eat clover seeds. Miscellaneous weed seeds yield 31.01 per cent of the annual food. Nearly half of these are seeds of bindweed (*Convolvulus* sp.), an abundant and troublesome weed in the South, where it often throttles other plants. The following miscellaneous seeds were found among their food: Thistle (*Carduus* sp.), wild sunflower (*Helianthus annuus*), *Coreopsis* (*Coreopsis coronaria*), aster (*Aster* sp.), chamomile (*Anthemis* sp.), pigweed (*Amaranthus* sp.), gromwell (*Lithospermum* sp.), borage (*Amsinckia* sp.), mallow (*Malva rotundifolia*), turkey mullein (*Croton setigerus*), croton (*Croton texensis*), alfalfa (*Erodium cicutarium*), spurge (*Euphorbia* sp.).

Grass seeds have not yet been found in quantity in the crop of the species, but panicum seeds have been recognized.

In summing up the economic status of the scaled quail it should be noted that although the bird is a desert species, it comes into more or less direct relation with agriculture, sometimes feeding upon cultivated land and about farm buildings. Moreover, half of its food consists of the seeds of weeds. Lastly, it is highly insectivorous, fully one-fourth of its food consisting of insects.

(To be continued.)

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

OUT-CROSSING AND ITS METHODS.

By J. Sidney Turner, in Illustrated Kennel News.

(Continued from November 25 issue.)

It is clearly established that the external appearance of an animal—his bodily, or "somatic," characters—are a less certain guide than a knowledge of his "gametic" factors, or germ cells, in ascertaining his breeding possibilities. In an absolutely pure race only one kind of "gametic" is given off, but in a mongrel race two kinds are given off in about equal numbers, each carrying one of the factors contained in the cross. No single gamete carries both.

In the cross-breeding of the rabbits, mentioned above, only one set of characters—viz., color of eyes and coat and short or long coat, was taken into account. We know by experience, as in the above case, that two or more characters are sometimes correlated, such as pink eyes and white coat and skin as in true (albinos), but not always so, as many white animals have dark eyes. Other characters are not necessarily associated, such as size, formation, speed, carriage of ear, courage or constitution. If two characters are associated, and not necessarily correlated (as in the case of pink eyes and movement of head, due to the action of light), in a breed to which the out-cross is made, we may desire to get one of the characters without the other. I will give you an instance presently; but first I will describe a simple method to demonstrate the doctrine of chance, which seems to serve the purpose very well and to bear out the Mendelian theory. It has the advantages of economy of time and expense over breeding experiments, and serves to bring home to our minds the operations of Mendel's law.

I take two packs of cards with different colors of backs—say, brown and white—to represent color of coat. These two packs represent mongrels of the first cross, fifty-two individuals, but 104 gametes. We take the brown to be the dominant and the white the recessive gametes. To breed these mongrels inter se I first place the cards in alternate order of brown and white, then shuffle the packs as much as possible. They thus will represent the gametes which would come together if mongrels were bred inter se. If the cards be now dealt out by two and two (and this experiment be made many times) it will be found that the average number of times that brown and white will come together will be one-half, or 50 per cent; the two browns one-quarter, or 25 per cent, and the two whites one-quarter, or 25 per cent—i. e., there will be twenty-six pairs of brown and white, thirteen pairs of brown, and thirteen pairs of white. All the mongrels, fifty-two, were brown in coat, as brown was the dominant, so that 75 per cent are still brown and 25 per cent all white. This is exactly what occurred when brown Belgian rabbits and white angoras were bred together; and their mongrel progeny were, in the second generation, bred inter se. This is the Mendelian expectancy in regard to the reappearance of the recessive character. These white will only produce whites, if bred inter se or if recrossed with the original white factor.

There would be little object—from a breeders' point of view—in doing this, and any out-cross should be made with some fixed object, such as the improvement of the constitution, courage, speed, size, etc., in the breed from which the outcross is made. To take a case in point. Suppose we want to improve the constitution of our Bloodhounds. We determine to do so with Foxhounds. We will assume (but this can only be actually determined by the experiment of breed) that the coat of the Foxhound is dominant, and we select in this instance white cards to represent the dominant as regards color. We will take strong constitution to be represented by black-faced, and its deficiency by red-faced cards. Brown cards will represent the Bloodhound. We therefore have white and brown cards to represent the colors of coat in the Foxhound and Bloodhound, respectively; the black faced and red-faced cards, the strong and deficient constitutions, on account of which latter the out-cross is to be made. The crossing of the brown and white cards will produce white (dominant color) mongrels, with white brown gametes (brown, recessive color). An equal division of strong and weak constitutions may be expected to be inherited by the mongrel offspring, so that we take equal numbers of the brown and white cards, black and red faces being in equal proportions in both colored backs. The cards must not be shuffled, as in this case they are not to breed inter se, but to recross the mongrels to the breed (Bloodhound) from which the out-cross was first made. Therefore we take two brown and two white cards (color gametes) with black and red faces equally divided between them—viz., white-red, white-black, brown-red and brown-black. These cards will then each be paired with a brown-red card (the original Bloodhound, whose color of coat we wish to retain, but whose constitution is to be strengthened by the out-cross). The result must be that 50 per cent of the progeny will retain the mongrel color of coat, and 50 per cent will recover the brown color; but only 25 per cent will have a black-faced card (the strong constitution) in the pair. Therefore in the second generation we have 50 per cent pure colored Bloodhounds, but only 25 per cent with the stronger constitution of the Foxhound infused into it, for which reason the out-cross was made. As the improved constitution will not be so directly visible as color, the judgment of the breeder will come in. This, however, will be the blend with which to continue the breeding of stronger constitutioned hounds, especially if mated with others bred on similar lines. If this be not done there will be danger of deterioration with each succeeding generation—i. e., if mating be with Bloodhounds whose constitution has received no fresh "blood" (really "gametes").

All this seems very complicated, but it is not

really so, as the equations will clearly show:

B., brown backed card (Bloodhound); color recessive.
W., black faced card (Foxhound); color dominant.
b., black faced card equals strong constitution.
r., red faced card equals deficient constitution.

1. W.r. x B.r. equals W.B.r.r. (still mongrel).
2. W.b. x B.r. equals W.B.b.r. (still mongrel).
3. B.r. x B.r. equals B.B.r.r. (Bloodhound constitution unchanged).
4. B.b. x B.r. equals B.B.b.r. (Bloodhound constitution improved).

Nos. 1 and 2 retain the mongrel gametes. No. 3 is as regards breeding, pure Bloodhound, but without improved constitution. No. 4 is the same as No. 3, but with improved constitution.

If we desired to obtain two of the characters of Foxhounds, e. g., constitution and dash, or constitution and round feet, we should probably only succeed in getting both characters in the second generation in ratio of 12½ per cent of the progeny. Suppose we take constitution and round feet. Color of coat and constitution shall be represented in the cards as before, and round feet of the Foxhound shall be represented by the court (or picture) cards. We will suppose round feet (as we do constitution) to be distributed in the mongrels in equal ratio to bad feet. Take four white backed and four brown backed cards to represent color; of these let four (one red and one black) be court cards to represent round feet. Thus half of the number of mongrels have round feet and half have good constitutions. There are now eight cards (eight gametes). If eight brown backed and red faced cards (not court cards), Bloodhound gametes, be paired with the eight mongrel gametes the result will be that 50 per cent will remain mongrels or resembling the Foxhound; 50 per cent will resemble the Bloodhound, out of which only half (25 per cent of whole progeny) will have the improved constitution, one-quarter (12½ per cent of whole) will have round feet without any improved constitution, and one-quarter (12½ per cent of whole) will have both round feet and improved constitution.

Let f. represent round feet. W.b.f. will be the original Foxhound factor and B.r. the original Bloodhound factor. The progeny of this first cross bred back again to the Bloodhound will be:

1. W.b.f. x B.r. equals W.B.b.f.r.
2. W.f.r. x B.r. equals W.B.f.r.r.
3. W.b. x B.r. equals W.B.b.r.
4. W.r. x B.r. equals W.B.r.r.
5. B.r. x B.r. equals B.B.r.r. (Bloodhound unchanged).
6. B.b. x B.r. equals B.B.b.r. (Bloodhound with constitution).
7. B.f.r. x B.r. equals B.B.f.r.r. (Bloodhound with round feet).
8. B.b.f. x B.r. equals B.B.b.f.r. (Bloodhound with round feet and constitution).

TWO—Breeder

Any other point of character may, of course, be substituted for constitution—e. g., head and muzzle (as was done by Dr. Inman in his cross of St. Bernards to Mastiffs), or shortness of muzzle, as in out-cross of Toy Spaniels with Japanese. Such characters would be more immediately apparent than constitution, and the effects of an out-cross more readily ascertained. I have proposed to take constitution and feet as being the most legitimate objects for an out-cross. The other instances just mentioned are for arbitrary and fanciful reasons, and are undertaken to gratify a passing craze for some point, but they are very doubtful improvements to the breeds in which they were made.

DOINGS IN DOGDOM.

Pasadena Dog Show.

Arrangements for Pasadena's dog show are progressing most satisfactorily and prospects are good for a neat little exhibition of the bluest-blooded canines in Southern California, December 13 and 14.

The best local judges of the various breeds available have been engaged, and a fairer lot of men would be hard to pick in any part of the country. That capable breeder and handler of Pointers, William J. Morris of Los Angeles, will pass out decisions in the classes with which he is most familiar, not an unmixed benefit, as his officiating will preclude his entering as a matter of course. C. A. Sumner will judge Fox Terriers; T. H. Broadhead, Spaniels and Toys, and James Ewins all other breeds not taken by the gentlemen named. Morris will give the awards in all the large classes.

R. C. Halsted of Pasadena is the secretary and will furnish all other desired information. Entries close December 2nd.

A Promising Pointer.

In mentioning a California dog at present on the Eastern circuit the American Field says:

Nearly all of the handlers remember old Champion Senator P. perfectly. Seeing his son, Senator's Don, run elicited many comparisons between sire and son. The consensus of opinion was that the son has more class than his sire, and that some day the rangy white and orange youngster will be the greatest dog Mr. Fynn has ever owned.

Senator's Don has not much of the old Senator's wisdom on game as yet, but he is a free, fast, easy mover, with a much more cheerful disposition than had old Champion Senator P. Handler Wilson has the young dog coming right and his future development looks both certain and easy.

The Tail of Eastover Lancelot.

Another hearing in the now famous Boston terrier controversy came up in New York last week. The protest against the Boston terrier, Eastover Lancelot, was heard by the Bench Show Committee of the Westminster Kennel Club. The meeting was held at

the office of H. K. Knapp and was attended by William Rauch, Harry T. Peters, Winthrop Rutherford, and Richard H. Williams, when additional evidence was presented in what is the most celebrated case of recent years among dog owners. Dr. F. H. Osgood, representing the Boston Terrier Club; John Sullivan of Charlestown, Mass., and Dr. Frank Miller, veterinary to the Westminster Kennel Club, were the only witnesses examined. After the meeting the committee announced that further testimony in the case would be necessary before a decision would be rendered.

The case, which hinges on whether the crinkly little crew tail of the protested dog was natural or faked, has been twice before the Supreme Court of dogdom, the American Kennel Club Bench Show Committee. It had its beginning at the show for Boston terriers, at Boston in 1904. Eastover Lancelot is the property of the Spotswood Kennels of Broad Axe, Montgomery County, Penn., which are owned by Edward H. Hance, Philadelphia. When the dog entered the ring at the Boston show of 1904, he had 9 points to his credit, and needed but one more to become a champion of record. Eastover Lancelot made a big winning at the show, but was protested, and Dr. F. H. Osgood, the show veterinarian, disqualified the dog on the charge that it had a cut tail, the action being subsequently sustained by the Executive Committee of the Boston Terrier Club. As the dog had already won twenty or more first prizes at the leading bench shows, the disqualification made a sensation among the bench show followers. Mr. Hance appealed at once to the American Kennel Club. The appeal was "from the decision of the Boston Terrier Club that Eastover Lancelot had been tampered with, based on a written opinion of the veterinarian of the show."

The Spotswood Kennels presented a deal of evidence, but the Boston Terrier Club did not make a fight. The committee to pass on the case comprised H. K. Bloodgood, chairman; W. B. Emery, Marcel A. Viti, G. M. Carnochan and W. G. Rockefeller. The evidence showed that there was no indication that the tail of Eastover Lancelot had been docked or tampered with, which was backed up with X-ray photographs showing the bone of the tail, taken in the presence of three reputable Philadelphia veterinarians. The American Kennel Club sustained the appeal and ordered the Boston Terrier Club to reinstate Eastover Lancelot.

The Boston canine authorities protested the decision, asserting that the case did not come up for a hearing until two days after the time limit had expired and when it was taken under consideration neither Dr. Osgood, whose opinion had disqualified the dog, nor the Boston Terrier Club was notified of the hearing. The matter came up at the annual meeting of the American Kennel Club, and after a general discussion the delegates voted to sustain the verdict of the committee that had exonerated Eastover Lancelot.

At the Westminster Kennel Club show in Madison Square Garden, held on February 13, 14, 15 and 16, the judge of the Boston terriers, H. D. Riley of Stafford, Penn., awarded to Eastover Lancelot premier honors, despite the assertion of a handler at the ringside, that he had owned the dog as a puppy in Providence, Mass., and that Eastover Lancelot had then a straight tail. John C. Sullivan, owner of Revillo Peach, second in the open class, first won by Eastover Lancelot, promptly filed a protest. Mr. Sullivan was notified that his claim was frivolous, and the protested dog received another clean bill of health.

Upon the plea that new evidence had been discovered the American Kennel Club issued an order to the Westminster Kennel Club to reopen the case that John C. Sullivan might have an opportunity to present his evidence, and the work of going over the testimony was begun again. Just what the nature of the new testimony is cannot be learned as the committee refuse to give out any information until the case is finally disposed of.

The object of the controversy has since died from injuries received in a kennel fight, but the case has already cost the disputants about \$2500, which is considerably in excess of the original value of Eastover Lancelot, irrespective of the time put on the case by nearly a dozen wealthy owners at different times.

GOSSIP FOR SPORTSMEN.

Where Quail Are Plentiful.

Quail are unusually plentiful in the vicinity of Lincoln this season, and fine sport is afforded the visiting Nimrods who have friends with a "pull" sufficient to enable them to pass the innumerable "no shooting" signs that confront the hunter on every side in the hunting regions east of Lincoln. It is really difficult to find a locality that is not full placarded with these "no hunting" admonitions, but probably it is all for the best, as the quail and other game were becoming very scarce in the foothills, and had some kind of a halt not been made Lincoln would have completely lost its reputation as the favorite starting point for the hunters who come from far and near to enjoy a day's sport with gun and dog in that vicinity.

Sowing Wild Rice.

Chas. Gilchrist of Port Hope, Ont., who has had considerable experience in handling wild rice seed, in forwarding a consignment to a local sportsman, sent the following circular of instructions for sowing the rice, which may be of interest to gun clubs and is given verbatim:

"I see that you would like to have full directions for planting wild rice. I buy the rice from the Indians, as they gather it in their canoes. They fetch it to me every evening. I spread it on the floors of my drying house (no fire in the house), and my men turn

it four times a day for nearly three weeks, until it is perfectly dry. I then put it through a fanning mill and take out all dirt and chaff, and then I pack it in barrels.

"For planting, put the rice in coarse linen bags. Sink the bags in water over night before sowing, and let the rice soak until morning. The husks are dry, but after being soaked the rice will sink at once to the bottom into the mud. Take the rice out of the bags and scatter it on the water. Sow in water from six inches to six feet deep with soft mud bottom, or low marshy places where it is covered with water the year round. If sowed in lake, sow in the bay. Drowned lands make a good place when there is water the year round. All the drowned lands round Rice Lake are full of rice. Once get it growing and it will crowd out all other weeds.

"The best time to sow the rice is just before the water freezes and the diving ducks have gone south, such as redheads, bluebills, canvas backs and whistlers. They are sure to find it, and will pick every seed from the bottom if a small quantity is planted, and is planted in October or fore part of November.

"I received a letter from a man, fifty miles north of here, last year, to send him a barrel. I sent it to him in October and gave him directions for sowing. I warned him about the ducks finding it. I received a letter from him this fall saying he had a fine bed of rice and a big crop, but he had had hard work to save it. The ducks found it. He went to the place where he had sowed it the next day and he said there were several hundred ducks on the bed diving for all they were worth. He and his son had to be there all the time. He killed a good many, and finally drove them away.

"The great trouble with parties getting rice is that they have some persons sow it, hired help, who don't care how they sow it, on gravel bed or in ten to fifteen feet of water. I sowed two barrels in a pond hole three miles from here fifteen years ago. The pond is about 400 yards long and 150 yards wide. I sowed it the 20th of November, and the pond hole froze up that night. It is about four feet deep. The next spring the rice all came up. It seeds itself every fall, and comes up in spring. Last report it was a big crop of rice.

"I have given about all I know about planting rice. If parties who get rice will follow these directions they will have no trouble in rearing good crops."

Hunting Notes.

The stormy weather this week has no doubt scattered the ducks over a wide area. But at that, good shooting is anticipated on many preserves tomorrow.

During the week and on last Sunday, generally, duck hunting was reported to be good and many limit bags were made.

The rains have made quail hunting conditions far better than was the situation a week or so ago. Snipe patches, on the contrary, have been turned into quagmires and most of the birds have levanted, to the south, probably.

As an illustration of how plentiful birds are in some interior sections the following from Colusa Herald of November 24th states:

On Tuesday last sixty-five sacks of geese and ducks, mostly the former, were shipped by express from Colusa to San Francisco. On Wednesday the shipment was sixty-one sacks. Yesterday fifty-one sacks were sent away, making the total shipment 177 sacks. The sacks averaged seventy pounds in weight, so San Francisco is richer by 12,390 pound, or over six tons of game as a result of the recent north wind.

Hundreds of birds also were killed by local sportsmen, who do not shoot for market, and it is an exceptional family that hasn't had all the game it could use in the past few days.

Bay shore shooting will not be in full swing until high water prevails in the tule and marsh island districts, where now the water is shallow and plenty of feed abounds.

Mr. Payne Shafter, Admiral Goodrich and J. K. Orr one day last week bagged nearly two dozen English Snipe in, as Shafter puts it, "my own marsh, a stone's throw from my door. Birds were plentiful but wild. The light was bad, as the birds flew between hills which obscured their flight until they rose above the shadowing background."

LeRoy Nickell and Mr. McMullin, Downey Harvey, George Boyd and F. Van Sicklen all made good bags of quail recently on the Country Club grounds.

Among the Anglers.

The San Francisco Fly-Casting Club members and invited guests will meet around the banquet board Tuesday evening next at the California Hotel.

The medals won in the contests this season at Stow Lake will be presented to the winners and the usual enjoyable time, ensuing when the jovial anglers meet, will transpire.

The many seekers of striped bass on the San Antonio slough waters last Sunday were, with the exception of two rods, unlucky in luring the fish from the stream.

A six foot tide made conditions unfavorable for good fishing. The current was like a millrace and the run out occurred in the afternoon—everything, even the weather, worked against the rodsters. The two fish taken weighed over twelve and fourteen pounds respectively.

The recent rains should bring the steelhead into the tidewaters of the Paper Mill, and some good sport with half pounders is probable for anglers who will take a trip to Point Reyes tomorrow.

Stockton anglers have been catching "dog" salmon recently trolling with Wilson spoons in the mouth of the Tuolumne river. Eighteen fish were caught by Mr. and Mrs. Clinton Garrison, Mr. and Mrs. Walter Garrison, Henry Garrison and Fred Willett. The largest salmon scaled thirty pounds, another twenty-

seven pounds and a third twenty pounds. These fish, it is claimed, all put up a strong fight.

On account of the alleged pollution of the Truckee River, near Reno, Nev., by the Floriston paper mills the local fish and game warden has recommended that no more fish be planted in the stream, but that brook trout be imported for planting in the small creeks that run into the river. Although hundreds of thousands of fry are placed in the Truckee every year the supply of fish is running lower and their weight is constantly decreasing. Fish culturists say this is due to the destruction of their food by the sewage from the paper mills.

Non-Sale of Game.

At the next session of the Legislature a bill will probably be introduced which if passed will prohibit the sale of feathered game entirely. This subject has been agitated from center to circumference in county game association circles and now has many supporters. The attitude of Southern California sportsmen is voiced in the Los Angeles Times thusly:

Representatives of the Los Angeles County Game and Fish Protective Association have been instructed to stand firmly for "no sale" at the meeting of the State association in Marysville.

The present fifty-bird bag limit is practically prohibitive of marketing ducks—if enforced—as no hunter can legally make enough at it to pay him day in and day out.

That "if," however, is even bigger than the little word usually is. Locally there has been no need to enforce the duck limit; the clubmen are the only ones who can violate it, and only in very few instances are they guilty of it. One occasionally picks up more ducks than he expected and thus stretches the limit three or four, or five birds, but while the practice is somewhat reprehensible, it is nothing as compared to the atrocious slaughter that has been practiced upon the birds in the San Joaquin Valley by market hunters, acting in a sort of quasi-partnership with crooked commission men whose boast is that they openly violate the law and "get away with it."

Local sportsmen last year found market hunters at Tulare killing all the way up to 300 ducks daily and shipping them to San Francisco. There were many engaged in the business, and game wardens seemed either unwilling or unable to stop the slaughter.

If the bag limit clause is hard to enforce, certainly a flat "no sale" clause on ducks would be impossible to misunderstand. Its constitutionality has been proved in over a dozen States; it does not constitute class legislation, because no one is denied the right to kill a certain number of birds for his own use. Those who contend that this privilege is "cornered" by the rich forget that the use of automobiles is also an advantage enjoyed almost exclusively by that fortunate class, yet no one tries to bar the motor car from the streets just because every one cannot have one. There is as much sense in one contention as in the other.

The market hunters, like the politician, immediately drag the poor man into the argument and say "no sale" is a blow at his rights, but they forget the poor man isn't buying even spoonbills at a dollar and a quarter the pair. He can rent a gun, buy shells and shoot them cheaper. There are plenty of places where a hunter can get half a dozen birds without belonging to any club.

"No sale" is a step in advance. The increase in the quail since they were protected from the market hunters is admitted; the "no sale" clause has held good here in California. Ducks are the next bird in line. Protected from the game butchers, conserved by a hundred clubs which shoot at most only twice a week; protected in their great breeding haunts in Alaska, there is absolutely no reason to fear for the future of duck shooting. So long as market hunting is permitted, there is an incentive to the extermination of waterfowl, and their passing becomes only a matter of such time as the history of shooting in the Mississippi Valley takes to repeat itself here on the Pacific Coast—the last great path of migration of the ducks.

Eight Illegal Fishermen Convicted.

Eight Italian fishermen, charged with illegally pursuing their vocation in the sloughs near Rio Vista, were tried and convicted in the Superior Court at Suisun last Friday. The prosecution was conducted by District Attorney Gregory, Attorney Geo. A. Lamont of Suisun and Attorney Latimer of Martinez. The attorneys for the defense made a hard fight for their clients, but without success, the evidence brought out against the accused being quite conclusive in the minds of the jurymen.

The convicted fishermen, who were at liberty on bail, were notified to appear in court on December 1st to receive their sentences. The minimum penalty for the offense is \$200 fine. Hence it is reasonably sure that the Solano county treasury will be enriched by at least \$1600 as a result of the conviction of the fishermen.

CARLOAD OF "3 IN ONE."

On Oct. 31st the G. W. Cole Company, sole manufacturers of the famous "3 in One" oil, shipped an entire carload in one consignment.

This was the biggest single shipment of an order for "3 in One," or any gun or household oil, that was ever made. The shipment consisted of 66,240 bottles.

As everyone knows, who knows anything about guns and oils, lubricants, etc., the sales of "3 in One" are going forward by leaps and bounds, the increased sales of this lubricant, cleaner and rust preventer being unprecedented. "3 in One" has been sold all over the world for many years.

The demands for "3 in One" at times taxes their facilities. But owing to their modern, right up-to-date, big factory at Rahway, New Jersey, and the policy of keeping adequate stocks ahead, orders for large or small size usually can be filled immediately, whatever the quantity.

UNIFORMITY IN BREEDING.

The first important law in breeding is that like produces like. But like all other rules and regulations there are exceptions. In opposition to this law is the fact that like does not always produce like. This is by no means detrimental in the breeding of live stock. The very fact that the progeny is different from either of the original stock makes it possible to improve the stock, because the young stock is just as likely to be better than its parents, and in this case improvement is quickly made. The average breeder of improved live stock is not as successful as he should be because he is slow to recognize this fact.

Another difficulty is the inability of some breeders to recognize type. In order to breed up a strain of live stock with intelligent perseverance that leads to certain improvement it is absolutely necessary to select a type and fix it firmly in mind. There are many families of the same breed and individual members of the different families may possess equal merit, but because of difference in type the breeding back and forth results in mediocrity.

Many breeders fail to secure extra good stock just because they go from one type to another. Superior animals appeal to them and they buy from other breeders stock that is a detriment when mixed with their own, not because the individual is not as good as they thought, but because the type is different and they failed to recognize or appreciate the fact.

In order to breed a uniformly high grade family it is not only necessary to understand the exact type required, but it is necessary to recognize by the study of pedigree of animals the line of improvement through which they have been developed. It is necessary to weigh carefully the points of superiority of the different dams and sires. Some of these may have been exceptionally valuable, while others lacked in essential features. Farther than this, he must be able to recognize the influence of animals in the line which were known to exert peculiar prepotency.

Inferior animals are found in the best families after every possible precaution has been observed. It requires nerve to slaughter animals bred from expensive ancestors which is the result of years of painstaking studied effort, but there is only one way to reach the top and that is to save only the best.

Another point the breeder must possess and that is the faculty of saying no when he is offered a big price for his best breeding stock. It must not be sold at any price, if the very top notch is to be attained. Want of uniformity is one of the strongest indications of lack of skill in breeding, or want of judgment along some of these lines.

A NEW BUTTER RECORD.

The Wisconsin Experiment Station recently published the butter record just made by the Guernsey cow Yeksa Sunbeam. It seems that during the year from October 1, 1904, to October 1, 1905, this cow produced 14,920 pounds of milk, containing an average per

cent of butter fat of 5.75, and produced during the year over 1000 pounds of butter.

Yeksa Sunbeam is a registered Guernsey, weighing 1200 pounds, rather a heavy weight for the breed. She is reported to present all the fine qualities of a world's record cow, being of pronounced dairy type and possessing an excellent udder.

It would be interesting to know the amount and value of the feed consumed by this cow during the test, but as the economical production of butter fat was not the object sought, we are advised that everything in the line of feed capable of increasing the flow of milk was given.

This record of 1000 pounds of butter, made by a single cow in one year, would be about equal to the product of seven average dairy cows.

Feed has considerable effect on the color of milk and the resulting cream or butter. Green grass, apples and carrots are well known to give yellow color to milk and butter. Of the grains, corn and oats probably tend to produce a milk most satisfactory for general household use. When fed with good alfalfa hay, the cream is well-colored and has good consistency. It comes off the top in a thick layer and leaves skim milk noticeably different in color from the cream. The feed also effects the hardness of the butter, that is, its ability to stand up in hot weather and also its grain. Corn and oats make a good grained butter, wheat, bran and linseed meal, poor grained, while if brewers grain is fed in large quantities a butter is produced that looks like lard. Gluten meal rich in fat, makes soft butter, while cotton-seed meal has the most pronounced effect of all the feeds in making the butter hard. Indeed in the South, where cotton-seed is fed largely, the butter-fat is so hard that the churning temperature has to be raised at least five degrees.

In a feeding experiment at Fort Collins molasses from the sugar mill was utilized as a complement to corn and shorts. The molasses was mixed with water and the grain added sufficient to make a thin slop. Molasses was also put in the drinking water, which was relished greatly by the pigs, for after a time they would not drink water without it. The pigs averaged eighty-three pounds each at the time the experiment began and 212 pounds each at the close. They were fed 107 days. It required 3.3 pounds of grain and 1.8 pounds of molasses for each pound of gain. At local prices for the grain and molasses the cost of each pound of gain was 3.61 cents. Considering that no pasture was used, these results show a high feeding value for molasses. The pork from these hogs was very fine.

This country of ours has approximately 60,000,000 head of cattle, 62,000,000 hogs and as many sheep, and a population of 85,000,000 people. No wonder the United States is an important base of supplies for foreign countries, so far as flesh foods are concerned. In practically all nations of Europe the meat supply is short, and the population very crowded. Russia, for instance, has only 24,000,000 cattle and 35,000,000 sheep for a population of over 90,000,000. And no other nation on that continent has as large a supply of live stock as Russia, though one or two countries have as many per head of population.

WESTCHESTER RACING ASSOCIATION

(UNDER THE AUSPICES OF THE JOCKEY CLUB)

RACE COURSE, BELMONT PARK OFFICE, 571 FIFTH AVE., NEW YORK
QUEENS, LONG ISLAND, N. Y. "THE WINDSOR ARCADE"THE TENTH
National Stallion Race

WITH \$5000 ADDED

To Be Run For by Then Two-Year-Olds During the
SPRING MEETING OF 1907

THE TENTH MATRON

WITH \$10,000 ADDED

To Be Run For by Then Two-Year-Olds During the
AUTUMN MEETING OF 1908

To Close and Name for Both Events at Midnight of Friday, Dec. 15, 1905

CONDITIONS.

THE NATIONAL STALLION, 1907

THE TENTH NATIONAL STALLION for then two-year-olds, foals of 1905, the progeny of stallions nominated.

Nominations of stallions to close and name by midnight of Friday, September 15, 1905, by subscription of \$50 each, or only \$25 each for stallions which have not sired a winner prior to December 15, 1905. Of the subscriptions for stallions the nominators of the sires of the first, second and third horses shall receive 25 per cent, 15 per cent and 10 per cent respectively. The remaining 50 per cent to the winner.

STALLION ENTRIES FOR 1907.

Conditions for the Entry of Foals of 1905, to Close and Name by Midnight of Friday, December 15, 1905.

Foals of 1905, the progeny of Stallions duly nominated to be entered and named by midnight of Friday, December 15, 1905. Colts and geldings at \$10 each, fillies at \$5 each, the only forfeit if declared by December 15, 1906. If left in after December 15, 1906, and declared by April 20, 1907, colts and geldings to pay \$30 each, fillies \$15 each. If left in after April 20, 1907, colts and geldings to pay \$60 each, fillies \$30 each. Starters—colts, geldings and fillies to pay \$100 additional. The Westchester Racing Association to add \$5000, and the remaining 50 per cent of the stallion entrance, of which \$1200 to the second and \$600 to the third. The nominator of the winner to receive \$1000 out of the subscriptions and starting money. Of the subscriptions for stallions, the nominators of the sires of the first, second and third horses shall receive 25 per cent, 15 per cent and 10 per cent, respectively. Colts to carry 122 lbs.; geldings and fillies 119 lbs. The produce of stallions which have not produced a winner prior to December 15, 1905, allowed 5 lbs., if claimed at time of entry. By filing with the Westchester Racing Association prior to December 15, 1906, an accepted transfer of the foal's entry, the original subscriber shall be released from liability as to the engagement of the horse, except for the original forfeit of \$10 or \$5. Five Furlongs.

THE MATRON, 1908.

THE TENTH MATRON, with \$10,000 added, for mares covered in 1905, foals of 1906, to be run for by then two-year olds at the Autumn Meeting in 1908. The event to be run in two races, one for colts and geldings, the other for fillies.

GENERAL CONDITIONS.

The TENTH MATRON for the produce of mares covered in 1905, to run when two years old at Autumn Meeting in 1908, with \$10,000 added.

Subscriptions for mares to close at \$20 each, or only \$10 each if the money accompany the entry. Foals the progeny of mares so nominated to be eligible, at \$10 each, the only forfeit if declared on or before November 1, 1907.

If left in after November 1, 1907, to pay \$25 each. If left in after August 15, 1908, to pay \$75 each. Starters to pay \$150 each additional.

WEIGHTS, PENALTIES AND ALLOWANCES.

Colts to carry 122 lbs.; fillies and geldings 119 lbs. Winners of \$5000 or twice of \$2500, to carry 3 lbs. extra; of \$10,000, or twice of \$5000, 5 lbs. extra; of \$15,000, or twice of \$10,000, 7 lbs. extra; of \$30,000, or twice of \$15,000, 10 lbs. extra.

Non-winners of \$2000 allowed 3 lbs.; of \$1000, 5 lbs.; maidens 10 lbs. Produce of horses or out of mares that had never produced a winner previous to December 15, 1905, allowed 3 lbs.; of both, 5 lbs.; which allowance must be claimed at time of entrance. Allowances cumulative.

CONDITIONS OF THE RACE FOR COLTS AND GELDINGS.

Colts and geldings, the produce of mares nominated for the Tenth Matron, to run by themselves, the money for which shall include all subscriptions of mares producing colts, all declaration fees paid for colts and geldings at \$10 and \$25 each, and of those left in after August 15, 1908, at \$75 each, with \$5000 of the added money, of which \$1000 to the second and \$500 to the third. The nominator of the dam of the winner to receive 50 per cent of the starting money for the race; of the second, 30 per cent; of the third, 20 per cent. Six Furlongs.

CONDITIONS OF THE RACE FOR FILLIES.

Fillies, the produce of mares nominated for the Tenth Matron, to run by themselves, the money for which shall include all subscriptions for mares producing fillies, all declaration fees paid for fillies at \$10 and \$25 each, and of those left in after August 15, 1908, at \$75 each, with \$5000 of the added money, of which \$1000 to the second and \$500 to the third. The nominator of the dam of the winner to receive 50 per cent of the starting money for the race; of the second, 30 per cent; of the third, 20 per cent. Six Furlongs. By filing with the Westchester Racing Association prior to November 1, 1907, an accepted transfer of the foal's entry, the original subscriber shall be released from liability as to the engagement, except for the original forfeit of \$10.

Both the National Stallion and the Matron, as above, are to be run under the Rules of The Jockey Club and Westchester Racing Association applicable to the conditions of each and both of them, viz.: Rule 54, Par. III, Rule 63, Par. III Rule 72 and Rule 5.

ABOUT COLORING BUTTER.

As we all know, first class butter, perfect as to flavor, grain, etc., is accompanied by a peculiar shade of yellow so much admired by the epicure and consumer that the dairyman whose product lacks this prime requisite is tempted to depend on artificially toning up his color to the standard. I do not think an intelligent discriminating public require June colored butter in December, writes a farmer's wife in the Country Gentleman. During the summer months, June especially, the natural color of butter is highest, presupposing that the cows have daily access to grasses. The color naturally grows lighter until in the winter the lightest shade is reached. If certain principles are adhered to, the color will be all that can be desired, or that ought to be required.

The breed of cows exerts an influence on the butter color. Jerseys and shorthorns furnish a good degree of color, and when the proper food is furnished, and proper care given to the milk and cream, the color is generally all that can be desired. Experiments have shown that certain foods have a marked influence on the butter product. For example, cotton seed meal renders the butter much lighter in color than is normal, while oats give a golden tint and firmness of grain; linseed meal, cottonseed meal, corn meal and bran, in connection with ensilage or green food, give satisfactory results. Of root crops, the carrot gives the highest color, and potatoes the least; the latter has the effect also of softening the grain of the butter. No amount of "doctoring" can restore a mass of white, frothy stuff, called butter by courtesy, to its normal state or what it should have been by proper management. With some butter makers this condition of things is chronic. Their butter is white or "off" in color, the grain is broken and only a greasy compound remains. This class of butter makers must "tone up" artificially if a market is to be secured.

While coloring butter is not a fraud in the sense that coloring oleo is, it is deception, and the sooner dairymen recognize it as such, the better. A dairyman lately made the assertion that his product was 10,000 pounds of dairy butter a year, and that not a particle of coloring matter had been used in its manufacture, and also that he could have sold ten times that amount at Elgin prices could his dairy have produced it. He heartily wishes all colored dairy or creamery or worked over butter had to pay the same tax the olcomargarine does. While this is extreme, perhaps, butter makers will do well to think seriously on this subject. In some localities, I am glad to note, the dairymen, or dairywomen, either, who habitually uses butter color to impart the proper shade which right management should have given, has an impaired reputation as a butter maker.

Can artificially colored butter rightfully be called "gilt edged." Ought not that term to be applied only to that grade of butter which has been brought to the highest standard of perfection through proper attention to all details pertaining to its manufacture?

Also, what proportion of customers would choose colored butter, were the

pure and the colored articles placed side by side and properly labeled?

WRAPPING BUTTER SQUARES.

The question is often asked if it is better to wrap butter with wet parchment paper than with dry paper. The answer is variously given, says an exchange. Some buttermakers in creameries wrap their butter in wet papers for the following reasons: The butter will not stick to the paper so much and the squares can be wrapped more quickly with wet papers than with dry, as they bend more readily. When wet paper is used it should have been soaked in boiled brine so as to be free from spores. This helps to keep the butter from being affected by spores on the paper. Then men that wrap dry claim that while it takes a little more time to do the work of wrapping, the package looks smoother, as the wet wrinkles on drying, also the brine in the butter seems to work through the parchment paper more when it has been wet, as is seen by the salt incrustations on the sides of the squares. If the butter is to be used at once there is no reason for using a wet paper, but if the butter must be kept a long time it is doubtless better to use parchment paper that has been well soaked in brine or some other antiseptic solution.

ROUGHAGE FOR SWINE.

It is generally considered that anything for which one has use in no other way will answer for the swine. The feeding of roughage is worked on this plan, the feeder forgetting that swine cannot make fat of anything but good material. It is all right to turn into the hog pen the clean leavings of tough corn stalks from the cow stable, but it should not be expected that the swine will get along wholly on this. Give them their share of sweet, clean roughage and if there is a fair supply of straw on the place let them have that. Don't think it is too expensive for it will add to the capacity of the swine to take on weight and will add to the value of the manure. Of course if it can be sold for a high price then sell it and buy something better for the hogs. A little silage will not hurt them nor will the sweepings from the hay mow especially if the latter are mixed with bran and moistened with warm skim milk. There are always lots of odds and ends around a farm which can be worked up into dainty dishes for the swine if one will take the trouble to make them appetizing.—Farmer and Breeder.

BUYERS DON'T PAY FOR COLOR.

An auction sale of fifty-four short-horn cows was recently made in Michigan. Of the number sold two were white, two red and white, twenty-six red or red and a little white and twenty-four were roan. The sale was topped by a white cow at \$1,000. The second was the other white at \$825. The third was a roan at \$620; the fourth, a roan at \$525; the fifth, a red, with a little white at \$500; the sixth, a roan at \$495; the seventh, a roan at \$480; the eighth, a roan at \$460; the ninth, a roan at \$450; the tenth, a roan at \$410; the eleventh, a roan at \$405; the twelfth, a roan at \$400. The remainder of all colors sold at \$100 to \$375. It is an item worth considering by all stockmen that the two white cows topped the sale by a large figure and that only one of the twenty-six cows, red or red and a little white, was permitted to come within the charmed circle of the twelve best cows in the sale.

FLOOR OF THE COW STABLE.

Writing in National Stockman and Farmer on the subject of cow stables, L. W. Lightly says: I prefer to have an earthen floor in my cow stable, though, of course, the manure gutter is cement and liquid proof. I believe the cow is more comfortable on the yielding, non-conducting ground than on hard plank or rocky cement. It is true that the earth will wear away and has to be filled up and leveled off occasionally, the doing of which has just reminded me of this: The floor of the stall should be level or slope back toward the gutter very little; there should be no rough ridges or hard, uneven places, as I could not nor can the cow rest in comfort on such a bed. A small quantity of gravel and earth well tamped can be made perfectly smooth and level, and a light covering of sawdust well moistened will help to keep it in place.

Hogs born, suckled and ranged on alfalfa until ready to harden for the block—are considered as good as the best. Tests show that the feeding value of alfalfa is forty-five per cent more than clover and sixty per cent over timothy; in fact, it is way ahead of all other forage crops. One acre well set will pasture thirty pigs for six months. Even without alfalfa, using other grains for grazing, the raising of hogs for market can be made highly profitable in this country but with alfalfa it is a bonanza.

About the largest hog of which we have record is Jumbo, owned by Joseph T. Moore of Oxford, North Carolina. It is three years of age, weighs 1420 pounds, measures nine feet two inches from tip to tip and seven and one-half feet around the girth.

176-PAGE ILLUSTRATED CATALOG MAILED, 12c. Largest stock in the world—15 acres required for storage.

FOR SALE OR LEASE.

Two Prince Airlie Stallions.

PORTOLA 37413, a handsome golden bay, 7 years old, 16 hands, weighs 1190 lbs.

MENLO BOY 37401, a magnificent brown with white points, 6 years old, 16.1 hands, weighs 1200 lbs.

These two horses are full brothers, being sired by Prince Airlie 28045; by Guy Wilkes 2:15 1/4, sire of Fred Kibb 2:07 3/4, Hilda 2:08 1/4, Seymour Wilkes 2:08 1/4; first dam Signal by Del Sur 2:24; second dam Lady Signal 2:35 1/4 by Signal 3:32 1/2. Both of these horses are very fast for the amount of work, being only a few months last year, showing quarters around :34 and :35.

For further information apply to P. H. McEVoy, Menlo Park, Cal.

JACK FOR SALE.

A BLACK JACK WITH LIGHT POINTS; large, heavy boned, prompt and a good handler. Is a good foal getter and his foals are excellent individuals. Price very reasonable for prompt sale. Address for further particulars, S. B. WRIGHT, Santa Rosa.

Registered Shire Stallion FOR SALE.

JET BLACK STALLION; WEIGHT 1750; 7 years old. Is a blocky built, big boned horse and a sure foal getter, and his foals will be shown. Price reasonable. For further particulars apply to office of BREEDER AND SPORTSMAN.

POSITION WANTED.

MIDDLE-AGED MAN WANTS JOB, BREAKING and handling Colts. Has had years of experience on large Kentucky stock farms; first-class references. CHAS. LEWIS, 22 Sacramento St., San Francisco.

McKINNEY STALLION FOR SALE.

ONE OF THE GRANDEST LOOKING AND best bred McKinney stallions ever foaled is offered for sale. He is five years old, sired by the great McKinney 2:11 1/4, dam by Dexter Prince, that sired the dam of Nora McKinney 2:12 1/4 (trial to wagon 2:00); second dam by a son of Electioneer; third dam by McDonald Chief, sire of the dams of Tom Smith 2:13 1/4 and Stella 2:15 1/4. This stallion has never raced and has not been trained, but has trotted miles better than 2:30 and quarters in 35 seconds. Stands 15.3. weighs 1050 pounds, is a beautiful bay with black points and without a pimple. Is an exceptionally handsome horse, fine disposition and has marvelous endurance. No horse living has cleaner, straighter or more perfect legs. A grand prospect to train, and a sure money-maker in the stud. Would make one of the grandest roadsters in America. For further particulars address BREEDER AND SPORTSMAN, 36 Geary St., San Francisco.

McKinney Mares and Stallions FOR SALE.

Four Black Mares by McKinney 2:11 1/4

One Brown or Black Weanling Filly by Lecco 2:00 1/4

The Mares are BESSIE D., that is out of Stemwinder, the dam of Directum 2:05 1/4; ROSE McKINNEY, that is out of a mare by Forrest Clay 1934 and is the dam of Almaden (2) 2:22 1/4, winner of Breeders Futurity and Occident Stake; RAGSY, that is out of Babe by Ferdinand 1835, son of Strathmore; and Black Mare out of Fontanita by Antevolo 2:19 1/4, son of Electioneer; second dam Fontana, dam of Silas Skinner 2:17, etc.

The Weanling is by Lecco 2:00 1/4 and out of Rose McKinney.

Also, one bay Gelding with a record of 2:17 1/4 by McKinney. This is the best and fastest roadster of his size in California.

Also, one three-year-old Stallion—the best bred one ever sired by McKinney; dam Elsie (dam of 5 in list) by Gen. Benton; second dam Elaine (dam of 4 in list) by Messenger Duro; third dam Green Mountain Maid (dam of 8 in list) by Harry Clay 45. A grand young horse; has trotted a half in 1:14 as a two-year-old.

Will sell one or all of the above at fair prices. Address C. A. DUFFEE,

529 Thirty first St., Oakland. Or Race Track, San Jose, where horses may be seen at any time.

GOOD THREE-YEAR-OLD FOR SALE.

FRANK COVEY, BROWN COLT BY MENDOCINO (sire of Monte Carlo 2:07 1/4, etc., etc.); dam Rose Kinney (dam of Almaden, 2-y-o. 2:22 1/4); 2d dam Bee by Forrest Clay 1934; 3d dam Lovella by Belmont Lightning 1023; 4th dam by Imp. Yorkshire. A very handsome colt, stands 16 hands and weighs 1100 lbs.; absolutely sound and well broken. With road work only has trotted quarters in 41 seconds, and with training promises to be a race horse. He was bred by Charles A. Duffee and, as will be seen by his pedigree is a half brother to Almaden, the great two-year-old. He is eligible to registration, and will make some one a great horse whether for the track, road or as a sire. He has a good disposition and is a high-class young horse in every respect. For price and further particulars address DR. A. DE FOE,

618 South Fifth St., San Jose, Cal.

Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O

NEW BREED OF DUCKS.

The newest breeds of ducks not yet known to the public are the Blue Orpington and the Buff Orpington. They were produced by William Cook of England, the originator of the several varieties of Orpington fowls, the Blue variety in 1896 and the Buff the year following. They are thus described in the Orpington Poultry Journal:

The Blue Orpington is a very large duck, quick in maturing, good layers of immense eggs. The color is slate, similar to an Andalusian fowl. They have proved a wonderful good table bird. Of course only the best specimens are absolutely blue all over, some having a small patch of white on the chest, which looks rather pretty when they are swimming, so much so that many people breed them with these white chests. Sometimes a little bit of brown is seen in them. The drakes are a little larger and have the head and neck a darker color than the ducks. These ducks do well in confinement and do not need water to swim in. They are enormous in size, being a good deal larger than Pekins and growing quicker.

The beak of the Blue Orpington is dark in color with a trifle yellow tinge. Legs dark orange. The back is a nice blue and underneath rather a lighter slate for the ground color. The ducks should be blue all over, but pencilled on the back. The carriage of the bird is much the same as an Aylesbury duck, with a long body close to the ground.

The Buff Orpington duck is not quite so bright in color as the Buff Orpington fowl, being more of a khaki color only not so dull. It is an improvement on the Indian Runner, as they are very much larger and more uniform in shape and a self color. They make a fine table bird and their eggs are larger; they are no doubt the best utility duck in the world for laying and table purposes besides having very handsome appearance.

TRAINING SHEPHERD DOGS.

The natives of New Mexico have an original and successful way of training shepherd dogs.

A pup is taken from its mother as soon as possible. The breed of dog is immaterial. The young of a sheep or goat is taken away and the pup is substituted. After the first few days the pup is never fed except just before the flock goes to pasture in the morning and just after the sheep are brought in at night. As soon as he can walk he goes out with the flock and stays with it all day. Whenever he begins to anticipate supper by trying to drive the flock in before sun down he is punished. After he is about a year old, he takes a flock out, guards it from other dogs and coyotes during the day and brings it in at the proper time at night without supervision or help. With a dog encountered in the hills with his flock all kinds of temptations are useless for in spite of all allurements he will remain faithful to duty.—Epitomist.

HOW MILCFLO IS MADE.

Milcflo is the name of a brand of dried skimmed milk now being made in this state by a Swedish process. In a vacuum where the temperature is about 165 degrees, F., the skimmed milk is reduced to a thick paste. This is scraped in the form of thin bands from a revolving metal drum and delivered into a car, the whole process being automatic and continuous. It is next spread upon wire screens and dried to crispness by currents of warm, dry air. It is then pulverized and packed for the market. One pound of milcflo contains all the solid matter originally in about eleven pounds, or five quarts, of skimmed milk, and it is claimed that the protein alone in this quantity equals in nutritive value 1.8 pounds of lean beef. It is intended to be used as substitute for milk, especially in cooking and in places where milk cannot be had, as at sea and in the army. To a small extent it is being adopted by bakers and for household use, but it has not yet become a part of the army and navy rations.—Country Gentleman.

On the farm where the chickens are given a free range, an average of one rooster to every fifteen hens will be sufficient; more than this is an extra expense, without any return of profit.

Isn't He Worth Saving?

ABSOLUTELY CURE
QUINN'S
OINTMENT
REMOVES
SPLINTS
SPAVINS
WIND PUFFS
BUNCHES

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curls, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitation that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials etc.

W. B. Eddy & Co., Whitehall, N.Y.

BREEDER AND SPORTSMAN, 36 Geary St. S. F.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Carise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

STALLION OWNER!

FOR SAMPLES AND PRICES ADDRESS

MAGNUS FLAWS & CO., 358 Dearborn St., CHICAGO, ILL.

IT MAKES NO DIFFERENCE

what particular kind of shooting you are interested in—sportsmen differ as to make of guns, advantages of various loads, etc., but sooner or later most of them come to the same opinion about ammunition—that

Peters Shells and Cartridges

have all the other makes beaten in the race for quality and results. See what they have recently accomplished in the three chief departments of "the game":

RIFLE

At Sea Girt, N. J., Aug. 24-Sept. 9, LIEUT. TEWES won the Wimbledon Cup Match, the Grand Laffin & Rand Aggregate, the Seabury and N. J. Members' Matches; LIEUT. CASEY won the Inspector's Match, and LIEUT. SMITH the Reading Match—all using Peters .30 U. S. Gov't ammunition. In the Spencer and Seabury Matches LIEUT. CASEY made a total of 20 consecutive bull's-eyes. In the Wimbledon Match seven of the first ten places were won with Peters Cartridges.

PISTOL

The Pistol Championship of the United States, competed for Sept. 1-11, was won by J. A. DIETZ of New York, scoring 465 out of a possible 500 with Peters 22 Stevens-Pope Armory Cartridges, Standard American Target, 8-in. Bull's-eye, distance 50 yards. At Sea Girt, N. J., Aug. 24-Sept. 9, THOMAS ANDERTON won the All-Comers, Any Revolver, and Jones Matches, and LIEUT. STEDJE the Disappearing Target Match, all with Peters Cartridges.

SHOTGUN

The Consolation Handicap at the Grand American, June 30, was won by JAS. T. ATKINSON, score 99 out of 100, using Peters Ideal Shells. First Amateur Average at the Cincinnati Tournament, Sept. 19-21, won by R. S. RHODES, using Peters Shells. First General Average at the Indianapolis Tournament, October 9-10, won by L. H. REID with the phenomenal score of 392 out of 400, using Peters Factory Loads.

THESE RECORDS SPEAK FOR THEMSELVES. COMMENT IS UNNECESSARY.
